Original Dream Unchanged

IN THIS country we often encounter in lukewarm and misguided Americans the frustrating argument that Soviet communism seeks not to expand but to contain itself peaceably. These same sources assert the Soviet ringed itself with satellites out of fear of the West...

We are now told by the Kremlin itself how false these convictions are. A communique, couched in the semantic jargon and double talk of Communists everywhere, yet unequivocal in its meaning, has just been issued which clearly states that world domination is the aim of communism and that the Kremlin shall be the leader in this movement. The document lesty. was issued after several weeks of meetings by Communist leaders of 12 countries . . .

Referring to anti-Communists as "the ruling single sign or trace of the head its pain.

Yes—Bi classes," the communique asserts "they usually of-! fer resistance to their own extermination" and that "the possibility of nonpeaceful transition to socialism should be borne in mind." This is clearly a call for armed revolution and civil war when the leaders in the Kremlin believe their hour to strike has come. The call for unity among Communists of the world, therefore, means simply the imposition of a military discipline under the central control at the Kremlin.

When the Soviet speaks of peace it means temporizing; it means peace for the moment. The Soviet has deviated a long way from the economic principles of Marx. It has modified Lenin's teachings to suit its own evil purposes. But it has never deviated from its original dream of world domination and it is time for the free world to wake up.

Merchants To Do-It-Yourself

OWNTOWN merchants are trying to do something about downtown business and property

More than 120 of them have banded together in the Downtown Park and Shop plan which went into operation Friday.

This is the first step of its kind in Miami. Previously all cries for help in solving the downtown parking problem have been directed at city hall.

Now enterprising merchants are taking a do-ityourself attitude. They are subsidizing parking for their customers on a big scale with 51 lots and garages participating.

The program is commendable. —Miami Herald.

"DRAGNET" HITTING YUGOSLAVS AIDING ANTI-RED REFUGEES

operation against Yugoslavs suspected of keeping contact with anti-Communist refugee groups in the West was reported in full swing today.

Five persons are known to have been arrested — all in Belgrade — in the last five weeks. They are in jail under interrogation. They include two leading members of the pre-war Socialist

party, a theological teacher, a translator employed at the United States Embassy in Belgrade, and a Belgrade University professor.

It is widely believed other arrests have also taken place. Dr. Milan Zujovic a law professor at Belgrade University, is the last person known to have been arrested. Zujovic, in his 60s, is a brother of Mladen Zujovic, an emigre now living in Paris who was sentenced to death in absentia by a Yugoslav Communist court in 1946.

Three of the arrests were officially confirmed after they were reported by Western correspondents.

Two events have occurred recently which might seem to have been as far! panionship, as well as the words, apart in significance as they were in distance but which, in fact, were definitely related to each other.

The first of these was the actiments so beautifully put into tion of President Eisenhower in operation under article 11 of violent. It is perfectly true, however that a significant U.S. dependence on oil imports from overseas, and especially the middle: East, does not involve questions of national security. Not only could these supplies be cut off in time of war, they could be peopardized without war. The Calro meeting has underlined this danger.

This Asian-African gathering has been—as it was meant to be -primarily an occasion for veguise of freedom and national

inevitably be directed against; the West which would be made into the villain of the piece. The incentive to do this would be greatest in those newly independent countries who are now sinding the responsibilities of freedom heavy and difficult and whose governments can use nationalist agitation and passions to conceal their own weaknesses

and their own failures.

The Cairo conference would therefore be filled with resounding appeal for equality and freedom, political and economic. even if there were no Communists present. This economic freedom, in their minds, would certainly include the eventual expropriation and nationalization. of the huge U.S. oil undertakings in the middle East. It therefore, impossible to be optimistic about the long range

inture of these undertakings. One would think therefore that the United States would draw the right conclusions from the Cairo conference and other such manifestations of anti-Western feeling by making it self less dependent on oil supplies from that unstable and insecure part of the world. This should mean encouraging rather than discouraging the development of Canadian oil re-

Therefore the recent United still takes a dim view of a man | ready importing more American of which still persist in the States action restricting Conawho whistles on the sabbath, oil than it was exporting from minds of Asians and Africans dian imports of oil by 15 per cent is not only unfair and unfriendly to Canada, it is shortcan do more. VANGUARD CHIEF CLAIMS REDS: IN TROUBLE WITH 3RD SPUTNIK

By LEWIS GULICK WASHINGTON up -- The chief of the United States Vanguard missile project says the Russians probably have, run into difficulties trying to shoot a new Sputnik into ort bit around the earth.

At the same time, Dr. John Hagen cautions that the next attempted launching of a Vanguard rocket still 'may' not result in placing a U.S. satellite in space.

Hagen commented in a written reply to questions [sub-] mitted by the Associated Press as belief spread that Eussia's half-ton Sputnik II, launched November 3, already is Fr soon will be the only man-made satellite aloft.

Premier Bulganin said in Moscow Friday night, that Sputnik I, launched October 4, will burn out by Monday if B not before. "For all I know it may have burned out already;" 🐉 he told reporters.

At Cambridge, Mass., the Smithsonian Astrophysical Observatory said it had no word on the fate of Sputnik, I, al-; & though officials there had predicted that the 184-poundsphere would plung to a flaming end in the atmosphere on. or about Thursday of this week.

CONTROL TATUODING - City council in Calgary has moved to amend a licensing bylaw to nover tattocists following complaints from parents that a tattoc fad had broken out among high school students. The amendment forbids a tattoolst from working on anyone under 18 without parents' consent. Ron Meigh (left), photographer for the Calgary Albertan, went to the studio of tattocist Tex Hammond for a picture and wound up instead as a subject. During the peak of the fad two students were expelled from school and the Children's Ald Department said the youngsters were being "disfigured" and "marked for life".
