TURKISH FORCES DEFEATED IN PALESTINE

ARAB ARMY ROUTS THE TURK AND CAPTURES COMMANDER--SERBIANS ACTIVE

KING OF THE HEJEZ INFLECTS SEVERE DEFEAT UPON TURKS

SOUTH OF THE DEAD SEA, ARABS ROUT TURKISH FORCES, AND CAPTURE ENEMY COMMANDER-IN-CHIEF--MAKE GREAT CAPTURES OF BOOTY--SERBIANS REPULSE A BULGARIAN RECONNOITERING PARTY

(Special to The Daily News.)
Washington, Feb. 9.—Following up their recent success, where they were able to destroy the strategic railway penetrating through the desert almost to the borders of Egypt, the Arab forces under the command of the Sheik of Mecca, have again inflicted a severe defeat upon the forces of Turks who have been operating inland, south of the Dead Sea. Fighting of a severe character took place, which ended in the flight of the Turkish forces in a disorderly rout. The Turkish commander-in-chief was captured, and immense stores which had been accumulated for the use of the desert forces fell into the hands of the Arabs.

The sheik of Mecca assumed the title of King of the Hejaz shortly after the outbreak of hostilities, when he threw off the suzerainty of Turkey. The country included in the Eastern littoral of the Red Sea thereupon became independent of the Sultan, and being in possession of the Holy Places of Islam, the new state has become all-powerful through Arabia. The sheik of Mecca has always been friendly to British rule, and has on many occasions been of great assistance in ending Turkish resistance in that country since the outbreak of the war.

Co-operating with the forces of General Allenby in Palestine, the Arab horsemen have proved their worth in protecting the British flanks from any raiding parties of Turkish cavalry operating from the desert lying to the east of Palestine. Accustomed to travel on the burning sands, they have been able to accomplish journeys which were beyond the power of the white men and their raiding proclivities have caused on several occasions very much trouble to the Turkish forces. Only a few days ago, the Arabs made a daring raid in which they destroyed the railway far to the north of the position of the Turks, thus cutting their communications. This they have now followed up with the crushing defeat of the southern Turkish army.

The Western Front.
Paris, Feb. 9.—French troops in the Woivre region have repulsed several enemy raids successfully, and on each occasion have been successful in inflicting very severe losses upon the enemy. The precautions which have been taken in the French lines against such raids are proving their worth, and very few of the enemy raiding parties ever are permitted to escape back to their own lines. There is no news from the British front.

In the Balkans.
Paris, Feb. 9.—In the region of Diprobokje, west of Monastir, the Serbian forces were successful in repulsing an enemy reconnaissance force, who were dispersed with

loss. Mutual artillery fire is continuous.

MINING NEWS

The Granby Company at Anyox have added another furnace to their smelter there, and they are now in a position to treat from 4,000 to 5,000 tons of ore per day. The Hidden Creek mine on several days recently shipped over 4,000 tons per shift which is a record for B. C. if not for the British Empire.

The Granby Company are opening up another mine on the Alice Arm, about two miles from the head of the inlet.

The Portland Canal district is again coming into prominence. The Bush mine there is developing steadily and showing up well. The Granby Company are also doing some diamond drilling there on a copper property which is stated to be a big thing.

The Maple Bay Mine, operated by the Granby Company on the Portland Canal is now closed down and from all accounts may not be reopened. The product of this mine was used as a flux at the company's smelter, and had little value outside of this. The reason for closing down is stated to be due to the company finding suitable flux nearer the smelter.

With such development going on in this northern country the time has now arrived when the Federal Government should do something towards the establishing of a refinery. We have not yet reached the point of production to warrant the building of a smelter, we are producing sufficient unrefined copper however to keep a refinery running to capacity, and as a national asset it is essential that the copper produced in Canada should be refined in Canada. We have no desire to obstruct development or interfere with those who make it a business to develop our natural resources, we have a right to demand, nevertheless, that the minerals mined be refined here and controlled at all times by the government.

ST. ANDREW'S SOCIETY WILL GIVE A CONCERT OF SCOTTISH MUSIC

The St. Andrew's Society, assisted by friends, will give a concert in the Presbyterian Church on the night of February 14th, the proceeds going towards the church funds.

During the last few months, the St. Andrew's Society have given several musical evenings in their rooms. On this occasion, however, the ladies will also assist, and it is safe to say that those who make a point to be present on the night of the fourteenth will have a great treat of Scottish music, both vocal and instrumental.

VETERANS' BALL WAS VERY SUCCESSFUL

Last evening there took place in the St. Andrew's Hall one of the happiest and most successful functions of the season. The occasion was the ball given by the Great War Veterans. The large hall was brilliantly decorated with the flags of the allies, conspicuous among which were the Stars and Stripes and the flag of Belgium. Chinese lanterns of many and varied hues lent their soft brilliance to the scene, which was a very animated one.

There were about three hundred present, and one and all enjoyed the proceedings to the utmost. The music was most tempting, and the dancing was kept up until late. Everything passed off delightfully, as "soft the lamps shone o'er fair women and brave men."

The Great War Veterans have good reason to be proud of the organizing ability of their committees, who were responsible for the success of the evening.

STORMS IN INTERIOR BRING DOWN THE WIRES

The severe storms which have been experienced during the past few days on the coast have also extended far inland. These have been severe enough in the interior to bring down the telegraph wires. Repairs have been made, but it is a matter of some difficulty keeping the line up, on account of the high wind prevailing. The wires on several occasions have no sooner been up for a few minutes than a break is caused at some other point, which has made the receipt press dispatches at this end a very intermittent matter.

The trouble today is somewhere in the direction of Quesnel, which is a somewhat inaccessible region at this time of the year. As a result of the frequency of the breaks, and the consequent silence of the telegraph instruments, news from outside places, and from the seat of war is necessarily brief. This state of things, unfortunately, is common at the end of the winter, when the rains begin and the snow begins to melt, when windstorms are frequent and the life of the telegraph lineman becomes no sinecure.

Our readers, however, may live in hopes for the future, when wireless plants will be released by the government, and when we install our own private wireless. Although by that time, there will be no war news, which is the most sought for at present.

AT THE WESTHOLME

Kitty Gordon, one of England's great star artistes, is the leading feature of the photoplay to be screened at the Westholme this evening. She is an actress of distinct personality, and of great charm. She has been received on this Western continent with great acclamation wherever she has appeared. Then the play itself is of great attractiveness. The vivid characterizations which are given will impress themselves upon the memory as something distinctly out of the usual. Both the play itself and the star actress, both singly and jointly, are well worth seeing. There will also be two comedies shown, of a most laughable kind, and the overture, "The Beautiful Galatea," will be repeated tonight again by the orchestra.

PACIFIC HERRING IS EQUAL TO ANY OTHER

Complaint of Softness and Poor Quality is Result of Wrong Handling—Seining A Poor Method.

(By Capt. Bill Sims.)
It is often said around here that the herring of British Columbia is of no quality, that they are soft, and not fit to eat, and that they are not suitable for commercial purposes. While there is really no truth in this remark, which is so commonly heard with regard to the herring in the sea, the remark does apply to a great extent to the herring after they are caught. But the fault lies not with the herring.

The reason is that the herring is the tenderest fish swimming in the ocean. The only method heretofore in these waters for catching it is by seine net. Now just consider the treatment the herring get. They are held in the net swimming around for hours in an area of say a hundred square feet—often twenty tons of fish at a time in one seine net. After that, they are hoisted out of the water in dip nets that are lifted up from eight to ten feet, from which height the herring are dumped down on to a scow, and exposed to the sun, the rain and the weather for often two days at a time, before they reach port.

In plain words, they get very rough handling, and being treated with so much disrespect, it is no wonder that the herring caught are often too soft and unfit for the market. The method of handling is the whole cause of the trouble. If herring are wanted in first-class condition, they must be handled properly. When the people who want herring will leave their seines at home, and go after the herring with a gill net, it will be found that the British Columbia herring can be sent to market, or used for bait, in a firm state, and of prime quality.

The method which has been proved to be the best one for catching herring is the gill net, which is used in the North Sea. When the time comes for the nets to be drawn aboard the vessel, they are taken in as a newspaper comes over the cylinder of a printing press. The nets are shaken as pulled in, and the fish fall singly on to the deck with a drop of about six inches. They then slide down into the hold of the boat, and the rocking of the vessel keeps herself in trim. By this means the herring is not exposed to the weather, is not dumped down. It comes to port with practically scales intact and not like the seined herring, bruised, scaleless, and soft.

It is not the herring that is at fault, it's the method of catching them that has given this fish a bad name. Remove the cause that hurts the herring and the world will be shown that the herring of British Columbia are the equal of any to be found in any waters.

(This is the second of a series of articles by Captain Bill Sims, who is a herring fisherman of the fourth generation.)

HONESTY RECOMMENDED TO GERMAN GOVERNMENT

Amsterdam.—Addressing the first meeting of the members of the Polish Society in Berlin Professor Hans Delbrueck adopted the standpoint that Germany might completely renounce territorial acquisitions in the East and West. He contended that honesty was desirable, not on pacifist grounds, but on those of a higher political sagacity, and said that a practical proof of the correctness of this conception was to be found in the brilliant success of British policy in South Africa.

THE DEVELOPMENT OF THE LOGGING INDUSTRY

The s.s. Prince Albert arrived in port last evening from Queen Charlotte Islands, whither she made a special trip direct from Vancouver. She took there from the south a whole cargo of logging material, some twenty donkey engines for getting the logs out of the woods, cable, and other equipment.

Logging equipment and sawmill equipment has been pouring over to the Queen Charlotte Islands for months past, and some idea of the extent of the operations to be undertaken there may be gathered when even after that, another whole shipload of material goes there this time. The plant is largely for the several companies who are already conducting operations in different parts of the island group, for the extending of their areas.

Never before in the history of the Islands has there been so much real productive work going on, and this summer promises to be the busiest one yet. The extent and the value of the standing timber of Graham Island has never been properly known until recently, and now, when every limit which contains spruce is being opened up, the true value of the wealth available will be known. All the efforts of the loggers and of the sawmills are being concentrated upon the production of spruce for aeroplane construction. Spruce is the best material so far found in quantities for the "wing beams" of an aeroplane. While it is somewhat weaker than fir, it is a very great deal lighter, and possesses an immense range of elasticity. It has considerably more "whip" to it, and it is a proven fact that a spruce plane will climb a given height in seven minutes shorter time than a machine with its beams constructed of fir. The particular advantage of spruce in aeroplane manufacture lies in its capabilities of contraction and expansion in high altitudes, and frequently changing temperatures.

Speed, of course, is assured with the use of spruce, which is one of the essentials for the battle planes, and it is for the production of the actual fighting machines in great quantities that the great programme of the Munitions Board in B. C. has been launched. The abilities of this programme are boundless, both for the assurance of ultimate victory, and the permanent establishment of the lumber business in this particular part of the province.

It is calculated that one quarter of the stand of timber is spruce, and of this, one-fifth will give No. 1 logs, on an average. Reduced by splitting by wedges as an auxiliary process of sawing, one-third of the No. 1 logs may eventually be selected as O. K. for shipment to the aeroplane factory. There a further selection of the logs is made, and only one-third of these are usually found to be ideal for the "wing beams," which are eighteen feet long. The understood exactitude of aeroplane requirements in the matter of its woodwork must of necessity be knowledge acquired only by the most exhaustive study, and men in possession of that valuable sense of perception, and able to see at a glance the ideal "wing beam" are naturally few in number.

It will readily be seen that from the strenuous selection which the sawn spruce undergoes, only a small portion of the thirty million feet per month which the Munitions Board asks for, actually finds its way into the construction of the fighting planes. The balance is of course utilized in other manners.

FRANCE IS FAR FROM BEING BLED WHITE AS SAID

Editor of Le Matin, of Paris, Speaking in Boston Assures of France's Strength, Which Was Never More.

(Special to The Daily News.)
Boston, Feb. 9.—At a large gathering of the City Club here given in his honor, Stephen Lazzane, the editor of the foremost newspaper in Paris, Le Matin, assured his hearers that La Belle France was very far from being "bled white" as some writers have alleged. While her casualties during the last three and a half years of warfare have been great, from a military point of view, her army of trained soldiers was never greater, nor more effective. She has now two million, seven hundred thousand highly trained men in the field, of full fighting capacity. Her factories are turning out munitions of war of all kinds. For her big guns, three hundred thousand shells per day is the average, and for the other arms proportionately. This work is being largely done by the women of France, who, he declared, have set an example to the whole world in their devotion to their country.

EAST AFRICANS WISH TO SEIZE OPPORTUNITY FOR DEVELOPMENT

Nairobi, British East Africa, Feb. 8.—A mass meeting of the residents enthusiastically passed a resolution requesting the Imperial government to appoint former governor, Sir Percy Girouard, military governor of British East Africa, and to proceed with the war with powers to organize the colony's efforts in the direction of utilizing such a portion of its population as is unavailable for military service to develop its immense potential energies and resources in the immediate production of commodities which are urgently required.

E. S. Grogan, Lord Delamere and others emphasized the urgent necessity of organizing the entire resources of the protectorate in order to provide for the immediate requirements in Mesopotamia and Palestine, thereby saving shipping and substantially contributing food and other necessities. Otherwise there were millions of acres of the finest land in the world available in East Africa for the Empire's war-worn soldiers.

FISHING ARRIVALS

The Stirrat has arrived in port with 6,000 lbs. halibut and the Mayflower with 2,000 lbs. The weather prevailing on the fishing banks continues to be very rough, and the catches consequently are poor.

PROGRESS, OR NO PROGRESS

The telegraphic communications which have passed between the Dominion Government Fisheries Department and this city within the last day or two, which we published yesterday, on the question of whether or no the salmon fishermen may use gas boats in the pursuit of their calling, adumbrates in some degree the action which the government will take shortly in the revision of the fishery regulations obtaining in District No. 2, in which Prince Rupert is situated.

At present, the use of gas boats in fishing for salmon by gill nets on the Skeena river is forbidden, under the fishery regulations. When it is remembered that these regulations were instituted for the protection of the salmon, the ordinary reader, without any special knowledge of fishing may well wonder what difference it would make to the fish what kind of boat the fishermen were in when they cast their nets. It would make no difference at all to the fish, but it would make a very great deal of difference to the fishermen. Anyone who has visited the canneries, and has seen the boat which is the average of those supplied to the fishermen by the canneries might well wonder that these boats are even manned at all, especially in such a swiftly flowing river as the Skeena. They are open boats and the fishermen are often wet from Sunday till Friday.

The fishermen's Association of Prince Rupert have declared that the fishermen who own gas boats want to fish salmon with the gill net. There is no real argument put forward against this proposal showing that the fish will suffer in any manner. This matter is really not one belonging to the fishery regulations at all. It comes rather within the regulations of the canneries, which, however, are made not by the government, but by the canneries themselves. The canneries, however, are perfectly well acquainted with the fact, that if

the independent gas boat owner goes fishing on the Skeena, he will be enabled to take his catch wherever he likes. If the price offered by the one cannery does not suit him, his gas boat has the power to take him to another cannery where possibly he might get a better price for the result of his hard work. And notwithstanding the cannery combine, one cannery has been known to pay more for the fish than another. By being condemned to use sail boats on a river like the Skeena, this privilege is denied to the fisherman. The wind is not always blowing, and the tide as often as not is running against him, and it runs so strongly at times that pulling with oars cannot prevail against it. Besides, who wants to pull oars anyway.

The fact of the fishermen on other parts of the B. C. coast having no use for gas boats is no argument against their being used on the Skeena. The conditions are perfectly well known to the local member of the Fishery Advisory Board and the only matter which should govern the action of the government in this connection as in others, as well, is the protection of the fish, and not the protection of the canneries. They are perfectly well able to look after themselves.

NOTES AND COMMENTS

Immediately prior to December of last year there was considerable feeling raised throughout this Dominion of sympathy for the soldiers in France. Unless reinforcements were sent them immediately they were alleged to have been "betrayed" and other expressions of a like nature were used. These reinforcements were required AT ONCE, it was alleged. The new Union Government, however, is apparently of a different opinion now, as it is arranging for "leave of absence" boards in each province, through which soldiers drafted under the Military Service Act are to be granted leave from military duty in order to engage in farm labor.

On his return from Europe some eight or nine months ago,

Insomnia Cured Without Drugs

Internal Bathing Relieves the Cause

If you do not sleep there is always some cause. Don't start dosing with drugs. Nerves can't consume them. Relieve the cause and a good, sound sleep will be the result.

The system cannot be right if the Colon or large intestine is not kept clean and free from all waste matter. Bathe internally if you want perfect health. Mr. F. C. Voigt, Rapid City, Man., writes: "For several years I suffered from Indigestion, Nervous Debility, Insomnia and Constipation. Had no appetite, and doctors did not expect I would live throughout the winter. Your book interested me. I got a 'J. B. L. Cascade' and in a few days obtained remarkable results. I now sleep and enjoy my meals better than for years before. I regard the 'J. B. L. Cascade' as a Godsend to me."

The "J. B. L. Cascade" is a perfected appliance for Internal Bathing, invented by Dr. Chas. A. Tyrrell of New York, and has been the means of restoring thousands to perfect health. It is shown and explained by Cyril H. Orme, Druggist, cor. 3rd Ave. and 4th St., who will be pleased to give you an interesting book called "The What, The Why, The Way of Internal Bathing" on request. Ask for it.

NOTICE

"Sea Gull," "Brown Bear," "Little Tommy Fraction," "Sunlight Fraction," "Sea Lion Fraction," "Sheet Anchor Fraction," "Skyline," "Camp Bird Fraction" and "Observatory" Mineral Claims, situate in the Skeena Mining Division of Coast District.

Where located—near Bear Lake, Surf Inlet, Prince Rupert Island.

TAKE NOTICE that I, Fred M. Wells, Free Miner's Certificate No. 15016 C, the duly authorized agent of Millard F. Warren, Free Miner's Certificate No. 15014 C, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of each of the above claims.

AND FURTHER TAKE NOTICE that action, under section 85, must be commenced before the issue of such Certificate of Improvements.

DATED this 26th day of October, A. D. 1917

LAND ACT

SKEENA LAND DISTRICT—DISTRICT OF COAST, RANGE 4.

TAKE NOTICE that John Grace, of Vancouver, B. C., occupation fisherman, intends to apply for permission to lease the following described lands:

Commencing at a post planted on the foreshore on the west side of Stewart Narrows, about two miles south of Hartley Bay; thence west 20 chains, thence north 20 chains, thence east 20 chains, thence south 20 chains to the point of commencement and containing 40 acres more or less.

JOHN GRACE, Applicant.

DATED November 12, 1917.

SKEENA LAND DISTRICT—DISTRICT OF COAST, RANGE FIVE.

Take notice that I intend to apply to the Honorable Commissioner of Lands and Works to lease the following described lands:

Commencing at a post planted at the northwest corner, above high water mark, at Bartlett Point—then ten chains due east, then south to the Shore Line, then following the contour of the Shore Line to the place of commencement, containing twenty acres, more or less.

JAMES DEBRISAY, manager, Wales Island Cannery.

November 14th, 1917. F12

TIMBER SALE X 979.

Sealed tenders will be received by the Minister of Lands not later than noon on the 12th day of March, 1918, for the purchase of Licence X 979, to cut 6,739,000 feet of Spruce, Cedar and Hemlock on an area adjoining L. 335, Swindle Island, Range 3, Coast District.

Three (3) years will be allowed for removal of timber. Further particulars of the Chief Forester, Victoria, B. C., or District Forester, Prince Rupert, B. C.

TIMBER SALE X 1235.

Sealed tenders will be received by the Minister of Lands not later than noon on the 14th day of February, 1918, for the purchase of Licence X 1235, to cut 1,256,000 feet of Spruce and Hemlock on an area adjoining L. 1625, East Shore of Juskatla Inlet, Queen Charlotte Islands District.

Two (2) years will be allowed for removal of timber. Further particulars of the Chief Forester, Victoria, B. C., or District Forester, Prince Rupert, B. C.

NAVIGABLE WATERS PROTECTION ACT.

(R. S. C. Chapter 115.)

AKERBERG THOMSON AND COMPANY, LIMITED, hereby give notice that they have, under section of said act deposited with the Minister of Public Works at Ottawa and in the office of the District Registrar of the Land Registry Office, District of Prince Rupert, a description of the site and the plans of wharf and other works proposed to be built on Lot one, Waterfront Block F, City of Prince Rupert, Province of British Columbia, and take notice that after the expiration of one month from the date of the first publication of this notice Akerberg Thomson and Company Limited will under Section seven of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa for approval of the said site and plans and for leave to construct the said wharf and works.

Dated at Prince Rupert, B. C., this second day of January 1918.

AKERBERG THOMSON AND COMPANY, LTD. David Thomson, Secretary.

THE DAILY NEWS

Sir Robert Borden told this country of the "urgent and immediate" need for reinforcements at the front. With the introduction of conscription legislation, voluntary recruiting, as was to be expected, immediately fell off and the Military Service Act, introduced to take the place of voluntary service, has so far only been successful in raising something like 10,000 men. Now, it seems that even these 10,000, instead of being rushed to the front, where they were supposed to be so immediately necessary, are to be sent back to the farms to produce food-stuffs. It was Napoleon who said over a hundred years ago that an army moves only upon its belly, yet Sir Robert Borden overlooked this dictum of a greater man than he himself. It is safe to say that before Sir Robert vacates the position he now holds, he will reverse a great many more of his preconceived notions as to the management of a Dominion like Canada.

That foodstuffs are being cornered by profiteers, the Edmonton Bulletin says, in order to boost prices is no longer a newspaper allegation, nor a public impression. It is a fact admitted and declared by the public officials paid to know what the facts are. In declaring it to be a fact, the Commissioner convicts the Ministers of having been curiously blind to the operations of the profiteers, of having actually connived at the exploitation of the public. He also by the same disclosure confronts the Ministers with the alternative that they must take the profiteers in hand, or hereafter stand openly as their protectors.

FRIENDS THOUGHT HE WOULD DIE

"FRUIT-A-TIVES" Conquered Dyspepsia and Restored His Health.

MR. ROBERT NEWTON.

Little Bras d'Or, C. B. "I was a terrible sufferer from Dyspepsia and Constipation for years. I had pain after eating, belching gas, constant headaches, and did not sleep well at night. I lost so much weight—going from 185 pounds to 146 pounds—that I became alarmed and saw several doctors who, however, did me no good. Finally, a friend told me to try 'Fruit-a-tives'.

In a week, there was improvement. The constipation was corrected and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous".

ROBERT NEWTON.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

CANADA WILL "ADOPT" FRENCH TOWN OF VIMY

For many months the Secours National of Toronto has been in correspondence with the French government regarding the "adoption" by the Secours of a devastated town or village. Many have been the difficulties in the way of completing arrangements, but recently a cable has been received from France to say that the town that has been allotted for Canadian mothering and rehabilitation is that town sacred, dear and glorious in the eyes of all Canadians—Vimy, the devastated.

Work will begin at once and will first of all consist in sending relief in the form of food and clothing to cover and nourish the women who after the manner of the loyal and loving French, creep back to the wreckage of what were once happy homes. Later, where walls have been left standing, the roof will be restored, seedlings of fruit and shade trees and fruit-producing bushes will be planted, and so, bit by bit, Vimy the immortal, will be restored.

Just now the Secours will carry out the details of the work it is impossible, as yet, to say, but as it progresses and the needs and the opportunities for meeting them develop, word will be sent on from France and the news made public here.

Salvation Army.

Public meetings, Tuesdays, Thursdays and Saturdays at 8 p. m. Sundays at 7:30 p. m.

MINERAL ACT

CERTIFICATE OF IMPROVEMENTS

NOTICE

"Molybdenum" and "Success" Mineral Claims, situate in the Skeena Mining Division of Cassiar District.

Where located:—About 4 miles West of the head of Alice Arm, and about one mile from the Beach.

TAKE NOTICE that Lewis W. Patmore, Free Miner's certificate No. 14233-C, as agent of the Molybdenum Mining and Reduction Company, Limited, (Non Personal Liability) Free Miner's Certificate No. 10222-C, intends sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of each of the above claims.

AND FURTHER TAKE NOTICE that action under Section 85 must be commenced before the issue of such Certificate of Improvements.

DATED this 26th day of November A. D. 1917. F12

WATER NOTICE

TAKE NOTICE that Dolly Varden Mines Company whose address is Alice Arm, B. C., will apply for a license to take and use ten cubic feet of water per second out of Trout Creek, a tributary of Kit-sault River flowing into Alice Arm, Cassiar District. The water will be diverted at the head of the Falls on the Silver Horde Mineral claim, Lot 3804, and will be used for power purposes on the Wolf and Dolly Varden Groups of Mineral claims being Lots 3794 to 3797 inclusive, and Lots 3192 to 3197 inclusive and Lot 3854, Cassiar District.

Application will be made also for the right to store 350 acre feet in First Trout Lake and 2,200 acre feet in Second, Third and Fourth Trout Lakes. The water will be stored in First Trout Lake by the construction of a dam at its outlet and in Second, Third and Fourth Trout Lakes by the construction of a dam at the outlet of Second Trout Lake. The estimated area of land to be flooded at First Trout Lake is 17 acres and at Second, Third and Fourth Trout Lakes is twenty acres.

This notice was posted on the ground on the 18th day of October, 1917.

A copy of this notice and an application pursuant thereto and to the Water Act, 1914, will be filed in the office of the Water Recorder at Prince Rupert, B. C.

The date of the first appearance of this notice in the local newspaper was the 23rd day of October, 1917, and objections may be filed with the comptroller or Water Recorder within thirty days after the said date.

DOLLY VARDEN MINES COMPANY,
R. B. McGinnis, Agent, per E. A. Cleveland.

NOTICE IS HEREBY GIVEN that application will be made to the Legislative Assembly of British Columbia at its next session for an act to incorporate an association known as "The Engineering and Technical Institute of British Columbia," with power to promote and increase the knowledge, skill and proficiency of its members in all things relating to the Architectural, Engineering, Surveying and technical professions, and to that end to prescribe such tests of competency and moral character as may be thought expedient and to grant certificates of membership to those approved of, and to purchase or otherwise acquire and hold real and personal property for the purpose of the Institute, and to dispose thereof and to invest the proceeds in such manner as may seem fit and to fix entrance fees and annual fees or subscriptions to be paid by the members, and to vary the same from time to time, and to provide for the management of its affairs by council to be constituted in such manner as may be provided for by-law, and to have its head office and hold its annual meetings within British Columbia, and to have, enjoy, and exercise all powers, rights and privileges necessary, usual or incidental to all or any of the aforesaid purposes.

BRADSHAW & STACPOOLE,
Solicitors for the Applicant.

DATED at Victoria, B. C., this 18th day of December 1917.

THE WESTERN SALMON PACKING COMPANY, LIMITED; C. G. Robertson, Agt.
DATED December 31st, 1917.

MUNITION PILES AT VLADIVOSTOCK SAFE FROM BOLSHEVICS

San Francisco, Feb. 8.—Munitions of war accumulated at Vladivostock are safe from appropriation by the Bolsheviki government for use in internal warfare, according to Vladimir Baschkiroff, assistant minister of munitions under Kerensky, who is in this city on his way to Washington.

"Public opinion in Siberia is against the Utopian measures of the Bolsheviki government and this feeling is a more potent factor against the misappropriation of munitions lying at Vladivostock harbor," Mr. Baschkiroff said.

For some weeks past the shipment of freight to those portions of Russia controlled by the Bolsheviki forces has been absolutely prohibited, and I feel sure that these enormous supplies of war at present in Vladivostock will yet be utilized effectively against our enemies, the Central Powers, as originally intended."

BRITISH LIVE STOCK WILL BE RATIONED

London, Feb. 6.—It is estimated that the quantity of fodderstuff in Great Britain is insufficient to maintain the existing stocks of animals and poultry until the present season's crop is available in September. The Secretary of the Board of Agriculture announced today that plans were being considered for the rationing of all classes of live stock, of which milch cows and work horses would receive the major portion of the available supply. The quantity of feed which is to be given over to poultry will be sufficient to maintain only one-twentieth of the normal stock.

HAIR SEAL SKINS

I want to get into touch with persons having or who may have hair seals or sea lions skins which are free from scars or fork or hook holes.

J. N. M. BROWN
Post Office Box 807, Vancouver, B.C.

LUX

A shampoo that's a real hair tonic.

You drop a couple of tablespoonfuls of the wet, satin-like LUX flakes into hot water and whisk about until you get a perfect sea of whipped-cream-like lather. The water underneath has been softened like unto a spring shower. Then you give friend Head a real old massage with the fluid and when you come to rinse you'll find the LUX flakes were so completely dissolved that not a trace or suggestion of soap will remain in the hair.

Your hair will look glossy, healthy and YOUNG.

All grocers sell LUX. British made, by

FOR EVERYONE
A fine stock of Hardware, Gurney's Oxford Stoves.

We Sell Nothing But The Best.

FRED STORK'S HARDWARE

Keep up the Food Supply and Help Make Victory Sure

OUR soldiers must be fed; the people at home must be fed. And—in spite of Germany's murderous campaign to cut off the Allies' Food supply, by sinking every ship on the High Seas—an ample and unfailing flow of food to England and France must be maintained.

*This is National Service—
Not to the Farmer only—
But to YOU—to everybody—
This appeal is directed*

WE must unite as a Nation to SERVE—to SAVE and to PRODUCE. Men, women and children; the young, the middle aged and the old—all can help in the Nation's Army of Production.

EVERY pound of FOOD raised, helps reduce the cost of living and adds to the Food Supply for Overseas.

PLANT a garden—small or large. Utilize your own back yard. Cultivate the vacant lots. Make them all yield food.

WOMEN of towns can find no better or more important outlet for their energies than in cultivating a vegetable garden.

Be patriotic in act as well as in thought.

*Use every means available—
Overlook nothing.*

Local News Notes

On Monday afternoon, Mrs. Wm. Christison will give a tea in aid of the Seal Cove Red Cross.

Mr. James Martin, of Masset, and his son Clarence, are visiting the city, having arrived here last evening.

Mr. S. T. Lewis, of Port Clements, arrived in the city last evening by the Prince Albert from the Islands.

THE FAMILY SHOE STORE, successors to Pecks'. From baby to daddy—yes, we fit your feet.—The Family Shoe Store. 34

Mrs. Joe Brown of this city has received word of the death of her brother "somewhere in France." He was her youngest brother, and she feels his loss very keenly.

Another of Prince Rupert's old timers, Mr. Grant Thorburn, is intending leaving the city in the near future. He will go to Vancouver, where his many friends will wish him every success.

Furniture wanted. Any quantity. Good prices paid for complete household furnishings and all kinds of tools, men's suits, coats, etc. Phone Red 243 or call n F. M. Crosby, 715 Third Ave.

The whist drive given by Mrs. R. Montador on Thursday evening in aid of the Seal Cove Red Cross realized the sum of \$27.50. The five dollar gold piece given by Mr. A. Leroux was won by Mr. G. Eckerman.

For Prince Rupert and district, we have secured the services of Mr. Martin Kroeger, F.R.H.S. Prince Rupert, B. C., phone Red 399. Consult him about your garden problems. British Columbia Nurseries, Ltd., Vancouver, B. C.

John Helset, a logger, was brought into town last night from Port Clements and admitted to the General Hospital. He had been engaged in falling a tree, when a limb fell down from aloft, hitting him across the face with great force, breaking his nose and shaking him up severely. This morning he was doing as well as could be expected.

CANADIANS ADOPT
RED-SKIN METHODS
ON FLANDERS FRONT

London, February 8.—Reuter's Agency learns that the Canadians have introduced into the army a new method of carrying loads, known as the tump-line. It is based on simple principles used for generations by North American Indians. By its use one man is able to carry the ordinary load of two men for a greater distance over slippery, devastated ground and with less fatigue than a soldier can carry his own ordinary load, while it enables troops to shift pack on the march and greatly increases their marching capacity.

The tump-line, made of leather, has three component parts—the brow-band, 21 in. long by about 3 in. wide in the centre, and tapering to about one inch at each end, and two straps, each 7 or more feet long, sewn to the ends. The brow-band is passed over the head just above the brow, and the load rests high up on the back. The tump-line walks slightly bent forward, and can steady the load by holding the straps about the level of the ears. The training of the man is very simple, no previous experience being required. Tump-line companies have been formed in connection with each Canadian brigade.

CITY OF PRINCE RUPERT

KALSOBINING CITY HALL

Tenders for the above work will be received by the City Clerk up till 5 p.m. on Monday, February 11th, 1918. Further particulars from the Acting City Engineer.

TIMBER SALE X 925.

Sealed tenders will be received by the Minister of Lands not later than noon on the 25th day of January, 1918, for the purchase of Licence X 925, to cut 3,660,000 feet of Hemlock, Cedar, Balsam and Spruce on an area situated on Long Lake, Fraser Reach, Range 4, Coast District.

Two (2) years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B. C., or District Forester, Prince Rupert, B. C.

TRADE PARLIAMENTS
ARE INSTITUTED
IN GREAT BRITAIN

London—The National Pottery Council, which was opened last week at Hanley, is the first of the new trade organizations to bring together employers and workers to deal jointly with questions concerning the welfare and progress of their trade and its members. The Council embraces the pottery trade of the whole kingdom, and is comprised of an equal number of elected representatives of employers and workers. Dealing, as it will, with every phase of activity in the pottery industry, the Council will be the grand parliament of the trade. Conditions and wages of workers, profits and earnings of masters, the study of processes, the encouragement of research and the fullest using of results, the education of workers and encouragement of enterprise and industry, the gathering of information for the common good of the trade, the building up of trade and markets—these are some of the questions that will fall within the scope of the organization.

TIMBER SALE X 926.

Sealed tenders will be received by the Minister of Lands not later than noon on the 25th day of February, 1918, for the purchase of Licence X 926, to cut 2,556,000 feet of Hemlock, Spruce, Balsam and Cedar on an area situated on Long Lake, Fraser Reach, Range 4, Coast District.

Three (3) years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B. C., or District Forester, Prince Rupert, B. C.

WATER NOTICE

(Diversion and Use.)

TAKE NOTICE that The British Canadian Lumber Corporation, Ltd., whose address is 509 Yorkshire Building, Vancouver, will apply for a licence to take and use one cubic foot per second of water out of an unnamed creek, which flows southerly and drains into Masset Inlet, about 400 yards north-easterly from the southwest corner of Lot 1438.

The water will be diverted from the stream at a point about a quarter of a mile from its mouth and will be used for steam purposes upon the land described as Lot 1438, Graham Island.

This notice was posted on the ground on the 2nd day of January, 1918. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Prince Rupert, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

The date of the first publication of this notice is January 8th, 1918.

THE BRITISH CANADIAN LUMBER CORPORATION, LTD.
J. T. T. Paxton, Receiver and Manager.
