

First Cancer Clinic Coming To Prince Rupert Next Week

Local Society Has Annual Meeting, Electing Mrs. Murdoch as President

Prince Rupert Cancer Society heard at its annual meeting last night that a travelling cancer clinic will visit the city next week to examine possibly twenty-five patients from this area for checking up and advice.

The clinic, travelling here from Vancouver by air, will operate in two rooms which have been arranged for at the Prince Rupert General Hospital. It will consist of Dr. Evans and Miss Hartwig. Appointments for appearance of patients at the clinic for free service are made through family doctors. It will be the first time that such a clinic has made its stand in Prince Rupert.

Last night's meeting made preliminary arrangements for the annual "Conquer Cancer" campaign for funds, the objective of which has been set at \$2000, the same as last year when \$2300 was actually raised. D. C. Stevenson will again be campaign chairman with Mrs. William Rothwell as vice-chairman. As usual, there will be a house-to-house canvass made by teams which will be provided by various organizations. The campaign will be conducted during the month of April.

Feature of the meeting last night was the presentation by Mrs. Fred Antrobus of her report on the recent convention of the British Columbia Cancer Society in Vancouver.

OFFICERS

Officers for the year were elected as follows:

Honorary president—Dr. Duncan Black.

President—Mrs. William Murdoch.

Vice-President—Mrs. G. Holbrook.

Secretary-Treasurer—Mrs. M. Halvorson.

Executive—Mrs. J. Adelman, Mrs. William Barton, Mrs. Eric Barton, Mrs. R. J. Pollock, Mrs. George Shenton, Mrs. William Rothwell, Mrs. G. V. Hanley, Miss H. Boehme PHN, Rev. Fred Antrobus, Rev. H. G. Bird, D. C. Stevenson and Dr. L. M. Greene. Retiring president was Rev. Fred Antrobus who conducted last night's meeting.

LOCAL UNIT IMPORTANT

Reporting on the provincial convention, Mrs. Antrobus told how it had been admitted that it was the individual local units, large or small as they might be, which made possible the important work of the whole international organization.

Program in Vancouver had included a visit to the new cancer clinic in Vancouver General Hospital, of particular interest being the viewing of the thickly insulated concrete chamber where would be installed the new cobalt 60 bomb, atomic instrument for the treatment of cancer, the third of its kind in the world, the other two being at London, Ontario, and Saskatoon. The cobalt 60 bomb was vastly more powerful than radium.

Mrs. Antrobus spoke of the principal phases of the Cancer

Religious Resurgence

Two things impressed themselves forcibly upon Dr. R. G. Large while on a recent motor trip to the United States.

One was the great sentimental attachment of the American people to the British throne.

The other was an obvious resurgence to religion in the eastern and southern states.

"We were leaving Canada just after the King died and felt somewhat concerned that we might be out of touch in the United States with the events that were to follow," said Dr. Large. "To our surprise, however, we found the papers of the United States following these events quite as adequately as we could have expected from the newspapers at home." There were fine editorials in tribute to the late King and expressing affection to the new Queen. From the attention that was given by newspapers, even the smallest, one would have thought it was the King of the United States.

The great number of religious programs that were on the air and being published in the eastern and southern United States was surprising indeed—not only on Sundays but throughout the week. And the climax was a program one Sunday jointly sponsored by the Protestant and the Roman Catholic churches. The tremendous religious resurgence did not seem so apparent as one came into the western states.

The trip of Dr. and Mrs. Large was from here to Oshawa, Ontario, by rail. There they picked up a new car and proceeded southward to Miami, Florida, whence they made the boat trip to Havana, Cuba. Returning to Miami, they motored to New Orleans, through Texas, Arizona and other states to California and thence northward. Rain marred much of the trip although there were two fine days in Miami and good weather in Havana.

Dr. Large showed highly interesting moving pictures depicting the trip, scenes of flora and fauna along the way through the Deep South and along the Rio Grande being featured in addition to beautiful scenic sequences in color.

President Marc Gormely was in the chair and, in addition to a good attendance of members, guests were James King of Vancouver and Fred Burton.

Appointment of a gyro welfare committee consisting of Dr. A. W. Large, Scott MacLaren, T. A. Stewart and David Radford was announced.

Increasingly difficult to speak or write with enough accuracy to meet modern requirements.

There is developing a distinct threat to the ability to read and write in a lucid fashion.

There is a growing aversion to reading.

New Boom Comes to Stewart, Reports Its First Citizen

Bill Tooth Here in Connection With Financing of Silver Tip Development

William R. Tooth, who certainly holds enough public positions to justify being termed the general factotum of his community, flew back to his home in Stewart today after spending a couple of days in the city on business.

Mr. Tooth is chairman of the village commissioners of Stewart, president of the Stewart Board of Trade and president of the Stewart Liberal Association. He also finds time to dabble in real estate and insurance as well as mining.

It was on mining business that he was here. The object was to set up an agency in the city for selling shares in the promising Silver Tip mine of which he is mine manager. P. H. Linzey has been appointed local representative.

Silver Tip is out to raise \$100,000 to finance a program of development which will open up the ore bodies at depth and bring the property into full production.

Meantime high valued gold, silver, lead, zinc ore will be mined for trucking to the Sibak-Premier mill eight miles away.

Last year Silver Tip shipped 15 tons to smelter and received returns of \$219.50 per ton from east shoot ore, \$136.21 from west shoot and \$70.72 from the Armstrong tunnel.

Values run to 43 ounce gold, 84.9 ounces silver, 12.6 per cent lead and 18.5 per cent zinc.

Silver Tip is one of the original discoveries of the days of 1910 when it was located by Ernie Armstrong, Scotty Dilsworth and Jack Clegg, all well-known pioneer prospectors. During the years 1500 feet of tunnel work has been carried out.

In the east shoot, A. Kirby, ME of Sibak-Premier, has estimated that there is 2600 tons of ore available already, at \$62.50 per ton value.

The property is located on Silver Creek two miles beyond Big

Society's work towards conquering cancer:

1. Financing research, costing \$77,000 last year.
2. Educating public, \$30,000.
3. Welfare work, \$25,000.

While much good work was being done towards the alleviation of the malady, the campaign towards conquering cancer was a slow one but ever hopeful in the ultimate aim of making the affliction curable.

During 1951 there had been 248 applications for assistance in British Columbia. Four cases had been sent from Prince Rupert to Vancouver for clinical treatment.

Speaking of activities of various branches in British Columbia, Mrs. Antrobus described that at Ocean Falls as being possibly the most enthusiastic in the province. Unlike the most of places, there was never difficulty in getting out a big crowd for a cancer meeting in the paper town.

The meeting, attended by 22 persons, concluded with the showing of a film depicting treatment of cancer by radiology and surgery and great progress which had been made during the past five years in this field.

Importance Of Church

An impressive address on the church and its foundation and its vital development and effect on the progress of civilization was delivered by Major W. C. Poulton, Salvation Army, in speaking this week before the regular monthly meeting of the Men's Club of First Presbyterian Church.

Fred Conrad was in the chair and there was a fair attendance of members.

Danger in So. Africa

Possibility of Bloodshed Seen in Racial Issue

By ARTHUR GAVSHON

CAPE TOWN, South Africa (AP)—South Africans braced today for a danger-packed fight over the National government's plans to curb the courts and change the constitution in favor of white supremacy.

Tension mounted as government opponents warned Prime Minister Daniel Malan that his racial policies may bring bloodshed.

Two critical phases approached for the divided country:

1. A united front of most anti-government forces plans to begin an intensive campaign on Monday to compel Malan to quit. Country-wide demonstrations—aimed at arousing white South Africans—have been arranged.

2. Beginning April 6, Negro and Asiatic leaders will launch their own campaign to defy what they term Malan's "oppressive and unjust" race laws. They have expressed hope this campaign will develop into an unbeatable passive resistance movement.

Observers say these planned demonstrations contain dynamite, because one rash move or ill-judged speech might spark a fire no one could put out.

Some informants said the government may decide to ban all

non-white meetings scheduled for April 6. If such a ban were defied—especially around Johannesburg—anything could happen, they said.

Government lawyers meanwhile have been ordered to write a bill which would put all parliamentary acts beyond the reach of the courts and prevent them from upsetting any more of the segregation legislation Malan's Nationalist party favors.

The bill would revive a law—thrown out by South Africa's highest court Thursday—restricting the constitutional voting rights of colored persons, those of mixed white and black skin pigment. Negro natives have no voting privileges at all. Under such a bill Malan could break the constitutional powers of the courts by a bare parlia-

mentary majority. Opposition party leader Strauss warned the United party will fight the legislation in the highest court. Television, Radio, Wireless Operators. All other means.
