PRISONERS TAKEN YESTERDAY BY THE BRITISH NUMBER 6,000

MORE THAN 6,000 PRISONERS ARE TAKEN BY BRITISH FORCES FRENCH ALSO DRIVE FORWARD

Enemy's Defences Penetrated at Many Points by Allied Troops and Counter Attack; are Repulsed by French in St. Quentin District.

(Special to The News via G. T. P. Telegraphs.)

London, September 19.—The British have penetrated the enemy's defences northwest of St. Quentin to a depth of three miles and captured more than 6,000 prisoners. The British also captured Fresnoy Le Petit, Bethaucourt and Pontru and the Australians have occupied Leverguier, Villeret and Hargicourt. High ground south of Gouzeaucourt has been carried by the British, who reached the outskirts of Villers Guislain and occupied Gauchwood. Templeux Le Guerard, Ronsoy, Epehy and Peziere have also been taken, the troops penetrating to a great depth along the line.

Paris, September 19.—The French attack on the right of the British in St. Quentin sector resulted in an advance of a mile and a third along a six-mile front. French troops co-operating with the British progressed west of St. Quentin. They advanced their lines two kilometers between Holnon and Essigny Le Grande on a front of 10 kilometers. They reached the outskirts of Francilly Selency and captured Savy Wood and Fontaineles Clercs. They now hold the southern outskirts of Contescourt. Several hundred prisoners were taken in this operation. The French also made progress to the west of Jouy (north-east of Soissons). The enemy was strongly counter-attacked on the plateau to the east of Allemant. We drove him back and gained more ground, taking 130 prisoners.

ITALIAN ACTIVITY FAVORS THE ALLIES

(Special via G. T. P. Telegraphs.)

Rome, Sept. 19.—An official communication from Italian headquarters says: "North of Monte Grappa, five enemy counter attacks in an effort to retake ground at the head of Seren valley were repulsed. The number of prisoners taken in minor operations between Cesilla Valley and Col Del Orso yesterday was 442. Twenty machine guns were also taken. On the slopes of Monte Dozzola, southeast of Morie, there was lively fighting between reconnoitering parties. In the Ordio Valley a hostile outpost was captured. Enemy artillery was particularly active along the Piave in the Montello region and near Fagari.

CRIMINALS MUST PAY FOR ALL ATROCITIES

(Special via G. T. P. Telegraphs.)

Paris, Sept. 19.—Premier Clemenceau speaking in the French Senate last night declared the Allies must keep on fighting until Germany understands there can be no compromise between crime and right. France desires the honor of expressing her gratitude to splendid soldiers of the Entente whose efforts are about to free the populations from the subjugation of barbarism. Referring to German atrocities he says: "There must be no victory until such criminals are made to pay in full."

BRIEF TELEGRAMS

German regulars have joined the Bolshevik troops along the Volga river. It is believed that a serious military operation is pending. Quietness prevails along the Canadian front. Several bloody collisions occurred in Belgium between Austrian and German soldiers recently. Lloyd George is now convalescent. A Hungarian officer tells of the revolt of two regiments recently in Budapest.

American troops embarked for Europe in August numbered 313,000. The total carried on British ships was 180,000. Members of the crew of the American steamer Dora, torpedoed and sunk on September 4, have landed at Irish ports. The American delegation to the Inter-Allied Labor and Socialist conference yesterday presented proposals that the conference endorse the fourteen points laid down by President Wilson as the conditions on which peace may be established and expected and maintained.

KILLED IN ACCIDENT

(Special via G. T. P. Telegraphs.)

Nelson, Sept. 19.—W. R. Mollard was killed and Murdock Henderson was seriously injured when an automobile went over the grade two miles from Trail yesterday. Mollard was a business man of Trail. Henderson was the driver of the car and a resident of Rossland.

MUCH INTEREST TAKEN IN EXHIBITS AT FALL FAIR

TERRACE MAKES FINE SHOWING; FLOWERS AND VEGETABLES ATTRACT MUCH ATTENTION; PRIZE LISTS SHOWING WINNERS IN SOME DEPARTMENTS

A. W. Edge, president of the Northern B. C. Agricultural and Industrial Association when asked yesterday what he thought about the fair said that he was well satisfied with the results obtained. There had been difficulty in getting help as usual but everything had gone well and he thought the results quite justified the efforts.

Terrace.

The exhibit that seems to have attracted most attention was the district exhibit from Terrace. This is the only district exhibit in the show and it certainly indicates that Terrace is delivering the goods in so far as production is concerned. H. Lefontaine is in charge of the exhibit and he is kept busy pointing out the excellence of the various products and answering questions in regard to it. The principal exhibitor in this section is Fred Bohler or perhaps it might be almost as well to say Mrs. Bohler for she it was who worked long past midnight to get the exhibits in place. Other exhibitors from Terrace were Geo. Howe, Mrs. Little, R. Corlett, and Messrs. Wick, Swan, Heep and Lefontaine. There was one exhibit of very large ever-bearing strawberries shown by S. Cook that attracted much attention.

Judging Delayed.

In the other parts of the hall judging was delayed in order that the exhibits from the Queen Charlotte Islands might be included. There was a fine lot of garden stuff however and the flowers were splendid. The roses and sweet peas made a great showing.

In minerals there was an interesting exhibit from the Surf Inlet mine showing the native ore and the processes through which it passes in recovering the gold. There was also ore from the Drum Lummon mine and a chunk of blister copper and some ore from Granby.

Industrial Exhibits.

In the industrial section special notice must be drawn to the exhibit of the electric light plant shown by the Prince Rupert Engineering and Supply Company where the booth was lighted by the plant in operation there and also the lights over the throne were kept going by it. A storage

battery is used so that the machine does not have to work all the time in order to keep the light supply going. It is understood that two of these outfits were sold by the firms yesterday as a result of the exhibit. The firm also has some other specialties such as babbling metal, belting, and a number of other things of interest to engineers and machinists.

Barrie's furniture house also has an attractive exhibit. He shows a fine dining-room set in fumed oak which looks unusually well and was the subject of favorable comment. There is also a white bed-room set that looks pretty.

An all too small Indian exhibit shows fine needlework, crocheting and basket work. The quality is good but the quantity is lacking. The work of the schools is indicated in the exhibit in the galleries. It makes a good showing although there is nothing there unusually outstanding.

The following are some of the prize lists:

TREACHERY AND MURDER MARK ACTIONS OF LENINE AND TROTSKY IN RUSSIA

WHILE PEACE CONFERENCE IS IN PROGRESS BOLSHIEVICS WERE SENDING AGENTS TO DISORGANIZE ARMIES OF THEIR ALLY, ROUMANIA, SAYS OFFICIAL DOCUMENT ISSUED AT WASHINGTON

(Special to The News via G. T. P. Telegraphs.)

Washington, September 19.—The betrayal of Roumania and elaborate advance plans of Germany and her Russian tools for suppressing and murdering loyal Roumanians, Russians and Poles are exposed in today's chapter of astounding Russian secret documents which the American Government is giving to the public. Other installments of the series have described how the Bolshevik leaders, Lenine and Trotsky, and their associates were bought by Germans for millions in gold and engineered the bloody overthrow of Russia for the benefit of their masters.

Now the story is told of how, while the Brest-Litovsk peace conference farce was still in progress, Bolsheviks were sending hired agents into Roumania to disorganize the armies of Russia's ally, dethrone the Roumanian king and turn loose German armies occupied there for service in a great offensive on the west front.

ARMY OF 4,800,000 FOR THE STATES BY JULY NEXT SAYS GENERAL MARCH

(Special to The News via G. T. P. Telegraphs.)

Washington, September 19.—An army of 4,800,000 by next July, after all deductions have been made for casualties and rejections, is what the enlarged American military programme calls for, General March explained to the House appropriations today, in discussing the new \$7,000,000,000 army estimates. There are now about 3,200,000 men under arms, General March said, and the plan is to call 2,500,000 of new draft registrants to the colors between October and July.

Everyone has heard of the work being done for the soldiers at the front by the Salvation Army. This worthy institution is making a call on the citizens tomorrow to support the work and with that end in view the members of the local organization, assisted by friends, will be out bright and early to make the collections.

At present 800 uniformed workers devote their entire time to religious and social duties. Forty-eight motor ambulances have been contributed for the work of the army and are manned by them. Something like 300,000 soldiers and sailors are catered for weekly in the various institutions, and an immense lot of other work is accomplished, of which there is not space to tell.

**Crossing the Rhine
 Difficult Task.**

The greatest obstacle to the success of the Allies will be, in the first place, the shortest line to which the enemy may fall back, from the southernmost point of the Dutch border passing in front of Liege, in front of Metz and down to their present line at Belfort. It is apparent that the shortening of the German line will give the defenders every opportunity to place men and guns along the whole front, without gaps, through which the Allies might outflank the Germans. There they will make the last stand, before crossing the river Rhine. It must be remembered that the Prussians are of the opinion that the Rhine will prove their salvation, if they are compelled to cross this non-fordable river. It is well known that a river can be defended, on the further side, if the defenders have sufficient armament, and can concentrate at a threatened point in less time than the enemy can build bridges. In defending hundreds of miles of the banks of a river, which will necessitate again extending their line, the Germans will give an opportunity to the Allies for the crossing in some selected places unknown to the defenders where there is a loop, or "re-entrant."

The question of bridging a river is not of great consequence, so far as men and material is concerned. The difficulty is in the efficiency of the heavy guns and the men, to prevent the enemy from dropping shells on the structures. So long as an effective force is on the other side, entrenches, and continually dropping shells, the work cannot go on, and another place for crossing must be found. In building bridges and crossing a river it is necessary to surprise the enemy, dominate the opposite bank with artillery and have sufficient men and guns ready to cross and hold the opposite shores until enough men, guns and supplies cross to hold and "carry on."

The Rhine is an obstacle in the way of the Allies that will receive a great deal of attention from the commander of the forces. On the arrival of the armies on its banks our forces will be well within German territory. It will then become a question of the enemy making a stand with depleted forces and a good idea of the hopelessness of their power to win. Once across the Rhine, the Germans will thoroughly realize that they will never again be in a position to meet the forces opposed to them. If the Germans cannot hold the line from Liege to Belfort, it will be necessary for them to spread out, to cover the territory leading to the Rhine, giving the Allies the opportunity to outflank them before they could cross the river and prevent the Allies from following them to the other shore.

**Fast Driving
 May Be Dangerous.**

The News has been asked to draw attention to the danger of fast driving in the city by automobiles. It is said that there is altogether too much speeding and that this is a danger to the children on the streets. Only yesterday one was struck although not seriously injured.

Prince Rupert is differently situated from any other city in that it is necessary for the children to play on the streets here, owing to lack of other convenient places. The wooden roadways are dry and clean and make ideal playgrounds, except for the danger. Drivers cannot afford to be careless. In a large city there is some excuse but here the distances are so short and the crowds so few that there is no necessity for bursts of speed.

**Rain Was a
 Disappointment.**

Many people were sadly disappointed yesterday at having rain when a fine day would have meant so much. After having had fine weather for so long a spell it was anything but pleasing to have a steady downpour all day. However it is a good thing to have another opportunity to play the games which had been set for yesterday. If they are not completed before tomorrow night it is possible that they may be played on Saturday. It is not often that so many good sports get together here and they should not miss the opportunity of meeting as often as possible in friendly contests.

"The food crisis is grave and urgent, beyond possibility of exaggeration."—Sir Robert Borden

City and Town Labor Must Save The Food Situation

THE heart of the food production problem is labor, and the heart of the labor problem is the city dweller. City people must produce food if Canada is to do her full duty in support of our soldiers and Allies.

Men who are needed on farms must come from the cities and towns—there is no other source. The Provincial Departments of Agriculture co-operating with the Canada Food Board, can place thousands of men on good farms in this Province. They are needed at once.

Those who remain at home must also Grow Food

A War Garden will not excuse the man whose rightful place this year is on a farm. But War Garden service is needed from those who can do no more.

Every pound of home-grown vegetables, produced on city land by city labor, will be a positive addition to the food supply. Home Garden and Vacant Lot cultivation will leave the farmers free to grow more food for export.

The vegetable garden offers an opportunity for service to men whose circumstances make it impossible for them to work on a farm, to women, to boys and girls—to city people generally.

Be a Food Producer This Year

If there is a garden or vacant lot movement in your community, associate yourself with it. If no organization exists, do what you can to interest your neighbours in the War Garden campaign. Write to your Provincial Department of Agriculture for pamphlets on gardening and additional information.

SCIENTIFIC FIGHTER, BUT NOT A BRUISER, IS BURNS; CHAT ABOUT HIS CAREER

THINKS IF HE HAD BEEN ALLOWED TO GO ON HE COULD HAVE BEATEN JOHNSON — FOUGHT MANY BATTLES — BEATEN ONLY FOUR TIMES

A real hard boxing go with plenty of punch and considerable science is the sort of thing that may be expected tonight when Tommy Burns meets Tex. Bracken in the Westholme Theatre.

Tommy is a scientific fighter. A man who uses his brains as well as his fists and nobody is ever quite sure what game he is going to play until he plays it. His opponent is one of the hard hitting, bruiser kind who is good on straight boxing and if not outmatched by brains is likely to knock his opponent out. He has been wanting a match with Burns for some time past and thinks he cannot be stopped in ten rounds.

The two men are something if he can. He does not belittle about the same height and weight him for he has learned not to probably two hundred pounds, so hold anyone cheap. there is bound to be some fun for a little while when the game starts.

Told of Battles.

Yesterday afternoon a News man called on Tommy Burns at the Prince Rupert Hotel and had a chat with him. He was asleep when the visitor arrived, but seemed quite pleased to talk and for half an hour or more he answered questions and told about his battles with the various champions he had met.

Asked what he really thought of the boxing game, Burns said he thought every boy should learn to box, as it developed his body and his brain, taught him to think and act quickly, gave him self confidence, and taught him to keep his temper. Besides that it prevented him being a sissy. The art of self defence, he said, was more in favor now than it had been for many years. In nearly every country today boxing was being taught, and it was found to be beneficial.

His Waterloo.

Telling of the time when he met his Waterloo, Burns said that he thought if the police had not intervened he would have eventually knocked Johnson out, for he had punished him a good deal and the next day it was found that Johnson had two of his ribs broken. His friends (and all the people of Australia were his friends) thought he was getting the worst of it and they were afraid he would be beaten up too badly, whereas he was just wearing Johnson out. Pretty soon he would have come back.

"I have won a good many matches through using my head," said Tommy. "When I was fighting Billy Allen I was getting the worst of it, when I suddenly hit on a plan which I thought would win, and it did. I pressed him all around the ring, taking a good deal of punishment but tiring him out. Then suddenly I changed my tactics, stepped back and struck him and the result was just what I expected."

It is no good to rely on any one plan of attack, Tommy thinks. He says that the short arm jab is the most effective stroke as it gives the opponent no notice of what is coming. To lunge back is to give notice of the blow. It is easy to learn to throw the body behind the short stroke and make it tell even more than the other kind of blow.

Burns is a sergeant in the First Depot Battalion at Vancouver and he has been instructing a class in boxing at Victoria. He will also probably teach the boys who are going to Siberia just how to handle themselves.

Sixty-Six Contests.

The ex-champion has fought 66 contests and lost four. Three of them were at the time when he was in the middleweight class and the only defeat since he became a heavyweight was when he fought Johnson in Australia ten years ago. For two years he was heavyweight champion, defeating O'Brien, who beat Fitzgibbon; Gunner Moier, champion of England; Jim Roache, the Irishman; Jewey Smith, the South African champ.; Bill Squires, of Australia, whom he met at Frisco, and Bill Lang who beat Jack Johnson.

Burns is only 5 ft 7 in., but he has fine shoulders, keen eyes which look at you square, and he is active as ever he was. Perhaps he has too much weight, but he has already trained down 27 lbs. since he has been in the camps. He says that this is no sparring exhibition that he is giving but he intends to trim his opponent

FIXES PRICE TO BE PAID FISHERMEN

On the recommendation of the Canada Food Board, the board has issued an order fixing the prices to be paid fishermen for salmon in British Columbia at the rates prevailing in Washington. The committee was advised to this effect by H. B. Thomson at a meeting in Victoria on Saturday. These prices are: Cohoes, 50 cents each; chums, 30 cents each; humpbacks 12 cents each.

The order setting the price to the fishermen applies to the Fraser river, the west, south and east coasts of Vancouver Island and in the waters from the west coast to the mainland of British Columbia from the southern boundary to and including Kingcombe Inlet and the Island of Vancouver up to and including Alert Bay. The necessity for the order was found in the fact that fish buyers from Washington were coming into British Columbia waters and offering the fishermen such remarkable prices for their salmon that the cost to canners had risen to a prohibitive point. The Washington buyers were able to offer any price they liked because there is no price set upon the frozen fish in the United States, and they could demand from the consumers whatever figure they desired.

The natives were in a starving condition and Mr. McDonald and Mr. Lund left them all the grub they had aboard their boat and offered to tow them in to Juneau. Jackson said that they expected that they would be picked up and towed to Funter Bay, their home, in a short time, and refused the offer.

Build up the Mighty National Force

FOR fifty years the Teuton peoples have been trained, disciplined, whipped, into servile cogs of an implacable military machine, by which is maintained the Prussian doctrine of might, and the Kaiser's autocracy. The Teutons deny themselves, they make sacrifices, because they are trained or forced to do so, but they do it.

The peoples of the Allied nations must make great sacrifices and tremendous efforts in order to defeat the enemies of freedom, but because they are free peoples it is left largely to the individual to say what or how much self-denial each will practice.

So if freedom is to prevail individuals must make voluntary sacrifices which in the aggregate will be greater than the forced sacrifices of the enemies of freedom.

The measure of your love of freedom is your willingness to deny yourself so that the strength of the nation for war effort will be increased.

This self-denial must take the form of money-saving—thrift. Each person knows in what way he or she may save.

The national need says you must save, but free Canada leaves it to you to say by what means and to what extent you will save.

★ ★ ★ ★

Now, it is for you, each of us, everyone of us, to say how much patriotic endeavor, how much loyal sacrifice we will make by saving our money, by "doing without" so that each day will see a surplus to add to our own and the nation's strength. No matter how small the surplus it is important because each saving is an effort made, and many small individual efforts make the mighty national force.

"SHADOW OF HER PAST" SHOWING AT WESTHOLME

The Shadow of Her Past should be a problem play. It is the feature that is being shown tonight at the Westholme with the famous actors Lena Cavalieri and Lucian Muratore as stars. The play is a five-reel Pathe Gold Rooster feature and that is sufficient indication that it has merit.

The two-reel comedy is a funny thing that has plenty of action in it. No one can afford to miss this holiday fun.

In order that the show may be over in time to accommodate the boxing match at 10, the show will commence sharp at 6:45.

OFF TO SIBERIA TO FIGHT BOLSHIEVICS

A. E. Woods, Formerly Sergeant Major in Lancashire Fusiliers, Has Joined the New Battalion.

The first Prince Rupert man to be accepted for the new battalion to go to Siberia is A. E. Woods, a veteran fighter who has seen long service and been wounded more than once fighting for his country. The call of the new battalion is strong, however, and he is going again to do another bit.

He was here when the war broke out and he immediately returned to England and rejoined the Lancashire Fusiliers which was his old regiment. He went overseas and fought at Mons, but failed to see the angels that time. He came nearer to it at Ypres where he was wounded in the leg three times. At Neuve Chappelle he got a lucky one in the head and nose and was also gassed and that put him out of business for the time being, although today he passed the doctor with flying colors.

Woods wears the Royal Humane Society's medal for saving two nurses and three men at the Dardanelles. He has two South African medals, one for service in Egypt, one in the Persian Gulf; he wears the Mons Star and now he wants just one more decoration for service in Siberia. He is the last of eight brothers who have fallen. He has refused a commission three times as he prefers the non-commissioned rank.

Mr. Woods has joined as a result of the efforts of Corporal Nelson who has just started a campaign here. It is also possible that Colonel Harvey will be here on a similar errand.
