PRICE FIVE CENTS

Buckley Mill Operation Now Sure

BUDGET VOTE IS EXCITING INTEREST IN CAPITAL OF DOMINION

Ten Million Dollar Corporation to Take Over Masset Timber Limits and Operate Mill on Queen Charlotte Isds.

A ten million dollar Los Angeles Corporation has taken over the timber holdings of the Massett Timber Co. and the Buckley mill at Buckley Bay on Massett Inlet and will operate the mill and a fleet of schooners, carrying the lumber to Los Angeles to be finished.

This is a consummation of the efforts of F. L. Buckley who with Colonel Baker visited Massett Inlet and later went to England in regard to the matter. Recently he returned home to Vancouver and announced that the mill would operate soon. He then

went to Los Angeles to consult and is expected to return to Vancouver in a few days.

The Los Angeles Times has a long article regarding the company as follows:

Los Angeles Story.

Following several months of negotiations, carried on in Los Angeles and in Europe between local business men and English capitalists, details were announced here yesterday of a deal consummated which involves the consolidation of two big British Columbia industrial concerns with two local plants, the formation of a new corporation with a capitalization of \$10,000,000 and the utilization of the seventy-acre plant of the Los Angeles Shipbuilding and Dry Dock Corporation at Los Angeles Harbor for a gigantic new industry which will employ several thousand workmen. The new consolidated plant will operate lumber mills of all kinds, a fleet of lumber vessels with this as home port, and may other allied activities.

All the other boys in town are invited to attend and see the work and at the close light refreshments will be served to the boys only. Parents of the boys are invited to be present as spectators.

LIQUOR FOR YUKON BARRED

Arrangement Bonding Through Alaskan Territory Not Yet Arranged

DAWSON, June 8.—United States Customs collector McBride at Juneau has notified George P. Mackenzie, chief executive of the Yukon, that after June 15 an embargo will be placed by the American government on all liquor passing through United States territory for the Yukon, except for medicinal and scientific purposes.

The permit permitting liquor to pass through in bond terminates on June 15 unless arrangements are continued between the two countries.

Governor Mackenzie is taking the matter up at Ottawa.

LONDONDERRY IN FOR SIEGE

Both British and Rebel Armies Are Reported to be Massing There

LONDON, June 8.—British troops are concentrated on both sides of the River Foyle at Exchange telegraph declares. Several thousand rebels are reported to be concentrated at Rathoar, armed with the latest American rifles. An attack on Londonderry is believed to be imminent.

FLAT FISH ARRIVE.

The trawler G. E. Foster arrived in port with 35,000 pounds of flat fish part of which are being marketed at the local stores. These will be available for Prince Rupert people.

(Continued on Page 4)

BOY SCOUTS FORM GUARD OR HONOR TO BARON BYNG

The Boy Scouts Association have received word from Provincial Headquarters that the Chief Scout for Canada, Baron Byng of Vimy, will probably visit Rupert some time between July 25th and 31st next, and the Association has requested the Chief Scout to inspect the Boy Scouts and Cubs and for permission to form a Guard of Honor for him upon arrival in Prince Rupert.

INTERNATIONAL LOAN IDEA OFF

Leaders of Reparations Commission Cannot Agree—Bankers Drafting Report

PARIS, June 8.—All ideas of an international loan to Germany have been abandoned by the bankers' committee which is drafting a report to this effect for submission to the reparations commission. Lack of unanimity among the leaders of the commission is given as the reason.

ESSINGTON FISHERMAN DIED YESTERDAY AFTER ILLNESS FROM CANCER

John Johnson, better known among his associates as "Steel-head" Johnson died yesterday at Port Essington from cancer. A short time ago he went to Marpole Hospital at Vancouver for treatment but they could do nothing for him and he returned to Port Essington about a week ago.

He is well known around the Skeena River and everywhere in the north. He was of Swedish extraction and had no relatives here. He was about 70 years of age.

The funeral will take place Friday at 3 o'clock at Essington.

STRANGLER LEWIS WON OVER CADDOCK

BOSTON, June 8.—Strangler Lewis, heavyweight wrestling champion, defeated Earl Cadock, former champion, last night by winning two falls out of three.

THE GOVERNMENT WILL MODIFY THE BUDGET PROPOSALS

OTTAWA, June 8, 2:30.—The government budget will be modified Premier Mackenzie King announced in the House this afternoon. The Finance Minister will make a statement which will possibly suggest some modifications in the proposals now before the Commons.

COUNTY CRICKET

Tiddlesex beat Sussex by 8 wickets.

Kent beat Hampshire by 51 runs.

Essex beat Worcestershire by an innings and 297 runs.

Surrey beat Nottinghamshire by 8 wickets.

Yorkshire beat Lancashire by 6 wickets.

Worcestershire beat Somerset by 10 wickets.

Leicestershire beat Northamptonshire by an innings and 62 runs.

Pillsbury, manager of the shipyard, received word to this effect this morning.

SIR GEORGE BURY IS MARRIED ONCE MORE

Quick Work Following Divorce of Both Man and Woman.

RENO, Nev., June 8.—Sir George Bury, who secured a divorce a fortnight ago, was this afternoon married to Mrs. Doris Blumenthal, a woman who was granted a divorce from her husband yesterday.

P.G.E. MATTER VERY SERIOUS

Engineer Offers No Solution But Will Submit Report Soon.

VANCOUVER, June 8.—Premier Oliver, who is here, said he had interviewed J. G. Sullivan consulting engineer, who surveyed the P.G.E. for the Government at Winnipeg and the latter regards the railway situation as very serious. He offers little in the way of a solution of the difficulty.

The report will probably be submitted soon after which the Government will act on the recommendations.

YUKON PROFIT ON LIQUOR WAS \$26,000

DAWSON, June 8.—The net profit on the three Government liquor stores from September 20 until March 31 was \$26,000. The Legislature has agreed to permit continuation of the sale of liquor by stores and hotels until July of next year.

IRELAND MAY BRING ABOUT AN ELECTION

Hon. C. McCurdy, Chief Coalition Whip, Speaks in British Commons

LONDON, June 8.—Hon. C. McCurdy, chief Coalition whip in the House of Commons, in a speech yesterday, hinted that the Irish problem might become worse and that if the circumstances arose it would be right for the government to consult the country as to a mandate to continue in power. The next election, the speaker intimated, would not be on pre-war programs but would be on the reconstruction of trade and the persistence of the continuation of the Laborites' socialistic propaganda. He said there was no substantial difference between the Conservatives and Liberals.

NEW MODERATOR OF PRESBYTERIAN CHURCH

Rev. W. J. Clark, D. D. of Westmount, Montreal Chosen Last Night.

WINNIPEG, June 8.—Rev. Dr. W. J. Clark of Westmount, Montreal, is the new moderator of the Presbyterian Church in Canada. He was elected here last night over Rev. E. Short, D. D. of Montreal.

Dr. Clark succeeds Rev. Dr. Gordon of Winnipeg.

CONVENTION PASSES RESOLUTION AGAINST THE TAX ON CHECKS

VICTORIA, June 8.—A vigorous demand from municipal councils and school boards to be exempted from the taxation on checks was made at the convention of the Western Municipal Union. The resolution in regard to the matter was wired to Ottawa. The union will put the matter of unemployment squarely up to the federal Government, according to addresses of the officers.

FOREST FIRES

Large Number Reported From Victoria of Which 40 in This District.

VICTORIA, June 8.—The heat has increased the forest fires so far this season in the province to 261, an increase of 100 over last week. There were 40 in the district of Prince Rupert and 30 in Cariboo while Prince George has 27.

To Earn One Dollar in March, C. N. R. Spent \$1.10—C. P. R. 82c, and G. T. P. 84c.

OTTAWA, June 8.—To earn a dollar in revenue during the month of March, the Canadian National Railway expended \$1.10. The figures for the Canadian Pacific and the Grand Trunk respectively were 82.29 cents and 84.22. An improvement is shown over the same period last year.

Mr. A. Crewe, who arrived on Tuesday from Anyox, left on last night's train for Hamilton, Ontario.

Two Parties Line Up Against Government at Ottawa over Budget; Estimated Majority

OTTAWA, June 8.—An all night session to wind up the budget debate is faced by the House of Commons. From indications this morning there appears to be no doubt a vote will be demanded on the main budget motion. Progressives and Conservatives are lining up against the government. The government majority on the motion is estimated anywhere from five to fifteen.

OTTAWA, June 8.—The budget debate is drawing to a close. A formidable list of speakers remain but an effort will be made to bring it to an end either tonight or in the early hours of Friday morning. Then will come the division on the Drayton amendment and still more important the decision on the main motion itself.

La Pointe's Jibe.

Wednesday's proceedings saw some sharp duelling between the minister and ex-minister, Hon. Ernest LaPointe, minister of marine, satirically dubbed the opposition attitude as cold roast, partisan nonsense. He charged the opposition with having changed their names as often as Henry VIII changed wives and that without even applying their own Mating Act. He declared that no party in Canada was in favor of absolute free trade.

MANAGER FOR ANNUAL FAIR

J. F. Venables of This City to Have Full Charge of Event

The directors of the Northern B.C. Agricultural and Industrial Association last night appointed J. F. Venables manager of the fair for this year. His appointment is to the end of the year and his duties will commence immediately.

The annual fall fair is to be held September 12 to 16 inclusive. Last year it commenced September 13.

YUKON BUSINESS IS BOOMING NOW

DAWSON, June 8.—With the general opening of navigation in northern waters, business is booming in the Yukon. Steamers are leaving Whitehorse with record loads of passengers, mail and freight.

This year more freight has accumulated at Whitehorse booked for the interior than for the past ten years and exceptionally heavy bookings of tourists are reported by the White Pass and Yukon Railway.

BELLEEK IS TAKEN BY BRITISH TROOPS

No Loss of Life and No Prisoners Taken by British.

BELFAST, June 8.—Believe was occupied by British troops today which advanced to take the salient from the Irish regulars. A fort overlooking Belleek was first captured and then the town was taken.

Later the military headquarters announced Belleek captured without loss of life. No prisoners were taken by the British.

LONG DISTANCE RUN RECORD IS BROKEN

Hannes Kohlmann, Olympic Champion, Does 25 Kilometers in 1 Hour, 23 Minutes.

HELSINKI, Finland, June 8.—Hannes Kohlmann, winner of the 1920 Olympic marathon, recently beat the world's running record for twenty-five kilometers. His time was one hour, 22 minutes and 43 seconds.

No One Need Worry
Over Election.

No one need worry over the possibility of a Dominion election. There will not be one for some time to come. Nobody wants an election except a few politicians and even they would find it difficult to extract any pleasure from the game with money as tight as it is today. The Progressives in Parliament are not yet ready for another fight. They will hope to make a decided impression of their solidarity as a party before again venturing forth to the fray. At any rate there is nothing to fear. It will be some time before there is another opportunity to exercise the federal franchise.

Bad Political Mixup In China.

There is a bad political mixup in China today. In the north there is no settled rule and in Canton there is a ruler, Dr. Sun Yat Sen, who calls himself president of China.

Dr. Sun was one of the leading spirits in the rebellion which rid the country of the Manchurian rulers. He was made provisional president until an election was held. Then Yuan Shai Kai was elected and the old party returned to power to a very large extent. There was an effort made to rid the country of all progressives including the former provisional president.

Several more or less abortive efforts have been made by Dr. Sun and his followers to regain control. He has been elected president in the south and refuses to give up. There has been some fighting between his forces and the various northern factions but nothing decisive has taken place.

Sun Yat Sen is an idealist. He thought that his countrymen needed only the opportunity for better government in order to carry it out. He has now had a great deal of experience and is doubtless much wiser than he was ten years ago. His followers are very loyal to him and it is possible he may yet become in fact as well as in name, president of China.

See Ourselves
As Others See Us.

The Ketchikan Chronicle just to hand has the following editorial in regard to the fish business under the heading "Canadian Exclusion."

There has been considerable talk of the desire of the Canadian government to aid the American fishermen, in the marketing of their products. That desire (?) is shown by the following Order in Council which again shows that they have not changed their minds about aiding their own fishermen to the detriment of the American, and which again excludes from Canada, for Canadian consumption, any fish caught by an American. Note well in the first paragraph of the Orders in Council, a little more than half way down that portion in parenthesis. Also note their friendly desire to permit the fishermen to buy their supplies and bait in Canada. Their altruism is positively marvelous. The Orders in Council read:

"During the present calendar year (1922) foreigners or foreign corporations bringing fresh fish in vessels registered in the United States of America to any port in British Columbia, shall be permitted to land such fresh fish at such port without payment of duties, and tranship the same in bond to any port in the United States, or to sell such fish in bond to such local dealer or dealers as may be properly and duly licensed therefore under the regulations and conditions hereinafter mentioned, which dealer or dealers shall export the same in compliance with the bonding requirements (but without the right, however, in either instance to sell in Canada for consumption therein or otherwise, except in bond, any of such fresh fish so landed) or to sell their fish for use in Canada on payment of the duty; and such foreigners and foreign corporations bringing fresh fish in vessels registered in the United States of America to any port in British Columbia, shall be permitted to purchase bait, ice and supplies, and ship crews for such vessels at any port in the said province of British Columbia; provided also that such foreigners and foreign corporations before bringing fresh fish to a port in British Columbia may be permitted to purchase bait and ice at any port in the said province of British Columbia upon an undertaking to the satisfaction of the Minister of Customs and Excise that catches of fish made with any baiting so supplied shall be landed at a port on the mainland of British Columbia—the whole under such regulations and conditions as the Minister of Customs and Excise may determine."

PUBLIC WORKS
THIS DISTRICT

Work Now in Progress Mainly
Maintenance Repair — New
New Work Starts About
July 1.

FERRY AT FRANCOIS
LAKE READY JULY 8

Fourteen Miles New Road to
Colleymount—Rock Approach
to Bear River Bridge.

With the exception of the Francois Lake ferry, the fill to the Bear River bridge at Stewart and the Colleymount road, the most of the work now being done in Prince Rupert, Omineca and Atlin districts by the provincial government public works department consists of ordinary maintenance repairs to roads, bridges and trails. New work will not commence until about July 1 and, in the meantime, Hon. Dr. W. H. Sutherland, minister of public works, is expected here on June 21 and when he arrives and has gone over the district he will likely have some definite announcements as to what is to be undertaken. The question of the Terrace bridge and main highways are among the important matters which are under advisement by the department and upon which Dr. Sutherland may give out statements when he is here.

Dr. Sutherland is expected on the Princess Charlotte on June 21 and P. Phillip, chief public works engineer, has wired stating that he will arrive on the Prince George the same day. They will go from here, it is expected to Atlin district and visit Alice Arm and Stewart and other points. According to present plans, on their return, they will go to the interior and be at Francois Lake possibly about July 8 when the trial runs of the new ferry are to take place.

Omineca District.

The Francois Lake ferry is now nearing completion. The frame is all finished and the plates are being riveted. The hull will be painted this week. The craft will be ready to launch about June 21. The engines will then be installed and it should be ready for the trial runs and operation on July 8. The upper work and painting will be about the last to be done.

The Colleymount road, upon which work is to commence at once, will be a complete reconstruction of the old road. It will run along the north side of Francois Lake from Francois Lake post-office to Colleymount, a distance of some fourteen miles. The steam shovel is already there and 12 men will be kept busy all summer on the job. There are also some men engaged here and there around Alice Arm and Stewart in Atlin district by the department on various maintenance repair works, there being one big rock cut at Colley Mountain.

Roads in other parts of Omineca district are in pretty good shape although maintenance repair work is being done where necessary.

Atlin District.

The contract has been let for filling with rock of the approach from the near end of the proposed Bear River bridge to Gus Eistrom & Co., of Stewart. This year's appropriation only provides for this approach and work on the bridge itself will not start until next spring. In the meantime the old bridge may be

used. The fill being put in is about 800 feet long and goes from a depth of zero to some 12 feet alongside the present bridge. There are also some men engaged here and there around Alice Arm and Stewart in Atlin district by the department on various maintenance repair works, there being one big rock cut at Colley Mountain.

Work of extending the Kitsault River dam at Alice Arm has been completed for the season and the channel of the river has been diverted further away from the town.

Prince Rupert.

In Prince Rupert district the Utko to Vanarsdol road from Utko to Pitman Spur has been completed affording a very fair communication. This was a new road and was started about April 1. Other maintenance repair work has been done in the district especially around Terrace where the roads have all been pretty well gone over.

MIDGETS WON FIRST OFFICIAL GAME IN JUVENILE LEAGUE

In the official opening game of the Juvenile Baseball League on Tuesday night the Midgets defeated the Boy Scouts by a score of 22 to 17. The Midgets' battery comprised M. Chenoski and W. Wrathall, pitchers, and S. Gurvich, catcher. E. Green and G. Emansson acted in similar capacities respectively for the Boy Scouts.

WHITE SOX BEAT BOY SCOUTS IN JUNIOR BASEBALL

The White Sox defeated the Boy Scouts in the second game of the Junior Baseball League schedule last night by a score of 23 to 11. The match was played at the Acropolis Grounds. A. Mitchell and A. Duncan pitched for the Scouts and D. Frizzell, for the White Sox, while George Edgar and J. Nickerson were the respective catchers.

WHALE WAS SEEN IN HARBOR LAST NIGHT

A whale, which heralded its appearance with a great display of spouting, was seen in the harbor off Digby Island last night. It appeared three times just a few yards off the port side of the power boat Uncle and headed for the harbor.

FISH WAS MARKETED AT EXCHANGE TODAY

One Hundred Twenty-two Thousand Pounds Halibut to Be Shipped East Tonight.

One hundred and twenty-two thousand pounds halibut was marketed at the Fish Exchange this morning. Eight express refrigerator cars arrived from the East last night and the fish sold today will be despatched East by tonight's train.

The arrivals and sales were as follows:

Andrew Kelly, 45,000 pounds, sold to the Canadian Fish-and Cold Storage Co., at 6¢ and 3¢. Rose Spit, 13,000 pounds, sold to the Booth Fisheries Canadian Co. at 7.5¢ and 3.5¢.

Eastern Point, 800 pounds, sold to the Booth Fisheries Canadian Co., at 7.9¢ and 3.5¢.

Sherman, 49,000 pounds, sold to the Sinclair Fisheries at 7.4¢ and 3¢.

Toddie, 11,000 pounds, sold to Royal Fish Co. at 7.4¢ and 3¢. Ringleader, 7,000 pounds, sold to the Royal Fish Co. at 7.5¢ and 3.5¢.

Fisher, 14,000 pounds, sold to the Canadian Fish-and Cold Storage Co. at 7.5¢ and 3.5¢.

Konyosu, 5,000 pounds, sold to the Sinclair Fisheries at 7.7¢ and 3¢.

A SMALL POINT.

His wife—So your client was acquitted of murder. On what grounds?

Lawyer—Insanity. We proved that his father had spent five years in an asylum.

His wife—But he didn't die he?

Lawyer—Yes. He was a doctor there but we had not time to bring that fact out.—Boston Transcript.

TEN MILLION DOLLAR CORPORATION TO TAKE OVER MASSETT TIMBER LIMITS AND OPERATE MILL ON QUEEN CHARLOTTE ISLANDS

(Continued from Page one).

ed, holds from its owners, the British Timber Corporation, Ltd., the logging rights to this acreage, which is declared by experts to be the finest single tract of standing timber on the American continent. It is estimated that the tract contains between six and eight billion feet of spruce, hemlock, cedar and other varieties of timber.

Shortly after the outbreak of the European war, Mr. Buckley, of Vancouver, B. C., with western associates and in co-operation with Scotch and English owners of this valuable tract, organized the Massey Timber Company, Ltd., and at an expenditure of over \$2,500,000 for extensive plant, sawmills, logging and other necessary equipment on Graham Island, developed a big lumber production to meet the urgent need of the British government.

The plant became particularly well known through the quality volume of its spruce timber, classified by the trade as airplane spruce, which it shipped for airplane construction to the British and French armies. The Allied armies drew their spruce for use in building airplanes, from a total of over 100 sources of supply. Mr. Buckley's company, however, is credited with having shipped to them a greater volume of this important material than that from all other sources combined. Through its shipment during and since the war the Massey product has been regarded as consistently showing an unusually high percentage of first quality timber and its seasoned cedar, in particular, is in increasing demand among the trade because of the high finish it takes when used for fine interior work.

Buckley a Director.

Mr. Buckley, who is said by his associates to have been mainly responsible for the success of the Massey company, will be a director and hold an executive position with the new corporation, sharing with the shipbuilding company's officers the management of the corporation's affairs.

In addition to providing every facility on its seventy-acre harbor site for the development of a large wholesale lumber business, a shingle mill will be built, and a box "shook" factory erected immediately to supply the demands of the California market and especially those of Southern California fruit packers, with the same class of product as is put out by the Puget Sound Box Company at Seattle, and which now will be part of the combination.

Immense Enterprise.

While no definite figures can be obtained as to the increased employment which the new activities will provide, the construction of lumber schooners, the erection of sawmills, shingle mill and box factory and the operation of all of these, in combination with the logging and sawmill plants in British Columbia and the box factory at Seattle, should together call for the work of several thousand men. Added to these new plans for the local shipyard, its regular ship repair and drydocking work, the manufacture of tractors in its machine shops for the Kroyer Motor Company and the construction of two steel ferry boats for the Key Route System at San Francisco, for which contract was recently awarded to the shipyard, give every indication of the rapid return of the nation's call for steel ships during the late war.

Prominent Englishmen.

Following satisfactory Pacific Coast negotiations covering a considerable period, and with the support and co-operation of substantial figures which it dis-

their associates among many of the leading business men of Southern California, Messrs. Baker and Leaf went to Europe in February, returning last week, having secured the endorsement of their plans and the co-operation in the development of these plans from those representing the ownership of the great timber tract, including such men as Sir Travers Dawson, chairman of the board of directors of Vickers, Ltd.; Sir William Beardmore, W. Allan Coats, Esq.; Alexander Walker, Esq., and many Scotch and English names of particular prominence in the British business world.

The arrangements made and engagements tentatively entered into by their chief executive officers both with the English and the Canadian parties to the deal, having now been ratified by the stockholders of the Los Angeles Shipbuilding and Dry Dock Corporation, steps are immediately to be taken for the organization of the new \$10,000,000 corporation and the execution of the final details in the purchase of the various interests concerned.

The development of the operating plans of the new combination is, it is reported, to be immediately and most actively pushed. These plans call for the logging and rough sawing of lumber at Graham Island, and the shipment of this product to the shipyard plant. Here a large area of the yard's unused water frontage is to be converted into a lumber yard and here also modern sawmills of large capacity are to be erected to finish and dress this lumber for the market.

Own Steamer Line.

For the transportation of the rough sawn lumber from British Columbia to Los Angeles Harbor, as well as for the transporting of the finished product to Pacific Coast and other markets, the new corporation will maintain its own line of vessels and to this end it purposed building six or more large steel lumber schooners of the most modern type. Those vessels are to be constructed at the shipyard, and it is understood that keels will be laid and construction work pushed as fast as plans can be prepared and building ways made available.

In addition to providing every facility on its seventy-acre harbor site for the development of a large wholesale lumber business, a shingle mill will be built, and a box "shook" factory erected immediately to supply the demands of the California market and especially those of Southern California fruit packers, with the same class of product as is put out by the Puget Sound Box Company at Seattle, and which now will be part of the combination.

Immense Enterprise.

While no definite figures can be obtained as to the increased employment which the new activities will provide, the construction of lumber schooners, the erection of sawmills, shingle mill and box factory and the operation of all of these, in combination with the logging and sawmill plants in British Columbia and the box factory at Seattle, should together call for the work of several thousand men. Added to these new plans for the local shipyard, its regular ship repair and drydocking work, the manufacture of tractors in its machine shops for the Kroyer Motor Company and the construction of two steel ferry boats for the Key Route System at San Francisco, for which contract was recently awarded to the shipyard, give every indication of the rapid return of the nation's call for steel ships during the late war.

A trial will convince you.

WORLD SHORTAGE OF TEA MAKES PRICES CLIMB MUCH HIGHER

During 1919 and 1920, the greatly increased production and unlimited shipping facilities resulted in enormous quantities of tea reaching every market of the world. A consequent drop in price was the result. To stabilize the situation, the tea growers of Ceylon and India agreed to curtail production 20% in 1921. Since that time, the demand has been constantly increasing and the price rising. The recent reduction of duty on tea entering Britain has further increased the demand, and the price is expected to rise accordingly.

RADIO NEEDS REGULATING

Mumerous Reproduction of What May Be Heard by "Listening in."

The use of the radio telephone is more or less general but not always satisfactory. The Ottawa Citizen humorous man explains the conditions with slight exaggerations for the sake of emphasis as follows:

Our radio seems to be in good voice, but it has acquired a habit of becoming rapidly bored with any one subject and shows a disposition to drop it in favor of something new that seems to occur to it whenever anything particularly interesting is under discussion. We have tried to keep our wireless from rambling but without results and have finally decided to serve the news to Colyam readers hot off the griddle. Last evening we garnered the following.

The Story.
Zzt-Zzt-Paris, talking, Paris, Paris, Paris-z-z-z-t, Premer Poineare, when asked about the Genoa conference today said Darling I Am Growing Old, Darlink I Am Growing O-o-o-old sung by Mlle. Sereamski of the Cosmopolitan Opera Company. Darlink I Am Growing O-o-old, Silva Threads Among the butter quoted at 29 cents in bulk lots, eggs falling rapidly and lady told court that husband had refused to take the pug out for airing in the Olympic now 867 miles off the Ambrose Channel lightship the official time at the Experimental Farm observatory being 10 o'clock if you take it now and 10.15 a quarter of an hour later with record cargo of codfish and thus qualifying for international fisherman's trophy which will be contested on the grounds of the Wimbleton tennis club. Miss Lenglen representing France and Jack Dempsey the United States if Wills, the colored fighter, can make the weight, Pug dog barked furiously at husband and judge said five boot-jacking stills and three barrels of mash the sentence being hauled with much joy by the Bible Conference students who sang Abide With Me Fast Falls the new French skirts which will be about four inches shorter around the waist. Rush message, the police have arrested the mur-

Ten Years Ago in Prince Rupert

June 8, 1912.

The program of Dominion Day sports just issued contains ten mile and five mile Marathon races for men. Officials for the water sports will be as follows: Starters, W. H. Tohey and F. Bodwell; judges, W. G. C. Meehan, F. S. Long, Capt. Saunders and Capt. McCoskrie; committee, W. A. Pettigrew, W. H. Tohey, F. Bodwell, H. T. Titus, H. F. G. Sinclair, F. S. Long, W. G. C. Meehan, Capt. Saunders, Capt. McCoskrie, Capt. Babington, Capt. Musgrave and Major Gibson.

The hospital board is considering the proposition to receive contract patients in the institution who pay \$1 a month as hospital insurance. A committee consisting of President D. G. Stewart, C. V. Bennett, P. J. Palmer, O. H. Nelson and J. A. Kirkpatrick has been delegated to look into the matter and report.

The Prince Rupert and Hazelton Boards of Trade have joined hands in an endeavor to secure lower freight costs between Skeena Crossing, the present end of steel, and Hazelton.

Boosts Prince Rupert as Market Where Fish is Packed Rapidly and well

An article of particular interest to fishermen and those engaged in the fish business appeared recently in "Alco Fisheries News," the trade journal of the Atlantic Coast Fisheries Company, New York. It is written by J. N. Sinclair of this city, manager of the Sinclair Fisheries Ltd., of Prince Rupert. It is featured on the front page of the publication and will doubtless prove of interest here. It follows:

The Article.

From time to time, articles dealing with the careful handling of fish have been published in your paper and producers have been cautioned along those lines. This is a very important matter and should be kept fresh in the minds of the producer, shipper, distributor and retail members of the fishing fraternity.

To the producer: Thousands of pounds of fish are destroyed daily both on the Atlantic and the Pacific Coasts, owing to the fact that the fish have not been properly iced when caught, cleaned and packed in the hold of the vessel. When caught, the fish should be immediately packed in ice and not left lying on deck for several hours as is the case on many of the fishing vessels operating. When the fish are left on deck, the air absorbs the slime adhering to them and the fish become discolored. Especially so is this the case with halibut, the slime being absorbed and the skin having no protection becomes dry. The pores are then exposed to the air and the fibre of the fish immediately starts to limp. Halibut iced in this condition has anything but a palatable appearance when put on the market and the producer must take a loss on quality of this kind. This condition, in the writer's opinion, is one of the causes of the limited demand for fish throughout the American Continent, and it up to the producer to use every precaution necessary to bring his product to market in first class condition.

Methods Compared.
To the Shipper and Distributor: The same caution in the careful handling of fish is also applicable to the shipper and the distributor. When making shipments of fish from the Coast to inland points, shippers should see that their fish is carefully and expeditiously handled. When compared with the methods used at other ports, the handling of fish at Prince Rupert, British Columbia, on the Pacific Coast is probably the best and most careful method of packing fish for transcontinental shipment. For the readers' information, the writer will explain just how quickly and carefully fish are handled at this port. The fish are unloaded from the boats onto a large table, graded as to sizes and quality, weighed and packed right from the weighing scoop. From leaving the hold of the vessel until the fish is repacked with fresh ice in new clean boxes, the average time taken per box is about two and one half minutes; the fish never being thrown on the floor or roughly handled. The boxes are immediately loaded into refrigerator cars which have been precooled for several hours. Whole carloads of Halibut and Salmon are packed in from one and a half to three hours' time. The grading table is always kept clear and no fish are exposed to the atmospheric conditions prevalent at the time of packing for more than five minutes. By this careful and quick method of handling the fish, the natural protective slimy substance adhering to the skin is unimpaired, thus preserving the quality and appearance of the fish.

Careful Marking.

Shippers should always inform their distributing agents exactly what quality their shipment is made up of and mark all packages, boxes or barrels accordingly so that no inferior fish can be distributed to the jobbing and retail trade as a first-class article. Selling inferior goods as first-class quality never yet built up any business.

The distributor, especially in the summer months, should use the utmost caution when taking consigned fish from refrigerator cars for distribution. The boxes containing the fish when taken from the car, if not for immediate distribution should be placed in a precooled room and not left at any time in places exposed to sun, wind or rain. The boxes should also be laid down flat with the lids of the boxes uppermost and not left standing on end. Especially so should this be noted when handling boxes of dressed Salmon, Cod, or any kind of sidefish, as these fish are packed with their backs to the bottom of the box and the inside facing the cover filled with ice. The ice generally cakes, but the rehandling of the boxes when unloading and distributing will probably break up the caked ice and if the boxes are left on end, or bottom up, the ice is thrown out of the fish.

and if left in this position for any length of time, the inside or belly part of the fish becomes sour. The fish then has to be marketed at a very much lower figure than had they been carefully handled. This causes a dissatisfaction right from the producer to the consumer, and is another cause for the present limited demand for fish.

Retail Business.

To the Retailer: Having dealt from the producing to the distributing phase of the trade, we now come to the retailer, who in the writer's opinion, has more responsibility than any other member of the trade on the question of demand. From careful observation made while visiting the trade recently throughout the United States and Canada, the writer believes that were there more experienced fish men in this branch of the trade and more retail stores handling fish only, the present demand could be considerably increased. Should a census be taken of the retail fish trade on the American Continent at the present time, probably 70% would be found to be handling fish as a side-line and quite a number of these handling fish "under protest." In one of the big cities of the Middle West, when asked why so little fish was used for so large a population, a prominent fish merchant stated that most of the retailers were handling under protest and were carrying a very small quantity of fish because they simply had to in order to keep the business they had for other commodities they were handling. None of these retailers have the facilities for handling and carrying a stock of the different varieties of fish, neither have they experienced fish-mongers to cater to the needs of the consumer. The amount of fish business they are doing cannot allow and does not warrant the expense.

First Class Stores.
What we want in all our cities is first-class retail fish stores, properly equipped to handle large quantities of the different varieties of fish produced from the Atlantic, Pacific and Great Lakes waters. Stores of this description operated by experienced fish-mongers would surely create a better demand. The consumers would also have the satisfaction of having their fish dressed, ready for cooking and would have a large variety to select from and the stores being equipped with cold-storage facilities, the fish would at all times be in prime condition. With these facilities at the command of the general public, fish as a food, would compare favorably with other commodities offering, and the increased turnover would no doubt cut the present price of fish considerably. People, who at present cannot afford to include fish in their daily menu and can only consider it as a luxury will have the opportunity of favorably considering fish when making their purchases for the dinner table.

These remarks are not made to cast any reflections on the modulus operandi of the different members of the various branches of the fishing industry, but with a view to helping the trade to solve the problem of the great question confronting the trade, "can we increase the present demand for fish?"

Sport Chat

At least five good league fixtures will be presented to local soccer fans before July 1 on which day the winners of the Dominion Day Cup will be determined. Tonight there will be the regular league fixture between the Sons of Canada and the Grotto opening the second half of the season's schedule. This gives promise of being a keenly contested match for the Sons have not yet sustained a defeat this season and the Grotto are out to administer the first and gain for themselves a good place in the running for the league championship. Supporters of both teams have high hopes and great confidence in their respective protégés and there should be a record crowd of fans out. Then, next Tuesday there will be another league game between the Sons of England and the Callies. If the Grotto should win tonight's game and the Sons of England next week's the three teams would be pretty well grouped around the top at the expense of the poor old Callies.

R. Taper, of Pacific, was an arrival in the city on last night's train.

However, the Scots haven't given up hope and mean to win their next game and preclude any possibilities of a shut-out right away.

The Elks and Knights of Columbus will meet for the first time this season in Senior Baseball League company tomorrow night. Both teams have had a go at the Sons of Canada and have been victorious, so they will now get together to settle their own differences. If events so far this season may be taken as any indication, it would seem that the two teams now to meet would be pretty well matched and should provide a good contest. The Elks will be faced with some players on the opposition side whom they might claim for themselves especially in the battery, both Donohoe and Astori having been associated with the Elks in last year's program. The Knights made a creditable showing on Monday night and should give the Elks a good run tomorrow evening.

These remarks are not made to cast any reflections on the modulus operandi of the different members of the various branches of the fishing industry, but with a view to helping the trade to solve the problem of the great question confronting the trade, "can we increase the present demand for fish?"

MONEY INVESTED IN VICTORY BONDS can be made to earn larger interest by selling the bonds and investing in first mortgage on improved City property. And the mortgages are just as safe, although not so readily convertible into cash. Money invested in mortgages is, generally speaking, fixed for the term of the loans which run from 6 months to 5 years. Hence the larger rate of interest. Drop in and talk it over.

MANY PEOPLE WENT TO THE SALT LAKES

Popular Swimming Resort Was Well Patronized Yesterday Afternoon and Evening.

The swimming season is on again in full swing and ferry launches as well as many private craft took parties over to the Salt Lakes yesterday afternoon and last night. The swimming in the afternoon and early evening was thoroughly enjoyed although later in the evening the flies became rather thick and somewhat detracted from the pleasure.

The ferry boat "23" also made a special trip with a party of 20 or so young people, chaperoned by Mrs. James Simpson, who went across to visit Miss Weller and Miss Hebbel, of the hospital staff, who are spending their holidays camping at the Broadhurst summer home near the entrance to the Salt Lakes.

ALICE ARM

The Midway group of claims, adjoining the Esperanza, has been bonded by Ralph Ingraham to a company of Anyox people for \$25,000 and development work, on which four men will be employed, is to commence at once. The Midway was staked by George Pratt in 1912.

Five hundred sacks of high grade ore are ready at the Esperanza mine to come down the hill for shipment to the smelter. The working staff has been increased and it is intended to ship ore throughout the year.

R. W. Goranson and E. P. Riley, of the Dominion government geological survey, have arrived in town and expect to be joined this week by George Hanson who is in charge of the work in this district. They will survey the Esperanza Hill and across the bay on Roundy and Lime Creeks and will then finish

SYNOPSIS OF LAND ACT AMENDMENTS

THE DAILY NEWS

JAP ALLEGED TO HAVE STABBED JACKSON WAS CAPTURED YESTERDAY

Constable R. Gibson, provincial police officer of Port Essington, reached the city on last night's train bringing with him Tomagusha, the Japanese who is alleged to have stabbed Jim Jackson at Port Edward last Saturday. Tomagusha disappeared from Port Edward immediately after the incident and was captured by Constable Gibson at Sunnyside yesterday. Accused came up before Stipendiary Magistrate J. H. McMullin for preliminary trial this morning and was remanded for eight days.

TERRACE NOTES

Miss N. Phillipson who has been visiting Mrs. McGregor, left on Sunday for Prince Rupert.

Rev. Father Fleck, of Anyox, visited Alice Arm on Tuesday and Wednesday of this week and celebrated mass at the residence of S. Dumas.

An ice cream social was given at the tennis court on Thursday evening in honor of the 18th birthday of Miss Nettie Hogberg. About forty people were present.

Joe Whealeigh has a boom of 400,000 feet of logs ready to be taken to the Georgetown mill.

A new fig is being developed at the past few years, that has created a new industry in California. The honor and credit for the discovery of the remarkable fig, now known as the Kadota, belongs to the late Stephen H. Taft, that wise old horticulturist of Saticle; member of the Centenary Club of Southern California.

This fig can be "canned" like any other fresh fruit, and is suitable for long distance shipping to Eastern and Canadian markets as fresh fruit.

Already in the San Joaquin Valley several thousand acres are planted to this fig and it has become the most profitable of all horticultural undertakings. The Kadota fig tree commences to bear the second year, and produces enormous crops for
