George Shenton won the men's tenpin bowling tournas ment here Sunday with a five-game total of 945 for an average. of 189. He had a handicap of 56.

Second best was Charlie Watman, who had a handicap of 38 and rolled 923. High single game honors went to Art Olsen, a scratch bowler, wno topped the list with his 224 total rolled in the first game. His five-game total was 875.

Here's Our SPRING OPENER

Special

Baseball and Softball Mitts at real Savings. Last year we over-orderedthis year we're clearing them at huge reductions . . . See our stock.

In 1914 we said:

TT WAS during the dark days of the last war that we wrote L those words. Can anyone looking at Canada today, say that our confidence in the destiny of this country was misplaced?

Canada's Amazing Growth

The expansion in every phase of our national life since that advertisement appeared is a matter of record. The gross national product (the total value of all the goods and services Canada produces in a year) has risen from approximately \$12 billion in 1944 to \$23 billion in 1952 while the annual value of our manufactured goods alone has doubled during the same period.

From 12,000,000 in 1944, our population has increased by over two and a half million-which is like saying that more than three-quarters of the population of Norway, or more than one and a quarter times the population of New Zealand has been added during those years.

Despite the fact that Canada still has approximately only onehalf of one percent of the world's population, she ranks third among the trading nations. Of the ten leading trading nations, on a per capita basis, she is first.

It is estimated that by 1960 our population will have reached sixteen and three quarter million and by that year some economists believe the total value of our goods and services will have passed the \$30 billion mark.

Electricity Plays a Vital Part

Since 1940 Canada's output of electric power has more than doubled. This extensive development of our power resources undoubtedly accounts, in part, for this country's rapid expansion. It is significant, for example, that we use about three times as much electric energy as the thirteen countries of South America combined, although we have only about one-eighth of their population.

Working Hand-in-Hand with Industry

We of Canadian General Electric are proud of the part this Company has always played and is still playing in Canada's remarkable development. Our great family of workers has increased from 8,500 in 1944, when the above advertisement appeared, to over 14,000 today. And since that time we have spent some 45 million dollars on new plants, new offices and warehouses—as well as on new equipment and extensions to existing plants.

Because it believes that "the best is yet to be" where Canada is concerned, this Company is even now stepping up the expansion of its manufacturing and distributing facilities to meet the increasing demand for its products resulting from

> Canada's phenomenal development. And so today, we again say confidently: THINK BIG . . . when you plan for Canada's future.
