# Ottawa Scene of Pomp and Splendor

## VANCOUVER BUSINESS MEN TAKE GREAT INTEREST IN STEWART

### Fourteenth Parliament of Canada is Formally Opened by Lord Byng

OTTAWA, Mar. 9.—With the usual pomp and display Canada's Fourteenth Parliament was formally opened by the Governor-general, Viscount Byng, this afternoon. Ottawa society ladies and many visitors from Toronto, Montreal and other nearby cities had seats there. Military uniforms were in evidence. Western people were noticed, including the wives and daughters of the members of the Senate and House of Commons, some coming from as far as the Pacific Coast to take part in the event.

After the confirmation of Hon. Rodolphe Lemieux as Speaker of the House of Commons, His Excellency in the Speech from the Throne announced the government's legislative program for the session.

### MILLIONAIRES ARE BEATEN IN HOCKEY MATCH

Regina Capitals too Fast for Coast Team in Elimination Game Last Night.

VANCOUVER, Mar. 9.—The Regina Capitals, champions of the Western Canada League, defeated Vancouver Millionaires by a score of two to one in the last of a two-game series in the elimination for the Stanley Cup contest. There was some disappointment here over the result, as the home team was the favorite and there was a lot of money put on them.

Regina showed faster pace and with seven men on the roster were able to send a constant succession of substitutes to maintain a terrific pace. The Millionaires had only one substitute, Tobin, and the result was the home team was unable to hold its own against the speedy Capitals. Desereau was not in uniform for Millionaires.

The next game will be played on Saturday at Regina.

### NEW OFFICERS ROTARY CLUB

Nomination Day Today—Formal Elections Take Place Next Week.

At the weekly meeting of the Rotary Club this afternoon the following nominations were made for the directorate for the year: President, T. H. Johnson. Vice-president, D. C. McRae. Secretary, George Korie. Treasurer, Richard Moore. Directors, James L. Lee and M. P. McCaffery.

The nominations just fill the list of offices and these men will be officially elected at the next meeting next week.

The speakers today were Mayor Harry B. Rochester, Lt. Col. S. P. McMordeie, D.S.O., and S. J. McLeod.

### TWO TEAMS GO AHEAD IN SPRING BIKE RACE

NEW YORK, March 9.—The eightieth hour of the spring six-day bicycle race found Alfred Grenda and J. R. McNamara, the Australian-American combination, and Maurice Broco and Charles de Ruyter, the Italian-Belgian team, still leading the field. They have pedaled 1408 miles and four laps, one lap ahead of the other teams.

### MISS STEWART TO VISIT CITY

Will Come Here to Aid Library Association in Their Campaign.

A night lettergram was received this morning from Miss Helen Stewart, president of the Library Commission of British Columbia and librarian at Victoria, stating that she would sail for Prince Rupert on the Princess Mary, arriving here on Monday, and would spend the week in the city. This week will be devoted to interesting the people in the library and familiarizing them with the work of a modern institution, such as the one it is proposed to establish here.

Miss Stewart is in touch with the most modern ideas in library work and is an able speaker. It is expected that while here she will address the Rotary Club and probably a public meeting will be arranged. Other organizations will doubtless wish to hear from her.

### UNEMPLOYMENT RELIEF AT VICTORIA WILL BE DISCONTINUED SOON

VICTORIA, Mar. 9.—Unemployment relief will not be continued much longer here. Members of the city council who advocate a cessation of relief work hold that the city has been getting only about one-fifth value from this labor. They believe that the return of good weather and the consequent reopening of logging operations and resumption of farming will absorb all surplus labor in Victoria in a few days and that no further assistance need be given. It is planned to discontinue relief work to unemployed also.

Although the city has dealt generously with the unemployed, in the opinion of the council members it would be a mistake to establish conditions here such as would discourage men at present out of regular work from seeking employment elsewhere. The fact that the Dominion and provincial governments have agreed to bear a share of only the so-called abnormal cost of public works benefiting the unemployed has resulted in the city paying out far more than usual on account of the unemployment situation.

### HEWITT BOSTOCK IS SPEAKER OF SENATE

R. F. Green, of British Columbia, and Others Have Been Sworn in.

OTTAWA, March 9.—Hon. Hewitt Bostock has been formally elected speaker of the Senate. Hon. R. F. Green, of British Columbia, and several other senators have been sworn in.

### CARDIFF BEATEN

Tottenham Hotspurs Win by Score of 2 to 1 in Replay.

LONDON, March 9.—In the replayed Association Cup match today, Tottenham Hotspurs defeated Cardiff 2 to 1. The official attendance was 53,628.

The semi-final games will be played on March 25 when the Hotspurs will meet Preston and Notts County will play Huddersfield.

### FIVE RAILWAY TRUCKS TO CARRY HER SALARY.

That it will take five railway trucks to carry her salary is practically unbelievable, but, just the same, it is true. Miss Lucy Doraine, a well known British actress, will have to have this many railway cars to take home her year's salary if the Austrian motion picture company with which she has just signed a contract pays her off in notes of one crown each. Miss Doraine can claim to have the biggest fees of any artiste in the world, at least as far as figures are concerned. She has agreed to appear in three spectacular films. Her salary exceeds that of a million Austrian crowns, which in pre-war times would be \$8,000,000.

### Captain James Anderson Arrives With Optimistic Message Regarding North

"A great many prominent Vancouver business men are taking deep interest in Stewart mining camp and several good payrolls have been arranged by them and others for development work there during the coming season," says Captain James Anderson of Victoria, director of the Silverado Mining Company Limited and the Terrace Oils Limited, who arrived in the city from the south on his way north to the Portland Canal country. "The interest is healthy and many business men who heretofore never showed any interest in mining are investing their money."

Captain Anderson states that this interest was particularly evidenced at the recent Mining Institute convention in Vancouver where several deals were put through.

Included in recent transactions was the selling of the Mist Group in the Premier basin, by Dalby Morkill and his partner to, it is understood, the Premier interests. A minority share, about one-third, in the B. C. Silver Group was sold by Grant Mahood and O. B. Bush to the Premier interests at a figure which would approximate \$300,000 for the entire property. The majority interest is owned by C. A. Banks, an English investor, and associates.

### New Alaska Deal.

Pat Daly has put through another deal in selling the New Alaska group to Jesse L. Kahn, of Vancouver, owner of the Castle Hotel, and associates. A syndicate was formed and Daly received a substantial cash payment. An active development program is planned for the season.

Captain MacKenzie, Victoria mining engineer, has made arrangements for an elaborate program of development on his properties on the Bear River at the junction of Bitter Creek

### 1750 BOOKS NOW IN FOR FREE LIBRARY

The total of books collected for the nucleus of the Prince Rupert municipal free library has now reached the highly satisfactory figure of 1750. This practically marks the end of the actual collecting campaign, but G. W. Wilkinson is still receiving donations at Orme's drug store.

### HERRING CATCH IS JUST MODERATE SO FAR THIS SEASON

T. H. Johnson, manager of the Canadian Fish and Gold Storage Co., reports that the herring catch so far this season has just been moderately fair. Some are being brought in but not all that are required by any means. There is about the same number taken so far this year as there was at a corresponding date last year. The herring are now showing some signs of spawn which is not considered good for it means, as soon as the fish spawn they will disappear and the season may be a short one. Mr. Johnson states that nothing definite has yet been decided in regard to sending out the big albatrawling vessels which have been tied up at the Seal Cove plant all winter.

### FORT WILLIAM IS SUCCESSFUL OVER BRANDON HOCKEY

FORT WILLIAM, March 9.—Brandon lost to the locals last night by a score of 8 to 3 in the first game of the elimination series for the Allan Cup.

### CORRECT TITLE OF NEW BRITISH BRIDE

LONDON, March 9.—An official court circular, indicates that the correct title of the new British bride is Princess Mary and Viscountess Lascelles.

Mr. Anderson in the company are Ralph Higgins, attorney, Harold Lee and W. M. Calhoun, all of Seattle. The company already has mining holdings around Hyder and intends to acquire more interests in Alaska. A cruise of the territory will likely be made this summer on the Seymour.

### Beautiful Craft.

The Robert G. Seymour is a beautiful craft especially adapted for cruising in northern waters. It is 52 feet long and is equipped with 40 h. p. heavy duty Corliss engine. It is heavily built with a view to a maximum degree of safety, efficiency and speed and was purchased from a Seattle missionary society which used it in cruising in Puget Sound. This is the maiden trip north.

The boat is under American registry and is to make Hyder its headquarters plying on private cruises to Stewart, Ketchikan, Prince Rupert and other points. It will not be used commercially, but merely by the members of the company for private purposes.

Captain Anderson will return in about a week from Stewart and may make a trip to Terrace where oil drilling operations, by his company have commenced.

### IRISH FREE STATE BILL BECOMES LAW

LONDON, Mar. 9.—The Irish Free State Bill, which has been before the House of Commons for several weeks, has passed all its stages, having been read for the third time last night. It needs now only the King's signature to make it law. A division was taken on the third reading, with the result that 52 voted against it and 295 in its favor. This vote was not large, as the second reading is the crucial time in the history of a bill.

### WAR VETERANS DISSATISFIED

Present Claims to Chairman of Soldier Settlement Board at Ottawa.

OTTAWA, Mar. 9.—Representatives of the Great War Veterans of four western provinces met Major John Barnett, chairman of the Soldiers' Settlement Board, yesterday and presented the claims of the soldier farmers, 50 per cent. of whom are located in British Columbia and are disgusted and desirous of quitting. Ian Mackenzie informed the board. The prairie men were less pessimistic, but urged the claims of the soldiers.

Major Barnett said the board had gone to the extent of its powers under the account, but he had advised the district offices that where payments under the scheme were unpaid they should be deferred and distributed over the balance of the loan period. The delegates left their case with the executive, which will prepare a program of remedial legislation.

### SENSATION OVER INDIAN PROTEST

Chief Secretary of State for India Resigns and Resignation Accepted.

### FOR TURKISH RIGHTS.

LONDON, March 9.—India's appeal for Turkish rights, which urged the revision of the Sevres Treaty in view of the intense Mohammedan feeling in that country, has created a sensation. The appeal has aroused resentment in a large section of the press against the viceroy, Earl of Reading and his council.

LONDON, March 9.—Edwin Samuel Montagu, secretary for India, tendered his resignation today to Lloyd George and it was accepted.

### SIR AUCKLAND GEDDES COMING TO PACIFIC

WASHINGTON, March 9.—Sir Auckland Geddes, the British ambassador to the United States, will visit the Pacific Coast next month. His itinerary will include Victoria on April 1 and Vancouver on April 3. He will spend four days at Vancouver and will then leave for Eastern Canada.

**Promotion for  
 Obliging Official.**

Everyone in Prince Rupert will regret to hear of the departure of G. F. Johnston from Prince Rupert, but at the same time will be pleased to think that a Prince Rupert man of such recognized ability and integrity has been chosen to represent the Canadian National Railway Company in such an important position as that of general passenger agent for the whole of Australasia. Mr. Johnston has been here for a number of years and has served the Grand Trunk Pacific faithfully. In doing so he has served the public faithfully. He has always been on his work and has been unflinching in his courtesy and his desire to please the public. Selfishness has it been possible to say of a man that he has filled the position with perfect satisfaction to both employers and the people. In the larger sphere of work The Daily News wishes Mr. Johnston every success, and we know he will speak a good word for Prince Rupert wherever he goes.

**Daylight Saving  
 Being Considered.**

In several countries daylight saving is likely to be adopted as a national measure. In Canada it is left for the individual districts to adopt it if they wish. Vancouver has already done so and the people of Prince Rupert seem anxious for it. There is a proposal to put out a petition asking for the adoption of the system. If this is done it should be done soon. The city will need some notice of any change and the council must have time to act. The city council can not be expected to know what the people want unless they express themselves.

**When Times Are Bad  
 They Begin to Get Better.**

It is well to console ourselves with the thought that when times are bad they begin to get better. There are people who see nothing but the worst side of every question. They look for bad times and rejoice when their evil predictions come true. These are the people to avoid.

Last autumn we looked forward to a hard winter. There were all sorts of pessimistic prophecies but yet nothing very untoward occurred. There have been a few business failures, but not many. There may yet be a few more, but these come during every period of depression. Today we look ahead and see the light and the possibilities for the future are bright.

Possibly there may not be any great rush of business for some time, but there will be enough to keep us going and we shall have the pleasure of fighting our way, contesting every inch, and getting our businesses on a better footing than has been in the past. We all have to get down to a different basis of expenditures. During the days of rising prices we got everything on a false basis. It takes a lot of careful and strenuous work to make the change and to bring ourselves to a different outlook on life.

**What Is True of Individuals  
 Is True Also of Governments.**

What is true of individuals is true of governments. They have to get down to the old basis of operation. Every dollar has to be conserved and no expenditures made except a proper return is in sight. Governments can no longer be looked to to spend money foolishly. The people are demanding value every time, whether it be in the Dominion, in the province or in the city. We have to adjust our perspective and look at things from the business point of view.

There are always plenty of needs, just as in every household there are needs. We often have to wait years for things we need. So in governments. They can not give us everything we want at once. We have to wait. In Prince Rupert there are streets and sewers and all sorts of permanent improvements needed. For some of these things we have to wait. One by one we get the improvements that are needed. We have to move carefully and slowly and not endanger the financial standing of the city, the province or the Dominion.

**ARCHBISHOP  
 LECTURES ON  
 PSYCHOLOGY**

**Dreams, Thought Transference  
 and Imagination Are Subjects  
 of Great Interest.**

"Dreams used to be regarded with a great deal of superstition and then interest in them lagged," said Archbishop Du Vernet last night in an address given in the Anglican Church. "No psychologists pay great attention to them. They are made up of old memory material and there is always a bit of recent memory attached to them. These bits of recent memory have not had time to be buried very deep.

Dreams may be caused by any one of a hundred things. A sudden light flashing on the sleeping person may cause it or sometimes it is the fluttering of the heart. Difficultly dreams are usually caused by the stomach and are suggested by some event. The speaker told of a dream he had a few weeks ago in which Arthur Balfour was mowing the grass in his lawn and the difficulty was how much they should pay him. This dream was probably caused by the idea of heat and also by a striking picture of Balfour he had seen in the illustrated London News the previous day.

In 1900, Dr. Freud of Vienna had made a scientific study of dreams and had come to the conclusion that the dream was usually the result of a suppressed wish trying to express itself. It might be the emotion of fear, love, hate or ambition. Sometimes so great was the effect of the suppression that it affected the unconscious mind and the dream then expressed itself symbolically. The Archbishop referred to Joseph's dream as the result of suppressed ambition.

**Thought Exchange.**

The speaker then went on to deal with thought exchange and instances cases which had come under his observation where messages had been received thousands of miles distant. As the result of an article he had written on the subject he had received many replies, giving instances of thought transference. One of a mother who saw her aviator boy fall and heard his voice. A telegram next day told of the occurrence. One was that of a dying woman in the old country whose sister in Canada heard her say "Mary, Mary, take care of the children." It proved later that those were the last words of the woman uttered at the identical hour when they had been distinctly heard in this country. In each case the mind of one was attuned to convey and catch the impression from the other. It was the conveyance of mind energy from one to the other. One was the transmitter and the other the receiver. Had the woman been working at some occupation which interested her, she probably would not have received the message but would have had a dim impression that something was wrong. There were thousands of well authenticated cases of thought transference without the intervention of the senses. In fact thought transference was going on all the time. The conscious mind creates a barrier against such transference.

The Archbishop went on from this to show the value of intercessory prayer.

**Memory and Imagination.**

Speaking of memory and imagination, the speaker likened them to two streams flowing side by side and then parting never again to meet. The difference between memory and imagination was that while one was a reproduction of the thought image as it originally appeared, imagination reproduced distorted views of the previous thought images. The test to be applied to them was to silhouette them against the background of reality. Theoretically it was easy to distinguish between memory and imagination but it was not easy in practice. Children lived in an imaginary world, and in it they spent the happiest of their days.

Imagination worked on memories of past experiences. A person who was born blind could not imagine a red dress for there was nothing on which to base the imaginative faculty. A person could not imagine a new color. Imagination can make

new things but cannot make something out of nothing. By dissociation and combination things were changed. The mermaid and Santa Claus were creatures of the imagination and yet they were very real. A mental fact is a real fact. It was by the exercise of the imagination that Sir Isaac Newton discovered the theory of gravitation. Great artists and sculptors used imagination idealizing their subjects. The same was done by poets.

**Great Poetry**

Speaking of poetry as one of the imaginative arts, Archbishop Du Vernet said that great poetry must be simple, vivid and passionate. The poet had a great advantage over the sculptor and painter in that he could use living words to express himself and these words grew in meaning as the days went by.

**CANDY FOR FLU**

British Doctor Is Said to Be Prescribing It.

LONDON, Mar. 9.—Sugar candy is being used with successful results as a remedy for muscular weakness of the heart after influenza.

"I was sent for on Sunday to see an old woman of over 80 with a pulse of 140 beats to the minute," said Dr. F. Thompson of Sunbury-on-Thames. "I gave her

sugar candy at once and next morning her pulse was down to 88."

Dr. Thompson is now prescribing sugar candy for so many influenza patients that the local chemist can not get enough.

"Sugar candy, and sugar generally, are wonderful heart foods, great heat producers, and easily utilized by the body," stated a physician at a London hospital for disease of the chest.

"Cases in which strong heart stimulants have failed have been immensely improved by the consumption of sugar. A London doctor who was cured in this way of extreme heart weakness has given up medicine and has taken to eating sugar.

"It is a very valuable agent in post-influenza cases both for the heart and the lungs."

**Why fade at 30?**

Youthful maturity may exert a charm which youth alone can't rival. And certainly no woman should allow her youthful freshness to fade just when the joy of living should be at its height.

Keep your school-girl complexion and you can forget the passing years. The woman with a fresh, radiant skin will always seem young.

How to keep it—this is simple, as Cleopatra could tell you. The secret lies in daily intelligent care which will make beauty life-long.

**How Cleopatra kept young**

Girlhood days had long passed when the beautiful Egyptian reached the height of her fame and loveliness. Her charm grew greater with the years.

She knew how to care for and keep the smooth, flawless complexion which makes the possessor seem ever young.

Her method—thorough cleansing with the soothing oils discovered in ancient Egypt. Whatever cosmetics this queen of

beauty used, the foundation was a skin free from all injurious accumulations.

**Why your face needs washing**

Because the accumulation of dirt, oil and perspiration must be removed or they will ruin your skin. To let them collect in the pores is to invite complexion troubles.

Inevitably such deposits soon cause enlarged pores and coarse texture results. The dirt forms blackheads and carries infections which cause blotches.

The more powder you use to conceal this condition the worse it grows, for this only increases the clogging. Lotions and cold creams won't help—you must remove the cause.

Gentle cleansing with Palmolive will soon improve the condition, and don't be afraid to be thorough.

Massage the cosmetic lather into the skin so that it may remove every trace of injurious soil.

If your skin is dry, apply cold cream

after cleansing. Oily skins won't require such applications.

**Throat, neck, shoulders**

Need the same beautifying cleansing, for complexion beauty doesn't stop with the face.

Bathe with Palmolive and keep your skin smooth and white. It is a luxury all can afford.

For with all its fineness, its mild, soothing qualities, its gentle cosmetic action, Palmolive isn't an expensive soap. Popularity keeps the price low.

**Explaining price**

This modest sum is possible through gigantic production which keeps the Palmolive factories working day and night and the importation of the bland mild oils in reducing volume.

Thus this finest facial soap, which if made in small quantities would cost at least 25 cents, is offered at the price of ordinary soap.

# .. SUCCESSFUL .. SOCIAL FUNCTIONS.

The successful society matron recognizes that in order to maintain her position as a society leader she must follow certain well defined lines; she must not forget the "trills"—those little aids that may mean the difference between the success or failure of her affair.

Probably you intend holding a whist drive and dance, a bridge or five-hundred party, an "at home" or a birthday party in honor of a daughter or friend. If so, you will require dance programs, tally cards, place cards, bridge score or five-hundred pads, as the case may be. In any case, whatever your requirements, consult us before buying elsewhere. We carry an excellent stock of artistic designs, unexcelled material, and at a reasonable price.

## PILES

## PIMPLES ON FACE DIDN'T LIKE TO GO OUT

Those nasty little pimples that break out on the face and other parts of the body are simply indications that the blood is out of order and requires purifying.

There is only one way to get rid of this obnoxious skin trouble, and that is by giving the blood a thorough cleansing which can best be done by that old reliable blood medicine.

## BURDOCK BLOOD BITTERS

and when the blood is purified the pimples will vanish and you will have a clear, healthy complexion.

Miss Mary E. Flanagan, R. R. No. 3, Stella, Ont., writes:—"I suffered for about two years with pimples and blotches breaking out on my face. The doctor said it was caused by bad blood. My face was so bad that I didn't like to go out among a crowd of people. One day I was talking to a friend, and she advised me to get a bottle of Burdock Blood Bitters and try it. I just took three bottles, and there was not a blotch or pimple of any kind left. Some of my friends asked me what I had used and I said, 'Burdock Blood Bitters chased them!'"

B. B. B. has been on the market for the past 45 years, so you are not experimenting with some new and untried remedy.

## MOOSE LODGE

Whist Drive and Dance Last Night in Metropole Hall Attended by 100 Persons.

About 100 persons attended the Moose Lodge whist drive and dance in the Metropole Hall last night. First prize winners at cards were Mrs. C. Richards and J. Biggar. Refreshments were served and dancing was then enjoyed. Joe Slaggard was master of ceremonies, George Milach was on the door and the committee comprised W. Hayner, J. Slaggard, G. Milach, P. Cameron, F. Cameron and J. Graham. The Moose orchestra provided the music. Mrs. Gertrude Morten and Mrs. H. Nations had charge of refreshments.

## DUTIES OF BRITISH ASTRONOMER ROYAL

Has to Keep Record of Big Ben and Keep Chronometers and Watches in Order.

LONDON, Mar. 9.—The functions of the Astronomer Royal, who has, it is stated, to give his approval to the new clock for the Royal Exchange, are multifarious. One of them is to keep a record of the rate of Big Ben. Twice every day the great clock at Westminster sends automatically a signal to the Royal Observatory at Greenwich. The time this signal arrives is carefully noted. It is not part of the Astronomer Royal's duty to correct Big Ben, and even if it were such a duty would be almost negligible, for Big Ben is never more than a second or two wrong in the hour, and rarely that.

The Astronomer Royal also tests chronometers and watches for the Admiralty. The chronometers belonging to the Navy are stored at the Observatory. After every period of service they are examined, and, if necessary, sent to the makers for repair.

On their return to the Observatory they are tested and rated. As many are for use in hot climates, part of the test consists in putting them in ovens heated to a temperature of about 98 degrees. They are tested also in cooling chambers. After being tested the chronometer is adjusted. The change from a cold to a hot temperature should not be very marked on the instrument. If, however, very much irregularity is shown, it has again to be corrected by the maker. Before the instrument is sent out on service it must pass the Astronomer Royal's test, so that the Navy is assured of having the finest chronometers if it is possible for them to get.

## Ten Years Ago in Prince Rupert

March 9, 1912.

At a labor meeting last night W. H. Montgomery was nominated as Socialist candidate for the forthcoming provincial election. Walter Shaw and W. Denning were also nominated but they withdrew to make the decision in favor of Mr. Montgomery unanimous.

Mayor Newton, City Engineer Davis, Aldermen Morrissey, Maitland, Bullock Webster, Kerr and Douglas; Rev. W. H. McLeod, H. O. Crew and W. H. Tobey made a tour of Acropolis Hill yesterday with a view to selecting a site for an athletic park. They decided on a spot south of the reservoir and will report to the council on it.

Edward Shear died at the Eagle Cafe last night while eating a meal. The cause of death is uncertain and there will be an autopsy.

## MADE MILLION FROM SMELT FISHING THIS SEASON N. BRUNSWICK

FREDERICTON, N. B., March 9.—Fishermen of five counties including what is known as the North Shore of New Brunswick cleared up more than a million dollars on the smelt fishing season which is now closing.

Gloucester, Restigouche, Northumberland, Kent and Westmoreland counties have all benefited from the season's success, but Northumberland County with the Miramichi River as the banner fishing ground, made the biggest cleanup, estimates giving Northumberland \$600,000 of the one million which the smelt season produced.

Smelt were unusually plentiful all along the northern and eastern coasts of New Brunswick this year, and because of the unemployment situation special permission was obtained whereby the smelt season opened earlier and closed later than provided by law. The output was marketed both in Upper Canada and the United States, as well as locally and fishermen are said to have averaged about seven cents per pound for their catch. Two men are known to have sold a night's catch for \$500.

## "S Brand Fresh Roasted SUPREME" Coffee

Coffee that tastes as good as it smells. Think of actually drinking coffee that tastes as good as it smells. Yet you can, because "SUPREME" has that characteristic.

## MOVE CAPITAL FROM JUNEAU

That Is Scheme Propounded by Seward Newspaper in Recent Issue.

The Seward newspaper, known as the Seward Gateway says an organized effort is being made to move the capital of Alaska from Juneau to Seward. The paper wants a referendum on the subject saying: "Up to the present time all candidates announcing for office in the third division have come out in favor of removing the capital from Juneau to some point farther north, preferably Seward. This pledge has evidently caused much alarm among the citizens of Juneau, as evidenced by the numerous editorials in the Capital. Charles E. Herron's exemplar of republicanism at the territorial hub.

"The Capital advances no cogent reason why the capital should not be removed, but treats the affair as a joke. It accuses Seward of wanting to take things away from other towns, for selfish motives. When we consider how Juneau took the capital away from Sitka, how it got the road commission, the fisheries bureau, the dozen and one bureaus now located there; of how the school commissioner sends supplies printed in Juneau to the towns of the third division, which are better able to print these blanks than the plants they are printed in; one can hardly see the consistency of the argument. Had Juneau not so persistently hogged everything in sight at a time when hogging was good, we might have a little sympathy for her, but as it is, the Gateway will go down the line for the removal of the capital, and with proposition being favorably considered in the second and fourth divisions, it can hardly fail of going before the people to vote on at the next election."

## OUTLOOK FOR NEWFOUNDLAND

Proposal to Establish Coal Bunkering Station at Little River.

ST. JOHN'S, Nfld., Mar. 9.—Much interest is being shown in the industrial possibilities of the Ancient Colony. Just now a company with an authorized capital of \$5,000,000 is being organized to exploit the coal mines on the Little River near the St. George's coal fields on the west coast, and its officials announce that development work will commence this spring. The company plans to create a bunkering station at Little River, believing steamships using the Straits of Belle Isle will call there for bunker coal. A representative of a Canadian firm is here with a proposition to establish a flour mill, which he says would employ 500 men. The United Towns Electric Co., which within a few years has ex-

## HALIFAX EXPLOSION WRECKED HER NERVES

The reader will, no doubt, remember when a few years ago there was a collision in the Halifax, N. S., harbor and one of the munition ships was blown up, causing great loss of life and laying a large portion of the city in ruins, and causing a great deal of suffering and distress among the inhabitants. Mrs. Winifred Hill, now of Windsor, N. S., was living in Halifax at that time and went through this trying experience and the shock wrecked her nerves. She writes as follows:—"I was living in Halifax at the time of the explosion, and it wrecked my nerves so that I could not do my housework. I would take such nervous spells I would be under the doctor's care. "I saw Milburn's Heart and Nerve Pills advertised, so I took two boxes, and they helped me so much I took six more, and now I am completely relieved. I can recommend them to anyone suffering from heart and nerve trouble." To all those who suffer from nervous shock we would recommend our

**MILBURN'S HEART AND NERVE PILLS** as the best remedy to tone up the entire nervous system and strengthen the weakest organs. Milburn's Heart and Nerve Pills are the original heart and nerve food, having been on the market for the past 27 years. Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

tended its hydro-electric system to practically all the towns and settlements on Conception Bay and Trinity Bay, has important plans for further water power development and is reported to be trying to make an arrangement with the Reid Newfoundland Co. to distribute power in St. John's. **Guarantee Bonds.** The project of the Armstrong & Whitworth Company of England, in conjunction with the Reid Newfoundland Company, to establish large pulp and papermaking industries in the Humber River Valley has become the subject of much controversy. The government's attitude to the proposals of these companies has not been disclosed, nor is the precise nature of the proposals known. In some quarters it is said that the government has been asked to guarantee the company's bonds to the extent of \$5,000,000; in other quarters it is said the proposals would involve the government in obligations amounting to eighteen million dollars.

The island's need of new industries is generally recognized. Young men are growing up who have no inclination for fishing, and unless opportunities for employment are afforded they must emigrate.

## Sport Chat

Melbourne Inman, professional billiard champion of England from 1912 to 1920, in writing in the News of the World of New-mans, the present champion, says that he is really a wonderful scorer. "He seems to take root when he works the balls to the top of the table. His remarkable form of the last couple of months has been uncanny. He has averaged nearly sixty points per inning every time he went to the table during this time. Nobody else I know of has ever equalled such a rate of scoring over so long a period."

A gold watch, lost in the snow

on a mountain near Glacier, B. C., ten years ago, was recently found by a member of a mountaineering club. It was in almost as good condition as on the day it was lost and when wound kept perfect time. When found it was lying on a rock at a height of about 7,500 feet and had slid through the snow for some distance, a trail left being plainly visible. F. W. Johnson, of Vancouver, a member of the British Columbia Mountaineering Club, was the finder. From an inscription on the back he located the owner, Rev. Benjamin E. Baker, of Yale University. The watch was highly prized by Rev. Mr. Baker as it was presented to him in 1892 by the First Congregational Church at Oswego, New York. The watch has been returned to Rev. Mr. Baker, and with it a fob, also a presentation received while he was a member of a football team in 1882.

"Rod and Gun," the Woodstock sporting publication, has made its appearance for the month of March. The magazine contains several splendid hunting and fishing stories, the list including three of particular interest for British Columbia readers. One by John P. Babcock, commissioner of fisheries for the provincial government, tells of fishing in the Cowichan River, on Vancouver Island near Duncan from a canoe. A. Bryan Williams writes on big game hunting in B. C. and refers to wolf shooting and trapping on northern coast and in the interior. L. W. Winslow tells of bird hunting in the Fraser Valley.

## CITIZENS' RESEARCH LEAGUE IS STARTED BY CALGARY PEOPLE

CALGARY, Mar. 9.—For the purpose of increasing interest in civic affairs the organization of a "Citizens' Research League" is now under way in Calgary, with many members already enrolled. An inaugural meeting was held recently when it was decided the league would operate under a charter secured under the ordinance respecting benevolent and other societies and it was emphatically explained that it had no relationship of any nature with any other organization in the city.

The objects of the league were outlined as follows: "To disseminate information on civic affairs; to secure the interest of all citizens in seeing that they are properly registered for voting, and that they use their franchise at the polls; to encourage good men to go into public life and to secure information from other municipalities as to the best administrative methods and policies, using such information to the end that the people of Calgary may benefit."

Even the unsuspected clothes line is questioned as to its responsibility. Here, as is often the case, that supposed friend of the housewife, is found to be quite culpable. Expert tests have shown that clothing exposed for 24 hours on the clothesline, has suffered a loss of 2 per cent. This explains in no small measure the almost universal failure of lace curtains just below the line of the opened window sash. By this test, the laundry industry is vindicated, and we are shown that after all, even the home laundry process has its imperfections. We do not use clothes lines in our process, your clothing is thus saved this 2 per cent loss, which may be even greater here when such high winds prevail. ### Grandma is Their Doctor

ON an old-fashioned bureau, in a house I know, lies a large-sized New Testament with the binding well worn, and with it a much-used old copy of Dr. Chase's Receipt Book. When the calves have the colic or the neighbor's baby the ear-ache, 'Grandma' hands out well-assimilated advice from the Dr. Chase Book. When 'Grandma' herself feels 'run-down,' Dr. Chase's Nerve Food stands ready on the dining-room table among the salt and pepper shakers.

In these few simple words Mrs. Bert Smith, Way's Mills, Que., beautifully describes the way in which many a grandmother is a blessing to her family and to

her neighbors as a guardian of health.

And what finer compliment can be paid to Dr. Chase's Receipt Book and Dr. Chase's Medicines than the approval of such mothers of experience as the one here described.

Just as in this home, Dr. Chase's Almanac hangs on the wall in the great majority of Canadian homes, and in the cupboard or medicine chest will be found one or more of Dr. Chase's Medicines ready for use in case of emergency.

If you did not receive a copy of Dr. Chase's Almanac it will be sent free by Edmanson, Bates & Co., Ltd., Toronto.

### JUNIOR FOURTH PRIZE ESSAY

Written for Rotary Club by Miss Wilma Wilson, Aged 12 Years.

Canada is our country. It is part of the greatest nation the world has ever known, the British Empire. In the first place it was a large and beautiful forest, inhabited by wild beasts and red men. Ever since the time of Cartier it has been growing and is now a thriving and prosperous country. The development has cost large amounts of money and a great many lives. Canada sent many brave men to fight in France and thousands of them died on the battlefield. Most of her wealth comes from her natural resources—mines, forests, fisheries. Her chief industries are agriculture, fishing, mining and lumbering. She has grain elevators, flour mills and lumber mills and exports large amounts of grain every year. Canada represents freedom, industry and untold effort in the founding of cities.

**Canadian Privileges.**  
Being a Canadian citizen is a privilege. We have other privileges, too, such as freedom of thought, which means that we are not judged by our work but by our character, words and actions. We have the privilege of the press, which means we can have our views printed in the papers. One of the greatest privileges, which is not properly appreciated by the children, is education. Another great privilege is being able to elect our own representatives for the government of our country. Another privilege for which we may be thankful are the hospitals.

We have duties, too. We must be loyal to our King and country, brave and courteous. We must be attentive in school, obedient at home and in school, and helpful in the home and church. In school, too, we should help to keep our class in order by each one minding his own business. Each boy and girl should have some idea of what their life work will be. Look always on the bright side. When grown up we should take some interest in the government of our country and vote. We should assist in all good causes, such as prohibition, non-smoking and prevention of cruelty to animals. We should take part in social affairs, help our town to grow and prosper and employ our bodies and minds properly.

### PRESENTATION G. F. JOHNSTON

Popular Railway Official Who is Leaving Tonight Given Sendoff.

SEVERAL REMEMBRANCES G. H. McNicholl Expresses Sense of Appreciation of Railway Officials.

Last night G. F. Johnston, ticket agent for the Canadian National Railway, who is leaving for New Zealand as general passenger agent for the Canadian National Railway in Australasia, has given a dinner and was the recipient of several valuable presents from his friends and fellow employees on the railway.

A few close friends were invited to dinner at the home of Mr. and Mrs. Harry Atkins and on behalf of these, Harry Atkins presented Mr. Johnston with a set of mother of pearl shirt studs. Another presentation on behalf of "The Wastrels" made by Fred Hale was a gold watch chain made from British Columbia gold.

After dinner something like 50 people dropped in for the evening, these including the fellow employees of Mr. Johnston as well as others from all walks of life. There was also the West-borne orchestra present and the famous saxophone quartette both of which gave selections during the evening.

#### Big Presentation.

The presentation was made on behalf of the employees of the company by G. H. McNicholl of a platinum and gold chain and a gold pencil set and also mother of pearl vest studs. In handing these to Mr. Johnston Mr. McNicholl said they all regretted that it should be necessary for him to leave. On the other hand they were pleased that so good a man had been selected for the responsible position, a position that they all knew he would fill with credit to the company and satisfaction to the people of Canada and Australasia. It was not often that such a happy occasion was made, one that had the full approval of all the associates of the appointee. Mr. Johnston had been in the employ of the company a long time and they all respected him. He had never worn out. He had stood the test of time, the test of bad times, the test of friendship and had come out like fine gold. Those present would all agree with him that in making that presentation they were conveying to the recipient the heart felt good wishes of everyone in the city and he hoped that in the days to come, when he had made a success of his work in the south, he would look back to Prince Rupert without any regrets, feeling that he had made

valuable friendships and that in leaving he carried away the best wishes of all.

There was singing and good cheer and the party broke up somewhat late amid the hearty congratulations of all.

Among those present were G. F. Johnston, Norman Allen, Fred J. Hale, G. A. McNicholl, R. F. McNaughton, E. C. Gibbons, Col. S. P. McMordie, H. McEwen, A. R. Holtby, A. A. Easson, Jack Barnsley, Charles Balagno, W. Balagno, W. F. Browne, Harry Atkins, Milton Gonzales, W. F. Roberge, J. A. Ross, A. R. Nicholls, Harry Welford, G. E. Jenner, W. G. Orchard, A. A. Forsythe, D. Grear, G. W. Nickerson, Frank Walsh, W. H. Tobey, W. H. Manuel, J. J. Raleigh and W. Vaughan Davies.

Mr. Vaughan Davies was piano accompanist for the evening.

### ARE ASKED TO VIEW THE LATEST FASHIONS

Newspapermen in Paris Admitted to Holy of Holies.

PARIS, March 8.—That little world of its own in Paris which has to do exclusively with the creation of women's clothing has been thrown into a high state of excitement through the "radical" departure of one of its leading members in inviting newspapermen to view his spring and summer dresses.

In doing so the dressmaker smashed a tradition as old as the Paris dressmaking business itself, which has always boasted of the fact that it needed no newspaper to assist it to greatness.

The representatives of the press have been rigorously barred heretofore and many of the big establishments have gone so far as to demand a special passport with a picture from all who entered their establishments. Those few special fashion writers who have obtained admission were made to believe they had been highly honored.

#### American Ideas.

Jean Patou, a young Frenchman with American ideas, decided recently that his associates were wrong. He therefore arranged a special party, invited all the best known newspapermen in Paris—foreign and French—and revealed to them the secrets of his art. Anyone was free to carry away a careful description of the gowns displayed.

Patou's move has caused great discussion in the Paris fashion world and there is much speculation as to whether it will force other dressmakers to open their doors to the press. Many well known houses which have felt the pinch of recent hard times are wondering whether they are wrong.

Advertising is to business what steam is to machinery, the grand propelling power.—Lord Macaulay.

### ACROSS-PACIFIC WAY OF ALASKA

That is Proposal of J. Roach—Fuel Stations en Route to Be Established.

EDMONTON, Mar. 9.—That a trans-Pacific aerial service in the near future is a possibility is the opinion of J. Roach, formerly of the Royal Air Force. Mr. Roach is temporarily in the city, prior to his departure to Camp Borden, for the purpose of taking a four weeks pilot's course. His record overseas was an enviable one, and more than one enemy plane has been placed to his credit. It is his intention to qualify for commercial flying in Canada and as soon as his course is completed, he will secure from the Maurice-Farman Aeroplanes Ltd., Rouen, France, a type of machine suitable for the purpose. The type will probably be the smallest size two passenger sport biplane, with a maximum speed of 85 miles per hour and landing speed of twenty miles. From the viewpoint of safety, it will have an attraction in its long glide and low landing speed.

**Commercial Basis.**  
He will operate this machine in different parts of the Dominion, endeavoring to interest capital in the advancement of his scheme for Trans-Pacific Aerial service, on a commercial basis. If successful in this, he will arrange for a machine of the 45 J. L. type, twin engine, multi-passenger, which is at present being designed.

The Trans-Pacific route would probably be north along the B. C. coast to a point in Alaska. From there to the Aleutian Islands, across the Behring Sea to the Kamtskatka peninsula and south along the Asiatic coast-line to Japanese and Chinese points. Fuel stations would be arranged for at distances of from 500 to 1000 miles, supplies of all kinds being obtainable at these points. An effort will be made to secure the co-operation of those countries immediately affected by this service.

#### Modern Progress.

Mr. Roach is confident that the initial steps of this great movement will be taken within a year. He says the speed at which the world of aeronautics is moving calls for a drastic change in the immediate future in the system of world-wide transportation and hopes that this development, emanating on Canadian soil and backed by Canadian finance will be realized, placing the Dominion once again in the foreground of modern progress.

#### In the Letter Box

##### SABBATH OBSERVANCE.

Editor Daily News:  
Remember the Sabbath, etc. Six days shalt thou labor, etc. Come, let us reason together. Law is supposed to be the essence of reason. Law applied is force. There should be no law upon our statute books that is unreasonable. In the early days the New Zealanders worked out in the spirit of good fellowship the 48-hour week, which was the best Sabbath law ever devised, until the prohibitionists added the Sunday proviso. Six days of eight hours' service was provided for first, then a day of rest. This was reasonable. Then the prohibitionists added one unnecessary and unreasonable restriction after another until the spirit of Christianity

back of the law was replaced by the spirit of Satan.

#### Punishable Offense.

In our country the ministers of evil are attempting to make it a punishable offense to perform a necessary service. Here, where we have practically no method of spending Sunday which is legal except to sit around and suck our thumbs, the prohibitionists are attempting to drive all our people to crime. "The devil still finds work for idle hands."

I would call your attention to the fact that in "the good old days," when churches were prohibited and Christians were used for torches, almost everyone went to church. Logically, with history to judge from, the prohibitionists should know that to prohibit any article or service which people desire will increase the sale of that service or article.

There is no logical reason why any person who can see sufficient profit in selling service to warrant him keeping that service for the benefit of those of our citizens who desire those services, seven days in the week and 24 hours a day so long as the laws of decency respecting the rights of employees are observed, i.e., six days of eight hours and then one day of rest, should not do so. Our present Sabbath law is an unreasonable law and therefore can not last. It is un-Christian. It is advocated by those who, because they do not wish to give a service, do not wish to see anyone else give it.

#### Must Be Customers.

There will be no performance of service unless there are customers. If the advocates of Sunday observance will provide

It is on the sewer and lies fine for building. Make us an offer. It must be sold. **H. G. HELGERSON, LTD.,** Real Estate, Rentals, Insurance.

**LOST HANDS AND FEET, YET BECAME EXPERT AT WORK**

WINNIPEG, Mar. 9.—Despite the loss of his arms and legs, Finlay Booth, a pioneer of the early 70's, who died here recently, aged 68, made his own way successfully in farming and other operations for more than 50 years. He was a survivor of a blizzard disaster of the early days of Manitoba, when the wanderer in a storm on the prairies was confronted with conditions that now exist in comparatively few districts. In those days there were few buildings to offer refuge to the lost person, no fences and the roads were but winding trails.

Mr. Booth arrived in Winnipeg in 1874, and with his father and family, who were taking up land near Gorman, Manitoba, started out from the city for the new home late in November. While the others rode in a wagon, young Finlay, who was 18 years old at this time, led the family cow along the trail. While passing what is now the town of Sanford, which is part of the famous White Horse Plains, a wide and treeless prairie, a storm developed. Finlay's brother, Payton, offered to lead the cow and let Finlay ride, but the latter declined.

The storm developed in fury and Finlay had to fight against it alone, being separated from the rest of the family. He plodded along, lost and buffeted by fierce blasts. About midnight the storm broke and he trudged eight miles, badly frozen, to the new family home. As a result of his experience his hands and feet had to be amputated, but his rugged constitution pulled him through. With the aid of artificial limbs Mr. Booth developed remarkable expertness in performing work.

**ORGANIZE TO FIGHT GRASSHOPPER PESTS**

EDMONTON, Mar. 9.—Attempts to regulate the grasshopper and other insect crop pests so far as possible in affected portions of Alberta will be made by the provincial department of agriculture this year by means of legislation proposed at this session of the house. Hon. George Hoadley, minister of agriculture, states that the proposed act will make compulsory the taking of certain precautions on the part of land owners to meet the grasshopper pest.

The compulsion will probably be brought about through the municipal organizations and through the department in unorganized districts. The spreading of poison at the proper time of the year will be required in all districts where the hoppers are known to exist in menacing numbers. By this means it is planned to overcome the difficulty of certain farmers in a district neglecting to take the proper steps to cope with the pests at the proper time of the season.

**WOULD PLANT TREES**

Calgary Horticultural Society Urges Effort to Improve Arid Areas.

CALGARY, Mar. 9.—The federal and provincial governments will be petitioned by the Calgary Horticultural Society to make provisions whereby a certain minimum number of trees must be planted on all land for which bonds are guaranteed by the governments. This request will be made in an effort to bring before all farmers the great value of arbor culture in dry areas of the province, which, it is hoped, will soon be placed under irrigation.

The following resolution was passed by the executive of the society recently: "Resolved that in all irrigated areas, where the federal or provincial governments are guaranteeing any bonds, or providing any assistance that gives them any power over such lands, it be insisted that trees shall be planted on every quarter section, the number and kind to be left to the discretion of the provincial minister of agriculture; and that the Canadian Pacific Railway department of natural resources, the United Farmers of Alberta and all horticultural societies be asked to give the utmost prominence to the great benefits accruing from arbor culture in the dry areas of this province."

**WORKERS OF SOUTH AFRICA WITH MINERS**

LONDON, March 9.—South African workers have rallied in a fairly wide response to the general strike call issued by the executive of the Industrial Federation and Trades Union in sympathy with the striking miners. Many shops in the business sections of South African cities are closed down, the owners fearing violence.

**INTO THE SPOT LIGHT.**

"I understand you think of retiring from public life and going into the motion picture industry."

"I shouldn't call it 'retiring from public life,'" rejoined Senator Sorghum. "For a statesman to associate himself with the films these days is like emerging from comparative obscurity."

—Washington Star.

**MAY USE AIRPLANES IN HUNTING SEALS**

Locating "Main Patch" Would be Simplified by Using Air Craft.

ST. JOHN'S Nfld., March 9.—The Newfoundland Government is being urged to employ one or more airplanes to assist the seal hunters during the coming Spring, and if the Government does not take action in the matter, it is probable that the firms fitting out vessels for the seal hunt will co-operate to secure the services of a flying machine. For some years past seal hunting has not been prosecuted with much vigor, owing to the difficult financial conditions; and before building new vessels and going into the business, heavily again the firms desire information as to the extent of the supply of seals. It is believed that with airplanes it will be possible to discover the "main patch" and determine its extent.

If scouting airplanes can locate the "main patch," and indicate how the seal ships can force their way to the ice floes carrying the main herds of seals, a new element of certainty will be introduced into the annual seal hunt. The method by which the hunters take the seals is to surround them on the ice floes and kill them by clubbing them on the nose.

**WANT AIR ROUTE BY WAY OF REGINA, SASK.**

REGINA, Mar. 9.—The provincial executive of the Canadian Air Force Association will have the support of the Saskatchewan government in petitioning for the establishment of a civil government air station in Saskatchewan, according to a promise made a delegation representing the association by Premier W. M. Martin. Premier Martin also indicated that his government would be prepared to consider uses to which the provincial government would be able to put the aerial routes should the Federal Air Board establish a station in this province.
