SEATTLE, Dec. 28.—The mail boat Frygve, plying between Peterburg and Kake, Alaska, for which fears were felt after she disappeared from a point where she had anchored with a broken crankshaft, has been taken in tow by a rescue vessel, according to word received here from Juneau. The last hope held for the halibut schooner Moresen, given up some time ago by the Seattle shipping men as lost, was dissolved yesterday with the peeling here of a radiogram sent by the coastguard cutter Unalga to Juneau. The Unalga reported that she had made a thorough search of Toy Bay, Alaska, without finding any trace of the Moresen. The Moresen left Sitka October 15 with a crew of five.

Correspondent Says Lull is but Temporary; Republicans Still Able to Make Trouble

LONDON, Dec. 28.—Reviewing year end conditions in Ireland, the Daily Mail's correspondent in Dublin paints a discouraging picture. Fear is expressed that the present lull in military operations is only temporary and that Republicanism is still strong enough to cause the Free State government infinite trouble. The correspondent attributes the reviving of activity among women, seventy-five per cent of whom, he asserts, probably sympathize with the irregulars.

Provide Inducement For Dog Fish Industry.

It looks as if the right way has at last been discovered to deal with the dogfish, says the Pacific Fisherman. When properly treated in a reduction plant this predatory fish—one of the worst pests of the fishing industry—is found to produce a valuable oil and the highest grade of edible fish meal. Methods and equipment for the purpose are not standardized as yet, but are well understood by enough people to form the beginning of a promising industry. Development has been retarded by difficulty of getting a steady and ample supply of the fish, but those who have been studying the problem believe that methods have at last been devised that will do the work.

It is still a question, however, whether this industry can be made worth while to the operators under present conditions. Taking the fish at best involves considerable expense, and the nature of the product demands a supply of cheap raw material. It is accordingly difficult to get any large number of fishermen to catch them regularly.

The industry is one that will perform a service of great value to the commercial fisheries, by materially reducing the numbers of one of the worst enemies of food fishes; and at the same time it converts these predatory fish into valuable material. It would therefore probably be money very well spent if the government of the United States and Canada, or of the Pacific States and British Columbia, could see their way to offer a small bounty for every pound of dogfish caught and delivered for the manufacture of oil and fish meal. If this could be done, the combined receipts in bounty and payment from the reduction works would form an inducement for a considerable number of persons to engage in the destruction of dogfish, and the salmon fishery, etc., would be greatly benefited.

Outlook For Business Good.

The outlook for the fish oil and meal industry in British Columbia is now very good, according to one of the best-informed handlers of these products in the province. After about 25 years of effort that has been disastrous to those engaged in it, during which fully a million dollars has been sunk in tombstones to concerns which entered the field without sufficient knowledge of conditions, experience has placed producers who are properly equipped and located in a position to operate on a profitable basis. Last year was a poor one, both in production and markets, but this year is much more favorable and some of the plants are making the largest output in their history.

The increase is due to the fact that successful methods have been developed for catching dogfish, which promise to be converted from an unutilized pest to an important resource. It is believed that the tonnage of dogfish is practically unlimited, the catch depending on use of the right gear, knowledge of their movements, and economy in fishing operations. Fishing is now being done with long lines, seines, and old Sockeye nets, as well as traps of special design in suitable locations, and the dogfish run in most localities follows the herring. Long-line fishing produces the most certain results, but is rather expensive, and great reliance is placed on dogfish gill nets, which are similar to Sockeye nets but of heavier material. The nets are often sunk in 75 or 80 fathoms of water. The use of traps is a new development, but much is expected of them.

A new season is getting well under way in the south. The possibilities of the industry are indicated by the fact that Nanaimo in 1917-18-19 averaged about 50,000 gallons of oil a year, using only the dogfish livers, which represents about 3,000 tons of fish a month. This year arrangements have been made for a largely increased catch, and by using the whole fish instead of the livers the output of both oil and meal is greatly increased.

ANOTHER COLLECTOR HERE IS NOT NEEDED

Says M. S. Whittier, Chief Deputy Collector of Customs for Alaska

JUNEAU, Dec. 28. — The appointment of another deputy collector of customs at Prince Rupert to facilitate fresh fish shipments to the East from there, in accordance with the new tariff, is not advisable at the present time, according to M. S. Whittier, chief deputy collector of customs here, who returned to his headquarters recently after spending several weeks at Prince Rupert looking into the matter, and at Hyder on other official business. The slack fishing at this time of the year makes it unnecessary for a deputy collector to be appointed to handle the business. When the season picks up again it might be advisable, Mr. Whittier said.

DOGFISH PLANT AT SKIDEGATE

Pacific Fisherman Reports Establishment of Industry in Old Doughty Plant

A new corporation, known as the Dogfish Fish Products, Ltd., has lately been organized at Victoria, with the object of establishing a dogfish reduction plant at Skidegate, Queen Charlotte Islands, the site of the ill-fated fishery venture started some years ago by Sir George Doughty, says the Pacific Coast Fisherman. Those principally interested are T. S. Hankey, a Victoria lawyer, and E. G. Henshall of the Henshall Fish Products, Ltd., of Sooke Harbor, B.C., which has been producing fish by-products in a small way for the past year or two. The project received considerable publicity through statements made by Mr. Hankey at a hearing of the recent fisheries investigating commission, and has since been rather extensively written up in newspapers at Victoria and Prince Rupert. A prospectus has also been issued, giving a decidedly glowing account of profits expected from the development of the dogfish industry.

The company's announcement states that it is intended to carry on the manufacture of dogfish products on a larger scale than has hitherto been attempted in the province, notwithstanding the fact that several other concerns have lately gone actively into the business in a good sized way. It is stated that a process invented by Mr. Henshall will be used, by which the oil can be more easily extracted than by previous methods, and the fishy smell eradicated. It is said that the lethality of the dogfish, hitherto a source of difficulty in reduction has been turned to account in the production of a preservative shingle stain.

Agricultural Use

As for the use of the products, statements are cited from J. R. Terry, chief poultry inspector for the province, and several other local men endorsing the use of dogfish meal for both swine and poultry feeding.

It is proposed to build a plant capable of taking care of 50 tons of raw fish daily, and it is claimed that the process will turn out much larger quantities of products to the ton of raw fish than methods formerly used.

DICKENS' PICTURE IS OF HIGH CLASS

"Our Mutual Friend" Raises Movie Standards to Better Plane

"Our Mutual Friend," one of the most unusual photo dramas movie fans of Prince Rupert have had the good fortune to view in many months draw intelligent classes to the Westholme Theatre. This human visualization of Dickens' last complete novel, which many critics say is the greatest of all his masterly writings, will strike a responsive chord with the moving picture public.

"Our Mutual Friend," proves an effective retort to the fallacious belief that movie patrons still prefer the "hard boiled" type of picture to the screen versions of famous classics.

Long after the final showing of "Our Mutual Friend," this fascinating story of romance and mystery will prove an interesting subject for discussion among the better class people. The picture has romance, murder, mystery, thrills and all

AUSTRALIA CONCERNED OVER WAVE OF CRIME

Premier of New South Wales Calls Conference to Deal With Condition in Sydney

SYDNEY, Australia, Dec. 28. — So accustomed is Australia to having a law-abiding citizenry that a total of 654 persons charged with crime in six months in a city of 800,000—Sydney—is considered a crime wave, and the premier of the state has called a conference to deal with the problem.

It will be proposed that the minimum jail sentence be six months. Although all but 184 of the 654 persons arraigned were convicted or pleaded guilty, it is felt that the judiciary has shown undue leniency in dealing with criminal cases.

RETURNED SOLDIERS' INSURANCE EXPIRY DATE

An amendment to the Returned Soldiers' Insurance Act provides that insurance may not be granted on the lives of returned soldiers with or without dependents, in a serious condition of health from causes other than war service, or those without dependents, even when impairment is due to service. The amendment, however, contains the following proviso:

"Provided that applicants with or without presentable disability who are so seriously ill that they have no expectancy of life, and who have dependents who are entitled to become beneficiaries under the contract as provided under the Act, shall be insurable under the Returned Soldiers' Insurance Act, up to, and inclusive of 1st JANUARY, 1923."

Insurance may be granted in all cases where the impairment is due to service and the returned soldier has dependents.

Application may be made at any local office of the Department of Soldiers' Civil Re-establishment, or by mail to Soldiers' Insurance Division, 140 Building, Ottawa.

Applications not affected by the above will be accepted until September 1st, 1923.

JAP INDUSTRIAL REFORM NEEDED

Production Costs Must be Lowered if Country is to Maintain its Position in World Trade

TOKYO, Dec. 28.—Unless some fundamental reform is effected in the Japanese industrial organization, Japanese goods will be evicted from the world markets according to M. Akiyama, of the Commercial and Industrial Bureau of Tokyo, who has just returned from a tour of inspection in China and other countries.

In China, he says, wages are very low and for this reason Japanese goods are being forced out there by Chinese manufacturers whose product is just as good as that of the Japanese. He also declares that in the South Seas markets Chinese goods are slowly supplanting Japanese merchandise and that unless Japan is to lose these markets entirely production costs must be reduced in this country.

MEMORIAL FOR NATIVE HEROES

Impressive Ceremony at Unveiling of Metlakatla Tablet by Archbishop DuVernet

Solemn and impressive was the ceremony at St. Paul's Church, Metlakatla, yesterday, of unveiling the memorial tablet in honor of the four heroes of the native village who made the supreme sacrifice in the Great War. The large and handsome brass tablet is now formally placed in a prominent position on the wall of the native worshipping place where it will remain a perpetual memorial to the brave men. It bears the names of the four heroes of the village who died on active service: John E. Rudland, James N. Leighton, Daniel Pearson, M.M., and Andrew O'Reilly. Six men enlisted from Metlakatla and these four gave up their lives. The tablet was provided by the residents of the village themselves.

The service drew a large attendance not only of the natives themselves but of visitors from Prince Rupert including a detachment from the Royal Canadian Mounted Police in full uniform, consisting of Inspector Achard, Sergeant Jepson, Corporal T. Brice and Constable Thornthwaite. There were also representatives of the Great War Veterans' Association and Archbishop DuVernet, Archbishop G. A. Rix and Indian Agent W. E. Colison went across to participate in the ceremonies. Miss Stone, Miss Mercer and Miss Davies from this city were also in attendance.

The service commenced with the singing of a hymn after which Peter Haldane, the Metlakatla lay reader, gave a scripture reading. Prayer was offered by Archbishop DuVernet, followed by another hymn was sung followed by Archbishop DuVernet's unveiling address. The detachment of Royal Canadian Mounted Police marched forward and stood at attention as the Archbishop removed the Union Jack draping the tablet which was adorned with an abundance of beautiful wreaths sent by the natives themselves and friends from Prince Rupert. An impressive two-minute silence was observed after the unveiling by those present who stood with heads bowed. A memorial prayer was then offered by the Archbishop and the native choir sang the hymn "O Valiant Hearts." A short address in the Indian language was delivered by the Indian agent W. E. Colison and Mrs. Morrison read an address by C. F. Morrison who was unable to be present in person. The Metlakatla Band played an appropriate selection and delivered by Acting Chief Constable William Leighton who was also the father of one of the dead heroes. Peter Venn and Envoy Aukland, of the Salvation Army, each spoke a few words and a hymn was sung followed by the singing of the National Anthem. The band played "The Dead March in Saul," and the closing ceremony was the playing of "The Last Post," by Bugler Rance of Prince Rupert. An impressive silence was observed that could be fairly felt by the assembly.

After the service, tea and refreshments were served in the town hall and the Prince Rupert visitors then returned home. Indian Agent Colison took over the local visitors in the launch Murielle.

\$72,000 ASKED IN DAMAGE SUIT AGAINST C.N.R.

Alberta Woman Asks for Sum for Death of Husband and Personal Injuries

EDMONTON, Dec. 28.—Claim for over \$72,000 has been filed in the supreme civil court here against the Canadian National Railways by Mrs. Bernice Mary Smith on behalf of herself and four small children, the action arising over the death of her husband who was killed at a level crossing near Blackfoot on the company's line last October.

Train Struck Auto
 Mrs. Smith is the widow of Chester John Smith and resides at Kilsyth. She claims that while being driven with her husband and one child across the railway tracks in an automobile on October 7 last their car was struck by a railway eastbound train.

"My Boy was Starving to Death"

"As He Was Getting No Nourishment He Was Gradually Wasting Away."

"Here's a story which will interest every mother. Before my boy was born, I was in such delicate health that the doctor didn't think I would survive the ordeal. For weeks after he was born my life was despaired of, so I couldn't feed him and the poor little fellow was left to the care of friends. He wasn't naturally strong. No care was taken in choosing his food and his poor little stomach became so weakened that he couldn't keep anything on it. As he was getting no nourishment from his food, he was gradually wasting away. Finally, in desperation, we sent for a child specialist and he said that my boy was starving to death. He gave him some medicine and advised a certain diet. The child did improve but somehow couldn't seem to get strong. This went on for four or five years and the boy still continued weak and puny looking. He could not play like other children without having to lie down and rest. My sister who lives on a farm near the sea, said that she could fix him up if I would send him to her. While I hated being separated from him, I was ready to make any sacrifice to get him strong. He was away from me for three months and it was with feelings of great excitement that I

awaited his return as my sister had written me that I would be surprised when I saw my boy. When my sister got off the train, I could not believe that it was my own boy that she was leading by the hand. I never saw such a change in any child. He was fat and rosy and full of life with a happy smile! 'What on earth have you done to him?' I said. 'Why,' she replied, 'I simply made him live out of doors, gave him good food—and here's the real secret. I gave him three bottles of Cornel. Before he had taken half a bottle his whole appearance had changed. He got heavier, his face took on a colour and he would run round for hours at a time.' The change in my boy is the most wonderful event in my life. I am a regular fan for Cornel and never lose a chance to boost it. As I write I am looking out of the window and when I see that rosy, active, healthy child running round, I cannot believe that he was once a puny, delicate boy."

Cornel is sold by your druggist, and if you can conscientiously say, after you have tried it, that it hasn't done you any good, return the empty bottle to him and he will refund your money.

Sold by Orme's Drug Store and McCutcheon's Drug Store.

USE OF RADIO IN HERRING FISHERIES
 Will Eliminate Waste of Time and Increase Size of Catches

GOTHBURG, Dec. 28.—The radiophone is becoming a serious menace to the safety of the herring off the Swedish Coast. The fishermen, out at sea soon will be told from the Gothenburg radio central the exact location of the herring schools. This unique service, which will tend to eliminate wasteful waiting on the part of fishermen, and will doubtless mean a considerable increase in the catches of herring, is the newest commercial use to which the wireless telephone will be put in Sweden, according to plans just completed. While merchant vessels have for some time been required by law to carry wireless equipment, the smaller fishing vessels have hitherto operated without sys-

MOOSE SMOKER LAST EVENING

Excellent Program Featured By Three Splendid Boxing Bouts

An enthusiastic crowd enjoyed an unusually good program at the Moose Smoker in the Metropolitan Hall last night. Every number was excellent and exceptional praise is due the boys who took part in the boxing bouts. All are local lads from Bobb Smith's Golf Club and, although they have only been in training two months, they gave one of the snuggest exhibitions of the fistie art that has been seen here. Without exception they battled from the tap of the gong. Their form showed not only natural ability but good training. There were three three-round bouts as follows: K. O. Warrior vs. Tiger Boulter; Battling Sims vs. Tiger Boulter; and Kid Fraser vs. Bear Cat Prizell. Roi Barnes acted as referee and Harry Fletcher held the watch.

The musical program was as follows: Harry Fletcher, song, "Dear Old Mother Mine," encore, "When Shall We Meet Again," Eddie Craggs, song, "Smiles," encore, "Old Pal," Bert McEvoy, song, "Under the Old Apple Tree," in French, Gailis Couture, song, "L'Amour et la Vieillesse," Jack Webster, piano solo, "Cavalleria Rusticana," Robert James, song, "Pop Goes the Major," encore, comic, Fletcher and Craggs, duet, "Eileen Alanna," encore, "There's a Long, Long Trail," Harry Astoria, song, "The Sunshine of Your Smile," Robert Sims, comedy, songs and stories.

Harry Astoria, song, "Oh! What a Pal Was Mary," Mr. Westward, song, "Joe Sluggard," song, "The Preacher and the Bear," encore, Selection, Gailis Couture, song, "Alouette," Bert McEvoy, jig, Harry Astoria, love song, Jack Webster ably officiated at the piano. Refreshments and smokes were served throughout the evening. On the committee were Joe Sigmond, Roi Barnes, Frank Cameron, F. Scadden and Ralph Kitchener.

William H. Klepper, principal owner of the Portland baseball club, has wired Jack Kearns, manager for Jack Dempsey an offer of \$350,000 for a ten-round boxing match for the championship of the world between Dempsey and Jess Willard to be held in Portland on July 4. Willard, who is in Portland, has declared that the match would be agreeable to him.

Right on top of this comes the word from St. Paul that Tommy Gibbons, who recently outpointed Billy Miska in ten rounds, has received an offer from a New York promoter for a match with Dempsey and was asked to state his terms. "If Dempsey can be induced to enter the ring with me, there will be no scumblin' over the terms as far as I am concerned," Gibbons replied.

While we are on the subject of boxing, it is interesting to note that more light has been shed on the Ski-Carpenter fiasco in France some time ago. A despatch from Paris states that L'Aurore, one of the big French sporting papers, has printed a story to the effect that a close study of the film of the fight shows that Francois Deschamps, manager of the French boxer, went to Ski's corner in the fourth round and said something to Helers, Ski's manager. The newspaper recalls that according to Ski's allegation, it was in the fourth round that the negro had arranged to allow himself to be beaten. Vice-president Boubarial of the Box. ing Federation, in an interview with L'Aurore, said that for the manager of a boxer to talk to the manager of another while the bout was in progress, constituted a very serious fault. The newspaper adds that as the Federation's investigation committee has also seen the film, it will no doubt draw its own conclusions.

There will be a meeting of the executive of the Prince Rupert Basketball Association, team captains, referees and representatives, in the city hall tonight to make preparations for the resumption of the schedule early in the year. The date of opening of the league will likely be January 9 or 16. Improvements to play or arrangements will be discussed tonight and the Association will welcome any suggestions that may be forthcoming for the betterment of the sport.

There is some doubt as to how this one-man railroad will work in midwinter, but the proprietor has attached some sawed-off brooms to the front wheels as a miniature rotary plow. He thinks this will take care of snow up to a depth of a foot. If it goes deeper the passengers will have to help shove the drifts.

Years ago there was a flourishing business in the mining and smelting of iron at Katabdin Iron Works. When it was finally abandoned as unprofitable the place became a sportsman's resort.

SUGAR FROM
SODA WATER

English Scientists Discover Arti-
ficial Means of Duplicating
Work of Plants

LONDON, Dec. 28. — Sugar may today be obtained from soda water, the aerated beverage which flows from nickel plated faucets in thousands of drug and candy stores throughout the country, according to two English scientists who for nearly three years have been conducting laboratory experiments with the idea of duplicating artificially the work done by plants in self-nourishment.

It always has been a scientific mystery how living plants build up the sugar, necessary for their growth, from the carbon dioxide in the atmosphere, which they absorb, by mixing it with carbo-hydrates and the starch universally found in plants.

Their experiments convinced the scientists, Professor E. C. Baly and Professor Heilbrunn, that not only is it possible to produce formaldehyde from soda water by the action of very short wave length light, but that it is also possible to produce formaldehyde with ordinary sunlight in the presence of malachite green, or other appropriate coloring matter.

Carrying their investigation a little farther they succeeded, by acting upon soda water with ultra-violet rays, in building up sugar. They found that formaldehyde turns directly into sugar. The yield of sugar may be increased by heightening the concentration of carbon dioxide with sodium carbonate.

BURGLARS DID NOT
HAVE TO CRACK SAFE

Niagara Falls, N.Y., Dec. 28. — Burglars who entered the offices of Laur & Mack, here, prepared to blow the safe, received a pleasant surprise. The doors of the safe were closed but unlocked and on the strong box was a sign "this safe is open." The burglars took \$101.50 and an automatic pistol from the safe and stole a typewriter.

Officers of the company explained that it is cheaper to lose the small amount of money in the safe than to pay out a large sum for repairs.
