

WALLACE DEPT. STORE

Boys' and Girls' FLANNEL LINED

Boxer Longs And Bib Overalls \$2.95 - \$3.95

It pays to buy quality, especially when quality costs no more. Choose from either denim or corduroy—both with warm plaid flannel lining.

Sizes 3-4-5-6-7 years.

Wallace's Dept. Store

CUBS TOO TAME
CALGARY (CP)—Because zoos find lions expensive to keep, and lion-tamers want their animals wild, the Calgary zoo is finding difficulty disposing of a surplus. It has three young cubs, bred in captivity.

Meet to Discuss Effect Of Alcohol on Driving

Special to The Daily News
TORONTO.—The effect of alcohol on driving will be probed by representatives of more than 20 countries—from South Korea to Argentina—when the second international conference on alcohol and road traffic gets under way here tomorrow.

Purpose of the conference is to study the effects of alcohol on road traffic and to determine what can be done through scientific investigation, education, legislation and law enforcement to combat misuse of alcohol among drivers.

Taking part in the four-day conferences will be more than 200 scientists, doctors, lawyers, safety experts and law enforcement officials from every part of the world.

The first conference was held in Sweden in 1950. Since then, research on alcohol detection devices such as the breath-alcohol test and the alcometer has been conducted in Canada and elsewhere. Surveys and experiments in various phases of drinking and driving have been made during the past two years the results of which will be presented at the conference.

BLACKWOOD on Bridge

Dale's Craftiness Puts Abel Down One

Here is one of the devices you can use when you are almost strong enough to make a force to game after an opposing opening bid. You can overcall with one more than necessary in your own suit.

This bid says, "Partner, I am not quite powerful enough to make an overcall in the suit bid by my opponent. But I don't need much help from you to make game. About a trick will do. And don't worry too much about my trump suit. It's long and strong."

Understanding this message, Mrs. Keen had enough to raise Mr. Abel's jump overcall in today's deal. Miss Brash thought a long time before passing four hearts, doubled, but as it turned out, her final decision was a profitable one.

Mr. Dale put up a sly defense based on a plan to take tricks with all three of his trumps. He opened the five of clubs. Mr. Abel won on the board with the queen and led a heart. Miss Brash discarded the ten of diamonds and the king lost to the ace.

Now Mr. Dale led his last club which was taken with the ace in the closed hand. Out came another trump and Mr. Dale was in with the queen.

He led back his small diamond, the seven, to make sure Miss Brash would win the trick. She did win, with the ace, and returned a club which Mr. Dale ruffed with the six of hearts. Down one.

Mr. Abel had no excuses. He

East dealer		Neither side vulnerable	
North (Mrs. Keen)		East	
S-6 5	H-9 5 4	D-6 5 4 2	C-K Q 9 4
West (Mr. Dale)		Miss Brash	
S-10 9 8 7 4 2	H-A Q 6	D-K 7	C-5 3
South (Mr. Abel)		None	
S-A Q	H-K J 10 6 7 3 2	D-8	C-A J 10

The bidding:
East 1 D 2 H 3 S 3 S
South 2 H 2 S 3 H
West 3 S 4 H Dbl. All Pass

should have become suspicious when Mr. Dale refused to lead either of the suits bid by his side. He should have known Mr. Dale wanted to ruff a club. To eliminate the chance of that happening, he should have led a diamond at trick two. This would have taken away the only possible means of entry to Miss Brash's hand.

And with that entry gone, Mr. Dale would never have taken a trick with his six of hearts.

The miracle on your wall

Behind the familiar wall switch lies the far-sighted planning and ingenuity of Canada's electrical industry that provides the low-cost power and efficient equipment which is helping to raise our standard of living.

When you want light in a room, you just flick a switch. It's as simple as that. And, if that minor miracle is taken for granted, consider a few of the other tasks electricity performs in the home.

It cooks complete meals while you are out—takes the labour out of cleaning, polishing, washing and ironing—keeps perishable foods in perfect condition, for months if necessary—supplies constant hot water—brings you radio and television entertainment—and helps to keep your home cosily warm in winter and delightfully cool in summer. This is fast becoming the pattern of living in even remote Canadian homes today.

While the role played by electricity in the home naturally looms large with all of us, it should always be remembered that by far the larger part of the power generated is used by industry. In fact, it is primarily because of the availability of this dependable source of power that Canada has been able to develop her aluminum,

pulp and paper, mining and manufacturing industries to their present position—which, indirectly, adds to the prosperity of all Canadians.

When you flip that familiar switch on the wall, have you ever given a thought to the amazingly intricate system of power equipment that lies behind it?

From the start, the story of Canada's electric utilities has been one of phenomenal increases in demand for power being constantly met, with the result that Canada has become one of the most highly electrified nations in the world. And, as always with this enlightened industry, tomorrow's needs are being taken care of by today's planning.

This Company engineers, manufactures and supplies a complete line of electrical equipment including generators, transformers, switchgear, wire and cable for the generation, transmission and distribution of electric power—as well as the motors and control, electronic devices, appliances, lamps and other products that put it to work.

We, of Canadian General Electric, take pride in the fact that electric power has become the pulse of the Canadian way of life because—as Canada's oldest and largest electrical manufacturer—we have helped to make it so.
