Everyone Pleased Asquith Elected.

Everyone will be pleased that Former Premier Asquith was elected member for Paisley, not because they desire the defeat of a labor candidate, but because they like to see a man who has done such noble service for his country given a seat once more in Parliament.

Mr. Asquith is 68 years of age, a barrister by profession, Prince Rupert, B. C., as owner in tary and since that time has been one of the most prominent and being in the city of Prince Rupert, figures in the House of Commons. He became Prime Minister in 1908.

Some people yet look to Mr. Asquith to lead a Government, but we do not share that view. Times are changing and Mr. | fected by publication in the Daily News) Asquith's liberalism is of an old fashioned type. He will be listened to always with respect and his views will have weight in the House, but he can hardly aspire again to leadership.

Careless Spending

Leads to Trouble.

Financial and other papers are still issuing warnings and much more boldly as the days go by. These warnings against taking too many chances in business should not go unheeded. We do not look for bad times in Prince Rupert, in fact much the opposite should be the case, but if the rest of the country is in difficulties we may share them to some extent. The following is a sample of what is being written:-

"Men high in the councils of Canadian finance are agreed that all portents point to an impending stringency of the money markets of this country, and they advise the public to prepare for the inevitable and seek to mitigate its most serious consequences. The causes for the impending pinch are partly those of world-wide extent, but predisposing factors are the orgy of extravagance in which Canadians have indulged, unjustificale speculation, and the over-inflation of Canada's currency, all of them within the control of the Canadian people or their government. Business has been brisk, industries have been working rince Rupert, B. C., this 20th day of overtime, wages have been high, returned soldiers have been spending their gratuities and in many cases refusing to work to Paul Hartman, Esq., while they had a dollar left-in short, there has been a flood of easy money in the Dominion. As a consequence, too many Canadians have lost all their sense of proportion and all their instincts of thrift and caution. They have been living up to or beyond their incomes. They have been buying expensive automobiles, jewelry, fur and other luxuries. Allured by the seductive representations of brokers, they have been withdrawing ter a Tax Sale Deed from the Collector of money from legitimate business enterprises in order to speculate in active stocks or invest in securities which promised large returns. There has been a riot of spending and a lessening of saving and of production, and now the time is at hand when the cost must be counted and the bill paid.

While the inevitable squeeze cannot be averted, say the experts, its worst effects can be minimized if the people of Canada take warning in time, curb their senseless and unnecessary expenditures, turn their surplus funds to judicious uses, and devote their energies to the work of the nation. Security issues should be cut to the limit and restricted to the actual needs of business and industry. The market is overstocked now with paper, much of it of little real value so that reputable enterprises find it diflicult to secure necessary funds. In the United States the last Liberty Loan, and in Canada the last Victory Loan, are still largely undigested, and it is apparent that the point of saturation has been about reached, and that the reaction cannot be long delayed.

The course outlined for the private citizen should be also obligatory upon the Dominion and the Provincial Governments which should practice the same rigid economy and scrutinizal every proposed expenditure as closely as does the honest man who finds himself overburdened with debt. The Governments made for a Certificate of Indefeasible Title have been setting the bad example of careless spending, and should now lead the way toward national retrenchment. The United States Treasury has given a lead by redeeming its floating of October, 1918, (the date on which the indebtedness, and the action of the British Government in retiring some £20,000,000 in paper money is also a step in the right direction. Perhaps the Dominion Government cannot at the moment follow either of these models, but each minister can at least pare his estimates to the quick, resist the constant importunities for less you take and prosecute the proper unjustifiable appropriations, and so help in a measure to prepare any, to the said lands, or to prevent such Canada for the lean days that are coming.
