Prince Rupert Mecca for Statesmen

TWO LOSE THEIR LIVES IN FOREST FIRES VANCOUVER ISLAND

Will Give Dinner For Distinguished Visitors Tomorrow

Three ministers in the Oliver Government, the agent general in London for British Columbia and the local federal members will all be guests of the Prince Rupert Board of Trade at a dinner tomorrow evening at the St. Regis Cafe. An address will be given by the agent general, F. C. Wade, and short speeches it is expected will be made by the other guests. In all it should be a memorable occasion. The chief regret will be that Hon. T. D. Pattullo, the local representative in the provincial house, is unable to be present, he having been detained in Victoria on departmental business.

PREMIER MINE BIG DIVIDEND

Fifty Per Cent of Invested Capital in Nine Months

SPOKANE, July 7.—The Premier Gold Mining Co., operating the Premier mine at Stewart, has just paid its second dividend, this year the amount being \$800,000. This is in addition to the \$200,000 distributed in March and the \$400,000 paid in December. It is the most sensational dividend of recent years.

PEACE MAY FOLLOW VICTORY IN IRELAND

LONDON, July 7.—The Irish Free State Government by their substantial victory over the insurgents in Dublin is believed to have taken a long step toward establishing itself firmly and bringing peace.

FIRE AT AMSBURY

Rumor That Mill Has Been Burned But No Official Information.

Rumors are current in town that there is a big forest fire raging in the neighborhood of Ambsbury and this side of that point for three or four miles. It is travelling northward. One rumor says the Ambsbury mill is burned out but there is no confirmation. The Forestry department has no official information.

TERRACE, July 7.—An extensive forest fire on the right of way is burning west of Ambsbury. It is travelling northward and has burned ties and telegraph poles extending four or five miles from that point.

SUPERINTENDENT DIES.

KAMLOOPS, July 7.—Hugh McLean, superintendent of the provincial home for the aged and indigent, for the past 23 years, died yesterday aged 60 years.

The fire department had a call at 5:30 yesterday afternoon to the vicinity of the city garbage dump on Park Avenue where a bush fire had started. The blaze was extinguished without any property damage having resulted.

Capt. G. H. Nicholson, manager of the G. T. P. coast steamship service, R. Beaumont, superintendent, and A. Gillard, Capt. Nicholson's secretary, arrived from Vancouver on the Prince John today.

TWO VICTIMS FOREST FIRE

Residents of Soldier Settlement at Merville Burned to Death.

NANAIMO, July 7.—Two people are dead and ten homes destroyed in a forest fire at Merville soldier settlement on Vancouver Island near Comox. The dead are Earnest Layland, 42 years of age, farmer, and Jack Clifford, 16 years old. They perished when their homes were destroyed. Several persons are reported to be missing.

Courtenay and Merville residents fought the flames all night but a high wind which sprang up suddenly swept the flames into town.

At Sayward, eighty miles north of Courtenay, the home of M. Geraux, a rancher, was destroyed in what is described as one of the fiercest fires that has swept the district in years. The fire covers quite a large area.

ANNUAL PICNIC OF ANGLICAN SUNDAY SCHOOL WAS HELD

Pleasant Day Was Spent Yesterday by 150 Kiddies and Parents on Digby Island.

About 150 children and parents attended the annual Sunday School picnic of the Anglican Church at Digby Island yesterday afternoon. John Myhill-Jones' "Oh Baby" was chartered for the occasion and several private craft went over in the evening. The first boatload of picnickers left Cow Bay at 10:30 and trips were made until 9 o'clock in the evening when the last had returned home. There was an impromptu program of sports and races and the full lunch baskets were a feature. A. W. Healy, superintendent of the Sunday School, was in charge, the teachers all giving assistance. Altogether the affair was highly enjoyable and one that will be remembered by the children for its delights.

CHINESE TO ISLANDS FOR CANNERY WORK

Over 50 Chinese came to the Queen Charlotte Islands on the Prince John this week to work in the canneries here. Thirty left the steamer at Lagoon Bay. Besides these the John had a full list of passengers for various island points.

FINED \$200

Chinese Had Opium in Possession and Caught by Mounties

Lee Lone, Chinese, charged by the Royal Canadian Mounted Police with having opium in his possession, was found guilty by Magistrate McClymont this morning and fined \$200 with the option of six months imprisonment. The fine was paid. The hearing of the case took several hours and two or three adjournments were made before it was brought to a close.

RETURNED FROM FIRST SESSION.

Prince Rupert's Representative at Ottawa in City after lengthy visit to Nation's Capital.

Federal Ministers Will Visit Prince Rupert in Near Future Says Stork

That Hon. W. R. Motherwell, minister of agriculture, who is now on the prairies, will be here by the end of the month and that Hon. Charles Stewart, minister of the interior, Hon. Dr. J. H. King, minister of public works, and Hon. W. G. Kennedy, minister of railways, will visit the city within the next six weeks is the announcement made by Fred Stork, M.P. for Skeena, who returned to the city last night after having attended his first session as representative for this constituency. Hon. Earnest Lapointe, minister of fisheries, was also coming, but his appointment to attend the League of Nations meeting will prevent this for the time being. Mr. Stork explained that each of the ministers was coming individually on his own particular departmental business. Mr. Motherwell and possibly Dr. King will tour the district accompanied by Mr. Stork and Mr. Kennedy will likely confine their visits in Skeena constituency to Prince Rupert.

Red Letter Days

The sixth of the month seems to be peculiarly of red letter nature in Mr. Stork's political career. He was elected to parliament on December 6, left to attend the session on February 5, and returned home on July 6, after an absence of 5 months at Ottawa. Mr. Stork is looking especially fit and says he feels every bit as well as he looks. He intends to remain pretty closely at home until after the ministers have paid their visits. He plans, however, an early trip to the interior and the Queen Charlotte Islands. He was accompanied home last night by Mrs. Stork and daughters, Kathleen and Patricia.

Speaking generally of the session, Mr. Stork said it had been a very successful one. There had been a lack of money, however, and Hon. W. S. Fielding, minister of finance, was absolutely compelled to cut wherever possible. Ottawa was swarming with delegations from all parts of Canada, many of them, wanting large expenditures. Of course the demands could not be nearly met. Mr. Fielding was also compelled

Pleased With Work

While apparently pleased with the work of the session, Mr. Stork appeared prone to make any definite announcements of great importance. Financial conditions were preventing, to a large extent, works that the government would have wished to do.

Eighty Per cent Taxes Were Paid this Year in Time to Secure Rebate

That eighty per cent of the general taxes for the year had already been paid was the very satisfactory report made this morning by W. D. Vance, city treasurer. The total assessment levy for the year is roughly \$267,000 and of this sum \$212,000 approximately is already in. Owing to the irregularity of the mails, it is expected that the next week will probably see even further taxes coming in.

These figures it is contended do not bear out the frantic statements made by some that, owing to the mill rate, much property would revert to the city. It is an exceedingly good sign, in fact, of the confidence that is felt both here and on the outside for local reality. A visit to the treasurer's office while the tax moneys have been coming in would dispel the laments of the grouches in this regard.

Local improvement tax returns have not yet been announced.

The penalty for the non-payment of taxes by July 3 was ten percent, by October 1, ten percent.

CAMPAIGN AGAINST SEA LIONS OF COAST

Givency is Waging War on Them During Present Cruise

VANCOUVER, July 7.—The patrol steamer Givency is waging war on the sea lions of the coast during the present cruise. She carries machine guns for use against them. The campaign is to be waged at the rookeries and islands of Smiths Inlet and Rivers Inlet and at other points as they destroy large quantities of salmon.

CANADIAN NATIONAL MOVES MUCH GRAIN

111,000 Cars Have Been Shipped Over Lines During Season; Prospects Good.

WINNIPEG, July 7.—With 2,000 cars of grain still to be moved from western points, an average shipment of 150 cars daily, the Canadian National railway has moved 111,000 cars of grain since the beginning of the crop season, September 1, 1921, according to a statement made by A. E. Rosevear, general freight agent.

Mr. Rosevear said the Canadian National Railway had moved more than 150,000,000 bushels of the total crop, which approximated 300,000,000 bushels. This aggregate included wheat, 220,000,000 bushels; oats, 59,000,000; barley, 13,000,000; rye, 4,000,000; and flax, 2,700,000.

IMMENSE LOSS FROM FOREST FIRES DURING PRESENT DRY SEASON

VANCOUVER, July 7.—J. A. Thomas, provincial fire marshal, estimates that the damage to date from the first of the year as the result of forest fires amounts to \$1,150,323.

The C. P. R. tourist steamer, Princess Louise, Arthur Slater, is in port this afternoon bound for the north with a full list of tourists making the round trip to Skagway. The vessel arrived at 1:30 city time.

VIOLATION OF TREATY RIGHTS

That is Claim of Senator in Regard to Jones Amendment.

KNOCK AT THIS PORT.

Effort Made by Jones of Washington to Divert Business.

WASHINGTON, July 7.—Demand that retaliatory provision against Canada be put into the proposed tariff bill in connection with the proposal to put two cents a pound duty on salmon, halibut, mackerel and other fish was made in the Senate yesterday by Senator Jones of Washington.

The senator offered an amendment "that no fresh or frozen salmon, halibut, or swordfish from the north Pacific or tributary waters be admitted to the United States through any foreign country except when in bond from a United States port."

Senator Jones explained that his amendment aimed at certain Canadian regulations and orders in council designed to concentrate the fishing industry at Prince Rupert, B. C.

The amendment seeks to induce United States fishermen to take their fish to Ketchikan and Seattle.

Senator McCumber, chairman of the Senate finance committee, held that the amendment was in violation of treaty rights.

GREEN WITH ENVY OF THOSE WHO SPENT YESTERDAY IN CITY

Members of the visiting excursionists, who made the Anyox trip were sore with themselves yesterday on their return when they heard what a good time those who remained here had. The trip on the water and the general good time given them made them so enthusiastic that the northern trippers were green with envy.

Future visitors to this city are likely to arrange for a stay in Prince Rupert.

 A dinner will be held at the St. Regis Cafe by the Prince Rupert Board of Trade at 7 p.m. July 8, 1922, to welcome—
 Hon. F. D. Barrow, Minister of Agriculture,
 Hon. Dr. Sutherland, Minister of Public Works,
 Hon. Alex. Manson, Attorney General,
 F. C. Wade, Esq., Agent General for British Columbia,
 Fred Stork, Esq., M.P.

DAILY EDITION Friday, July 7, 1922.

**Montreal's Board
 Of Trade To Come Here.**
 Word was received here yesterday that the members of the
 Montreal Board of Trade would visit Prince Rupert and spend
 some time in the city. This is an influential body, one of the
 most influential in Canada, and the visit means a great deal. It
 is an intimation that this route is taking its place on the map. The
 local Board of Trade will doubtless take cognizance of the visit
 and try to impress the guests with the importance of our strategic
 position.

**Local Interest In
 Fishing Industry.**
 A few days ago the Daily News failed to publish the record
 of fish sales for the day, owing to pressure of holiday news. The
 result was a widespread protest from many readers who follow
 the sales regularly. To business men the fish sales mean a great
 deal because high prices mean the payment of outstanding ac-
 counts, whereas low prices indicate that no cash will be forth-
 coming.

We are missing the operation of the saw mill and the result
 of the continued shutdown is seen in empty houses. Perhaps
 when it opens up again we shall appreciate it better and shall al-
 so be able to realize what it means to the city to have any kind
 of industry going here. We cannot afford to discourage any in-
 dustry small or great. Industry is what makes the place pros-
 perous.

**Looking Forward To
 Big Prairie Crop.**
 Indications are that there will be a good crop of grain on
 the prairies generally in spite of the fact that hail has injured or
 destroyed small sections. The rains of the past week or ten
 days have proved most beneficial and with favorable harvest-
 ing conditions the result should be a bumper crop. The banks
 are beginning to loan money on it, an indication that they believe
 there is going to be a good yield.

**Have You A Museum?
 Ask Visitors.**
 Now that tourists are beginning to take an interest in the
 city and the railway is co-operating by keeping them here long
 enough to allow them to see the place, the question of initiating
 a movement for a museum might well be considered. A science
 and art society is needed to foster local scientific investigation
 and to gather specimens of scientific interest and preserve scien-
 tific and historic data. In addition to this and in conjunction
 with it might go the collecting of pictures or other art works with
 a view to some day establishing an art gallery here in connection
 with the museum.

At Victoria the Government has a fine museum which is
 the mecca of all tourists. In Vancouver they have such an institu-
 tion in connection with the public library. In some of the
 Alaska towns they have small museums where Indian and other
 specimens are gathered and can be seen by visitors.
 In this city there are societies for the encouragement of the
 study of music and literature, but so far no one has taken up the
 scientific, historical and art study collectively with a view to
 making it permanently of benefit to the place. If there were
 an organization to take care of specimens, there would be no diffi-
 culty in securing them from time to time. The city already has
 a few but has no place to put them.
 It needs energy and time to organize a society and keep it
 going, but there must be some few people here who would wel-
 come the opportunity to join such an organization if the lead
 were taken by someone with organizing ability and with time to
 devote to it.

**The Man in the Moon
 SAYS—**

THE way to eliminate Orientals from industries is to stop employing them.

A LOT of local lads seem to have "fallen for" the girl tourists. Or should it be "risen to."

IF the visitors were appreciated locally, they also appreciated Prince Rupert. Honors are even.

THERE are a lot of people in town who might enter the baby show but they would scarcely take a prize.

THE coming of the Montreal Board of Trade will overshadow some of these little visits from small town people.

FOR Montreal businessmen to acknowledge that there was a northern route was a great concession, but to travel on it! Surely something is happening.

WHAT about a "city beautiful campaign" here?

THERE was a man fishing at Khatada the other day and the big trout got away with the hook, line and rod. A week later another Prince Rupert esteemed citizen was fishing in the same lake and he hooked a whopper and thought he saw something trailing behind that looked like a rod and line. On pulling the fish out, it was found not to be the one that had carried off the tackle the previous week.

IF hags should ever come back in vogue, how would people know how to properly and artistically place the foot on the brass rail as they called for another of the same.

THE latest organization to be formed is an anti-wireless league. It is formed among those who believe that wife is hearing too much.

IN the latest dictionaries "jiggs" will be given as a synonym for pomee beef and cabbage. To illustrate: Take your order, sir? "Yes, bring me some jiggs."

SOME of the men in Prince Rupert are today suffering with enlargement of the cranium. The lady visitors told them they had never seen such handsome men as there were in Prince Rupert.

IT is to be expected that there will be an influx of ladies from the east if the news gets bruited around.

Persistent advertising is absolutely necessary to succeed.

**MANY UNABLE
 READ OR WRITE**

So Said J. Pinder-Moss in Address to Rotary Club Yesterday

URGES NIGHT SCHOOLS

Asks Aid of Rotary Club in Getting Technical Institute Started

According to the census returns of 1911 there were at that time 9,000 people in the Comox-Alton electoral district who were unable to read or write. Of these 2753 were foreign born, 121 British born and 2137 were Canadian born.

In 1921 figures are not yet available. It was to remedy this condition that the district needed night schools and continuation classes, stated J. Pinder-Moss at the Rotary Club meeting yesterday. Other reasons for establishing night and continuation classes throughout the district would be for the purpose of aiding those who so wished to study and develop in their particular lines of work and also to give opportunities of studying cultural subjects.

Growth at Edmonton.
 Mr. Pinder-Moss who organized the Anyox Polytechnic Institute and also helped to start the technical school in Edmonton told of the growth of the work in the former city. In Edmonton the technical institute had started with about twelve students and today there were over 700. In his own department when he left to come to Anyox, he had five hundred under him. The idea grew by leaps and bounds. Students stood four deep in order to register in the night classes.

At Anyox the members were charged five dollars for one class, eight dollars for two and eleven dollars for three subjects.

Cost to Rupert.
 Under the scheme which he proposed, the cost of the scheme to Prince Rupert would be about \$27,000 for the first year and rather less for subsequent years. The classes would have to do with the basic industries.

Asks Rotary Aid.
 Mr. Pinder-Moss appealed to the members of the Rotary Club to help on the technical education and night school movement. They could give it their individual encouragement, could lend the use of their plants for the conduct of classes and could encourage employees to attend classes.

While there had been opposition from the Trades and Labor Council in Edmonton at first, that body had finally come over to the idea and had insisted on the technical course in typographical and machinists work and the production of certificates from the school.

Great Future.
 There was a great future ahead for this city, the speaker said. Everyone knew that. All they had to do was to study the map in order to see that Prince Rupert was destined to be a great town. In the development of the resources of the district however, he urged that men trained at home should be used as far as possible. His scheme for a system of federated night schools would be the cheapest and best method of dealing with the education question for those not in school. The scheme was based on the system in vogue in connection with the South Kensington Institute.

**SOCKEYE FISHING ON
 SKEENA CONTINUES
 SHOW IMPROVEMENT**

Sockeye salmon fishing on the Skeena River continues to gradually improve. The average for boats on the outside was reported on Wednesday to be 30. On Thursday, 34.

Definite figures for the Neas during the past few days have not been received but it is understood the good start already made there is being maintained.

C. J. Fletcher, of Vancouver, secretary of the B. C. Medical Association, returned south last night after having visited Prince Rupert and Anyox. He intends to come north again later in the year to continue organization work visiting points in the interior.

**Ten Years Ago
 in Prince Rupert**

JULY 7, 1912.

The C. P. R. tug Nanoose, Capt. Guns, and transfer barge is unloading 500 tons of bridge material for Mile 476 of the G. T. P. railway today. Twelve girders, each fifteen tons in weight, for the bridge at Sealey gulch are, with accessories, being loaded on eight cars to be forwarded by special train.

Capt. Barney Johnson is having a handsome 7-room bungalow erected on Fifth Avenue East alongside G. A. McNicholl's residence. The cost is to be about \$4,500.

The Caledonian Football Club met last night and were photographed by G. Bain. Later the members of the club were entertained at the home of J. H. Kelly, J. E. MacDonald giving an address. The handsome cup presented by the Overseas Club and won by the Caledonians was filled and the toast to the club duly responded to.

BRINGING UP FATHER

By George McManus

TOTEM POLE AND POTLACH

Showing how Ancient Customs and Crafts of Indians are passing owing to Advance of Civilization: by Thomas Deasy.

The Indian has been a "problem" to many of the white race. His customs, habits, and characteristics are difficult to comprehend, even by those associating with the aborigine during the past century. Lacking in history or tradition, with a diversified tongue, it is practically impossible to lead him back, even a century, or to delve into his burial places, for an explanation of his origin, which can only be traced through the Asiatic east of countenance of the people, on the westernmost coast of Alaska and the Queen Charlotte Islands.

The "Totem Pole" is the last standing monument of former days. Many have the idea that this represents the "family tree" of generations of Indians which is a great error. Each "Totem Pole" bears the imprint of former "chiefs," and their "clans." It is the standard of authority which denoted that the owner is the "nephew" of a former "chief," and to him must all bow, whether of the "clan" or a visitor to his "lodge." Before it the thirteen medicine men orated, each with a symbol in his hand, on which was engraved the figure of an animal, or bird, or fish or a reptile. Standing before one of the large buildings in which a number of the relatives of the "chief" resided, it meant that all should also pass through a doorway cut from a tree on which the "crest" of the "chief" is also shown. In the lodge the "Totem Pole" held a conspicuous place, usually in the four corners of the log building.

The Potlach
Only those capable of giving a "Potlach" were able to make, erect and retain their "Totem Pole." At the selection of a "cedar tree"; when the "tree" is brought from the forest and when the completed "Totem Pole" is erected, are "feast days" in honor of the owner. From far and near invited guests appear to do honor to the "chief." All of the "clan" and in providing food and presents, while the "eopper" is placed in his hands, as the donor of pelts, grease and other necessities of life. At times money is distributed while the nights are made joyous with the sound of revelry or the orgies of those engaged in the secret rites necessary to prove the stamina of the proposed heads of the "clans."

The Clan System
Along the sea coast from one end of the country to the other we now see deserted villages. The "Totem Poles" are tumbling to decay. When Christianity was introduced the Haidas had hundreds of "Totem Poles" in their villages. On one occasion the greatest chief of the Skidegates set himself a herculean task. He took up pan axe and cut down sixteen of his "Totem Poles" leaving them to rot on the ground. On another occasion the Massetts made a raid on their "Totem Poles" and cut them into kindling wood. When the most intelligent of them was asked the reason, he replied: "They are relics of heathenism." Yet, the "clans" continue to make their "chiefs," according to the standard adopted long ago. Where the "eagle" graced the lodge of a "chief," the figure of the bird has disappeared; but the "Eagle Clan" remains. An "eagle" dare not marry an "eagle"; but must become the partner of a "bear," a "wolf," a "beaver" or some other bird, or an animal "clan." By

this means the danger of congenuity is avoided.

Cure For Saving
The descent of a family is taken from the "mother." The son of a chief is not the chief's successor. The "nephew" on the "mother's side" is the natural successor of a "chief." The wife, sons and daughters are not considered under the Indian custom. The "nephew" inherits all. There is no reason for the father and mother to put aside riches for their progeny.

The Indian was the first "Socialist" and is to this day living "Socialistic" ideas. The rich must give, while the poorer members of the clan must assist in providing material for the "Potlach." Those who claim the "Potlach" was a different celebration in the olden days, know little of the customs and habits of past generations of Indians.

Tribal Custom
It is only those who have seen the Indian in his wild state imitating the conduct of his forebearers, who know the extremes of cruelty and endurance under which the aborigine carried out the rites and ceremonies in past ages. Sixty-two years of association with the Indians should be some criterion for knowledge of their customs and habits. The "white man" is blamed for the "passing of a race"; but where would the "race" be today but for the fostering care of the government of the country—the same care which is exercised over people of all races living under the flag of the Empire. Christianity has done a great deal for all nations; education and protection of life and property proved of benefit where no law prevailed in the earlier days. Not unlike the "barons of old" the "chief" of the "clan" held in his hands the lives of those surrounding him, and also the destruction of "slaves" captured in warfare. Christianity and commercialism charged the downfall of the "Totem Pole" with its legendary lore, descriptive of the animals and birds, the fishes and the reptiles which graced the long cedar monuments now no longer significant of the strength of this nation or that.

Each "chief" now boasts of his "flagpole" on which the Union Jack or the Stars and Stripes float from the top. The Indians of every band are desirous to have an elective body of "chief councillors," replacing the hereditary dictators of the "clan" where the "chiefs" held the "Totem Pole," as he would safeguard his own life the native "carvers" are now making "replicas" of all the "Totem Poles" on which they inscribe the birds and animals of the various "clans."

An Old Institution.
On the top of a mountain ten miles from Skidegate village is a formation of "black slate" which is known as "jadite." It is buried in blocks beneath the surface of the ground. The Haidas

visit this mountain situated near the Houna River. They climb the mountain with probes in their hands and engage in locating the blocks of jadite beneath the surface. When a block of the black mineral is found the Indian carries it down to his boat and conveys it to his village. He saws the block into squares and imbeds the squares in putty. He then shapes and carves the square to represent one of the miniature "Totem Poles." On it he engraves the crest of his clan with the mythical figures of the raven carrying away the moon, of the eagle surmounting the top of the "Totem Pole," as it can still be seen on the giant timbers along the coast. As he carves, into his brain runs a legend of the olden days. When the carving is complete, the "Totem Pole" is brightly polished by a process known only to a few. Strange to say, the Queen Charlotte Islands have the only deposit of the material. The Japanese and others endeavored to duplicate the jadite without success. The art was dying away; but we endeavored to have the Indians continue to manufacture the "Totem Poles." The best of the carvers are dying off. It will shortly be a lost art. Thousands of the small "Totem Poles" of former days, have been manufactured and find a ready sale.

Fall to Decay.
Now and then one of the "wooden totem poles" is sold or falls from decay and lies mouldering on the ground. The carvers in wood are fast passing away. They no longer make the wood carvings or "feast" and hold "potlaches." A new generation is springing up. Modern habits and customs are superseding the ancient methods. In a few years the only depositary of the wooden "Totem Pole" will be the museums of the crowded cities. The "chiefs" and their "nephews" are no longer recognized as heads of the various clans. The "potlaching" has gone, or is used only when the young bride sits before the wedding cake in the town hall, dressed in orange blossoms and the regalia of a bride. With the "Totem Pole" the "legend" is also becoming a dream of the past. Commercialism is replacing the so-called "potlaching" of the early days. The Indian is becoming modernized. The church and the school are leading the aborigines away from ideas and ideals unsuited to the age in which they live. They are becoming shrewd buyers and sellers with a love for home, although, in many cases, far removed from the large centres. As a law-abiding class they are noted throughout the length and breadth of the land. Their conception of our moral teaching is gaining ground; but they have much to learn. One hundred years of progress has passed from the time the first traders visited their shores. If the remnant of the tribes will continue to increase as the Haidas have done, another century will show better results than are perceivable in a people with but the century mark to show the advancement they have made.

CARD OF THANKS.
The Sons of Canada wish to express their sincere appreciation of the practical support given by the merchants and the citizens in their successful Dominion Day Celebration.

GOD IS MIND MAN HIS IDEA

So Says Christian Science Lecturer at Empress Theatre Last Night

FAILURE OF MEDICINE

Only True Healing is That Brought About by Spiritual Understanding

Dr. Walton Hubbard, G.S.B., member of the board of lectureship of the Mother Church, the first Church of Christian Science, Boston, delivered a lecture on Christian Science in the Empress Theatre last evening. The attendance was not large but those who were present listened with capt attention and the discourse proved most complete and interesting. E. F. Dohy presided and introduced the speaker. The lecture was held under the auspices of the local Christian Science Society. Dr. Hubbard, accompanied by Mrs. Hubbard, left on the Princess Louise this morning for Alaska to continue his lecture tour visiting some of the more important points in the territory.

He said in part:
The explanation of God's law and its availability to all mankind was taught and demonstrated by Jesus the Christ, but for many centuries it has been maintained that the major portion of the reward for Christian living is to come at some future time. Christian Science furnishes the rule by which the power that Jesus used in accomplishing his wondrous works is made immediately available, and because its beneficent power can make over and bless every phase of our material existence it is the most important subject that can come to our consideration. The wisdom of this world has failed not only to heal from discord and sin but to heal from disease. And it will continue to fail in its treatment of disease until it is recognized that sickness is sick thought expressed on the body, and that sick thought is cast out through spiritual understanding.

Material Methods Fail

Anyone who goes back into the history of material medicine is impressed by the fact that for practically every diseased condition there has been a continual succession of drugs, one following the other; and it is always obtained for the last one, with the greatest enthusiasm and positiveness that it certainly does heal the disease, and in support of this contention there may be offered the records of many cases that have been cured. Human thought is not much given to retrospection along this line. If it were it would remember that all the drugs that have followed each other in the treatment of disease, and have been successively discarded, have had the same glowing record when they were first used. The reason for this is that it is not the drug but the belief in it which accomplishes the healing. Those who discover and bring forth a remedy are strong in their belief that it will cure, because the remedy is the outcome of a definite conviction as to how the disease should be treated; so they obtain marked results, while those who prescribe the same drug later on have no such deep conviction, and because of their previous experience may be even mildly skeptical. This state of thought brings about failure.

Now the history of every material method including surgery is the same as that of drugs. The results which come are according to the belief which is entertained about them. One has only to glance through the medical journal to see that physicians themselves are condemning many of the operations and methods which the world at large has been taught to believe would heal them. Almost every one can recall operations and methods which were quite the rage a few years ago but are seldom heard of today, and it is perfectly safe to predict that the surgical procedures which seem successful today will be discarded for others tomorrow. The greatest blessing that can come to both the doctor and the world is to learn why it is that no material method is of permanent avail and that it is God who notionally "forgiveth all thine iniquities" but "who healeth all thine diseases."

All Causation Mental
It is essential in undertaking

the study of Christian Science that one should know something of the one to whom it was revealed, and some of the factors which led to its discovery. The revelation came to Mrs. Eddy because of the particular qualities of thought which she possessed made it inevitable. She investigated every material system of healing and finally decided that all causation must be mental, yet it required twenty years of effort before she really understood that all causation was Mind God, and a number of years more before it had unfolded with sufficient clarity to be given to the world. So Christian Science came as a result of patient, unflinching effort to know God's law, and to the one who possessed the qualities of thought which made its revelation humanly possible.

It is the common experience of those who study Christian Science that there comes to them a much larger, clearer understanding of God than they had before. In discussing the nature of God let us begin with the fact that God is Mind, because by recognizing this we are enabled to see more clearly the inseparable relationship which exists between God and man, and to see that because of this relationship man manifests the qualities of God, of Mind, and nothing else.

Divine Mind and Idea.

In order that we may better understand the operation, the activity, of infinite Mind let us illustrate the divine Mind by using the ordinary conception of a human mind as an example. You say your friend has a fine mind. You say you know this because he has many fine ideas which he expresses. You have never seen his mind but you have known the expression of it in ideas. If he never moved a muscle, never spoke a word, you would rightly conclude that there was no mind there. So a mind to be called a mind must be filled with ideas, and an idea by virtue of being an idea must be expressed. It is impossible to conceive of a mind filled with ideas, yet unexpressed; for a mind with no expression is not a mind but a blank. How do you know that a rock has no mind and no ideas? Why simply because it has no expression, for where there are ideas there is expression. The infinite Mind therefore, is filled with an infinite number of ideas or thoughts, which must be expressed, and the activity, the expression, the manifestation of these ideas constitutes man and the universe. God's ideas express Him in countless spiritual forms. As God's ideas exist in Him and because we exist in Him the Scriptures so declare that "in him we live, and move, and have our being."

There is a further quality of an idea which it will be necessary for us to consider. An idea has no ability to do anything except as the idea of the mind in which it exists. It cannot change itself and so become more, or less, or different, than mind intended it should be, because it has no volition of its own and must of necessity express exactly what mind intends it should express. For example: If you have a thought of love for your neighbor, this idea cannot get away from you and change itself into a thought of hate. The ideas in Mind must of necessity express exactly what Mind intends they should express. Now the real man is, as we have shown, the perfect idea of infinite Mind, and has only divine volition. He has therefore no ability to choose to do evil or to be sick, nor can he ever become separated from the Mind which contains him. Man, then, God's idea, God's image and likeness, has all the qualities of God, and not a single quality that is not of Him. He is therefore healthful and holy; perfect, spiritual, and immortal.

Unreality of Matter.

Because it is true that man is the idea of infinite Mind he cannot be material, and this material body will have to be accounted for in some other way. Matter seems very real to the human mind, yet the deepest material thinkers maintain that the matter has no existence in and of itself. They say that it is simply a manifestation of law. They see and admit that

matter is simply a manifestation of material thought which maintains that these material laws proceed from the Infinite Being. Now Christian Science agrees with them in admitting that matter is simply an expression of thought but denies absolutely that this thought is of God. On the contrary it maintains that the material man and the material universe are expressions of beliefs that are counterfeits of true expressions of beliefs that are counterfeits of the true ideas. The material man manifests sin, sickness, and materiality, which are opposites of those qualities of health, holiness, and spirituality, which the real and spiritual man must inevitably manifest as the image and likeness of God.

It is not maintained that we have been able fully to demonstrate that matter is unreal, but thousands have been able to annul what are thought to be unchanging material laws through the recognition of the law of Spirit.

Christian Science Heals.

The only way to be rid of disease is to stop it at its source. The beliefs from which it proceeded must be placed by spiritual understanding.

The reasoning of Christian Science brings divine Love close to human experience. The recognition that God is Mind and that man is His perfect idea is the basis for Christian Science healing. When we measure our thoughts by this divine standard and undertake as far as possible to entertain only that thought which we know to be of God, the thought which has made us sick or unhappy is eliminated.

"THE WITCHING HOUR" IS WONDERFUL PLAY

Picture is to be Seen Tonight at the Westholme Theatre

In the story of "The Witching Hour" at the Westholme tonight, Jack Brookfield, owner of a fashionable gambling house in Louisville, Kentucky, is seen at a poker table playing to guess what the other fellow holds. When the hands are shown Jack is seen to have guessed right. However, tonight the game closes early because Jack's theatre party is due to return for a little supper. Hardmuth, a district attorney, is making love to Viola Campbell, Clay Whipple, a young southerner, proposes to the girl and is accepted.

It so happens that Clay Whipple has an inherited foaming for cats-eye jewels. Denning, a sport, taunts him with one and in a frenzy Clay strikes him with a paper cutter and kills him. In the meantime Jack has met Judge Prentice who wants to buy a Corot painting he owns. Through Prentice he learns that he has an unenvy power of reading other people's minds, of controlling their thoughts. This has been the secret of his success in gambling. The gambling, likewise, has kept him from the love of Helen Whipple, Clay's mother.

Clay is Freed.
Clay is Freed.

turns his hate against his successful rival and it appears that Clay will hang. Jack turns his great will power to a good use, exposes Hardmuth as being an accomplice in a murder — and Clay is freed.

But Jack has not finished his own atonement. He tells Helen that "long before the governor-elect was killed he thought he could be killed just as it was done. A guilty thought is almost as criminal as a guilty deed." For this reason he is going to help Hardmuth escape.

He turns to Helen as he leaves to meet Hardmuth and says, "Will you stand by me while I make my fight." Helen answers, "You've made your fight, Jack and won." A tight hand grip of understanding and they exit.

CRUISE ABOUT HARBOR PROVED MUCH INTEREST

Eastern Visitors Had Very Pleasant Stay in This City Yesterday.

The visit to the Canadian Fish and Cold Storage Co.'s plant and dry dock and the cruise in local gasoline yachts about the harbor proved of especial interest and pleasure to the Eastern tourists who spent yesterday in the city.

Early in the afternoon, the train left the yards and carried the crowd to the cold storage plant and dry dock. Through the courtesy of the officials of both plants, the visitors were personally conducted through the workings. Many of the travellers being from prairie points, these marine industries proved intensely interesting to them and of great educative value.

About 2:30, 150 or more of the visitors gathered at the Prince Rupert Rowing and Yacht Club where local boat owners were on hand to take them on a cruise of the harbor. The Dominion government wireless, marine and quarantine depots on Digby Island were visited and then Metlakalla and the Salt

Takes. Capt. James Neville's big fish boat "N. M. & R." had been specially rigged out for the occasion and probably carried the biggest load away from the yacht club. Other boats were Dr. J. P. Cade's Kermac, John Dybbhavn's Surveyor, M. M. Stephens' Triton, George Bryant's Harla, J. C. Brady's Asolondo, Douglas Stork's Sunbeam, M. P. McCaffery's Nellie Wiltshire, Herbert Ward's Eva, A. T. Parkin's Jetaguel, Fred Seadden's Dawn, G. H. Arnold's Nechako, T. C. Duncan's Nancy; Jack McAuley's Dolphin, J. J. Ralsigh's Betty, W. Reid's Mary R., J. Day Bell's Elivol, J. Macdonald's Star, J. McLean's Mispah, Sid Hunter's and F. R. Haven's boats.

The morning was spent by the visitors in seeing various points of interest within the city. The big party transferred from their special train in the evening to the Prince George on which steamer they are now travelling south to Vancouver. Some of the visitors took in the dance at the Auditorium last night before embarking.

The visitors were highly pleased at their stay in Prince Rupert and the feeling of appreciation at the reception given them

possible during the holiday season it will not do when school is on. Therefore, the hue and cry for more sporting ground accommodation is again going up and this time it is the younger boys who are leading in the demand. The necessity for a second sports field in the city is ever being more felt as athletics are developed. It is a question that will have to be taken up seriously by the authorities at an early date and the sooner, the better.

The Sons of Canada and the Knights of Columbus, scheduled to meet tonight in a Senior Baseball League contest, will take the field to decide which is to head the league for the time being at least. All teams being now tied at 500, the winners will advance to the top with 600 average while the losers will get the cellar position at 400. Whatever the outcome however, it will make little difference to the general interest that has now been developed in the league race. All three teams are most decidedly in the running yet and will continue to be so whatever the result of this evening's party.

This week beautiful Henley-on-the-Thames is again the lodestone for those whose fancy turns to the greatest of aquatic sports, amateur rowing. Competitors for many centuries are again on hand matching their speed and endurance and to the successful athletes will go the highest honors that can be won by amateur oarsmen Henley Regatta for well on to a century has gathered together the best amateur oarsmen of the world. The entries for this year's regatta, which opened on Wednesday, compare very favorably with those of the last pre-war regatta in 1914. Entries for the various events are in from Norway, Switzerland, Belgium, France and, of course, Great Britain, as well as Australia and United States. For the Grand Challenge Cup the feature of the Henley, the five former countries are entered.

GROTTO WINS OVER CALLIES

Football Fixture Last Night Resulted in 5-3 Victory for Tobacconist.

The Grotto defeated the Callies in last night's Senior Football League fixture by a score of 5 to 3. The game was well contested, both sides doing the most of their scoring when they had the natural advantage of the grade and sun in their favor. A good crowd of fans saw the match.

In the first half the Grotto had the advantage of grade and sun and early became dangerous to the Callies. The cigar store boys did the bulk of the attack in this period although the Scots made occasional breakaways. Kirby opened the scoring and Hill added number two. The Callies then forced the game and got a couple of abortive corners which resulted in nothing. The Grotto resumed the attack through loose defence play and Kirby scored the third counter. Shortly after Waugh made the fourth and best score of the period. At half time the score stood: Grotto, 4; Callies, 0.

Despite the heavy adverse score, the Callies opened briskly in the second half, Scot early proving prominent in the test of Mercer. The Scottish attack continued and Scot beat Mercer with a pretty long shot. Smith scored the Callies' second and, from one of the dangerous breakaways, Waugh kicked in the Grotto's fifth. Kinghorn failed to convert a penalty awarded for handling and Scot scored the Callies' third nearly getting a fourth shortly afterwards. This half was certainly the Callies' and, with a less experienced goal tender than Bob Mercer, the Grotto might easily have lost the game.

Sid Thompson was referee, D. Wiggins and A. Clapperton, linesmen, and the teams lined up as follows: Grotto—Mercer; Hamilton and Barrie; O'Reilly, Hynd and Currie; Hill, McGowan, Waugh, Kirby and Buffers. Callies—Martin; Kinghorn and Currie; Abbott, Murray and Anderson; Smith, Mitchell, Scott, Jack and McPherson.

Sport Chat

Finding adequate accommodation for the various ball leagues staging games in the city is again becoming a problem and the Junior Baseball League is once more feeling the pinch. With Senior football and baseball leagues, intermediate baseball and lacrosse filling the evenings almost completely at Acropolis Hill, the Juniors are being crowded off and W. J. Cash, manager of the youngsters, stated yesterday that it was likely his boys would have to play in future on Wednesday afternoons. While this may be
