## 2,000,000 Belgians Depend on us for Bread!

Since shortly after the German invasion, the Belgians have depended for food entirely on the "Commission for Relief in Belgium". Their own store of food, even if not destroyed or pillaged, would last only three weeks—they have had no chance to raise more and the ruthless Germans refuse to supply them!

Backed by the

## Belgian Relief Fund

so generously contributed in the British Empire and the United States, the neutral Belgian Relief Commission has imported enough wheat, flour and other foods to feed the whole nation so far. The great majority of the 7,000,000 Belgians left in the country have been able to pay for their daily allowance of bread—but a steadily growing number have no money left.

Unless we are willing to let these hundreds of thousands of women, children and old men starve, they must be fed at the expense of the Belgian Relief Fund. To make this possible someone must contribute nearly \$3,000,000 a month—every month-all this winter!

No people under the Allied Flags are as well able to contribute generously as we Canadians! No cause has ever been more deserving of help! In the name of Justice and Humanity for the sake of our own self-respect—let us give all we can to help our martyred Allies!

# The Tale The Wagons Tell

My office window faces a street, close to the railway freight heds.

All day long a steady stream of trucks and lorries lumber byloaded with boxes, barrels and bales.

One truck I noticed the other afternoon was particularly interesting. No two boxes were the same, and stencilled on the end of each was the name of some well-known product-soap, tobacco, socks, breakfast food, cocoa, port, tea, chocolates, perfumery and baking powder.

Gathered there in prosaic wooden boxes were the results of thousands of hand's labor in all parts of the world.

The cocoa had been grown in Brazil, shipped to Bristol, transhipped to Montreal and finally distributed from Toronto.

ered by swartskinned natives of the romantic island of Ceylon; from sunny Portugal the luscious, big grapes had been gathered years ago, fermented, bottled and branded with a famous name; from Egypt had come the cotton and from South America the dyes that entered into the product finally stamped with the brand of a well-known hosiery.

There, behind that obviously prosaic truck-load of freight was the whole romance of modern commerce—the skilled production, the universal demand for food, drink and raiment, and the world-wide distribution of the things we use every day.

And then I speculated why we use these things every day, instead of some other things; and that brought me plump back to my own job of advertising.

The names of some of the boxes on the lorrie were known everywhere to-day, but had been unknown a few years ago; and I saw then more clearly than ever before that Advertising is really a great channel digger. It is like the Panama Canal. You can sail from Montreal to Vancouver now, around the Horn. You can get there, but it is going to take months. A year or so from now you will sail through the Panama Canal and chop the journey to less than half. A new channel will have been dug.

The great names in commerce to-day are those of the manufacturers who have let modern advertising steam-shovel a channel across the isthmus of distributing difficulties.

The great names in the commerce of to-morrow will be those of men who widen and dredge this channel so that the greater traffic may pass smoothly and quickly from the source of production to the homes of the consumer.

" TO win the war with the decisiveness which will ensure lasting peace, the Empire will require to put forth its full collective power in men and in money. From this viewpoint it is our true policy to augment our financial strength by multiplying our productive exertions and by exercising rigid economy, which reduces to the minimum all expenditures upon luxuries and non-essentials. Only in this way shall we be able to make good the loss caused by the withdrawal of so many of our workers from industrial activities, repair the wastage of the war, and find the funds for its continuance. It cannot be too frequently or too earnestly impressed upon our people that the heaviest burdens of the conflict still lie before us, and that industry and thrift are, for those who remain at home, supreme patriotic duties upon whose faithful fulfilment our success, and consequently our national safety, may altimately depend."SIR THOMAS WHITE.
