FRENCH BIG GUNS SMASH GERMAN DEFENCES

ARTILLERY BATTLE ON FRENCH FRONT ISOLATES ENEMY FRONT LINE TRENCHES

ARTILLERY BATTLE NOW IN PROGRESS

Enemy Front Line Trenches Are Isolated—Terrific Barrage of Fire Prevents Reinforcements.

(Special to The Daily News.) London, May 3.—France is now waging her greatest artillery battle of the war. An enormous blast of shells was let loose on the German hold on the crest of Moronvilliers. This great battle which began on Sunday extends on a front of more than eight miles.

Barrages. Two barrages of fire are being kept up continuously day and night, and the enemy in the front trenches are completely isolated. Throughout the night the bombardment increased in intensity. Fresh divisions were thrown forward by Hindenburg to check the advance of the French and extremely fierce bayonet fighting followed. The French were occasionally thrown back, but held on to the strategic positions.

Soldier Farmers. The French soldiers are working alongside the peasant women and girls and little children, ploughing, sowing and harrowing the ground. They are fighting France's economic battle as their brothers in the trenches just ahead fight the military combat.

British Front. Quiet prevails on the British front.

ARTHUR J. BALFOUR ADDRESSES CONGRESS

(Special to The Daily News.) Washington, May 3.—A precedent has been created in Washington. For the first time in the history of the United States, a British statesman addressed both houses of Congress. The Right Hon. Arthur J. Balfour, of the British Commission now visiting Washington, spoke before the members of the Senate and of the House of Representatives on Saturday on the issues of the great war.

THE RACE COURSE

At the skating rink last night, an event, open to all comers was pulled off. There were two starters, Mr. Bennie McDaniels and Mr. Fred Wermig. The distance was one mile, and the winner made it in four minutes and eight seconds. Fred Wermig took the lead and kept it until the twentieth lap, when Bennie McDaniels passed him and finished first. The judges were Joe Drew and Bill Blythe, the timekeeper was Harry Smart, and the lap counter was Len Dewhurst.

There was a big crowd out to see this event, and the auditorium was full of skaters, who all enjoyed themselves immensely.

Flour having advanced to such a high price, the bakers are compelled to advance the price of bread to 10c per loaf straight. Taking effect at once.

WILL DISCUSS PEACE TERMS IN REICHSTAG

(Special to The Daily News.) London, May 3.—What sort of peace terms Bethman-Hollweg will offer tomorrow in the Reichstag ran the gamut of speculation in London today. The London newspapers are agreed that the Chancellor's second proffer has been forced by the growing unrest throughout the Central Empire for an official government statement of Germany's war aims. The Berliner Tageblatt admits that while Germany is no longer in a position to dictate terms of peace to her enemies, she must demand freedom of trade and independence.

TO CRUSH BRITAIN'S MARITIME SUPREMACY

(Special to The Daily News.) New York, May 3.—Captain von Rintelen, of the German navy, came to America for the purpose of promoting friendly relations between the United States and Germany, and to bring about an understanding for the purpose of crushing Great Britain's maritime supremacy, according to the testimony of John Hammond, the prosecution witness in the von Rintelen conspiracy trial. He declared that the war would be won in America and proposed to use all influence toward embroiling the United States in a war with Mexico and Japan.

AGRICULTURAL ASS'N. DIRECTORS MEET

At a meeting of the directors of the Agricultural Association of Northern British Columbia held last evening, committees were appointed to make a canvas of the city for subscriptions. The sum of \$4,000 is required to make possible the holding of the fair this fall.

The membership fee of the Association is \$1 and it was arranged to sell season tickets, non-transferable, for the fair to members for the sum of fifty cents extra.

WESTHOLME THEATRE

At the Westholme Theatre tonight a photoplay will be shown which is entitled "Virtue Triumphant." This is a very strongly constructed play and as the title indicates, is one that will appeal to the better instincts of everybody. How virtue, and that which is right, ultimately triumphs, notwithstanding all tribulations, in this particular case, as it eventually will in every other, is very vividly shown. The stars, Jack Pickford and Fritz Brunette are very favorably known.

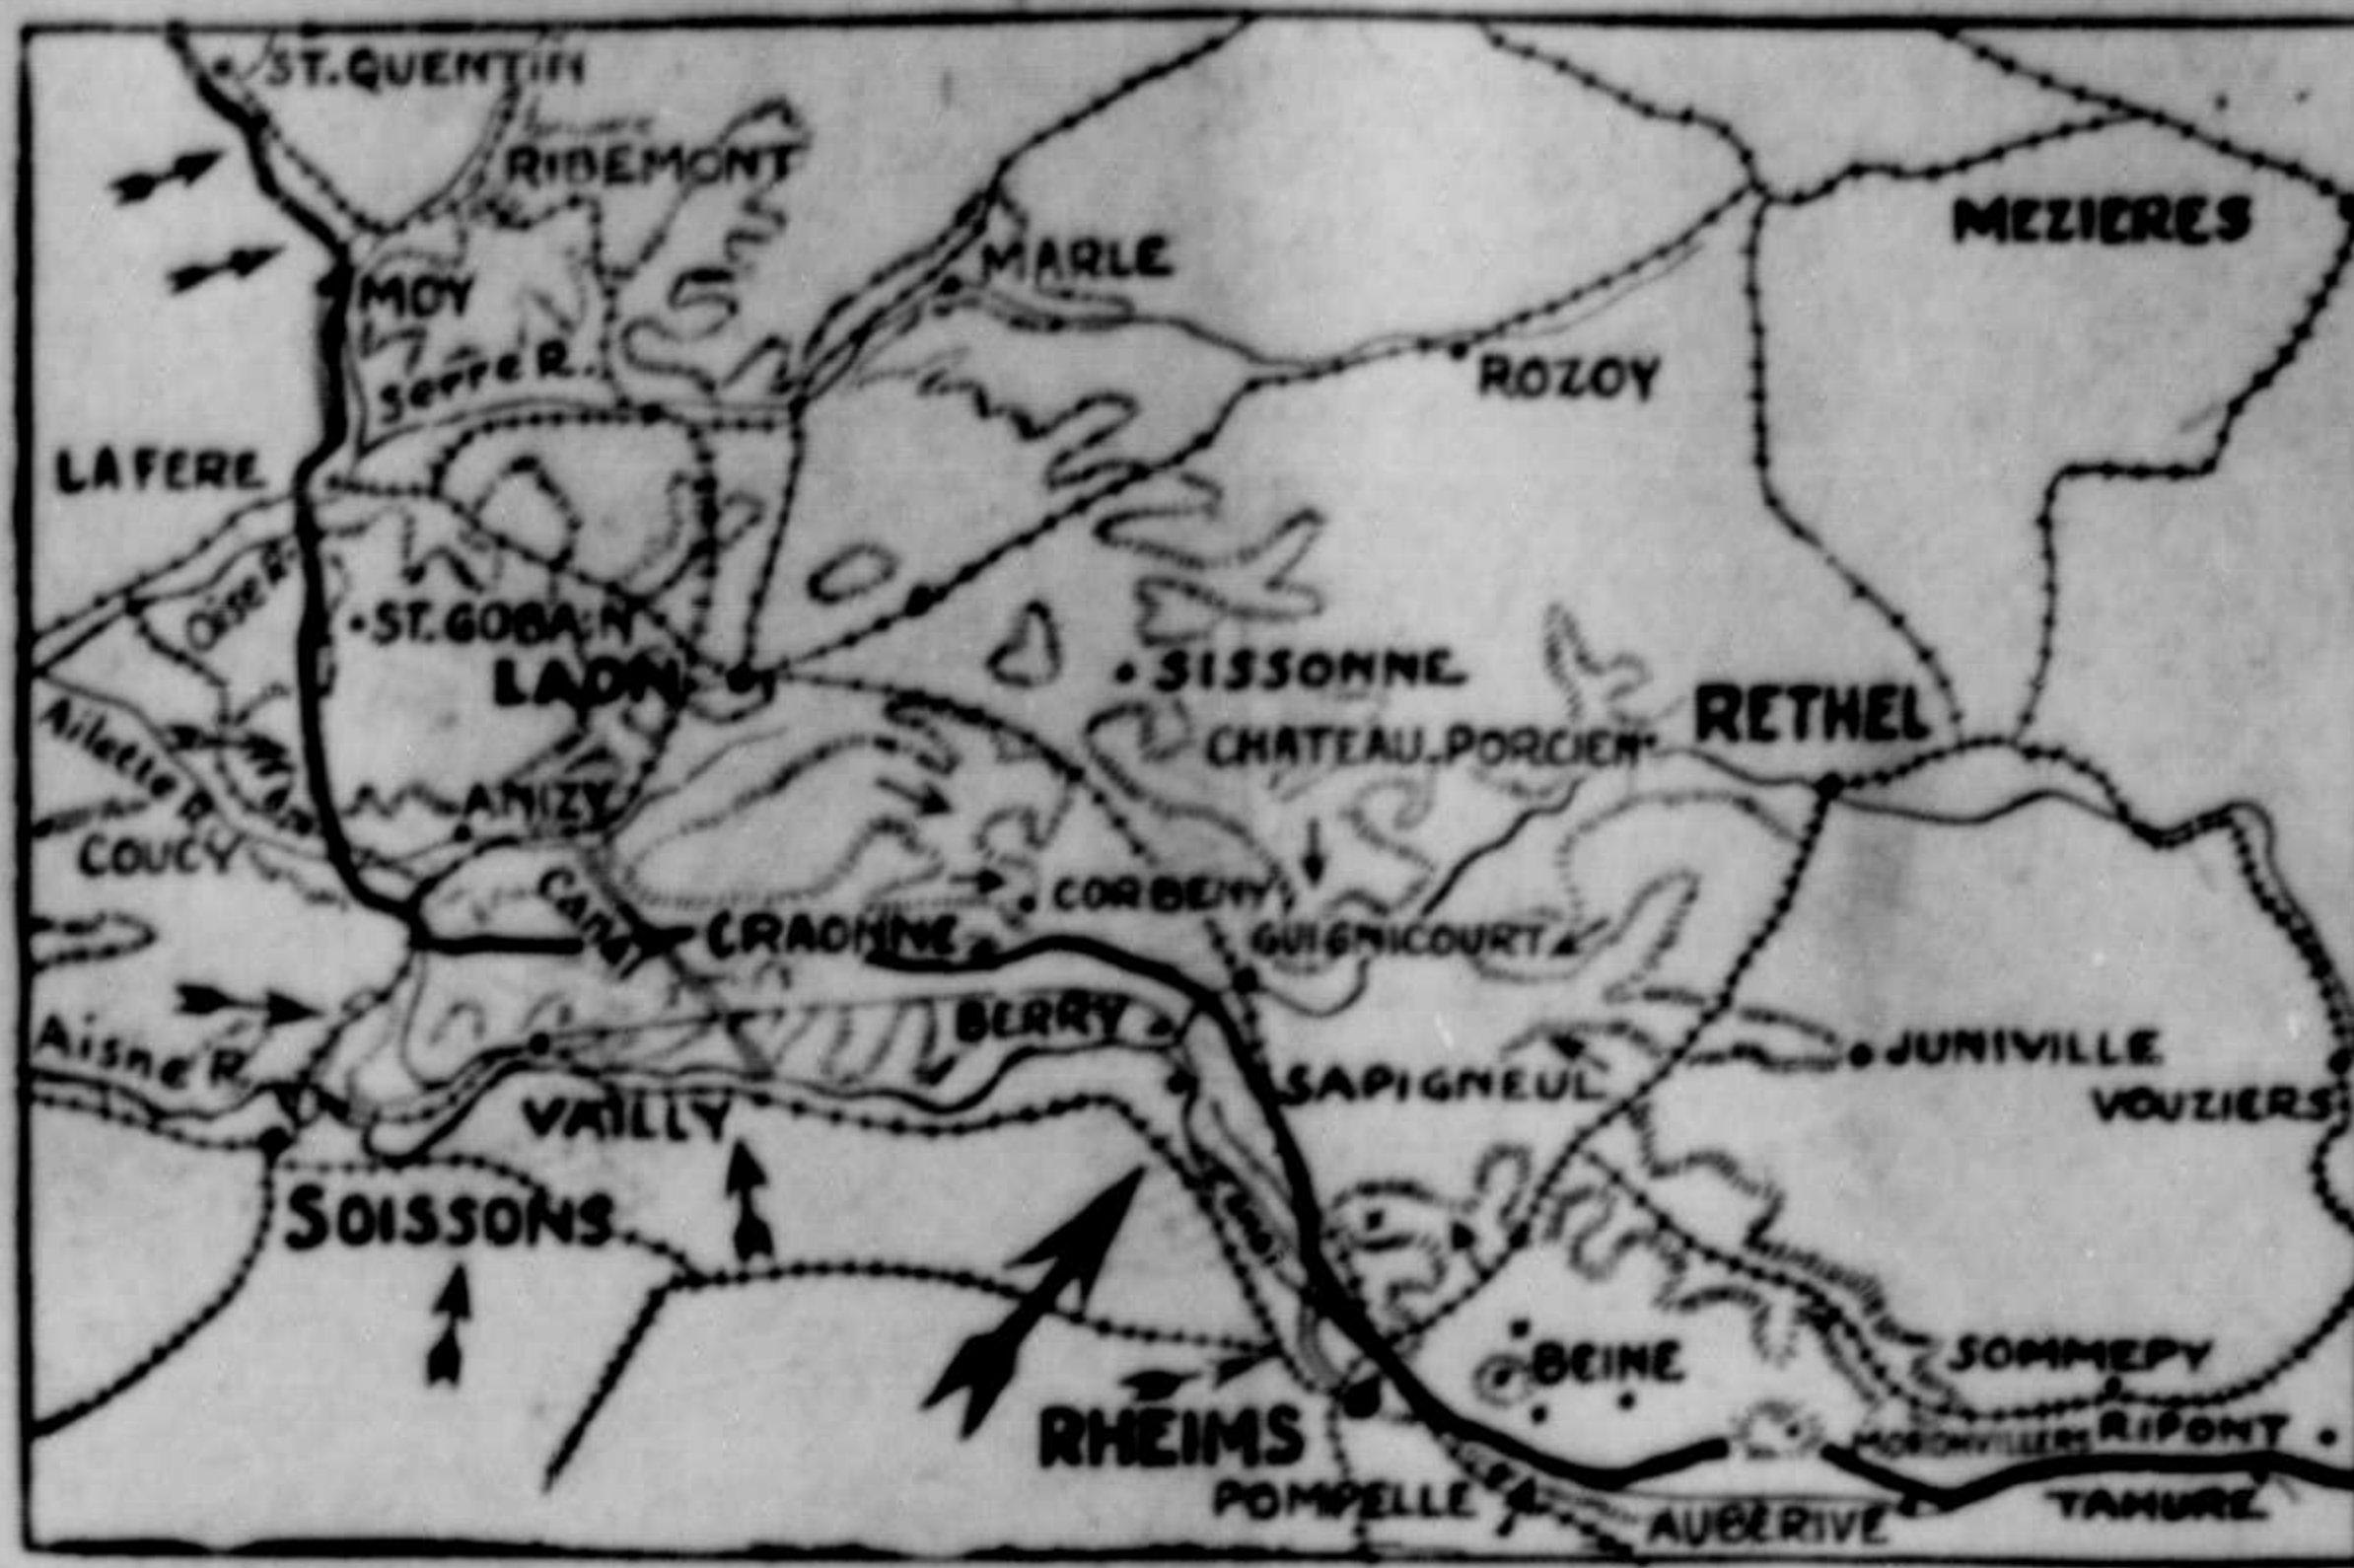

In addition, a cartoon will be shown and also a comedy.

SUBMARINE MENACE IS STILL SERIOUS

(Special to The Daily News.) London, May 3.—The Admiralty report of the losses sustained by shipping for the week ending Sunday last has been published today. During this week just finished, fifty-one ships and eight fishing boats have been sunk.

TROUBLES IN RUSSIA

(Special to The Daily News.) Petrograd, May 3.—Serious riots have taken place in Petrograd. General Kasha Linski was killed by a bomb when the disorders occurred. A proclamation has been issued by the executive,

WHERE THE NEW DRIVE MAY BE MADE. Dispatches state that the weakest part of the German line is between Craonne and Rheims. The big arrow suggests where a new drive against Hindenburg may be made, and indicates a region where the French bombardment is known to be very violent.

THE PORT OF PROMISE IN THE LAND OF HOPE

In a recent number of the Lady's Pictorial there is a very interesting article by Miss Elizabeth Banks, who visited here some time ago. Prince Rupert is described as the "magic town of Canada's Northwest, Harbor of the Pacific Ocean, Port of Promise in the Land of Hope."

Miss Banks is relating her reminiscences of a visit to Western Canada and tells the story of Prince Rupert from its inception until the year after the war. The plank roadways seemed curious to the European eyes of Miss Banks, in this, what she calls "the most marvellous little city I have ever beheld."

CONSCRIPTION IN THE STATES

(Special to The Daily News.) Washington, May 3.—The army and navy appropriation bill passed by a vote of 362 to one. It is the biggest of its kind in the history of the world. The selective draft system is working out and Americans will be called to the colors in classes. Exemptions and the unfit are being weeded out.

MAY DAY IN AUSTRIA

(Special to The Daily News.) London, May 3.—Work of all kinds was stopped completely throughout Austria-Hungary on May Day. The food question and the need for peace was discussed.

AEROPLANES CAPTURED

(Special to The Daily News.) London, May 3.—Seven hundred and fourteen aeroplanes were brought down on the western front during the month of April.

AMERICAN SHIP SUNK

(Special to The Daily News.) London, May 3.—The American steamer Rookingham has been torpedoed and sunk by a German submarine. Thirteen of the crew are reported missing.

FISH ARRIVALS

The Bravo has arrived with 7,000 pounds of halibut; Sultan, 7,000; Kitwanmar, 7,000; Minnie V., 6,000; Lillian, 5,500; Spriglitu, 4,000; W. R. Lord, 44,000, and Daisy, 44,000 lbs. The Carruthers has also arrived with 100,000 lbs. of all sorts of fish as the result of a trawling trip. The price realized for Canadian halibut this morning averaged about 9 1/2 cents.

GREAT STRENGTH OF BRITISH WAR MACHINE

The opinion of an international banker, who has recently returned from London, says the Financial Post, that there is only one question in the minds of those who are directing the war for the Allies, and that is not a question of who will win, but a question solely of the time in which the Allies will win, is printed by the Wall Street Journal.

He states that it is recognized by the British military authorities that the brunt of the offensive must hereafter be borne by the British and in this connection speaks of the tremendous forces, which are being organized on the western front:

"I can confirm all that you have previously reported as to the size of the British war machine. No two nations in the world today have the gun and shell power that Britain possesses. If I could tell you the number of shells that the British can throw on the western front in comparison with Germany, the figures would look ridiculous. Toward the end of 1914 the French were throwing shells at the rate of 80,000 a day, the Germans were answering with 120,000 shells a day, a total of 200,000 shells. At the battle of Ypres, the British threw 800,000 shells in two hours. Britain is now ready to throw several million shells a day and keep it up to the end. Germany possesses no such power."

THE WAR CONFERENCE IN WASHINGTON

(Special to The Daily News.) Washington, May 3.—The international war conference will be ended soon. The Allied ministers will have completed their work within the next six days. All problems relating to shipping and finance are settled. The chief subject to be discussed today is how to build up the American army.

THE POLICE COURT

At the police court this morning, three men, named B. Grompsell, J. Duffett, and Carl Johnson, were charged with doing damage to property. The case was adjourned until tomorrow and the accused were allowed bail of \$50 each.

DEMONSTRATIONS IN SWEDEN

Copenhagen, May 2.—At Malmo yesterday 10,000 people took part in a demonstration before the town hall at which demands were made for a commercial agreement with Britain, larger bread rations and a discontinuance of food exports. The institution of an eight-hour day also was demanded.

Similar demonstrations on a smaller scale occurred at Gothenburg and Harnosand.

THE ADMIRALTY IS TO BE REMODELLED

(Special to The Daily News.) London, May 3.—The Admiralty is to be remodelled. Sea traffic and the Inventions Board will also be reorganized on the grounds of inefficiency, as they have failed to check the work of the submarines. New plans are being laid with a view of increasing combatting means.

Premier Goes to France.

Premier Lloyd George crossed the Channel safely and is now in France. The settlement of the Irish question will thus be delayed a week.

HOW THE GERMANS WON THE ARRAS FIGHT

London, May 2.—The German newspapers are claiming victory in the Battle of Arras, telegraphs the correspondent at The Hague of the Evening News.

The Frankfurter Zeitung says: "The second Battle of Arras can never be made good by the British who lost it at an enormous cost in men and materials."

The Cologne Gazette says: "The German troops look across fields piled with corpses of British soldiers, whom they have repelled successfully."

The Cologne Volks Zeitung says: "The Siegfried position has become an elastic band, a living wall which has dissolved the physical and moral strength of the enemy."

MINING NOTES

A representative of a large mining and smelting company visiting Northern British Columbia recently, expressed himself as being fully convinced of the future of this mining field. He said his company is coming in here simply because it is a new field with great possibilities, and will be producing when the Boundary and Kootenay districts are things of the past.

Such expressions coming from a man familiar with the subject are very encouraging.

The Rocher de Boule' big tunnel is now in over three thousand feet. It is reported on good authority that the indications at the face are such as to cause the management to be very hopeful.

The entire mining community of the interior are anxiously awaiting the results of this exploratory work and fully realize the effect that it will have on mining operations, especially in and around the Rocher de Boule.

The Highland Boy Mine is now shipping ore to the Ladysmith Smelter. Considerable ore is sacked at the mine, and the development so far, has assured regular shipments during the summer months. The ore is brought down from the mine to the Rocher de Boule Basin by an aerial tramway and hauled over the trail to Skeena Crossing.

The Delta Copper Company are rushing construction with all possible speed so as to be able to ship ore immediately. The crosscut tunnel now being driven taps the vein to depth, which is expected to take place very soon. The Taylor Engineering Co. have the contract for building the road.

Developments around Telkwa district are going ahead very favorably. The Dockrill property is shipping regularly and recent developments have, it is stated, been very encouraging. It has also been stated that some very high grade ore has been located on the Cronin property.

The favorite household Coal is Ladysmith Wellington. Phone 15, Prince Rupert Coal Co. 17.

THE POSSIBILITIES OF TRADE WITH RUSSIA

Montreal, May 2.—Geo. Bury, vice-president of the Canadian Pacific Railway, who arrived in Montreal from Europe, said:

"In Britain, Scandinavia and Russia, everywhere I have travelled, food restrictions of varying degrees were in force and rail travelling was curtailed. War or no war it was time that a halt was called on the food wastefulness that had been going on."

"No one who has had the slightest opportunity of learning all that Great Britain has done in the war for humanity can help being proud of the Mother Country. With the proverbial modesty of the Englishman, but little has been said, although big things have been done and much has been said of the mistakes—mistakes inseparable from any understanding, and but to be expected in any undertaking that dwarfs anything in history, authentic or mythical."

"Everywhere we traveled in Great Britain evidences of sacrifice, willingly made, were visible. "Our past mode of living is at an end for some time, and we will have to come down to more simple forms and economical conditions will compel the elimination of waste."

"The trade possibilities with Russia after the war are illimitable, and those nations who will study the needs and the Russian character will succeed. Up to the time of the war it would appear that the Germans appreciated the possibilities of Russia and the trade statistics of that country show what our enemy accomplished."

"One has to travel around the world to see how well off we Canadians are."

"The Canadian soldiers covered themselves with glory in the recent advance. They took a strong position which had been tried twice before by other troops, and their deeds were in the mouths of everyone in London."

SERBIANS DRIVEN INTO UPRISING

Berne, May 2.—Details have reached here of the uprising of Serbians last month which threatened for a time the security of the German-Bulgar lines of communication in the region of Nish and Uskub. It was put down with awful bloodshed.

As a result of the Bulgarian measures of internment of Serbs in the occupied territory and compulsory recruiting of the male population for service in the ranks of the invaders, the population of the departments of Nish, Vrania, Leskovats and Prokupla revolted. At the same time a regiment of Bulgarians mutinied at Kurshumlia. Serbians occupied this town and released 300 Bulgarian soldiers who had been imprisoned.

The revolutionary movement spread until the insurgents numbered twenty thousand. Following repressive measures by the rebel leader, Kosta, escaped to the mountains with 3,000 followers. The remainder of the insurgents were either imprisoned or killed.

PRODUCTION

That the Government of British Columbia is fully alive to the necessity of their controlling in some way the production of foodstuffs in these times of stress is to be seen in the introduction into the Provincial House last week of the "Act to promote increased agricultural production." This act was introduced by the Minister of Agriculture, and is, says the Victoria Times, a measure of far-reaching importance, particularly in its responsiveness to the demands of the stage through which the world is now passing. In a nutshell its purpose is to enable the Government to get quick action in respect of increased agricultural production. It sets up a board of directors who will perform the functions entrusted to the Commission established under the agricultural credits law of last session, but whose work will be carried out in an entirely different way. Instead of remaining at central headquarters and passing upon reports of appraisers in regard to applications for loans the Board will keep itself in personal touch with the properties upon which assistance is sought by farmers, and decisions will be given promptly. The object is to obviate the delay encountered under the present arrangement, which in some cases takes up many months.

But the chief feature of the new measure is the provision empowering the Board to undertake land settlement or production projects itself. Under this section it can prepare and improve Crown lands for agricultural purposes or can purchase land from private owners and subject it to the same process. For instance, the Government has before it a scheme for providing employment for returned soldiers pending their gradual reabsorption into civil life. There are certain logged areas on Vancouver Island and elsewhere which with further clearing operations can be made ready for production. The Board under this section can either acquire the land and improve it or improve it without acquiring it, with the labor of returned soldiers, making the cost a charge against the property, to be repaid over a

term of years. This furnishes one means of providing work for soldiers and at the same time creates a permanent asset for the country at large.

This provision, which it is possible to discuss only cursorily at this time, in conjunction with the more prompt and efficient operation of the present loan system, is expected to advance agricultural production in the quickest possible way. It is short-cut through red-tape and places the resources of the Government at once behind the movement for a greater output of foodstuffs, which is and will be for some years the most serious problem confronting the world. It provides for action instead of talk and formality. To the possible criticism that it smacks too much of paternalism, the effective answer is that only through governmental action can an organized movement for more settlement and production be brought to fruition at this time. We shall see measures much more radical adopted by other governments on this continent before long in their efforts to increase production sufficient to feed their own people and to send a large supply to the Allies across the ocean.

The new measure does not repeal the agricultural credits law in its application to the transactions already carried out under its provisions. It sets up machinery for taking over the work of the Commission and extending it in the future. Undoubtedly it will have to be amended in various particulars, but the underlying principle of it should commend itself to the House, as it will to the country.

NOTES AND COMMENTS

"The Brazier," the Canadian trench journal which is printed somewhere in France, has the following: "Don't write poetry for the Brazier. There are already 978 poets doing the work and it considered presumptuous for a new comer to indulge." Even in France editors have their troubles.

The fact of the frontiers of Germany being closed tightly is very significant. Coupled with the suppression of the newspapers, it leads to the belief that

the strikers have been doing something on May Day. This is the day in the year in Europe, when Labor demonstrations were held in every country. It would be a fitting time for the heretofore docile German people to assert themselves. Even the worm will turn.

The German authorities are apprehensive over the prospect of another industrial upheaval. The strike which broke out in the chief munition centres following the reduction of the bread ration has been brought under hand, but, as we pointed out a few days ago, the subsidence will be only temporary. It cannot be anything else simply because the discontent is due to causes over which the German Government has no control. To end strikes the German authorities must be able to do away with the conditions which produce them, and this is impossible.

MEN WHO WILL LEAD U. S. ARMY AND NAVY

It may happen with the United States as it has happened with other belligerents that as time goes on the leading generals and admirals at the beginning of the war will be replaced by others; but as matters now stand the thirteen men whose names follow are expected to be the Haigs and Nivelles, the Beattys and Jellicoes of the American nation. Pride of place goes to Major-General Scott, Chief of Staff. He has won laurels for gallantry in action, and is a man of great judgment and prodigious industry. He has fought against the Comanches and the Apaches, the Sulus and the Moros. In an action against the Filipinos a shot struck the revolver in his hand and shattered it, as well as a finger. He shifted the pistol, and a moment later the left hand was struck. He continued to command his men, and, risking blood-poisoning, remained in charge of the expedition after both hands had been dressed and bandaged to his side. He also figured in the recent Mexican troubles with credit to himself. General Scott is a Kentuckian, and his mother was a great-granddaughter of Benjamin Franklin.

The Best Known Soldier.
Next comes Gen. Leonard Wood, formerly Chief of Staff, and the best known soldier in the United States. He was legislated out of the highest office in the army as a result of politics. Gen. Wood was a great chum of Colonel Roosevelt, who was responsible for much of his rapid promotion. He preached preparedness in the United States as Lord Roberts preached it in England, and with precisely the same results. He has a record as an Indian fighter. He was in Cuba, too, and according to Roosevelt, is easily the greatest soldier the United States has produced since the Civil War. His great-grandfather commanded a regiment at Bunker Hill. Wood is Irish where he is not Mayflower American, a scientific soldier, and he has probably the best reputation with the military experts of other nations of any American soldier.

Some Noted Leaders.
Major-General Bell, who has recently succeeded Wood, as commander of the Department of the East, has been an Indian fighter, and made a big reputation against the Filipinos. He is another Kentuckian, and has the reputation of not knowing fear. Major-General Barrie is of Irish descent and a native of New York. He also has fought Indians, Chinese and Filipinos, and is a scientific soldier. General Pershing has a similar record, and was recently in charge of the Mexican expedition. He is high in Masonic circles and comes from Wyoming. Brigadier-General Edwards comes from Ohio. He has seen fighting and is said to be a fine administrator. Major-General Liggett, a new appointee, comes from Pennsylvania, and is described as a "bug on entrenching." Admiral Benson, chief of the navy, was on the expedition that rescued Greeley in the Arctic, and is a strict disciplinarian. Admiral Mayo, of Vera Cruz fame, is an Irishman from Vermont birth. Admiral Caperton comes from Tennessee, and was in the Spanish-American war. Admiral Grant is in charge of the submarines, and Admiral Gleaves commands the destroyers, which

may be particularly active in a week or two. He is a Southerner. Admiral Winterhalter, in charge of the Asiatic Squadron, is an expert on astronomy and hydrography.—Exchange.

WATER NOTICE

DIVERSION AND USE

Serve Save Produce

EVERY ONE CAN do something for his country

Some can bear arms
Some can produce food
Some can make munitions
Some can give money
It is the privilege of all to help.

YOU CAN SERVE by Fighting—Working—Saving—Giving

This is NATIONAL SERVICE
Are YOU doing your part?

ALL EYES turn now to the Canadian Farmer, for he can render the Empire SPECIAL SERVICE in this sternest year of the war.

But—our farms are badly undermanned—25,000 men are needed on the land.

With insufficient help, the Man on the Land fights an uphill fight to meet the pressing need for Food.

CITY and TOWN can help.

Municipal Councils, Churches and Schools, and other organizations, both of men and women, can render National Service by directing all available labour to the Land.

Farmers themselves can exchange labour. School boys can assist.

Were you raised on a farm? Can you drive a team? Can you handle fork or hoe? If you can't fight, you can produce. Spend the Summer working on the Farm.

Let every man, woman and child in the Dominion who has access to Land, no matter how small the plot, make it produce Food in 1917.

GOOD WORK DONE BY ITALIAN NAVY Rome, May 2.—Official figures now available show that the transportation of the Serbian army to safety was a great task, and that it was accomplished almost entirely by Italian warships and merchant vessels. These conveyed 11,651 wounded and ill through the submarine-infested Adriatic, besides 130,841 soldiers taken to Corfu and 4,100 to Biserta. To do this 303 trips were made, while 17 trips were required to transport cavalry and 15 to take prisoners and food supplies. Nineteen times the convoys were attacked, but each time the enemy was frustrated through the alertness of the Italian destroyers.

THEY ALL VOLUNTEERED We should like to print this story in letters of gold. It is of a Colonel on the British front who wanted twenty men to face almost certain death. He called the whole company together and made the situation clear to them. Then he asked for twenty volunteers to advance one pace. He loved his men, and it was almost more than he could bear. He closed his eyes to keep back his tears, and when he opened them the men stood in exactly the same formation. He was pained. "Is there not one volunteer?" he asked. A sergeant stepped forward at salute. "Everyone has advanced one pace, sir," he said.—Tit-Bits.

AUSTRIANS CANNOT STAND A GOOD MEAL

For the last few days, according to a New York Times correspondent in Berne, Switzerland, writing about the middle of February, a number of people have been allowed to cross the Austrian frontier into Switzerland. Directly they reach a railway refreshment room or entered a Swiss dining car all of them naturally ordered a meal, but in almost all cases an ordinary substantial meal proved too much for them, and, instead of benefiting them, simply made them ill. The dining car attendants are, therefore, obliged to make provisions for these Austrian passengers just as stewards and stewardesses must do for passengers crossing the Channel in a rough sea; while the Swiss, who would ordinarily travel by these express dining car trains from the Austrian, or even the German frontier, now usually leave them in sole occupation of Germans or Austrians, at any rate, should there be any considerable number of either on board. A German or Austrian, in short, generally requires a week or more after arriving in Switzerland to become accustomed to ordinary food.

NEW ZEALAND SHEEP

London, May 1.—Speaking at Newcastle, Mr. Massey, Prime Minister of New Zealand, stated that there are in the refrigerator storehouses in New Zealand, 2,000,000 carcasses of sheep awaiting shipment, but that no vessels are obtainable to carry them to Europe. By the end of this month the number of carcasses would be 3,500,000. Mr. Massey also stated that New Zealand could export this year \$40,000,000 worth of dairy produce.

The following recipe shows how an appetizing, wholesome cake can be made without expensive ingredients.

In many other recipes the number of eggs may be reduced one-half or more by using an additional quantity of Dr. Price's Cream Baking Powder, about a teaspoon, in place of each egg omitted.

EGGLESS, MILKLESS, BUTTERLESS CAKE 1 cup brown sugar 1/4 cups water 1 cup seeded raisins 2 ounces citron 1/4 cup shortening 1 teaspoon nutmeg 1/2 teaspoon cinnamon 1/2 teaspoon salt 3 cups flour 3 teaspoons Dr. Price's Baking Powder The old method (fruit cake) called for 2 eggs DIRECTIONS—Put the first eight ingredients into saucepan and boil three minutes. When cool, add the flour and baking powder which have been sifted together; mix well. Bake in moderate oven in loaf pan (rouled tin with hole in center is best) for 35 or 40 minutes. Ice with white icing. Booklet of recipes which economize in eggs and other expensive ingredients mailed free. Address 6 St. Lawrence Boulevard, Montreal.
