We've gone fishing for facts

Education and information is an important part of the Department of Fisheries' work-telling the facts about Canada's fishing industry.

Fish are a great national resource · · · vital to this country's economy. Canada's welfare-which means - yours-depends on keeping them in plentiful supply. The educational program of the Department is designed to tell Canadians what's being done to preserve the nation's

extensive fish stocks and how valuable they are as a basic food resource.

This work is carried out through the daily and weekly press; radio and television; magazines; educational publications; recipe pamphlets for housewives; exhibitions; permanent fishery displays; film and filmstrip showings; and illustrated educational talks to fishermen and consumers.
