'Pavement' Artists

YOUNG MILAN STUDENTS, who might or linearly do their chalk art work on pavements, to decorate trolleys with slogans against Marshal Tito of Yugoslavia. Students throughout have been demonstrating against Tito and his threat of interference in Trieste situation.

Scientist Claims Guided Missiles Could Wipe Out Dread Tornadoes

HOUSTON, Texas (AP)—A geophysicist and meteorologist, physicist and meteorologist, brought to the United States by the air force six months ago, has opened the door to tornado destruction through a new theory that contradicts a 50-year-old idea about tornado behaviour. Col. Rollins H. Mayer, electronic scientist at the air force missile test centre in Florida, where Rossman is working, says the theory makes possible a national tornado-damage "prevention net" capable of saving millions of dollars and thousands of lives.

INQUISITIVE YOUNGSTER GETS LOCKED IN MAILBOX

BINGHAMTON, N.Y. (AP)—Four-year-old Bobby Delancy covered an open mail box near his home Thursday and hid himself in it. A playmate shut the door and snapped the lock. Forty minutes later the screaming Bobby was rescued from the box, after a neighbor heard his cries and called police. A mailman was sent to open the box.

Disabled Canadian Atomic Reactor Soon Back in Action

WILK RIVER, Ont. (AP)—Canada's powerful atomic energy reactor, knocked out by a leak in December, will be in operation in a few weeks with new safeguards to prevent similar accidents. W. B. Lewis, vice-president of Atomic Energy of Canada Ltd., said the reactor broke down nearly two weeks ago when aluminum water used to cool the pile's producing uranium rods, leaked, allowing radioactive material to escape. The entire reactor had to be dismantled and rebuilt.

Dr. Lewis said Atomic Energy of Canada and Ontario Hydro have started a "feasibility study" to determine whether it would be practical to build an electric power reactor. "No firm decision has been made as yet to build such a reactor," Dr. Lewis said. "It's still in the idea stage."

In Ottawa, Trade Minister Howe, who reports to Parliament for Atomic Energy of Canada, said the federal government would bear part of the cost of building a power reactor. The federal share of such a project, however, had not been determined.

The U.S. Atomic Energy Commission announced Oct. 22 that it plans to build an industrial power reactor during the next three or four years. The reactor is expected to produce at least 60,000 kilowatts—enough to run a city of 50,000.

Man Gets Year for Forgery

NEIL Chan was sentenced to a year in Oakalla Prison this morning when he appeared before Magistrate W. D. after being remanded for forgery on a cheque. Chan was found guilty Nov. 5 after testimony was given in court that he had forged signatures on cheques belonging to Gordon Sedore. Chan was scheduled to appear in court for sentence on a charge of retaining a rifle. A forgery charge arose after Chan was sentenced to months in jail for stealing travellers cheques from a woman. The woman took the cheques to Chan who forged them after which one of the cheques was cashed for one or more dollars.

NINE YEARS AFTER they were buried under a haystack in France, the regimental drums of Les Fusiliers Mont-Royal have been recovered by Lieut. Claude Turgeon (centre) of Montreal. He turned them over to his unit, now completing two years with the 27th Canadian Infantry Brigade in Germany. At left is Sgt. Paul Juteau and, right, Staff Sgt. Andre Deslauriers, Montreal.

Nine-Cent Boost By May, 1954 Set In Pulp Firms-Union Pact

Formula Will Go To Membership

VANCOUVER.—Settlement of the dispute between 4,200 pulp and paper workers and eight Pacific coast companies was reported today when details of a formula reached between management and union negotiators were announced.

The agreement, to run two years, when approved by the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (AFL-TLO) membership, gives workers in nine coastal mills a wage increase totalling nine cents an hour by May 1, 1954.

The formula, believed to have averted a strike by the pulp and paper workers, was presented to union local representatives last night after four days of union-management negotiations.

The agreement provides an across-the-board wage increase of five cents an hour retroactive to July 1, 1953; two more cents an hour effective December 1, and a final two cents an hour May 1, 1954. It also gives mechanics in two categories three cents an hour more and an additional "floating" holiday with pay to be taken by the worker at a time suitable to him and the company.

The settlement followed a strike vote taken when members turned down a company offer of a five-cent increase. The union sought a 10-cent increase in a basic \$1.50 hourly wage. The agreement also carries the recommendation of both management and the international officers of the unions involved, the International Brotherhoods of Pulp, Sulphite and Paper Mill Workers and Paper Makers, both AFL.

MAYOR WHALEN ... hat in ring

Whalen To Seek Re-Election

Mayor Harold Whalen announced today he will seek re-election in the December 10 civic election.

The 49-year-old mayor, who has been chief magistrate for the past two years, is the first person to announce his intention to take part in this year's campaign.

Four aldermanic seats also become vacant this year.

Prior to his election as mayor in 1951, Mr. Whalen served for three years as an alderman. At the recent convention of the Union of British Columbia Municipalities in Vancouver, Mayor Whalen headed the poll of delegates elected to the executive.

Aldermen whose terms expire this year are H. G. Glassey, George B. Casey, John Currie and Mike Krueger.

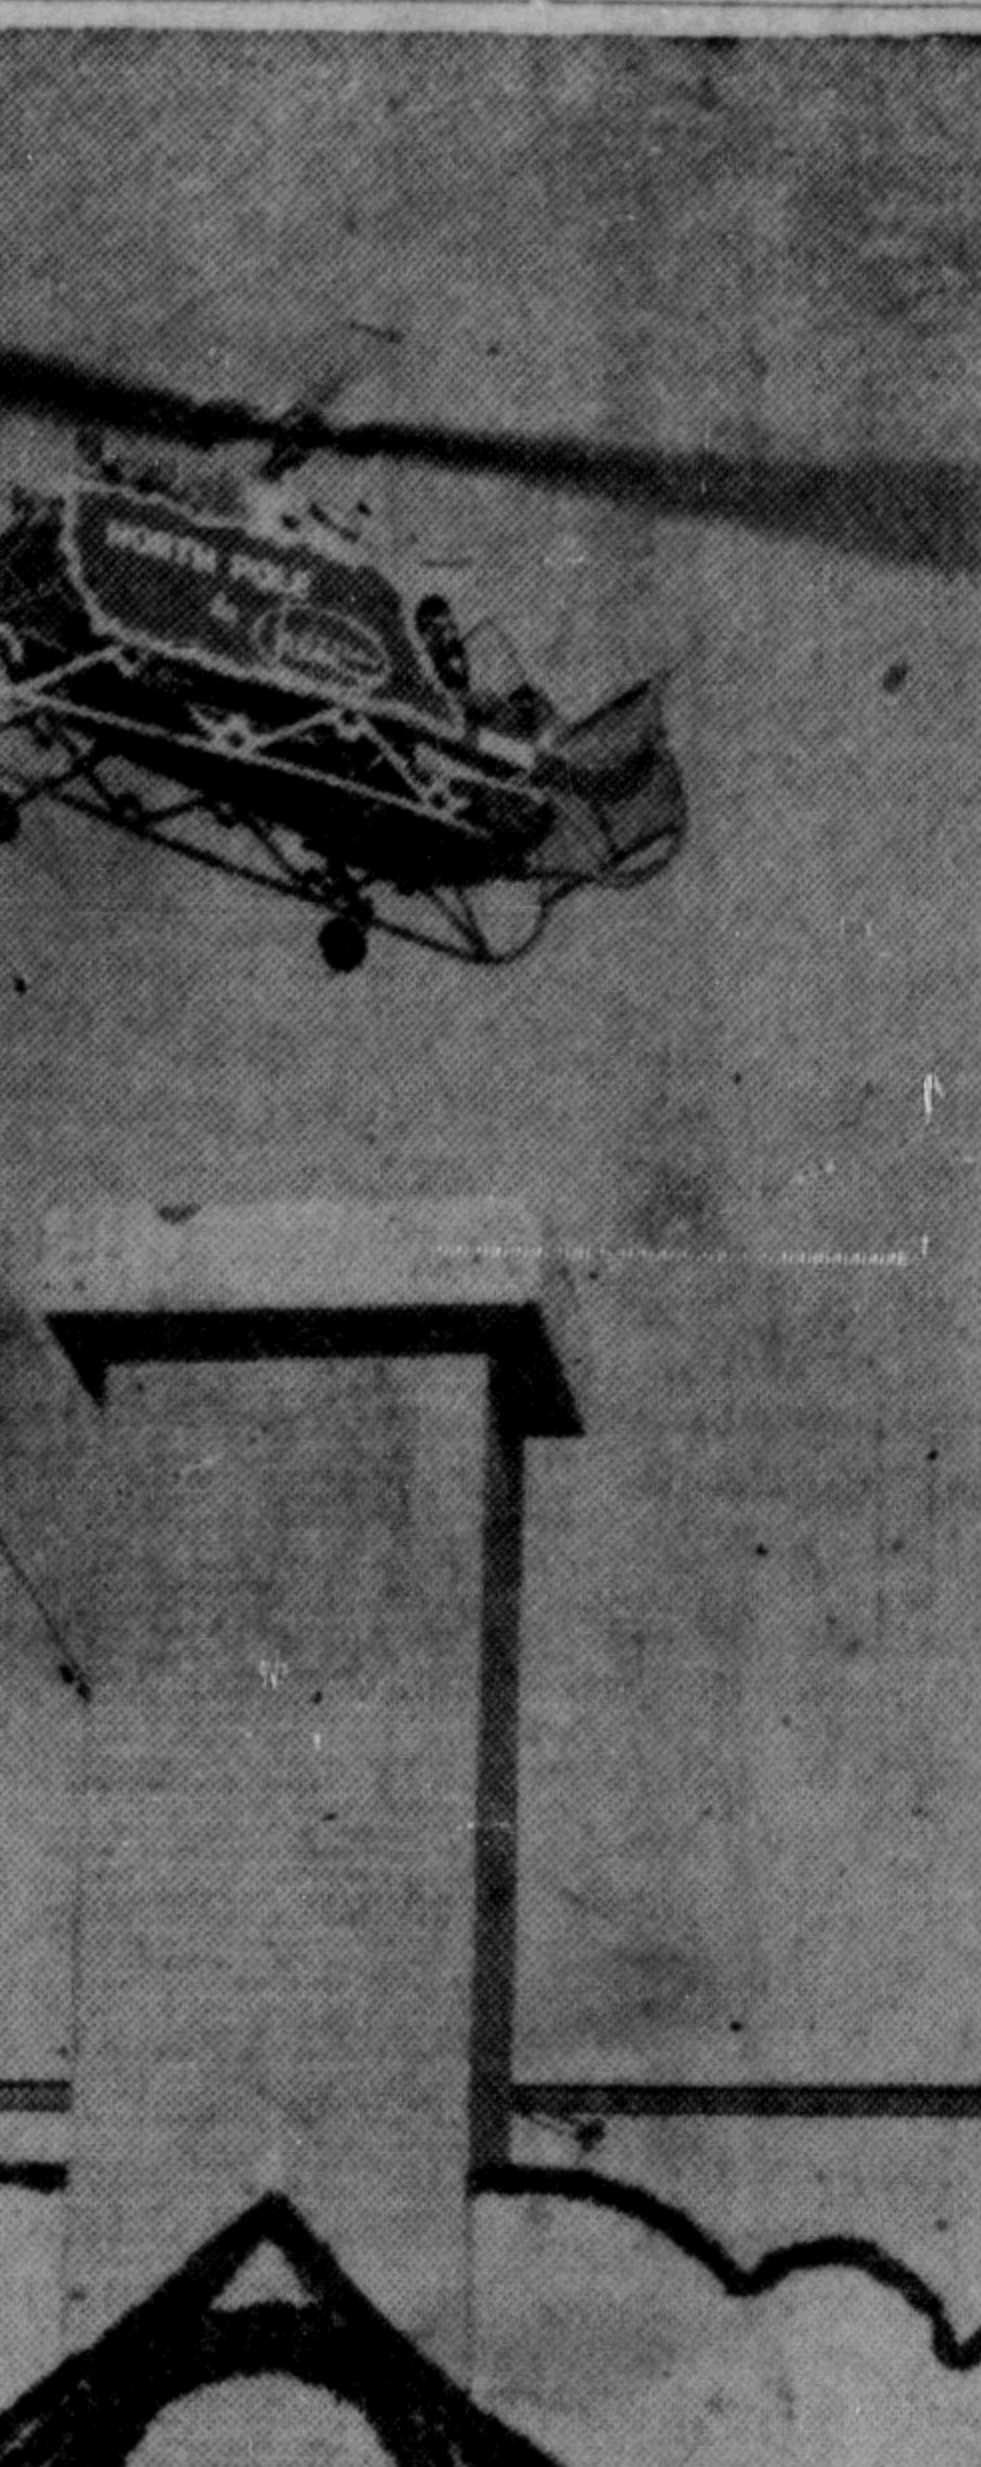

LESS VOTERS

There are 22 less voters on the voters' list this year than there was for the December election last year.

Completion of the 1953 list showed there are 2,991 persons who have registered to vote in the December 10 elections compared to 3,013 voters last year.

Licence holders are the same as 1952, with 87 being recorded. There is an increase this year in the number of property owners, 2,885 registering compared to 2,872 in 1952.

Only 19 householders registered this year, considerably less than the 54 who were on the voters' list in December, 1952.

WITH 10,000 PAIRS of young eyes raised skyward, Santa Claus made his first appearance of the 1953 yule season at Allentown, Pa., as the jolly old fellow descended from a helicopter-powered sled upon a 35-foot specially constructed chimney at the Fair Grounds. The small fry, guests of Max Hess Jr., followed their host to the chimney's end where Hess presented Kris Kringle with the key to the city.

No Slackening Scheduled In Canadian Defence Plans

OTTAWA (CP)—The House of Commons swings into action today in the first session of Canada's 22nd Parliament.

Two freshman members open the debate. S. A. H. Hollingsworth (L-York Centre) and George Villeneuve (L-Roberval) will make their maiden speeches, expected to deal with topics from the speech from the throne.

Mr. Hollingsworth will move the traditional motion for an address in reply to the speech from the throne. It will be seconded by Mr. Villeneuve. Leaders of the four parties in the House will continue the debate Monday with major addresses on the government's legislative program as outlined in the speech.

The speech dwelt on the international situation and said there will be no slackening next year of Canada's defence efforts.

"Much remains to be done before there can be a permanent and durable peace in the world," the speech said. "My ministers therefore consider it would be unwise for the free nations to slacken our efforts to build up and maintain the necessary strength to deter aggression and they intend to continue to work to that end."

Officials said later that 1954 defence expenditures will be roughly the same as this year's \$2,000,000,000—half the federal budget.

The Commons, meeting separately in its own chamber, unanimously chose Rene Beaudoin, 41, Liberal member for the constituency of Vaudeville-Soulanges, as its speaker.

Will Robinson, Liberal member for Simcoe East, was named as his deputy.

Catholic Group Opens Campaign Against Comics

A campaign against "horror" and "girlie" comics in Prince Rupert is being launched by the Home and School Association of the Annunciation school.

At a meeting of the association this week, members denounced the variety of "horror" and "girlie" comics now being sold at some stands in the city.

Members said that if parents would not allow their youngsters to buy such comics, merchants would soon stop carrying them.

GE Plant Target Of Reds

ALBANY, N.Y.—Senator Joseph McCarthy today summoned into closed hearing 10 more workers from the General Electric Company's big Schenectady plant where, the Wisconsin Republican says, there is a "concentration of Communists."

Seventeen witnesses, including one unidentified Toronto man, appeared Thursday before his Senate investigations sub-committee as it opened a probe of "alleged Communist infiltration and alleged espionage" at GE's main plant.

Afterward, the senator told reporters he had heard testimony that:

• There are no secrets from the Communists at GE.

• A New York City official of the Communist party once said the Reds had planted a man in the hush-hush Knolls atomic power laboratory, which GE operates for the Atomic Energy Commission.

• It is well known among Red leaders that the Schenectady plant is a prime target for Communist infiltration, and a party cell was established there.

McCarthy did not identify any of the witnesses, but said all 17 were employed at GE or had worked there.

A former GE employee who came voluntarily from Toronto to testify told of the Communists planted at the Knolls laboratory and referred to the Schenectady works as a main target for Reds, McCarthy said.

The man joined the Communist party in 1949 but dropped out last February, the Senator said.

After the session, McCarthy told reporters: "I don't know there is at fault but I do know there must be something radically wrong when so many Communists are concentrated in a defence plant." He gave no estimate of the number.

There was no comment from company officials.

Efficient RCMP Skipper Finds Lost Cruiser

City businessman Bill Bond is a happy man today, after having a demonstration of the efficiency of the Marine division of the RCMP.

Yesterday a saddened Mr. Bond discovered that his 15-foot inboard cruiser was missing from its berth at the yacht club and immediately made for the court house to report to RCMP sub-division that his craft was stolen or adrift.

Referred to Sgt. Norman of the city detachment, Mr. Bond's hopes were lifted when arrangements were made to enlist the aid of the marine division. Down to the RCMP launch went Sgt. Norman, where he was joined by Mr. Bond.

Skipper of the police craft, Cpl. Reg Goode, backed out the boat, headed straight across the harbor. Without deviating to port or starboard the police boat continued until Cpl. Goode picked up his binoculars, looked, put them down and told Mr. Bond:

"Your boat is straight ahead." Sure enough the 15-footer was there high and dry on the rocks, not far from Alex Mitchell's cabin, where it had drifted after breaking away from the docks.

A jubilant boat owner soon had his cruiser back home, but he's still a little mystified as to how Cpl. Goode knew where to go, without even scouting around first.

WEATHER

Forecast

North Coast Region: Gale warning continued.

Cloudy with showers today and Saturday. Little change in temperature. Wind southerly 25 today, increasing to southeast 50 over open water this evening. Southerly 20 Saturday.

Low tonight and high Saturday, Port Hardy and Sandspit, 45 and 50; Prince Rupert, 42 and 53.
