HMCS LABRADOR, Canada's Arctic patrol ship and first naval vessel to navigate the Northwest Passage, is shown steaming along the Alaska coast towards Esquimalt, B.C. During her trip which began July 23, she steamed 7,500 miles across the top of the world from her home port of Halifax in about nine weeks.

RCN Ice-Breaker Ends Northwest Passage Trip

VICTORIA (CP)—HMCS Labrador, Canada's newest and finest ice-breaker, landed in Esquimalt harbor last night, comple-

ting a history-making voyage through the Northwest Passage.

The Labrador is the first naval vessel and the biggest ship—6,500 tons—to traverse the ice-covered Arctic passage.

If the scientists on board made any discoveries concerning hydrogen bombs set off by Russia on Wrangel Island in the Arctic sea earlier this month, they are not telling anybody about it.

The navy has classified all the information they might have gathered as secret and Capt. Owen Robertson and Dr. D. C. Rose, chief scientist, met questions about H-bombs with "no comment."

A naval spokesman described the new alarm system recently installed in Chatham, pulled down on one of the fire-box levers with the understanding that the alarm would ring in Chatham only.

However, his action alerted not only the naval stations, but also the city fire department who responded to the false alarm.

While in the district, Lt. Cmdr. Carruthers, testing the new alarm system recently installed in Chatham, pulled down on one of the fire-box levers with the understanding that the alarm would ring in Chatham only.

Because of his serious illness the Labrador rushed here and landed well ahead of schedule.

The naval hospital at HMCS Naden announced later he was on the seriously ill list and was being kept under oxygen.

Arriving in Prince Rupert September 29 for an inspection of boilers at Chatham, Montreal Circle and the radio station at Port Edward is C. F. Rainford of HMCS Dockyard.

Mr. Rainford is on the staff of the Commodore Superintendent, Pacific Coast.

Narrows Death Ruled Accident

An inquiry by Dr. W. D. Watt, coroner at Queen Charlotte City, showed that fisherman Harold Seltjord, 46, of Vancouver, came to his death Friday at Louise Narrows due to accidental drowning.

Mr. Seltjord was a crew member of the Nelson Brothers Limited fishboat Gavin B which went aground on a sandbar during the gale which lashed the north coast last week.

RCMP in Prince Rupert report that the Gavin B's crew went ashore after the vessel hit the sandbar to wait for high tide. Police say the crew started fishing from shore and apparently Mr. Seltjord stepped into a deep hole and was drowned. The body was recovered but efforts to revive the victim were unsuccessful.

The body has been shipped to Vancouver for funeral services and burial.

Mr. Seltjord was born in Bodø, Norway, and came to this country 20 years ago and from that time he has been employed as a fisherman, both here and in Vancouver.

He is survived by his wife, also, in Vancouver, his mother, Johanna Seltjord in Bergen, Norway; four sisters, Mrs. Astrid Strand and Mrs. Dugnay Remond in Prince Rupert, Mrs. Ingrid Vold in Oslo, Norway and Mrs. Gunhild Jonson in Stockholm, Sweden; two brothers, Hankon in Vancouver and Ola in Prince Rupert.

Rearmament Conference Starts Well

Eden Outlines 50-Day Schedule

LONDON (AP)—The nine-power conference on freeing and rearming West Germany convened today, and after a 90-minute session delegates said they were off to "a good start."

"It started very well but it is too early yet to predict any result," Belgium's Foreign Minister Paul-Henri Spaak told reporters at the luncheon adjournment.

L. B. Pearson, Canada's minister of external affairs, said "we are off to a very good start."

Anthony Eden, as host foreign minister, was elected permanent chairman of the conference. He immediately proposed a streamlined timetable to win agreement within 50 days of setting West Germany free and enlisting her troops in the defense of West Europe.

Eden urged two simultaneous sets of talks: One by the United States, Britain, France and West Germany to restore German sovereignty and the other, by all nine powers to work out plans for getting Germany rearmed.

Whether Eden's plan would have approval was not immediately clear.

Ex-Mayor Hit For Damages

TORONTO (CP)—Former mayor Allan Lampert of Toronto has been ordered to pay \$40,000 to taxi owner Thomas A. Ross for libel and slander.

Mr. Ross sued Mr. Lampert, now Toronto Transit Commission vice-chairman, for comments made to two newspaper reporters last Oct. 30. He was reported to have said that Mr. Ross was trafficking in taxi licences and that "there never has been a more flagrant case of trafficking."

In the following 68 days she steamed just over 10,000 miles, 6,100 of them north of the Arctic Circle. The wide variety of scientific investigations included taking 1,050 water samples for testing salinity, 1,320 weather observations north of the Arctic Circle, and making 110 weather charts.

A total of 440 weather reports were sent by radio to stations at Halifax, Vancouver, Edmonton, 46 and 60; Prince Rupert, 30 and 60.

WEATHER

Forecast

North Coast Region—Clear today and Wednesday. Little change in temperature. Winds northerly 15 near the Queen Charlottes, light elsewhere. Low tonight and high Wednesday at Port Hardy, 40 and 60; Sandspit, 46 and 60; Prince Rupert, 30 and 60.

RAMPAGING UNIVERSITY of Toronto engineering students carry coat-rack, chair and blackboard down University College stairs. The outbreak of violence among the freshmen resulted in head injuries to Prof. W. J. McAndrew who tried to halt the students.

Bigger, Better Season Aim of Membership Drive

With a membership campaign set for tomorrow night and opening of the 1954-55 season program less than a week away, the Prince Rupert Civic Centre is humming with activity as renovations and program planning near completion.

The Centre staff is preparing for a heavier winter schedule for a larger membership, expected to result from tomorrow night's all-out drive. The campaign will see nearly 100 volunteer canvassers visiting homes throughout the city seeking new members and renewal of old memberships.

To serve those members, new facilities are being prepared, including a new canteen in the former gymnasium office, work on which started yesterday.

Carpenter R. Kelday is building the modern canteen from plans drawn up by Jack Collins. The canteen will include a curved, glass-top counter jutting out into the lobby, topped with a smart canopy. The counter will be faced with mahogany plywood, and topped by a glass panel for display purposes. The room behind the counter will be partitioned into two sections, the front portion including cooler for soft drinks, sink, coffee maker and shelves for items for sale. The rear portion will be used as a storeroom at present, pending possible expansion of the canteen later.

A snake dance by 200 freshmen along the main street last night wound up with a raid on a police station when students tried to rescue two freshmen who had been arrested.

The two youths were picked up after a manhole cover was removed on Princess street. They were charged with drinking while under age and with obstructing an officer.

The crowd followed the police cruiser to the station. Students milled around the building. Some pushed a parked patrol car up against the main door, smashing the hinges. Others hurled rocks through a window.

Police brought out the fire hoses. Several students rushed at the officers to smash the hoses, but police kept them off. The crowd broke up.

Earlier, a motorist tried to crash the student lines with his car. The students hauled him out of the front seat, tore his shirt off and slapped mustard all over the car.

Police Official Granted Asylum

WASHINGTON (AP)—The United States Justice Department said today that the deputy chief of Communist Poland's secret police, Józef Swiatlo, has quit the Reds and been granted political asylum in the United States.

Swiatlo's defection has been termed "very important" to the world counterintelligence.

Group Seeks Survey Of Company Assets

The three-man British Columbia Power Commission has agreed to reopen negotiations with Northern B.C. Power Company, Limited, with a view to possible purchase of the system and establishment of a power district in this area.

This was made known last night at a meeting of the city council in a letter from H. H. Griffin, Commission member, who met with the city council September 10 for preliminary talks after months of urging by the city that the question be brought to a head.

In his letter, Mr. Griffin, said

the Power Commission wished

to make an independent

survey of its own of the power

company's physical assets and to

examine its books. He added that

the company had agreed conditionally to the survey, but that

the appraisal could not go forward until John Farris, power

company counsel had received

further instructions on the con-

ditions set out by NBCP.

Mr. Griffin did not name the

conditions, but he said Mr. Far-

ris would let the Commission

know what they were not later

than the end of this week.

Subject to the satisfactory

settlement of these conditions,

we (the Commission) propose to

send two of our engineers and

an accountant to Prince Rupert

for such appraisal," Mr. Griffi-

n's letter stated.

The Power Commissioner add-

ed that the appraisal results

could not be expected before the

end of October this year at the

earliest. However, following re-

ceipt of the report and their

analysis a further meeting with

the company is proposed.

The letter continued: "This

procedure was not quite what I

had in mind when I had

Rupert in mind when I had
