DAY'S WORK.

PRESIDENT WILSON AND MEXICO.

President Wilson seems to be mixing things merrily up in his dealing with the Mexican situation. As a successor to Henry Lane Wilson he has appointed the governor of Minnesota ambassador to Mexico, and yet he has refused to recognize the Huerta government. To whom, therefore, is the new ambassador to present his credentials when he arrives in Mexico? President Huerta also adds to the gaiety of the nations by declaring that if his government is not recognized by the United States before the new ambassador arrives there, the said ambassador will not be granted audience. Rather peculiar situation, isn't it?

A DROP IN GERMANY'S BIRTH RATE.

It has become a sort of axiom that Germany's population is increasing at a very rapid rate, and that this gives her an immense advantage over France. But it now appears that the German birth rate is declining. In the years between 1871 and 1875 there were 43 births to a thousand inhabitants. In 1910 there were less than thirty. The decrease occurred chiefly between 1905 and 1910. In Berlin there were 20.83 births per thousand in 1910, as compared with 46.9 in 1876.

The theory generally accepted by economists is that the birth rate depends upon the supply of food. The more food, the more births. But this is offset by the tendency of prosperous communities to regard large families as unfashionable. Perhaps Germany has been affected in the latter way.

DIRECT SERVICE TO RUPERT IS DESIRED

Bella Coola Residents Find That Present Freight Rates Are Prohibitive.

B. F. Jocobsen, through whose efforts a large number of settlers have located in the Bella Coola valley, is in the city as a representative of the farmers of that district to give evidence before the agricultural commission, which is to sit here on Tuesday. While here he is endeavoring to start an agitation for a direct boat service between Bella Coola and Prince Rupert, which conditions undoubtedly seem to warrant. Bella Coola is only two hundred miles from Prince Rupert, while it is four hundred miles from Vancouver. The settlers in the Bella Coola valley, Mr. Jacobsen says, fully realize that Prince Rupert is their natural market as well as their trading centre. The farmers already have large vegetable crops which they are prevented from shipping to Prince Rupert on account of the prohibitive freight rates. Under present conditions freight from Bella Coola to Prince Rupert has to be shipped via Vancouver. Mr. Jacobsen recently made a shipment of one ton and a half of vegetables to Stewart & Mobley of this city, the freight charges on which amounted to \$17.65. With over five hundred settlers in the Bella Coola val-I ley, and the number being rapidly added to, the local Board of Trade should leave no stone unturned in endeavoring to secure a direct freight and passenger service to and from this city. Mr. Jacobsen informed The

News that it takes six weeks to receive a reply by mail from Prince Rupert under the present arrangement.
