### SIR GEORGE FOSTER TAKES BRIDE AT GENEVA BEFORE LEAGUE OF NATIONS

#### Engineer Preparing Estimate On Completing Ships at Yard

H. A. Butt has Telegraphic Instructions to Proceed and Full Details of Work are Expected by Mail Tonight or Sunday

H. A. Butt, the British marine engineer, who is here representing the Dominion Government in connection with the completion of the ships, has received a telegram from Ottawa instructing him to proceed with the preparation of an estimate of the cost of completing the vessels. On this estimate, it is understood, will be prepared a tender which will be submitted in competition with other tenderers.

Full instructions are expected by Mr. Butt by mail, possibly tonight, but not later than Sunday next.

In view of the tender being submitted to the Government by S. S. Magoffin and associates to complete the ships on a cost plus commission basis, it is possible that the estimate of Mr. Butt may be required before any definite arrangement can be arrived at. Mr. Magoffin is now on his way to Ottawa and on his arrival there, will at once take up the matter of the contract with the Department of Marine and Fisheries.

Newly Appointed Chief Inspector of Fisheries was also in the Militia with Colonel Gunningham

VANCOUVER, Dec. 9.—Major J. A. Motherwell, assistant chief inspector of fisheries, whose appointment to succeed Col. C. H. Gunningham as chief was announced yesterday, has been with the department of fisheries for many years and was before a real estate man in New Westminster.

Major Motherwell was a member of the New Westminster militia and joined for active service during the war, going overseas with the 103rd battalion. He was wounded in the leg and still has a limp as a result. In the New Westminster militia he was major in the same unit as C. H. Gunningham was lieutenant-colonel.

#### Sir George Foster Marries at Geneva

Bride Given Away by Right Hon. A. J. Balfour, Representative of Britain at League of Nations Assembly

GENEVA, December 9.—Sir George E. Foster, head of the Canadian delegation to the League of Nations, was married here this morning to Miss Jessie Allan at Holy Trinity Church.

The wedding which was a most interesting one, was attended by many of the delegates to the historic assembly, Sir George being one of the spectacular and influential members of that august body.

Special dignity was lent to the occasion by the fact that the bride was given away by a former premier of Britain, Right Hon. Arthur Balfour of the British delegation, one of the best known men in the British Empire, and a prominent member of the famous Cecil family.

Sir George was attended by Hon. N. Wesley Rowell of the Canadian delegation and until recently a member of the Canadian Government, and by Chester Payne of Canada.

Right Hon. Sir George E. Foster, B. A., LL. D., K. C. M. G., minister of Trade and Commerce, was born in New Brunswick in 1847 and is therefore 73 years of age. He has been a member of several Conservative governments and has always taken a prominent part in the affairs of state either on the Government or opposition side of the House of Commons. He attended the coronation of King George and has held many important positions outside of those connected with the Government.

He is well known throughout the country and his marriage comes as a great surprise.

**Monster Pipe Line to the Northern Oil Fields**

Sanction will be Asked at Next Session of Parliament; One Route Proposed to Skagway

OTTAWA, December 9.—The conveyance of the oil products of the Mackenzie River basin to the Behring Sea by means of a monster pipe line from the sea terminus of which the oil would be carried by tankers to the markets of the world is an ambitious project for which sanction will be sought by a bill to be considered at the next session of parliament.

The oil activity seems to be centering now about Fort Norman on the Liard River where a gusher has been reported. The right for the major concessions in the new fields now lie between the Imperial Oil Co. and large Canadian and British interests and there are also some smaller concerns in the field.

The oil is of paraffin base and tests give it very high gasoline properties. Samples have already been brought to the outside world.

One proposed pipe line is from Fort Norman to Skagway a distance of 500 miles. The only hindrance to this route would be the many grades that would be caused by the mountain ranges.

#### Britain Insures Eight Millions

15s. a Week Paid to all Men Out of Work, 12s. for Women and 7s. 6d. to Boys and 6s. to Girls

LONDON, December 9.—Eight millions of British workers become automatically insured against unemployment under the Unemployment Insurance Act of 1920 which has just come into operation.

This new act extends compulsory insurance against unemployment to practically all persons in receipt of remuneration not exceeding £250 a year.

After a "waiting period" of three days of unemployment, beneficiaries become entitled to 12 shillings for women, seven and one-half shillings for boys under 18 and six shillings for girls under 18.

To qualify for benefit an insured person must not quit his or her job without good cause and must not have been discharged for misconduct or have gone on strike. There must also be no refusal of a suitable job offered, and should a dispute arise on the question of "suitability," the insured person may appeal to a court of referees. Not more than 15 weeks' benefit may be drawn in any one insurance year.

Employers are free to set up insurance schemes of their own, giving equal or greater advantages. The state rate of contribution to such special schemes or contracts will not exceed 30 per cent of the amount paid to the general scheme, as it is taken for granted that in industries with insurance systems of their own, the rate of unemployment will be lower than in other trades.

**ENGINEER MINE CLAIM DISMISSED**

Lawyer Fails to Get Fifth Interest in the Estate of Captain Alexander.

VANCOUVER, December 9.—Mr. Justice Morrison has dismissed the claim of Pollard Grant, a lawyer, for a one-fifth interest in the estate of the late Captain James Alexander in the Engineer mine, Allin.

The claim of Grant was based on a document which Alexander alleges was signed by Alexander. The judge stated that the document was not original but a carbon copy, and that Alexander's signature was not witnessed although witnesses were available. "The signature must be 'clearly demonstrable,'" he said. Whether it was probable or improbable that Alexander should have signed is no proof.

Claims for monies and reimbursements for goods allegedly supplied, were also dismissed.

**Whose Boy Was It  
They Buried in London?**

Yesterday we published a picture of the Genolph in memory of the unknown warrior who was buried in London. Let Sir Philip Gibbs tell his story:

It did not seem an Unknown Warrior whose body came on a gun-carriage down Whitehall where we were waiting for him. He was known to us all. It was one of "our boys"—not warriors—as we called them in the days of darkness lit by faith.

To some women, weeping a little in the crowd after an all-night vigil, he was their own boy who went missing one day and was never found till now, though their souls went searching for him through dreadful places in the night. To many men among those packed densely on each side of an empty street, wearing ribbons and badges on civil clothes, he was a familiar figure, one of their comrades, the one they liked best, perhaps, in the old crowd who went into the fields of death and stayed there with great companionship.

It was the steel helmet—the old "tin hat"—lying there on the crimson of the flag, which revealed him instantly, not as a mythical warrior, aloof from common humanity, a shadowy type of national pride and martial glory, but as one of those fellows dressed in the drab of khaki, stained by mud and grease, who went into the dirty ditches with this steel hat on his head, and in his heart the unspoken things which made him one of us in courage and in fear, with some kind of faith, not clear, full of perplexities, often dim, in the watchwords of those years of war.

**Great Folk There  
To Do Homage**

So it seemed to me at least, as I looked down Whitehall and listened to the music which told us that the Unknown was coming down the road. A band was playing the old Dead March in "Saul" with heavy drumming, but as yet the roadway was clear where it led up to that altar of sacrifice, as it looked, covered by two flags hanging in long folds of scarlet and white.

About that altar—the Genolph—there were little groups of strange people, all waiting for the dead warrior. Why were they there, these people? They were great folk to greet the dust of a simple soldier! There were the Archbishop of Canterbury and the Bishop of London and other clergy in gowns and hoods. What had they to do with the body of a soldier who had gone trudging through the mud and muck like one ant in a legion of ants, unknown to fame, not more heroic, perhaps, than all the pals about him, not missed much when he fell dead between tangled wire and shell holes?

There were great generals and admirals, Lord Haig himself, the Commander-in-Chief of our armies in France, and Admiral Lord Beatty, who held the seas, Lord French of Ypres, with Horns of the First Army, and Byng of the Third, and Air-Marshal Trenchard, who commanded all the birds that flew above the lines on mornings of enormous battle.

These were the High Powers, infinitely remote, perhaps, in the imagination of the man whose dust was now being brought towards them. It was their brains that had directed his movements down long roads which galled his feet, over ground churned up by gunfire, up duck boards from which he slipped under his heavy pack—if he were a foot slogger—and, whatever his class as a soldier, ordained at last the end of his journey, which finished in a grave marked by a metal disc.

**Princes of the World  
Bowed to the Unknown.**

In life he had looked upon these generals as terrifying in their power "for the likes of him." Sometimes, perhaps, he had saluted them as they rode past. Now they stood in Whitehall to salute him, to keep silence in his presence, to render him a homage more wonderful, with deeper reverence, than any general of them all has had.

There were princes there about the Genolph, not only of England, but of the Indian Empire. These Indian Rajahs, that old white bearded, white turbaned man, with the face of an Eastern prophet. Was it possible that they too were out to pay homage to an unknown British soldier, who for all we may guess, and who (in our hearts we know) was just one of "the boys" from some little home in a back street somewhere, put through the hard discipline of a home camp, sent out as a draft to fill up a gap, billeted in rat-crowded hams, marched up to the water-logged trenches, told to "stand-to" on the fire-step, ordered over the top, and but one lost unit in that great mass of khaki which fell like autumn leaves in Flanders fields.

The time used is Pacific Standard, for the 120th Meridian west. It is counted from 0 to 24 hours from midnight to midnight.  
 The table given is for Port Simpson but the time for Prince Rupert varies only a few minutes on some days and on others is the same. The range of the tide may be computed as 5 per cent greater at Prince Rupert than at Port Simpson both at springs and neaps. Therefore the rise in the Prince Rupert harbor is slightly greater than Port Simpson.  
 The height is in feet and tenths of feet above the average level of lower low water.

**ACCUSED OF MURDER TAKES FIRST RIDE IN AN AUTOMOBILE**

KINGSTON, Dec. 9.—James Young, a farmer of Kalever Township in the county of Lennox and Addington, arrested in connection with the death of his wife, whose charred remains were found in the cellar of his home following a fire, took his first ride in a motor car when transported to the jail at Napanee. Noticing a German cannon, a war trophy awarded the town, Young inquired what it was. The information apparently conveyed little to him.  
 "Didn't you hear about the war?" asked the Provincial police officer.  
 Young replied that he had heard some of the fellows talking about it a while back, but didn't pay much attention.

There is great suffering in Central and East Europe at the present time. Pestilence and famine are raging in that part of the world. The children are hungry and calling out for bread. They are dying from starvation and disease by the thousands. Is it right that the people of North America and other parts of the world who know nothing about famine conditions as they exist in Europe should be unconcerned about the misery of those poor people? Does it not seem that there is a clarion call ringing out to all people who have a little to spare, to come forward at this generous season to relieve suffering where it exists in its most dreadful form?

**In the Letter Box**

**FAMINE IN EUROPE**  
 Editor Daily News.—The Christmas season is at hand. It is a time when people are controlled by spirit of kindness, of charity and of sacrifice. That is what Christmas means. If ever selfishness should be banished, it certainly should be at Christmas. The keynote of the season is "Peace on earth, goodwill to men."

Our own country, Canada, rejoices this year in that she has harvested the second best wheat crop in ten years. United States is in a similar position with abundance of wheat and corn. Both of these countries can spare many shiploads of flour to starving Central and Eastern Europe without feeling it. If every man, woman and child in Canada does a little it will go a long way to help those people. Surely we cannot enjoy our own Christmas with the knowledge of millions crying for food not so very far from our door.

If every city in Canada and every large country community would make an effort during the present month to see how much flour they could spare to those unfortunate people, I have no doubt Canada could raise a sufficient amount to send several shiploads—"Santa Claus" ships—across the Atlantic. It would be one of the noblest works ever done by any country.

### BOILS SO BAD HAD TO GIVE UP WORK

From the days of Job, up to the present time, boils have been one of the afflictions of the human race.

As the pus-filled and itching you may do will not prevent them from breaking out again.

Boils are simply caused by the bad blood bursting out; and the bad blood must be made pure before the boils will disappear.

Burdock Blood Bitters, which has been on the market for over forty years, is well known as the greatest blood medicine procurable.

It purifies the blood by removing every particle of foul matter from the system, and when this is done the boils vanish, and you should never be troubled again.

Mr. James A. Sney, Newport Island, Que., writes: "I was troubled with boils on my back and neck, so bad that I was obliged to give up work. I tried several remedies but got no relief. Finally I went to a doctor, and he treated me for several weeks, and all without benefit. At last a friend told me of Burdock Blood Bitters, so I decided to give it a trial. I got three bottles, but before I had taken two the boils were all gone. In a short time more, and I have had no return of the old trouble, and have never felt so well."

### AUSTRALIA ABOUT TO ASSIST IMMIGRATION

Various States to Co-operate with Commonwealth and Shipping To Be Provided.

LONDON, Dec. 9.—A unified scheme of assisted immigration is about to be established by the Australian Commonwealth Government, according to the Hon. E. D. Millen, Minister of Repatriation, who has arrived in London.

The various State Governments which in the past handled their immigration problems themselves have recently reached an agreement with the Commonwealth Government and under this a uniform system of recruiting and transporting emigrants will be established. At the Australian end there will be a supplementary organization, which will receive the newcomer and care for and place him in employment. An important section of the work is to be the provision of the necessary shipping facilities. While the door will be open to all classes, Mr. Millen stated that the settlement of the land is the main objective. At the same time the London headquarters will be kept in close touch with the labor situation in Australia, so that both skilled and unskilled immigrants will be absorbed as occasion requires.

### ITALIAN DROWNS IN GAS BOAT ACCIDENT

Tank on Deck Explodes from Contact with Open Light—Drowning and Miraculous Escape

ANYOX, Dec. 9.—One Italian was drowned and three others badly burned as the result of a gas boat fire in the bay on Sunday night. A small boat was coming across bearing a number of Italians to town when one took a lighted carbide light too close to a gasoline tank on deck. An explosion occurred and the boat soon became a mass of flames. The men in it had to take to the water for their lives and the most of them hung on to the blazing craft until rescue was brought from shore. One of them, however, could not hold on and sunk in the icy waters. The boat is a complete loss. The man who was holding the carbide light came through without a scratch or wound of any kind.

Two-color window cards take the eye quickly. See them at the News Job Department.

### NITRE COCKTAILS PLACE OF LIQUOR

Consumption of Injurious Drug is Said to be Increasing in States

BOSTON, Dec. 8.—Nitrate cocktails, as a substitute for the once popular Bronx, has come into favor since the advent of prohibition, according to information given out by William S. Briry, director of registration in the State Department of Drug Control. He said the department had noticed a tremendous increase in the sale of sweet spirits of nitre, and had found that the drug was being used as a substitute for liquor "among the better classes."

He called attention to the danger in the practice, as he said the drug contains alcohol, sodium nitrate and sulphuric acid, which is a solvent of metals.

## ALASKA IS NOT A COMPETITOR PULP INDUSTRY

Only One Small Plant Being Installed, but None so far in Operation

### LARGE TIMBER AREA BUT IS UNDEVELOPED

Conditions Not Such as to Encourage Investors to Come, says Report

WASHINGTON, Dec. 9.—That the Alaskan pulp and paper industry still has a very long way to go before the far northern state can challenge Canada's leadership in that field is disclosed in the annual report of the Secretary of the Interior just issued. Alaska's forestry resources and their development have been the subject of much discussion within the past few months and it has been predicted on this side of the line that Alaska paper would be on the market in large quantities in competition with the product of Western Canadian mills. The section devoted to Alaska in the Interior Department report shows, however, that while preliminary steps are being taken towards the development of the industry, only one plant has actually been projected to date. This is a small pulp plant which is in process of construction at Port Snettisham. It is declared it will be ready for the manufacture of pulp by next spring. A preliminary sale of 100,000,000 feet of timber has been made to this company.

#### Pulp and Paper

"A number of companies interested in the manufacture of pulp and paper are negotiating for leases of timber, and when the offered leases can be smoothed out, so as to offer satisfactory terms, doubtless several mills will be established," says the report. "The leases now offered by the Forest Service cover a period of 30 years, with an allowed two-year period for construction; the stumpage rate is set for the first five years and a maximum stumpage rate for the following five years. For the remaining five-year periods the Forest Service reserves the right to fix the stumpage on prevailing timber rates in the district, but will fix no exact basis on which the revaluation will be made. This is the stumbling block, and to the governor it appears to be a short-sighted policy to keep out industry for fear that a proper price for future stumpage will not be received.

#### National Forests

"There are two great national forests in Alaska—the Chugach, comprising 5,130,201 acres, and the Tongass, comprising 15,449,530 acres. The total receipts from the Tongass and the Chugach National Forests for the fiscal year ended June 30, 1920, were \$106,921.48. The total cost of administration of the two forests for the same period was \$6,393.94. The Department of Agriculture, in co-operation with the Territory, has definitely outlined a road-building program within the national forests; co-operative agreements have been approved and a number of projects are now under construction by the Bureau of Public Roads."

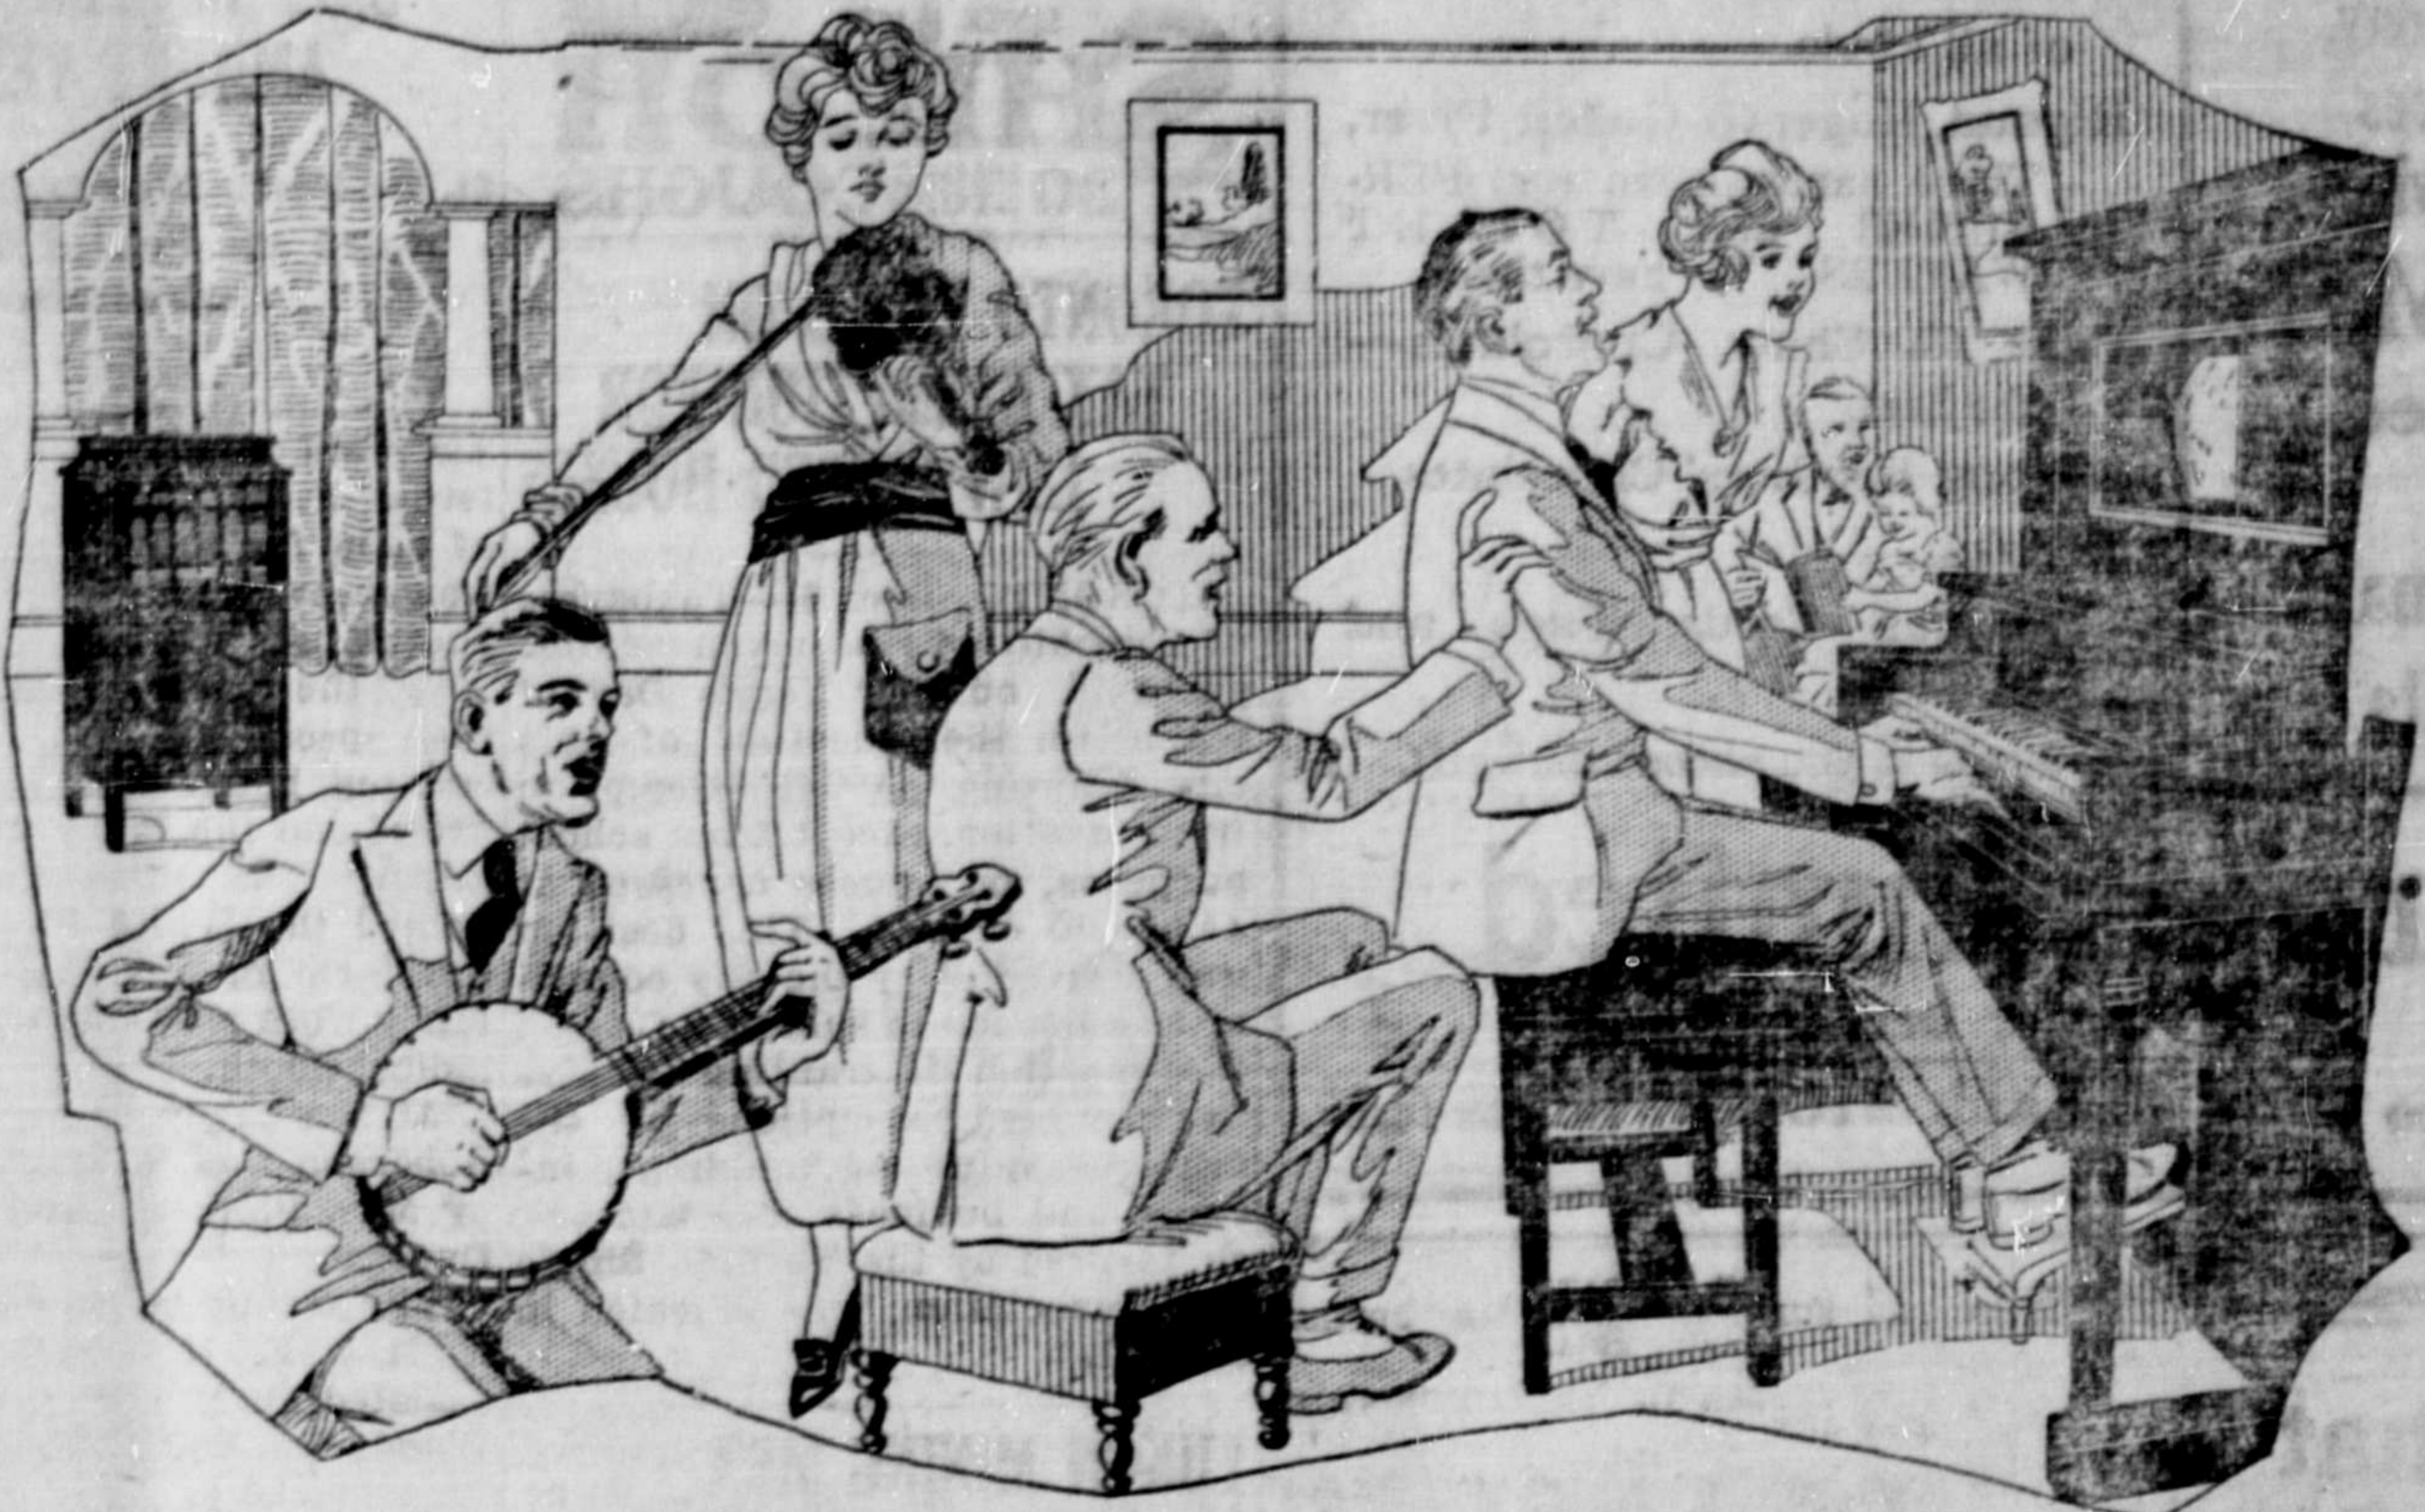

#### Forest Resources

The report of an advisory committee which was appointed last April to advise the Secretary of the Interior as to what steps to take to develop Alaskan industries, contains the following statement of Alaska's forestry resources:

"The best timber in Alaska, chiefly composed of Sitka spruce and hemlock, is in the Tongass National forest, in southwestern Alaska, and in the Chugach National Forest, in the Prince William Sound region. These two forests embrace 20,000,000 acres, approximately 25% of the total area of Alaska. Between these two forests lie about 2,000,000 acres of timber of similar character. In the interior there is approximately between 50,000,000 and 75,000,000 acres of spruce, birch and cottonwood. This is chiefly valuable for local use."

"The national forests are estimated by the Forest Service to include 77,000,000,000 feet of timber suitable for lumber and pulp."

## Everybody's happy when there's Music in the home!

Where there's plenty of life and melody—where the evenings pass quickly and pleasantly in music and laughter—the young people want to stay home.

Young people revel in music.

Listen to the girl humming the newest dance melody as she goes blithely about the house!

Listen to the boy whistling lively airs as, with springing footsteps, he sets out for school or work!

Music is in you—part of your very being. You absolutely need music.

The man who said he couldn't afford a piano or a phonograph was wrong. Eventually he bought both and now declares he couldn't afford to be without either.

Now's the time to get more music into your home. Go to your music dealer and let him show you how easy it is for you to own a piano, player, phonograph or any other musical instrument.

**ROWELL SLATES THE  
EUROPEAN STATESMEN**

Says Canada has Paid Price of  
50,000 Dead Soldiers for  
Them

GENEVA, Dec. 9.—Liveliest  
emotion was experienced in the  
assembly of the League of Nations  
here yesterday when Hon. N. W.  
Rowell, representative of Canada,  
expressed his views regarding  
European statesmanship and  
started the diplomatists of the  
Old World.

The debate arose over the re-  
commendation that the assembly  
propose to the government of the  
nations that they set up three new  
organizations, finance, transit and  
health, with annual conferences.

Mr. Rowell objected on the  
ground that it was impossible for  
the distant countries to send their  
best men abroad four times a  
year. The result would be to  
throw the organization under  
European influence.

"Fifty thousand Canadian sol-  
diers lie under the sod in France  
and Flanders and represent the  
price that Canada has paid for  
European statesmanship," cried  
Mr. Rowell.

**SHORT OF BREATH**

Could Hardly Walk  
Without Resting.

When you go to a physician to be  
examined for any heart trouble, one of the  
first questions he asks is: "Are you short  
of breath?"

Now, when the heart becomes affected  
there ensues a feeling of a choking sensa-  
tion, a shortness of breath, palpitation,  
throbbing, irregular beating, smothering  
sensation, dizziness and a weak, sinking,  
all-gone feeling of oppression and anxiety.

On the first sign of the heart becoming  
weakened or the nerves disturbing al-  
lura's Heart and Nerve Pills are just the  
remedy you require. They regulate and  
stimulate the heart, and strengthen and  
restore the whole nerve system.

Mr. Stephen Crosse, East Clifford, N. S.,  
writes:—I suffered for five years with  
heart trouble. I could hardly walk from  
the house to the barn without resting as  
I used to get so short of breath. Doctors  
could not help me. My wife told me to  
get a box of Allura's Heart and Nerve  
Pills and I felt better after taking them;  
three boxes made me quite well. I am  
now helping my son to work on the farm,  
and can truthfully say I feel like a differ-  
ent man.
