YOUTH AFRICAN STRIKE IS ON MARTIAL LAW IS DECLARED

ENGINEER LEFT TRAIN FILLED WITH PASSENGERS ON THE VELD--MEDIATION IS USELESS

(Special to the Daily News)
Capetown, Jan. 14.—A general strike throughout South Africa is voted by a two-thirds majority of the Trades Federation. The government retaliated by proclaiming martial law. Official reports say conditions in Johannesburg show improvement. The service in other districts

To the Electors of the City of Prince Rupert:

Gentlemen:
At the request of members of the council I am publishing here the communication from Mr. J. J. Maney, consulting engineer, Seattle, Wn., who, at the request of our city solicitor, Mr. J. J. Maney, made a report upon the proposed agreement with the Hydro-Electric Company. When the proposed agreement with the company first passed I advised the council that we reserved the right to have the agreement passed upon by an expert consulting engineer other than our own engineer, also additional counsel. The counsel employed by Mr. J. J. Maney was R. T. Elliott, Esq., of Victoria, B. C., who approved of the agreement from a legal standpoint. A number of exceptions were made to the agreement by the electrical engineer, Mr. Maney. By comparing Mr. Maney's report with the agreement as it now stands it will be observed that of the objections raised by Mr. Maney, with the exception of the primary charge on maximum demand, have been met in the proposed agreement. With regard to the primary charge on maximum demand our engineer does not view with apprehension the contention of Mr. Maney in this regard, and the careful investigation that I have made of the whole

Annual Surplus.....	
	\$ 1,579.68

Last year the city electric plant burned \$23,000 worth of coal to produce 257 h. p. of energy. That amount of horse power at the Hydro-Electric Company's price of \$53 would have cost us \$13,621. In other words, if we turn down the agreement we will pay \$10,000 for the privilege of owning our own plant, to say nothing of the cost of distribution.

Match Postponed

(Special to The Daily News)
San Francisco, Jan. 14.—The Willie Ritchie and Harlem Tommy Murphy match scheduled for January 23, has been postponed by request of the champion because of a sprained heel tendon.

Levinsky in Ten Rounds

(Special to The Daily News)
New York, Jan. 14.—Batting Levinsky gets the better of Porky Flynn in ten rounds.

Dirty Tactics

There are no tactics so despicable as those used by Mayor Pattullo's opponents in trying to make city officials take the responsibility of their dishonest insinuations and their prejudiced utterances. The function of city officials is executive; that of the mayor and aldermen legislative. When the council critics attempt by their dirty tactics to draw officials into a legislative discussion they are trying to put these officials in a position where it would be impossible for any council to retain their services.

If you are in the market for a good reliable engine for business or pleasure, see Akeberg, Thomson & Co., machinists, cor. Manson Way and 1st Avenue. 246-11-38

As a large taxpayer, McClymont will advocate sane spending methods in city affairs. His interests are the ratepayers' interests. See that he is elected for Alderman. 9-10

You want a practical man to look after your business. Choose D. H. Morrison. 11-12

charge of \$1 per horse power for that maximum load. The practice of stipulating for a "primary charge" is obsolete and not in common use on a uniform load in large units, such as is contemplated in this agreement, as it invariably leads to dissatisfaction and serious disagreements that in the end is harmful to both parties. Under paragraph 3 the company agrees to construct a hydro-electric plant, an auxiliary, Diesel oil engine plant, together with transmission lines, etc., to

FINAL RALLY

In the Westholme Theatre this evening the final rally of the 'campaign' will be held in the interests of Mayor Pattullo. The meeting will be presided over by Fred Stork. Special attention will be given to the by-laws before the public. Ladies are invited to be present. Among the speakers, in addition to Mayor Pattullo, will be Ald. Douglas Sutherland, Thomas McClymont, ex-Ald. W. P. Lynch, J. E. Dyer, O. H. Nelson, A. H. Allison, Ald. Geo. Leek, V. Basso-Bert, D. H. Morrison, Ald. J. Dybhavn, Ald. G. R. Naden and Ald. McCaffery.

VOLCANIC DISASTER LEAVES JAPS STARVING

Ten Million People in Need of Food—Heat is Infernal

(Special to The Daily News)
Tokio, Jan. 14.—Ten million Japanese people need food. There are many deaths from starvation as a result of the earthquakes and volcanic eruptions. Thousands, pursued by the rain of fiery stones, kneel half submerged in the water near the beach and gestulating wildly to steamers and fishing boats. The heat is described as infernal. Junks report that the stones were hissing as they touched the water.

French Meeting

Last evening French speaking electors met in the Catholic hall and discussed municipal affairs. Those who spoke were M. de Mussey, M. Lannic, T. Collart, Ald. Maitland, A. J. Prudhomme, M. Sequin, O. Besner, A. Couture and V. Basso-Bert. Some of the speakers spoke on each side of the mayorality question and several were not committal.

F. M. Lannic said the agreement was giving away a franchise which would be worth 10 or 15 millions in a few years. If we sold it at that price we would not have to pay any more taxes.

T. Collart replied that the theory was absurd. If the franchise was worth millions to a company it would be worth more to the city. He also criticised Newton severely for publishing statements about the city water being polluted. He was a knocker of the city. There were about 35 electors present.

No Newton Beggars

There are no Newton backers who have any money to wager on the mayorality contest. Several hundred dollars is standing at a Third Avenue real estate office which no one will cover. The betting men have it sized up pretty accurately.

As a large taxpayer, McClymont will advocate sane spending methods in city affairs. His interests are the ratepayers' interests. See that he is elected for Alderman. 9-10

Pattullo Meeting
Westholme Theatre
TO-NIGHT

The fight is on and Prince Rupert expects every man to do his duty. Ballots are bullets and every one should be shot right into the enemy's camp. Let there be no blank shells and let every shot be fired. The negligence of one voter may loose the day. Vote early and stay with the game till the last shot is fired.

120 Persons in Distress

(Special to The Daily News)
Halifax, Jan. 14.—Up to dark there was no trace found of the distressed vessel Cobeguid. It is a grave concern for 120 people are aboard. When approaching the Bay of Fundy a blizzard descended on the steamer. Canadian and American governments will take measures to rescue them. The keeper of the Briar Light is unable to locate the vessel.

Morrissey Election Dope

Candidate Morrissey used numerous doctored and distorted figures last evening in an endeavor to show that he is some financier. He stated that if the power agreement is passed the city would pay for a Diesel oil plant \$36,000 a year of a primary charge alone and \$720,000 in 20 years out of the people's taxes. The city light superintendent estimates the primary charge for the first year at \$6,000, and that the lighting of the City Hall, the business houses, all the residences and the power for local industries would cost less than \$25,000 the first year.

Morrissey also said that Mayor Pattullo claimed there was a deficit last year of \$50,000, and as he used the figures for comparison the glaring exaggeration was all the more noticeable. Mayor Pattullo has repeatedly placed the deficit at \$30,000.

This is the kind of stuff Morrissey is putting over to you in an attempt to get elected. As a large taxpayer, McClymont will advocate sane spending methods in city affairs. His interests are the ratepayers' interests. See that he is elected for Alderman. 9-10

Morrison has served other districts as alderman for nine years. His experience is worth having. 11-12

The Prince John leaves for Massett tomorrow at 10 p. m.

Campaign News and Views

Prince Rupert has never been ashamed of Pattullo.

So long as Pattullo is mayor of Prince Rupert there will be no party politics in civic affairs.

By accepting the agreement with the power company Prince Rupert ties up the competition of that company. It gives the city control of the rates.

Unless the water, light and telephone extension bylaws are carried the outlying sections will have to go without these public utilities for a long time.

The whole campaign of Mayor Pattullo's opposition is one of petty criticism, false statements, false figures and the cry of rascals, swindlers, etc.

If you have any suspicion that Wm. Manson will not have that bylaw ratified in the legislature this session if it is accepted by the electors, just vote for it and see.

Without power no industry can come to this city, and under city operation no power can be supplied to industries that want to come here in less than two years.

The present administration sold \$160,000 worth of short term debentures as against \$4,600 for the two years previous, and end up the year with a surplus of \$135,000.

Seattle Ross and Dr. Clayton say the hydro company can buy up Prince Rupert citizens body and soul. A man usually thinks his own sense of morality is typical of all the world.

Every one appreciates the difficulties of financing a municipality in this tight period. It is for you to judge which of the mayorality candidates is more likely to sell the city's bonds.

Newton was going to finance last year by the issue of a \$400,000 treasury note, which would be due today. What position would this city now be in with \$400,000 to be paid immediately?

With the coming through of the railroad this year it is important that a wise and progressive publicity campaign be started. Unless we have something substantial to offer the money would be wasted. We must be able to take care of the people

when they come here and must be able to provide industries with electrical energy.

Some people seem to think that municipalities can operate by a miracle, and these same people give the advice to let the future take care of itself. No business man can proceed along this line, neither can a municipality.

A good start during the next two years will be worth more to this city than any subsequent five. Under the hydro-electric agreement the city can immediately advertise that it can supply power at fixed and reasonable rates.

It would take one year longer to get Woodworth Lake power than to buy it from the company. If the electors accept that agreement they will have saved by lower rates in that year \$30,000, or enough to light the city one year for nothing.

None of Mayor Pattullo's opponents have had the courage to face him on the platform with petty criticisms and their misrepresentations. Mayor Pattullo fights clean. He has given every one a square deal in office and he is absolutely fair in his campaign.

An expert who would send out the campaign clap-trap that Mr. Ross has shipped in here to the opponents of the bylaw has neither self respect nor professional decency. He may be a good electrician in Seattle, but from this point of view he looks like a cheap politician.

The property owners and business men of Prince Rupert cannot afford in the most critical year of her existence to turn aside from a mayor who has given the city a clean, sane business administration for one who made a farce and a muddle of the city's affairs. This year Prince Rupert needs a mayor of courage, business acumen, progressive ideas, and good address. Mayor Pattullo is logically the man of the hour.

As a large taxpayer, McClymont will advocate sane spending methods in city affairs. His interests are the ratepayers' interests. See that he is elected for Alderman. 9-10

They're all voting for Morrison. Why not you? 11-12

DAILY EDITION

Wednesday, Jan. 14, 1914

The civic campaign has reached the end of its tether. The field of argument has been cropped short and the weary herd lies down to chew its cud and meditate.

During an election the average mind is hardly in its normal state. Very few people realize how much one is a product of his environment.

Then the prominence given to the hydro-electric agreement may tend to cloud the other important issues. It should be kept clearly in mind however that our first care is to elect the best man for mayor.

Both of the candidates are well known. They have both been tried out and their records stand before you. Dismiss at once all opposition that comes from hearsay.

We had squabbles and wrangling in the city hall; long, wearisome sessions; jumbling of the city accounts financial chaos, and a deficit of \$30,000.

Pattullo became mayor. At once a reform began in the city hall. Harmony and business methods took the place of discord and guess work. Instead of the general store idea he installed the departmental, each standing on its own legs.

After these and many other public works were carried on and paid for we find a surplus of \$135,000 to our credit instead of a deficit of \$30,000.

Let us put aside all personal animosities and prejudices. Let us all pull together for the big year 1914. Pattullo has promised a progressive policy to boost Prince Rupert.

FORMERLY MISS DOROTHY PARKER-DEACON, THE PRINCESS ANTHONY RADZIWILL

On July 5, 1910, Prince Anthony Albert Radziwill, eldest son of George, Prince Radziwill, was married to Miss Dorothy Parker-Deacon, who was born an American in her compatriot's heaven, Paris, on July 12, 1892.

TO THE ELECTORS OF THE CITY OF PRINCE RUPERT

(Continued from page 1)

the point of delivery at the city of Prince Rupert. As this contract is evidently to be made the base on which to promote the enterprise, I deem it but just and fair that the installation of the plant transmission lines and all auxiliaries should be according to the specifications of the city and under the supervision of their representative.

Paragraph 6 of the contract is very ambiguous and practically means nothing, as the term "commercial practice" is as varied as its uses, the voltage and frequency of the power furnished should be defined within certain co-ordinate lines of the normal voltage with its percentage of variation distinctly stated.

Paragraph 7 relates to the energy delivered to the consumer at 12,000 volts. This, in my opinion, should be changed to either 2,000 or 2,200 volts, as outside of the question of transformer losses a more serious question is involved in the transmission of a high potential energy to the consumers' lines.

The city should install its recording watt meter, receive and pay for its energy at a commercial voltage in order to eliminate all risks from damage to its patrons from high voltage lines that it does not control.

In regard to the meter tests, it would, I think, be the better practice to have them tested every three months by certified instruments as a matter of routine, and thus eliminate to a large degree the oral equation that is so hard to detect until scandal and, perhaps, innocent people are involved.

The paragraph relating to the increase in power should be more specific in giving the city the right to order a further installation of power units whenever their maximum demand reaches to within, I would say, 25 per cent. of the maximum efficiency of the company's plant, and that the company should agree to install these units within a reasonable time based upon the size of the unit.

In regard to the many arbitration clauses contained in this contract, I am not in a position to comment upon the same, except in a general way: That I believe the terms and conditions of a contract of this nature should be reduced to specific terms and one general arbitration clause should cover the entire contract.

is placed at a period of twenty years. Many changed conditions occur in that period, and as the city of Prince Rupert is, I believe, looking forward to becoming a manufacturing centre, it should be protected by a clause that the company furnishing this power should not sell to any one for less than its unit price to your city, plus the city's cost of distribution.

The city should be protected from interruption of service, except for causes absolutely beyond the control of the company, and a penalty provided for frequent breaks that would induce the company to install and maintain a plant and service of the highest efficiency, for which the city could well afford to pay a substantial bonus; in addition to this the city should have the right to cancel this contract if, after six months' notice, the company failed, neglected or refused to furnish efficient service.

All of these matters can, I believe, be adjusted and specifically stated if your city is desirous of entering into a contract for power and the company is willing to furnish the same on a fair and equitable basis.

Respectfully submitted, J. J. MANEY.

As I have previously pointed out and I wish to reiterate so that there may be no misunderstanding, because so many misrepresentations are being made at this time, all the objections taken by our consulting engineer have been met with the exception of the primary charge on maximum demand, and with regard to the primary charge of maximum demand our own engineer states that the city could only suffer in this regard through illegal collusion, which he considers very remote, and which in any event could be obviated by the form of contract made between the city and the consumer, so that he has no apprehensions on this score.

Your obedient servant, T. D. PATTULLO, Mayor.

Comparative Statistics

The great growth of the business of the British Columbia Electric Railway Company Limited during the fifteen years of its operation is strikingly told in brief form by the following figures:

Table with 3 columns: Category, 1897-8, Present. Rows include Capital, Gross annual income, Population of districts served, Light and Power, Generating stations (output), Lamps in service, Tramway System, Miles of single track, Passengers carried annually, Numbers of cars in service.

In May, 1912, the number of lighting customers noted on the Company's books was 43,750 and the connected load for industrial purposes was 31,250 h.p.

Table with 3 columns: Category, 1897-8, Present. Rows include Miles of Mains, Number of connections, Gross annual income.

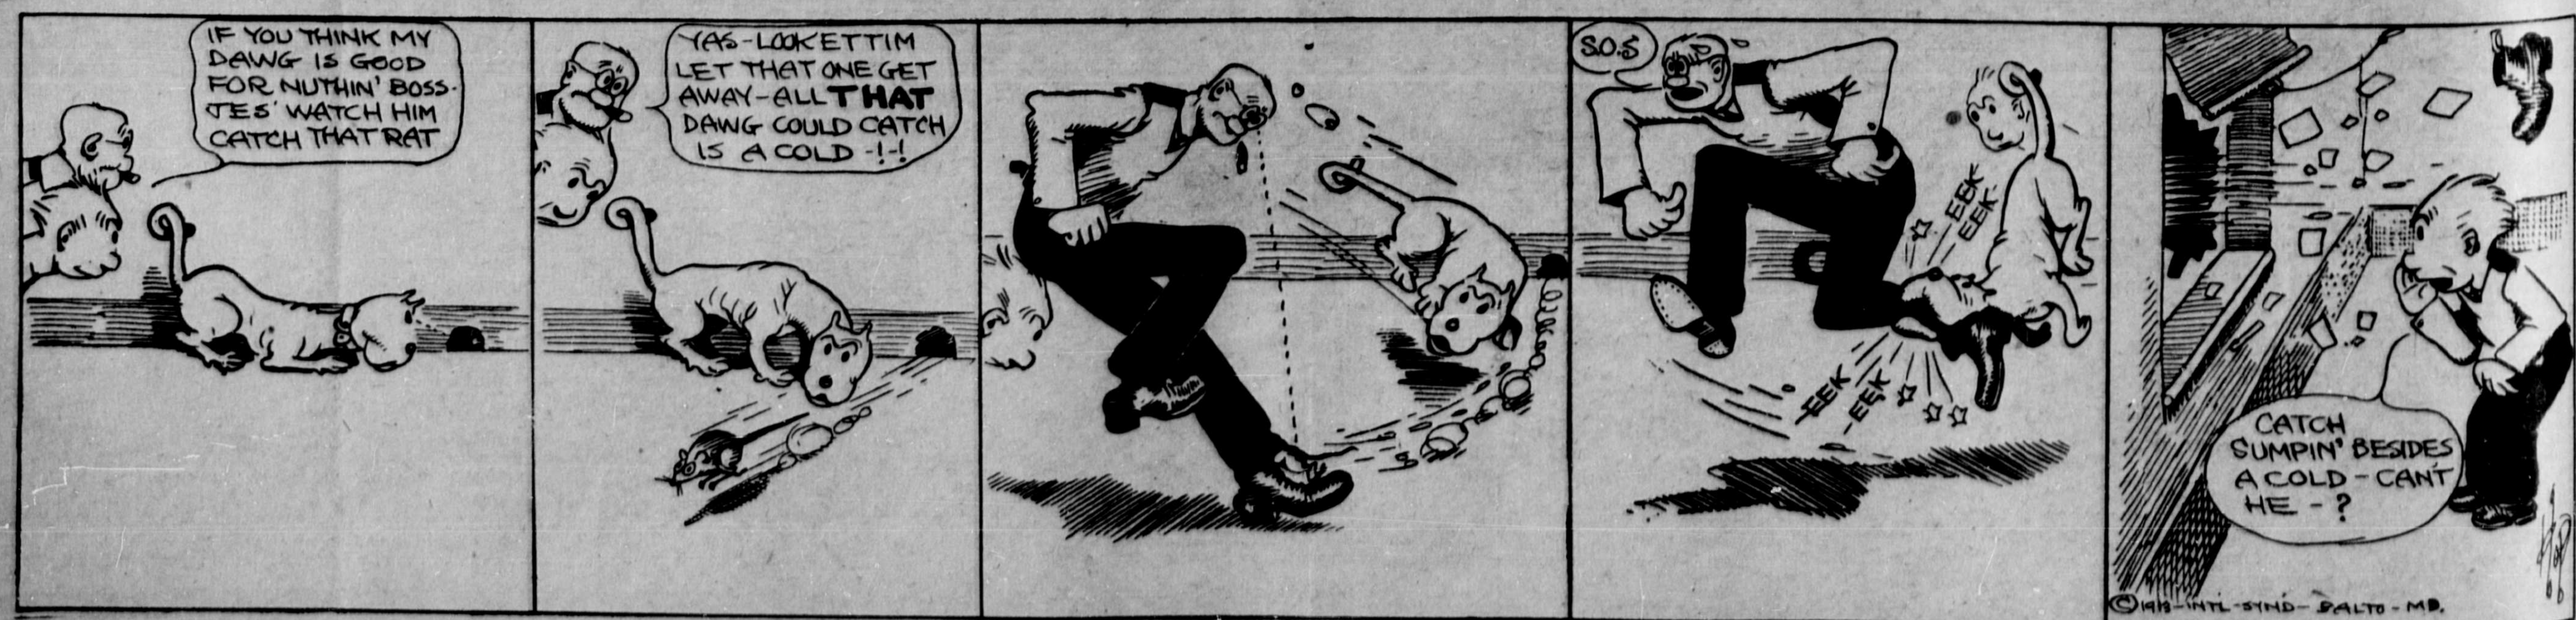

For the month of March, 1912, the payroll of the Company covered 5,086 employees, the total amount of the payroll for the period being \$391,255.77.

From the above it is seen that more than 1/2 h.p. is used per person, and this in a district where they have gas and cheap coal.

OPPOSITIONS' MEETING WAS RATHER TAME

Mayorality Candidate Called Off and Only Read His Last Minute Policy

The Newton meeting in the Westholme last evening fell off in attendance and enthusiasm. The mayorality candidate himself made only a few remarks and read a last minute policy. The principal speakers were Montgomery, Morrissey and Bennett. Mr. Morrissey's performance was principally a juggling of figures along with some wild statements.

The principal items in the Newton platform were: Will endeavor to sell long term debentures and carry on the work of the bylaws. Failing to sell these he will sell treasury certificates for the hydro-electric scheme and complete that. If he can't sell debentures he will make needed improvements out of current revenue and make the taxes a great deal lower.

All business will be at the open council board.

Will reduce light and telephone rates or use profits for extensions.

If he does not sell the debentures he will use current revenue for additional school accommodation.

Copy of assessment roll to be open for public inspection.

Will get the mining congress to come to Prince Rupert as a publicity campaign.

Advocate direct steamship service to adjacent points.

A. M. Stewart spoke briefly about Glasgow.

Ald. Maitland complained that the power company was too small and too brief. We wanted to see the water bylaw passed and the recreation bylaw passed. He stood for eight hours, 45c an hour, and employment of married men.

Geo. Kerr said Nelson has power at \$20 h. p. He advocated a public market and does not want to see the city shut down.

Wm. Montgomery said the Hydro-Electric Company is not here to build Prince Rupert. It would be a step backward to adopt the agreement. He is satisfied the city solicitor does not like the agreement and is not responsible for the penalty clauses. The speaker took a fall out of the judiciary. He claimed figures extorted from city officials to cover up inequalities in the agreement. The water department needs a physician. The only bylaw he wants is the recreation grounds.

D. W. Morrissey suggested that Mayor Pattullo apply the \$135,000 to the building of a Diesel oil plant. He said the power agreement would cost the taxpayers \$36,000 a year for primary charge alone, or \$720,000 in 20 years and that only for a Diesel oil plant.

The auditors Stuart & Stuart showed a surplus last year of something over \$1,000, while Pattullo claims there is a deficit of \$50,000.

The 1913 council made no estimates. They made a running jump at it.

C. V. Bennett went into the legal aspect of the power agreement. He admitted the city had the best corporation lawyer in the province to prepare the penalty clauses in the agreement, but didn't think that would make it safe.

He said he did not see how the bylaw could be ratified by the legislature this session.

Candidates Salter, H. Douglas and Derry also spoke.

In the Letter Box

Newton a Knocker

Editor Daily News: When in Seattle last summer two persons showed me an article taken from Mr. Newton's paper stating that Prince Rupert was drinking polluted water, under similar conditions which caused the death of 2000 natives some years ago. I was asked what kind of citizens we had up here? Were we trying to chase people away from the city? Every citizen knows how spiteful malicious and untruthful those statements were and I would like to ask them if that is the kind of man they want for mayor in the year when Prince Rupert needs a real booster?

M. P. McCAFFERY.

Morrison for alderman. 11-12

After the theatre. Palace Cafe. 2841f

The Venture went south this morning.

Panorium Pioneer Cleaners. Phone 4.

Mr. Ikeda, the owner of the Ikeda mine on Moresby Island, is in the city today. It is reported that the Granby company is negotiating for the property.

You are asked to elect directors to handle your business. You should choose a man like D. H. Morrison for alderman, who is safe and progressive. 8-13

The herring are now running in big schools in the harbor and several boats are making catch. The cold storage boat made one haul of 50 tons yesterday.

As a large taxpayer, McClymont will advocate sane spending methods in city affairs. His interests are the ratepayers' interests. See that he is elected for Alderman. 9-10

The launch Independent left this afternoon for Stewart with Dan Linderborg in charge. Chas. Gillingham, road superintendent, was a passenger.

As a large taxpayer, McClymont will advocate sane spending methods in city affairs. His interests are the ratepayers' interests. See that he is elected for Alderman. 9-10

W. J. Rolfe of the Canadian Mining Exploration Co. of Toronto and New York, was in the city today. He left on the launch Independent for Stewart, where he is interested in taking up some property.

The Bertha of the Swan Navigation Co., Seattle, was in today unloading brick at the Westholme dock and coal for Contractor Stirrit. She is bound for Alaska.

The basic principle of municipal ownership is to get an efficient service cheaper than it can be purchased from a private corporation. The advocates of the city hydro-electric scheme do not claim any such virtue for that scheme. The city light superintendent says there is no question of rates in the issue. When the opponents of the bylaw suggest that we go without sewers and other necessary public utilities in order to get a scheme of municipal ownership which fails in its basic principle, they are proposing something that lacks business judgment and common sense.

Bullock-Webster Withdrawn

L. Bullock-Webster, who was expected to be back in the city today, has not returned. His friends who had him nominated in the hope that he would be here, have withdrawn his name from the contest.

As a large taxpayer, McClymont will advocate sane spending methods in city affairs. His interests are the ratepayers' interests. See that he is elected for Alderman. 9-10

NOTICE

I, the undersigned, for and on behalf of the Granby Consolidated Mining, Smelting and Power Company, Limited, have deposited with the Registrar of the Prince Rupert Land Registration District, Prince Rupert, B. C., (a) A description of wharf which this company proposes to construct in front of Lot No. 479, Granby Bay, B. C., said lot and the adjoining under-water lot upon which the wharf will be constructed being the property of the said company. (b) A general plan showing the position of the property relative to the proposed wharf. (c) A general plan showing more particularly the relation of this wharf to the shore line, with cross-section of the proposed wharf showing type of construction. F. M. SYLVESTER, General Manager. Pub. Dec. 12 to Jan. 17-d

Frozen - Pipes

Don't follow the old expensive methods of thawing pipes. It costs more than the pipes are worth.

I have just received a new device for thawing pipes by electricity. You don't have to open up your pipes. Just turn the current on and in three minutes the frost is gone.
