#### AMERICANS PREPARE TO ARM VESSELS

Merchant Ships Will Be Ready Effectively to Combat the Sub Menace, Backed by Whole Nation.

(Special to The Daily News.)  
Washington, March 12.—The American government has begun actual preparations to put American merchant vessels in an effective state of defence against the ruthless submarine campaign of Germany against neutral shipping. Special naval gun and gunners will be placed on board every American vessel sailing for the barred zone, and special war risk insurance will be made available. It has been made clear to the shipowners that the entire resources of the United States are ready for instant action should the neutrality of the American vessels be violated by the German submarines, after the warning given the German government by the United States.

#### MORE AMERICANS IN JEOPARDY

(Special to The Daily News.)

A wire from London states that the Norwegian steamer Storstad, carrying supplies for the Belgian Relief Commission has been torpedoed. Only thirteen of the crew have been saved.

#### CITY OF THE GALIPHS FALLS TO BRITISH ARMS

(Special to The Daily News.)

London, March 12.—According to the latest advices, Baghdad is now in possession of the British army operating from the Persian Gulf. The ancient city, full of mosques and smells, is forever gone from the sway of the Turk. British Tommies are treading in the footsteps of Haroun-al-Raschid and the jingle of British accoutrements re-echo in the narrow streets, within whose radius took place the scenes recorded in the Tales of the Arabian Nights. Baghdad, situated on the principle trade routes between the East and the Farther East, was the great emporium for trade of all kinds. It is the great distributing centre, the greatest east of Constantinople. Like most Eastern cities, it looks best from afar off. Its towers and minarets showing up on the desert horizon appear to be that of some fairy city, but its romantic appearance disappears on closer acquaintance. The first principles of sanitary measures are unknown to the Turk, and Baghdad has well been termed the City of Smells.

Now that it is in British hands, its importance as a trading centre will grow to even greater importance, and the affect of its capture will be very great on the Eastern tribesmen.

The British forces are now reported to be on the other side of the city in pursuit of the retreating enemy. With the Russians closing in on the north, Eastern Turkestan will be cleared and the Turkish forces will be forced back to Syria and Asia Minor.

The full importance of the capture of Baghdad cannot yet be estimated.

#### GOT FORTY-EIGHT ENEMY SUBMARINES

New York, March 10.—A monster fleet of 500 trawlers from Grimsby, Hull, Leith, Yarmouth, Lowestoft and other North Sea fishing ports, aided by fast destroyers and patrol boats, is guarding the mouth of the English Channel and Irish Sea with many devices for catching and destroying submarines, according to passengers who arrived here yesterday.

One passenger said that when he was at Devonport Dockyard on February 24, one of the Admiralty officials informed him that the German navy was credited with having 100 submarines of all sizes, from the old type of submersible, 90 feet long, to the latest U boat from Kiel, ranging from 195 to 230 feet in length. The result of the defensive moves on the part of the Admiralty was that the mosquito fleet had destroyed or captured 48 by Feb. 16, which caused the big decrease in the number of vessels torpedoed after that date.

Very few of the submarines were captured and taken into port, it was said, as it was too much trouble to raise them. A few were taken on the surface after they had been disabled by bombs from aeroplanes. Others were destroyed by bombs from trawlers after they had been tangled in steel nets.

#### SIR SAM IN NEW YORK

(Special to The Daily News.)

New York, March 12.—According to reports, Sir Sam Hughes, as a representative of the British army, came to New York to confer with the United States army officers. On being interviewed, Sir Sam insisted that he came on personal business, but finally admitted that there had been a conference.

#### THE LLOYD GEORGE POISONING CASE

(Special to The Daily News.)

London, March 12.—The trial at the Old Bailey in London of the four persons accused of conspiring to murder Premier Lloyd George and Mr. Arthur Henderson was concluded on Saturday. Mrs. Alice Wheeldon, her daughter, Mrs. Winnifred Mason, and the husband of the latter were found guilty of conspiracy to murder. Mrs. Wheeldon was sentenced to ten years, Mrs. Mason five years and her husband, Albert Mason, to seven years penal servitude.

#### OFF TO FIGHT

(Special to The Daily News.)

Victoria, March 12.—The members of Shackleton's expedition to the South Pole who have been marooned for two years within the Antarctic circle, have now reached Victoria. They are on their way to offer their services in their country's cause. They had to tell of many trials and hardships endured for the two long, weary years, with nothing but a gramophone and an encyclopedia to pass the time. The gramophone records certainly saw some service, and having no other mental pabulum, the assimilation of the encyclopedia has caused the returned members of the expedition to bristle with facts.

#### MINISTRY CALLS FOR POLICE WOMEN

London, March 8.—The Ministry of Munitions has sent out a call for 300 women for police duty in the areas in which government work is being done by women. Already there are 700 applicants.

The women police are given a training of about three weeks. They are taken out in small parties to the various police courts where they learn the elementary particulars as to how offenders are brought before a magistrate, how a case is presented, how evidence is given, etc. Other instruction is given as to how to deal with the questions of cruelty to children and especially the working of the factory acts. Their own drill is an important matter as they are taught how to walk and how to wear their uniforms as with authority.

#### HALIBUT ARRIVALS

The Commonwealth, belonging to the Booth Fisheries, Ltd., has arrived with 20,000 pounds. The Pioneer, also arrived with 20,000 pounds, and the Arctic has 15,000 pounds. The temporary car shortage, thanks to the energetic endeavors of the G. T. P. officials, has been overcome, meantime. The G. T. P. staff say that they are doing all in their power to obtain the prompt return of refrigerators.

#### WIRELESS PLANT AT MEXICO CITY

Washington, March 10.—Information has reached the government that through the perfection of a powerful wireless telegraph plant in Mexico City direct communication between the Mexican capital has been established with Germany. Officials realize that if confirmed this news is of great importance, and an investigation has been ordered.

Through connection by way of Mexico City with the land telegraphs leading into the United States, Germany would be able to secure complete exemption from the censorship now imposed by the American government at the wireless stations at Sayville and Tuckerton, and by the British and French governments in their control of the Atlantic cables.

Far-reaching possibilities thus would be opened for the violation of American neutrality, or even the menacing of the national safety in the critical situation existing. Sea raiders and submarines might be directed, and full information concerning the departure of ships from American ports furnished. German agents in this country might keep in close touch with Berlin, and in case of war even more serious results might follow.

From the semi-official sources information has reached Washington that secret meetings are being held by Germans in Vera Cruz and Monterey to determine upon uniform action by Germans in Mexico in the event of an outbreak of war between the United States and Germany.

#### CHANGE OF EMPERORS WANTED IN GERMANY

"If the fortunes of war are finally decided against the German Empire, then every one will awake to the fact that, in her own interests, the Hohenzollerns absolutely must, voluntarily or compulsory, be relieved of their imperial functions." Such is one of the statements contained in the pamphlet recently published in Germany and promptly suppressed by the government there. It continues: "A mere glance at the newspaper articles of our enemies makes it obvious that in the Entente countries governments and people alike feel a deadly hatred for the present German emperor. It is against the Kaiser and his son that the most venomous attacks are directed. They are held responsible, not merely for the outbreak of the war, but also for all those acts of war about which our enemies assert that they are justified in complaining. This being so, how can anyone still believe that Britain, France and Russia will ever consent to negotiate with the present principle personages in Germany—that is to say, with William II. and his son?"

"We should remember the magnanimity with which Napoleon abdicated his position of Emperor, in order to enable his country to conclude peace and to obtain more lenient conditions from the victor. Is William II. capable of making such a sacrifice for the German nation as Napoleon made for the French nation?"

I am convinced that the Entente countries will be willing to resume peaceful commercial relations with a Germany which has rid herself of the Hohenzollerns. It would no doubt even be possible to approach the subject of colonies. If it were possible by a change of dynasty to give the Entente a guarantee that the influence of this party has once and for all been set aside and that the much desired 'place in the sun' will be no longer interpreted as meaning that everyone else is excluded therefrom, but in the sense of all sharing it alike, then a Greater Germany might emerge from this calamitous war."

This pamphlet, of which the above are extracts, shows very clearly the trend of thought of a large portion of the population of the German empire, but not including the Prussians. From this it seems to be realized that the Hohenzollern ideas and the further progress of Germany are incompatible. Just as France and Napoleon had to separate, so will Germany and William. It is interesting to note that this was written in Bavaria, the one part of Germany where the people have the freest constitution, and where the voice of the people is paid most attention to.

#### ADVANCE BY THE BRITISH CONTINUED

In the Ancre Region the British Forward Movement Carries For Three More Miles—4 ns Captured.

(Special to The Daily News.)

London, March 12.—The advance against the retreating Germans was continued today for more than three miles on the Ancre front. The village of Arles has been attacked and captured from the enemy. The neighboring defences to the northeast of Grandcourt have also been taken and the enemy ejected. More than one hundred German prisoners were captured and with them fifteen machine guns. The Germans are fighting stubbornly in their retreat, but the pressure of the British never relaxes.

Paris, March 12.—To the south of the Ancre the fire from our batteries exploded an enemy munitions depot near Lechelle St. Aurin. Artillery fighting in the sectors of St. Hilaire, Legrand and Mais ns de Champagne is going on in a very spirited manner. There is no infantry activity, the state of the terrain owing to the general thaw, making the movement of troops very difficult. The bombardment on the remaining part of the front is of an intermittent character. Our special anti-aeroplane guns have brought down an enemy aeroplane.

#### GETTING UNDER WAY IN THE PROVINCIAL HOUSE

(Special to The Daily News.)

Victoria, March 12.—This week promises to be a very busy one in the Provincial Parliament. Among the matters on the agenda for the week are, the new regulations to govern the civil service, the establishment of a superannuation fund, irrigation problems, arrangements for the completion of the P. G. E., and proposals for the establishing of the sugar beet industry.

#### VERY BUSY TIMES AT THE COLD STORAGE PLANT

With that perverseness which sometimes shows itself in human affairs, after waiting for weeks for supplies of herring to be frozen for bait, supplies are coming in faster than they can be handled. The freezing plant at Seal Cove is working to its fullest capacity, and has been all last week. It is reported that the Cold Storage people have had a scow load for themselves waiting to be frozen since Tuesday last, and up till Saturday, owing to the immense arrivals, it had been found impossible to get round to it. And the herring are still on the run.

The Baptist ladies will hold a 15c tea at the home of Mrs. Hal Peck, Fifth Avenue, next Wednesday, from 3 till 6 p. m. 61

**FREEDOM OF THE ATLANTIC**

Probably the earliest result of the United States break with Germany will be that instead of being able to blockade Great Britain, France and Italy, the Teutonic powers will be forced back more and more into the recesses of their own sheltered waters, and will be deprived not only of the freedom of the seas generally, but of the freedom of the Atlantic absolutely. It is difficult to see at the moment what more important work the United States can do as an ally of the nations that are fighting for freedom on land and sea than that of organizing a naval system that will render it totally impossible for any German craft to ply its nefarious trade on the ocean routes connecting America with Europe. Japan has co-operated all along in just this way. The Japanese government has not sent an army to Europe, neither have they sent a naval squadron to fight the fleets of Germany or Austria, but they have swept the enemy from land and sea in the far East and are now co-operating in other and very effective ways. It should be the more immediate duty of the States to carry this policy to even greater length. It will be her first duty to show that Germany cannot sink her peaceful merchant ships without warning and drown her peaceful citizens with impunity. She can show this in the most practical manner possible by sinking and seizing every German ship she can lay her hands on. By doing so, and rendering the Atlantic as dangerous as the North Sea now is for the piratical craft with which Germany is evidently making her last wild gamble in the world war. The United States will be acting exactly in line with the purposes which have dragged her into the struggle and will be doing for the European Allies the greatest service she can do in the early stages of her participation in the war.

There are two ways in particular in which such work on the part of the United States should be of assistance to the Allies, especially to Great Britain. For rendering the Atlantic safe. The largest and the fastest of the German liners hitherto interned in her ports can be utilized as armed

cruisers. Thus the onus of sinking their own ships, if they can, will be thrown on the German submarines. This will release similar British vessels for other purposes, and thus relieve to some extent, the serious shortage of tonnage. And by commissioning all the four or five score of laid-up German steamers and sending them out for general service on the trade routes of the world, preferably on the North Atlantic, she will at once throw some half a million tons gross of carrying capacity into the work of defeating Germany.

This is a work that lies ready to the hands of the United States, that requires no months or even weeks of preparation, and that will do so much to defeat the nation that has flouted them, that the war is almost certain to be over before their participation in regular fighting is required.

The United States has all along had an exceedingly difficult part to play. As an ally in the war, she will have a peculiar part, a part which only she can play, a part of very great importance, and one in which she will be fighting Germany in a sense in which no other nation is. She comes into the war as a great international moral force, which has been outraged by the brutality of one of the combatants, and her duty is to teach that brutal combatant that the freedom of the seas is not for those who abuse it, but for those who use it for the upholding of high principles and the welfare of the world.

**NOTES AND COMMENTS**

The British have taken over more of the French front and their line now extends some distance south of the Somme. To General Haig has been entrusted the job of capturing Peronne as well as Bapaume. The advance of his troops east of Bouchavesnes indicates that he is already moving with that object in view. His progress at this point should shortly uncover the enemy's batteries on Mt. St. Quentin, which is the key to Peronne and the chief obstacle to a British advance across the Somme Canal south of that town.

The British line in France is now thirty miles longer than it

was last summer. This releases some 250,000 French troops for service elsewhere. France evidently is keeping a wary eye on the Swiss border and even the revival of Hun activity in the Verdun region will not divert her attention. She apparently has an "army of manoeuvre" for all emergencies. The Germans know what this is; they ran into it at the Marne.

Thus pertinently says the Edmonton Bulletin: "An exchange, which supports the Borden Government, points out that the much-maligned Canadian cruiser Niobe has rounded up sixty-five German merchantmen since the war began, only two ships in the British navy having larger catches to their credit. Also that the Niobe failed by only a few hours to intercept the Kronprinzessin Cecilie when the war began, with \$7,000,000 in gold aboard. That failure, it is to be noted, would likely not have occurred but for the fact that the Niobe had been dismantled and tied up at the dock at Halifax months before, and time was unavoidably lost in getting it to sea when the need for action arose. The naval policy of dismantling the few warships we had cost Canada that seven millions in gold, a first-class liner, and the credit that would have been gained by the capture."

2,000,000 Belgians Depend on us for Bread!

Since shortly after the German invasion, the Belgians have depended for food entirely on the "Commission for Relief in Belgium". Their own store of food, even if not destroyed or pillaged, would last only three weeks—they have had no chance to raise more—and the ruthless Germans refuse to supply them!

Backed by the **Belgian Relief Fund**

so generously contributed in the British Empire and the United States, the neutral Belgian Relief Commission has imported enough wheat, flour and other foods to feed the whole nation so far. The great majority of the 7,000,000 Belgians left in the country have been able to pay for their daily allowance of bread—but a steadily growing number have no money left.

Unless we are willing to let these hundreds of thousands of women, children and old men starve, they must be fed at the expense of the Belgian Relief Fund. To make this possible someone must contribute nearly \$3,000,000 a month—every month—all this winter!

No people under the Allied Flags are as well able to contribute generously as we Canadians! No cause has ever been more deserving of help! In the name of Justice and Humanity—for the sake of our own self-respect—let us give all we can to help our martyred Allies!

# AUTOINTOXICATION OR SELF-POISONING

The Dangerous Condition Which Produces Many Well Known Diseases.

## HOW TO GUARD AGAINST THIS TROUBLE

"FRUIT-A-LIVES" — The Wonderful Fruit Medicine — will Protect You

Auto-intoxication means self-poisoning, caused by continuous or partial constipation, or insufficient action of the bowels.

Instead of the refuse matter passing daily from the body, it is absorbed by the blood. As a result, the Kidneys and Skin are overworked, in their efforts to rid the blood of this poisoning.

Poisoning of the blood in this way often causes Indigestion, Loss of Appetite and Disturbed Stomach. It may produce Headaches and Sleeplessness. It may irritate the Kidneys and bring on Pain in the Back, Rheumatism, Gout, and Rheumatic Pains. It is the chief cause of Eczema—and keeps the whole system unhealthy by the constant absorption into the blood of this refuse matter.

"Fruit-a-lives" will always cure Auto-intoxication or self-poisoning—as "Fruit-a-lives" acts gently on bowels, kidneys and skin, strengthens the bowels and tones up the nervous system.

50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-lives Limited, Ottawa.

## HONG KONG ALMOST DENUDED OF ITS MEN

The last of the available men to leave Hong Kong came through Vancouver last week to join the British forces in France.

It was explained by one of the party that they had great difficulty in getting away, since the British colony is almost denuded of white men, and it is absolutely essential to keep patrols going on account of the large number of white women and children there in the midst of a great multitude of Chinese.

Perhaps outside of India, there is no place in the world where so many defenceless white dependents are now located while the men are away, amid a race alien in faith and color. Those are circumstances which have forced military drill and patrol among those who remain, and it is admitted that apprehension exists whether the white residents may be spared an outbreak before the war terminates, such as occurred at Singapore early in the war.

The German propaganda, particularly in trade, is continuing in some parts of China, openly in some of the northern ports, and from Hongkong under Dutch guise. After the German firms were liquidated by the Colonial Government, it was found that gradually men were arriving from The Netherlands, without attachment to any particular firm, and certainly not to the reputable Dutch merchants who have traded for years in the Orient. Gradually they went into trade. It is believed they are working for the German traders of Hamburg, and elsewhere, and holding the fort till the war ends, so that the German commercial establishments can reopen in the Orient. One of the reasons given for the continuation of German trade in China after the blockade by the British fleet, is that the Germans were warned of the coming struggle, and accumulated vast stocks of imported articles, so that they could carry on trade when supplies were cut off.

**TURK ATROCITIES**

Reuter's Agency learns that information, received in authoritative quarters in London, shows that the Turks are carrying out a deliberate policy of destruction of Arabs, having apparently for its object their extermination, as in the case of the Armenians.

In pursuance of this object, they surrounded the whole region of Lebanon with a military cordon, thus preventing any food getting through, with the result that about half the Christians and Druse Arabs in that zone have died of starvation. They have devastated Syria and Palestine. On the pretext of getting fuel, olive trees and orange gardens have been ruined.

They have deported large numbers of the most illustrious Arab families, and have hanged on the flimsiest pretext all Arab leaders on whom they could lay their hands, no matter whether they were pro or anti Turk.

In the matter of the agricultural population they have pressed them more heavily with conscription than any other section of the Turkish people, and have exposed them on all the worst fronts. Such individuals as have been left behind have been infected by typhus by deliberately sending into the villages typhus-stricken Armenians to act as carriers of disease. Fortunately, however, Arab vitality is very strong.

The Turks are trying to do away with the Arabic language, and also to eliminate Arabic from the Mohammedan religion by introducing non-Arabic prayers.

Mr. David Straag, late of the provincial government office here, left last night for the southern route to Australia.
