Second-Rate Editor

N HIS outspoken criticism of Queen Elizabeth's speaking style, a previously unheard of editor named Lord Altrincham has made a cheap bid for attention for which he deserves to have his morning kippers stick in his throat.

This poor man's Bernard Shaw is byviously more interested in establishing himself as a renegade, though masquerading as a friend of the Queen, than in being fair or even accurate. Since the Queen by custom is prevented from answering his accusations, he can sashay forth in his quest for extravagant publicity without fear of running into official rebuke. He is a gladiator with nothing in the arena but his own hot air.

Whatever Altrincham thinks of the Queen's English, it is certain that the world which hears her voice recognizes that here is the language as it should be spoken and that fortunate is the country which can have its message broadcast in such clear young tones. His own foppish attitude of rebellion suggests that Altrincham himself speaks with a Mayfair adenoidal tone that is best calculated to waft its way through drawing-room cigarette smoke and needs refreshing with an occasional well-mannered sip of gin and lime.

What Altrincham fails to see through the parlor haze is that in Queen Elizabeth Britain has an attractive, appealingly feminine ruler who has more fortitude than he could describe on a page of his foolscap. She assumed her enormously responsible position when other girls might look forward to nothing but pleasure, and not for a moment has she betrayed any sign of wishing she could quit. The taking away any of the grea world will never know what domestic problems she may have, in addition to those of her public office, but for the thousands who are constantly watching she has maintained her poise and pleasant expression. She knows her Commonwealth probably as no that great office between the other British ruler ever did, and in Canada she is re- and the election of John Diefmembered for her graceful manner through an exhausting tour.

It is fortunate for this Commonwealth that Lord Altrincham has a place of no importance in it. We do not know if the courtiers at Buckingham Palace are a second-rate lot as he charges, but we do know that Altrincham is a second-rate editor.

They Get Their Man

short while ago a merchant from Aklavik came down to Edmonton. In the Far North this man operates a boat on the Mackenzie River. He has a crew of three Eskimo. He brought the Eskimo down to Edmonton and to get them a health check at Camsell Hospital.

The man stayed at one of the hotels. He doesn't drink, but he had some liquor for any friends who might call. Before leaving for Aklavik he took the Eskimo to the lake. He bundled the liquor in the trunk of a rented car.

Returning from the lake they saw a groundhog; that had been run over by another car. It was badly hurt and they decided to kill it to put it out of its misery.

As they were attending to the groundhog the Royal Canadian Mounted Police arrived on the scene. They searched the car and the man was fined for illegal possession of liquor.

The man from Aklavik says times have changed. In the old days the Mounties used to go to Aklavik to get their man. Now, they get the man to come down to Edmonton. It's so much easier that way.
