Opinions Differ on School Question

FIERCE BATTLE FOUGHT IN ULSTER BETWEEN RIVAL FORCES

School Board Has 4 Hour Session on Repair Question; Council is to be Called In

For four hours last night, the School Board was in session listening to reports on the Booth School situation from A. A. Cox, consulting architect, and J. W. Potter, supervising architect. There was considerable discussion in which the large assembly of spectators, including several local and outside contractors, took an active part, and a great diversity of opinion was brought forward. Some seemed to favor Mr. Cox's \$35,000 plan for rebuilding, others criticized some parts of it, while still others thought the plan was entirely unnecessary. At some junctures, the discussion took the appearance of a cross-examination of Mr. Potter by Mr. Cox and there were just enough heated remarks from these two gentlemen and various other persons present to keep interest running at a high pitch all the time. Mr. Cox stood his ground firmly as did also Mr. Potter with the result that the School Board is now face to face with the question of whether to proceed with the \$35,000 scheme or summon further expert advice to adjudicate the question that has arisen.

The meeting adjourned at midnight after the passing of a resolution, moved by L. W. Patmore and seconded by Thomas McMeekin, that the council be called into joint meeting with the School Board before further

London Money Much Dearer

Exchange Goes Up to 447 1-8 in New York Stock Market.

NEW YORK, June 2.—Exchange on London made a new high record for over three years on the stock market today, demand bills selling at 447 1-8 against yesterday's high of 445 1/2. The further rise is attributed by the bankers to the German moratorium which is regarded here as a prelude to the granting of an international loan to the German Republic, largely under British auspices.

DELORME TO STAND TRIAL

True Bill Found Against Priest Who Is Charged with Murder.

MONTREAL, June 2.—The Grand Jury found a true bill against Adelarde Delorme, the priest who is charged with murdering his half brother Raoul. He has already been dispossessed of his clerical status by the Roman Catholic Church authorities, and will now have to stand trial.

SMALL FIRE ANYOX SMELTER DESTROYS COUPLE OF MOTORS

Word has been received here that a fire broke out at the Anyox smelter on Monday of this week when one of the converters turned over backwards instead of forwards spilling the molten matt on some of the platforms at the rear. A couple of motors were burned up but no serious damage was done. Fortunately no one was hurt, which was lucky as hot matt was flying all directions for awhile.

The damage is covered by insurance.

+ VISCOUNT ASTOR'S
POGROM WON OAKS
+
+ EPSOM DOWNS, June 2.—Viscount Astor's Pogrom won the Oaks Stakes here today. Sire E. Huntington's Sonbriquet was second and E. Destalay's Mysia third. Eleven horses ran.
+ Betting on Pogrom was five to four against, Sonbriquet, seven to two, and Mysia 100 to 8. Pogrom won by three-quarters of a length and Sonbriquet was three lengths ahead of Mysia.

AIR PLANE FOR RUPERT

Edmonton Newspaper Reports Big Steel Flier En Route.

Piloting the all-steel J.L.-6 airplane, formerly used on the flight to Fort Norman by the Imperial Oil Company, Major Thompson and several passengers arrived in the city by the air route on Monday morning at 10:30 a.m., says the Edmonton Bulletin. The big plane took off at 8:45 a.m., and with good weather made the flight through, to the considerable satisfaction of the passengers.

The plane will remain here for a few days and will then be flown through the mountains to Hazelton and Prince Rupert, B. C., where the air vessel will be put to commercial use.

DEVELOP PROPERTY AT DOME MOUNTAIN

Having completed arrangements with principals in the East, T. Jefferson returned to Telkwa on Saturday night after an absence of two months and is now gathering equipment and supplies together to undertake a program of development on the mining properties he has under bond on Dome mountain, says the Interior News. A small force of men is to be put on this work and operations will continue for the summer at least, although the nature of the work to be undertaken has not been announced. The properties in the group coming in for development by Mr. Jefferson were bonded from Telkwa people some time ago.

A fire alarm was rung in this morning at 11 o'clock from the corner of Fifth Avenue and McBride Street where a grass fire had started near L. O. Larsen's paint shop. The slight blaze was put out by Ralph Smith of Atkin's butcher shop, before the fire brigade reached the scene. There was no damage.

Absence permits the heart to wander.

PRINCE RUPERT MAN TO RAISE THE LUSITANIA

Count Zanardi Was Formerly Engaged in Survey Work Here and Rapids Named After Him

A former Prince Rupert man is about to make an attempt to save the big liner Lusitania from the bottom of the Atlantic ocean. Count Zanardi, the head of the constables occurred during the night at Dungooley Cross on the south Armagh border which lasted seven hours. It is believed that three constables were killed. The inhabitants along the border in the vicinity fled to Dungooley.

BELFAST, June 2.—Heavy firing between Irish Republican army forces and Ulster special constables was here engaged on survey work in connection with the laying out of the townsite. He came in the fall of 1906 and was engaged in the work under J. H. Pilbury for about four years. The Zanardi rapids near Port Edward were named after him.

Dr. Tremayne met the Count in London during the war. At that time he was engaged in salvage work and raised a great many vessels that had been sunk by the enemy. The following is a despatch from London in regard to the Lusitania which is being published by Eastern papers:

London Despatch

"Count Zanardi Bandi, head of the Ayerden Salvage Syndicate expects to begin his attempt to raise the Lusitania's cargo next month, the date depending upon the cessation of the National Engineers' strike.

Zanardi spent many years in Canada and raised a number of ships in the Pacific and elsewhere. He is now in London in the possession of a salvage contract with underwriters whereby his syndicate will take 80 per cent of the value of whatever is raised from the Lusitania.

"Zanardi has already received bids for the film rights of the expedition. He says he is satisfied there is enough bullion, jewels and furs in the wreck to make operations commercially sound.

Remove Valuables

"In order to remove the valuables from the ship and make the hull buoyant he will employ forty divers wearing special suits which will enable them to work broken in two by the enormous 280 feet beneath the surface of impact with which the bows of the water, which is the depth of the Lusitania's keel.

"Zanardi is finding that few experts agree with him that it is into the bows."

Terrible Fighting in Belfast Yesterday and Battle on Louth border

LONDON, June 2.—Despatches say the worst battle ever seen occurred between the Sinn Fein and military in Belfast Thursday night. The military were called out 13 times in five hours while the streets were raked with machine gun fire, bombs and fire torch. Whole blocks were set afire and the battle raged in the streets by the burning buildings. Nine civilians, including two women, were carried out of this inferno.

Some of those now dead were pursued to the burning houses and there killed while the rescuers could only snatch the dead bodies from the buildings to prevent cremation. Bayonet charges were necessary to prevent utter disorder.

The government forces had great difficulty in controlling the gunmen along the Louth border. The battle rages over a line a mile long and Protestant clergymen who set out with the intention of arranging a truce had to return to Belfast in haste.

The cosier the parlor the sooner the love-match.

SHOOTING AND INCENDIARISM

Comparative Quiet Follows Fierce Outbreak in Belfast Yesterday

MAY BE SETTLEMENT

Heavy Firing Took Place at Dungooley Cross and Three Killed

BELFAST, June 2.—Heavy firing between Irish Republican army forces and Ulster special constables occurred during the night at Dungooley Cross on the south Armagh border which lasted seven hours. It is believed that three constables were killed. The inhabitants along the border in the vicinity fled to Dungooley.

LONDON, June 2.—While outward indications show little change in the Irish situation, well informed circles are more optimistic regarding the negotiations than they were yesterday. As a result of representations made by Sir James Craig, the Ulster premier, the Evening News today says it understands a concession was made to the Ulster government giving it greater control of the British troops in Ulster without first having obtained authority from Colonial Secretary Churchill. This applies only to the movement of troops in Ulster and not to crossing into Free State territory.

BELFAST, June 2.—After a 24 hours' orgy of shooting, incendiarism and looting, the city enjoyed a comparatively quiet night. Sniping continued in Millfield area and a woman was wounded severely. Many Catholics are reported to have left Belfast.

"Landi spent many years in Canada and raised a number of ships in the Pacific and elsewhere. He is now in London in the possession of a salvage contract with underwriters whereby his syndicate will take 80 per cent of the value of whatever is raised from the Lusitania.

"Landi has already received bids for the film rights of the expedition. He says he is satisfied there is enough bullion, jewels and furs in the wreck to make operations commercially sound.

Remove Valuables

"In order to remove the valuables from the ship and make the hull buoyant he will employ forty divers wearing special suits which will enable them to work broken in two by the enormous 280 feet beneath the surface of impact with which the bows of the water, which is the depth of the Lusitania's keel.

"Landi is finding that few experts agree with him that it is into the bows."

Terrible Fighting in Belfast Yesterday and Battle on Louth border

LONDON, June 2.—Despatches say the worst battle ever seen occurred between the Sinn Fein and military in Belfast Thursday night. Budget Change Affects Port of Prince Rupert: Vessels Admitted Free

The most important feature of the budget brought down by Hon. W. S. Fielding, minister of finance, as far as Prince Rupert is concerned, and one which will have a tremendous effect on the fishing industry of the port, is the provision that fishermen coming with their families from the United States to Canada to settle can bring in their boats and effects free of duty provided the boats were owned by them six months prior to the move being made. The great importance of this ruling can be more readily understood when it is realized what difficulties American

BUDGET DEBATE MAY LAST LONG

If All Members Carry Out Intentions of Speaking Will Run Past Tuesday

OTTAWA, June 2.—The budget debate may not come to an end by Tuesday night if all the members who propose to speak carry out their intentions. It had been expected by party whips that the debate would end with speeches by the three party leaders on Tuesday. In case the budget debate goes beyond Tuesday, the date of prorogation will be moved nearer to July 1 than June 20, which is the present hope.

TWO DEATHS IN FOREST FIRES

SEATTLE, June 2.—Forest fires in Oregon and Washington were under control last night after considerable damage had been done in a scattered district to camps and small villages and some green timber. Two deaths are reported as a result.

TOMORROW IS OFFICE HOLIDAY BUT STORES WILL REMAIN OPEN

Tomorrow, the King's Birthday, will not be observed as a store holiday, but the post office, banks, government and city offices will continue their work as usual, however. The Daily News will also be published.

UKRAINIAN SETTLERS FOR THIS PROVINCE

Property at Vernon Been Sold to Syndicate and Will Be Subdivided.

VERNON, June 2.—The Garlin property, forty miles from here has been sold to a Manitoba syndicate of Ukrainians, who aim to settle there 300 of their countrymen on a community basis, establishing their own town and trading companies.

TRAWLER GOES OUT

Capt. Saunders to Engage in Fishing Sole and Other Flat Fish.

Capt. E. Saunders, the well known fishing skipper, is to leave port tomorrow evening with the trawler G. E. Foster. She will fish for flat fish. This is the first time this vessel has been engaged in trawling since the fall of 1919.

Light-hearted love lasts least.

BRITAIN ARRANGES INTEREST PAYMENT

This Fall Will Pay £25,000,000 to United States on War Debt

LONDON, June 2.—The government has completed arrangements to pay, during the coming Fall, interest amounting to £25,000,000 on the British debt to the United States.

FORMER FIGHTER ILL

VICTORIA, June 2.—Frank Slavik, former heavyweight champion pugilist is severely ill at a hospital here.

DAILY EDITION

Friday, June 2, 1922.

Favor Fishermen and Farmers.

Fishermen from the United States may register their vessels on this side the boundary without paying duty just as an American farmer may bring in his stock and implements without paying duty, as long as he is going to settle in this country. If he sells them within a year after arrival, the duty is charged against the goods.

Another favor secured from the Liberal government at Ottawa is the abolition of the sales tax, now amounting to six per cent., on almost all fishing gear and other material used by the fishermen. This also is an important concession to the business which has never before been recognized.

The change has been brought about through the representations of the local member, Fred Stork, and through the efforts of the delegation which went from here. If they have done nothing else they have earned the money and effort that was spent in sending them and the city will reap the benefit. It means that the local business houses will be able to do business on equal terms with American houses.

Lumber Being Shipped to Winnipeg.

It was only a small order that the Georgetown mill got for lumber from Winnipeg this week but it was a beginning and other orders may follow soon. If four car loads can be shipped, so can twenty. It may be a harbinger of better things to come. It may be the beginning of a business which will again make things active in this port. At any rate every small shipment made from this port is so much more business for the railway and so much more of an indication that we are again coming back and that there is business to be done here.

Shipping Business From This Port.

What we need to start us on the way to fame and fortune is to establish this port in the deep sea shipping business, both coastwise and Oriental. We have the railway and we have the deck. What is needed now is the business. We as citizens cannot secure that shipping and we cannot secure the cargoes. The only ones who can do it are the Railway Company or some company running in conjunction with the railway company such as the Canadian line. There is here a great opportunity for some enterprising concern to work up a business.

Naturally the government influence will be all powerful in this respect. The government can get the shipping business started or they can hold it back. It will not be very long, we hope before Hon. W. G. Kennedy comes to Prince Rupert and we have an opportunity to discuss the matter with him at first hand. There is a fine railway and a fine new dock and the next thing will be to provide business for both. As a good business man Mr. Kennedy will undoubtedly be anxious to have the railway operated without loss and even to make a profit toward paying the interest on the bonds. This can be done, but it will need much energy and good management to bring it about. The development of overseas business from this port will be one of the important steps in making the G. T. P. a commercial success.

Complete School Building Soon.

Whatever is done with the school building it must be something which has the sanction of the citizens because the citizens are the ones who pay the bill and who must approve the bylaw. In any case it will be costly, but it is desirable that it cost as little as possible. At present there does not seem to be any semblance of unanimity. The members of the school board and the city council have a serious duty to perform and much careful consideration will be necessary. Today we are giving a large amount of space to the matter with a view to allowing ratepayers an opportunity to study the problem and keep themselves informed on the subject. Very soon the people will be asked to approve a bylaw and when the time comes we want them to know what they are voting on so that they may exercise their franchise in this respect intelligently.

COMPLETELY FREE OF CONSTIPATION

Tried for Years to Find Relief

"FRUIT-A-TIVES" GAVE IT

Chronic Constipation or insufficient action of the bowels, is one of the great causes of disease. Some authorities even claim that Constipation cannot be permanently corrected. This is a great mistake, because here is the proof that constipation can be cured and the bowels made to act regularly and naturally.

YARMOUTH, N.S.

"For years, I was troubled with Constipation, and had to take laxatives and purgatives all the time. If I neglected to take these, the bowels would refuse to do their work."

About two years ago, a friend advised me to try "Fruit-a-tives", which I did. The first box helped me so much that I obtained further supplies of the remedy and continued the treatment. After using about eight boxes, my bowels were able to perform their particular function without aid.

The relief in my case has been lasting, as up to date, I have never had any further trouble. I can recommend "Fruit-a-tives" to all suffering as I did and I am sure they will derive equal benefit".

A. W. FRANKLIN.

"Fruit-a-tives" are sold by all dealers at 50¢ a box, 6 for \$2.50, trial size 25¢, or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

ROTARY CLUB BOYS' RALLY

Arrangements Made For Big Event at Agricultural Hall Next Week.

Announcement was made yesterday at the luncheon of the Rotary Club of a big boy's rally to be held on Friday evening of next week, June 9, at the Exhibition Building when the various boys' organization in the city will give an exhibition of their work for the benefit of the other boys of the community and of the citizens generally. Included in the organizations taking part will be two companies of Boy Scouts, the Wolf Cubs, the Naval Brigade and the Tuxis Boys and Trail Rangers. These will give drills, exhibitions of first aid to the injured, craft work, scout making and other diversions known only to the boys.

After the exhibition refreshments will be provided for the boys and the president of the Rotary Club will give a three minute talk.

Ten Years Ago in Prince Rupert

June 2, 1912.

A. G. Kerr, of the Railway Commission, and W. C. C. Meehan, general superintendent, returned today from a trip of inspection of the railway between Vanarsdol to Skeena Crossing. Mr. Kerr is pleased with the road and has wired the Railway Commission recommending the inauguration of train service from here to Skeena Crossing.

In addition to the post of harbor master, Captain Edward McGoskie has received the appointments as port warden and shipping master. He will thus have control of all shipping in the harbor.

The new ship Princess Sophia has arrived at Victoria from Glasgow and will be commissioned this summer in the C.P.R. service to Alaska running opposite the Princess May.

The newspaper with the circulation is the real advertising medium.

ROTARIANS HEAR ONE OF MEMBERS

Editor of Daily News Gives Talk on Impressions Gained From Trip

Incidents and impressions in regard to his recent trip to California were given yesterday by Harry Pullen to the Rotary Club at their luncheon in the St. Regis Cafe. He told of the number of Rotarians who were coming north with the Masons and expected to attend the luncheon on June 22. He also told of an interview with the secretary of the San Francisco Club where it is considered a very great privilege to be asked to deliver an address.

"A Canadian is looked on with great favor in the western states," declared Mr. Pullen. He said that everyone received them well, and the words "Canadian newspapermen" gave them entry to the movie studios where Canadian publicity was desired just as much as American publicity.

The question of food was discussed and the speaker expressed surprise at the people in a hot country eating meat and potatoes so often just as they do here. While in the cities salads were used a good deal, especially in the cafeterias, in the country it was almost impossible to buy anything except a regular dinner of meat and potatoes.

Weather and Work

The relation between laziness and warm weather was also mentioned. Since the Garden of Eden people had been trying to get away from work. Even those who worked hard did it so that some day they might be rich enough to stop work. So people in cool countries looked to a warmer climate, but it, like idleness, was very disappointing. The men who worked had the best time especially if they did it in a cool climate.

The wonderful efficiency of the camping parks was explained. Every town and city had its free camping park and often every convenience was provided for tourists free of charge. This led to the development of a tourist business, which brought much money into the country. While the city that provided the park often did not make any more out of the tourists than other places, by each doing its part the business was encouraged and all shared in the good results. Free water, stoves, fuel, benches and tables were provided in many places as well as the best of sites.

Wear Best Clothes

Among other things discussed by the speaker was the value of clothes. He told of the time when on the trip they got very dirty and dusty and the garage men called them "brother" and in the hotels they were paid little respect. Then when they had taken bath and changed their clothes, the attitude of the people they met changed. So he argued it was with towns and cities. They should put on their best clothes. Paint up their houses and stores and improve the appearance of the place. Then they felt more prosperous even if they did not make more money and they kept a good front to the world and the city commanded respect.

UNIONS SUFFER IN MEMBERSHIP DURING 1921, SAYS REPORT

Fewer Members and Diminished Number of Organizations in Canada

The information contained in the Eleventh Annual Report on Labor Organization in Canada, covering the year 1921, which has just been issued by the Department of Labor, shows that trade union membership has suffered a heavy loss during the year. The total membership of all classes of trade unions in Canada at the close of 1921 stood at 313,320, comprised in 2,668 local branches, and indicates losses during the year of 1921 of 60,522 in members and of 250 in branches.

Although a heavy decrease occurred in the following of international organizations, over 71 per cent of trade unionists in Canada belong to this class. There are in all 98 international organizations having one or more local branches in the Dominion, the aggregate for Canada being 2,223 with a combined reported membership of 222,896. These fig-

ures show three less international organizations operating in Canada and losses of 232 in branches and 44,354 in members.

There are 264 local branches, with a membership of 24,980, of what are termed non-international bodies; a gain of five in branches, but a decrease in members of 926.

The number of independent units is 27, three less than in 1920, and the reported membership 15,644, a decrease of 15,545.

The national and Catholic unions number 120, four less than reported in the previous year, and the total membership was given as 45,000.

The local units of the One Big Union number 34, a decrease of 17, and the membership was understood to be approximately 5,300.

IT always makes me excited to read the result of the Derby race as I note what money I might have won if I had only made a good choice.

AS Cutie says, there is an advantage in dull times. When you rest awhile you know you are not losing money.

THE school situation is too serious to joke about, the editor says. I say so too.

THE worst of having a holiday is settling down after it. Also settling up is difficult, the editor says.

THE only thing that keeps down the divorce record in the United States is the fact that most married couples can afford only one car and in case of a divorce they cannot agree who is to have it. It is better to remain married and both use it.

CIGARETTES have gone up in price and they are still going up in smoke.

HOW about a Royal Commission to investigate the cost of high living?

When you buy advertising you buy CIRCULATION, and see that you get it.

ONE HUNDRED AND NINETY THOUSAND POUNDS HALIBUT

Was Marketed at Low Prices at Fish Exchange at Today's Sale.

One hundred and ninety thousand pounds of halibut were marketed at low prices at the Fish Exchange this morning. There was also 3500 pounds of salmon on the Lunendahl which brought 15¢ a pound from the Canadian Fish and Cold Storage Co.

The halibut arrivals and sales were as follows:

Seattle, 58,000 pounds, sold to the Canadian Fish and Cold Storage Co. at 5.5¢ and 3¢.

Bartalome, 8000 pounds; Laura and Margaret, 14,000 pounds, sold to the Pacific Fisheries at 6.5¢ and 3¢.

Augusta, 12,000 pounds; North Pole, 5,000 pounds, and Adeline, 7000 pounds, sold to the Booth Fisheries Canadian Co. at 6.6¢ and 3¢.

Revilla, 10,000 pounds; Vulture, 6,000 pounds; Maude, 3,000 pounds, and Awaji, 3,000, sold to the Canadian Fish and Cold Storage Co. at 6.9¢ and 3¢.

Murineag, 10,000 pounds; Joe Baker, 8,000 pounds, and Iris, 5,000 pounds, sold to the Sinclair Fisheries at 7.3¢ and 3.3¢.

Groth, 3,000 pounds; Fanny F., 9,000 pounds and Shrub, 11,000 pounds, sold to the Canadian Fish and Cold Storage Co. at 7.2¢ and 3¢.

Atli, 8,000 pounds, sold to the Canadian Fish and Cold Storage Co. at 8.3¢ and 3.5¢.

Vinnie, 1,200 pounds, sold to the Royal Fish Co. at 7.7¢ and 3¢.

Azores, 10,000 pounds, sold to the Atli Fisheries at 8.2¢ and 3.5¢.

In the crown's case there was no evidence to show that the men had been seen near the premises broken into and there was no evidence to show that they were found in possession of the goods alleged to have been stolen, but when Detective Reynolds, of the city police, took prints of the men's fingers and compared them with the photo of the finger marks found on the stolen goods, they were the same. Mr. Justice Tweedie convicted the men on the charge and sentenced each to serve 18 months in jail.

The finger prints being wanting to a former case against Coleman the same day, the jury found him not guilty on the charge of the theft of silk from the London Silk Company.

EDMONTON, June 2.—Finger print evidence in the supreme criminal court submitted in the case of Chester Coleman and Clarence Moreland, secured their conviction on the charges of breaking and entry and theft when all other evidence failed.

In the crown's case there was no evidence to show that the men had been seen near the premises broken into and there was no evidence to show that they were found in possession of the goods alleged to have been stolen, but when Detective Reynolds, of the city police, took prints of the men's fingers and compared them with the photo of the finger marks found on the stolen goods, they were the same. Mr. Justice Tweedie convicted the men on the charge and sentenced each to serve 18 months in jail.

BRINGING UP FATHER

ELKS WINNERS OPENING GAME

Defeated Sons of Canada at Baseball by 9 to 5.

In the opening game of the Senior Baseball League season, the Elks defeated the Sons of Canada by a score of 9 to 5. The match was a very good one and, considering that it was the first of the season, the play was very fair although some costly errors were made, especially by the Sons of Canada. Batting was also of a low standard, the Elks being somewhat superior to the Sons. On the whole, the Elks were deserving of their victory.

Howard Frizzell, of the Elks, pitched a good steady game and extricated himself nicely from some rather tight holes. Eddie, for the Sons, a new pitcher, deserved to win the game for he made 15 strike-outs, almost a local record. He was given poor support, however. George Shaw, behind the bat for the Elks, excelled himself. Willie Mitchell, although an Intermediate, played well on second for the Elks and also made a nice two bagger in the course of the game. Jack Ratchford got practically all that came his way in left field for the Elks and also made two timely hits.

There was a good attendance and the game was very interesting from start to finish. E. A. Donohoe was umpire.

The teams lined up as follows:

Elks—George Shaw, c; H. Frizzell, p; Roy Selman, 1b; W. Mitchell, 2b; A. A. Eason, ss; G. Dickenson, 3b; J. Ratchford, lf; G. Hill, rf; and A. Grant, cf. Sons of Canada—W. G. Anderson, c; Eddie, p; H. B. Scott, 1b; H. Menzies, 2b; V. Menzies, ss; J. Farquhar, 3b; Joe Ratchford, lf; W. Sloan, cf; G. Mitchell, rf.

The score by innings:
1 2 3 4 5 6 7 8 9
Elks . . . 0 4 3 0 0 2 0 1 2 — 9
S.O.C. . . . 0 3 0 0 0 1 0 1 0 — 5

ALBERTA BASEBALL TEAM WANTS PLAY WITH THIS CITY

Blue Diamond Coal Mine Sluggers Ask For Date With Prince Rupert In Course of Coast Tour

A letter has been received by the Prince Rupert Baseball Association from the Blue Diamond Coal Co. of Brule Mines, Alberta, asking that arrangement be made to have the company's baseball team, which is to tour the Pacific coast late in July or early in August, meet Prince Rupert. It was stated that the team was one of the best in Alberta and was also going to play in Vancouver.

The local association, at its meeting last night, decided to make no guarantee but to arrange the games on a percentage basis. The prospective visitors will be advised to this effect.

PORT SIMPSON TO PLAY BASEBALL SONS OF CANADA

Arrangements have been made for a baseball game at the Aeroplane Hill ground tomorrow night between the Sons of Canada and the Port Simpson native team. The Port Simpson boys will arrive in the city tomorrow.

IOWANS ASKED HIM ABOUT THIS CITY

E. A. Heath, of Ketchikan, Finds People in States Have Their Eye on These Parts

E. A. Heath, of Ketchikan, is in the city on his return north after having visited his old home in Des Moines, Iowa. He will be sailing this afternoon on the Princess Louise for Ketchikan.

Mr. Heath says that people in the part of the United States he visited have their eyes on this district and many asked him about Prince Rupert. They seem to know that this city is the terminus of the Canadian National Railway having the best transcontinental grade across Canada.

Hester Bevins goes to New York from the country, disgusted with the ways of a small town. Jerry assures her before she goes that he will love her forever. But Hester longs for luxuries which Jerry cannot afford and in New York she gets them.

Jerry, at the outbreak of the war, enlists and at the front is blinded and gassed. Brought back to the United States, Jerry calls for Hester.

The girl decides that Jerry's last days shall be spent in comfort so she marries him and takes him to her apartment. We see him in the beautiful boudoir, but being blind, Jerry has no knowledge of the luxury that surrounds him.

Hester, to keep Jerry in ignorance of her recent life, assures him that it is a simple room in a small flat. It is the contrast between the gorgeous setting and the kindly deception practiced by Hester, that lends to this scene its dramatic value.

OPENING INTERMEDIATE LEAGUE GAME CANCELLED

At an executive meeting of the Baseball Association last night it was decided to throw out the opening game of the Intermediate Baseball game played this week between Gil's and Grotto teams and won by the former 10 to 9. The reason for the action is that Sid Bazzett-Jones, who played for Gil's was a Senior League player and was not properly registered to take part in the Intermediate League match.

J. M. Middleton, of Edson, arrived in the city on last night's train.

BUSINESS CHANCES.

FOR SALE—Building, 25x50 on float. Good wharfage for boats during winter months. A man handy at repair work could build up a good business here. Eventually splendid location for East End Club quarters. We will sell this place at a low price and on terms to suit purchaser. Apply Northern Exchange. See us for boats and engines. 130

Silk Under Things

The makers of Kayser "Italian" Silk Underwear (Made in Canada,) the high quality and exclusive features of which are recognized as standard, strongly advise the use of Lux. They say:

"Lux renewes the beauty and lustre of these excellent garments. Silk Underwear should be washed at home, preferably with Lux."

A quick gentle washing in the rich Lux suds will make your underwear as clean and fresh as when new. The thin white satin-like flakes of Lux are made by our own exclusive process, and dissolve instantly into a rich bubbling lather as harmless as pure water itself.

Lux stands supreme for washing silks and other fine fabrics. It is sold only in sealed packets—dust-proof!

SCHOOL BOARD HAS FOUR
WEEK SESSION ON REPAIR
QUESTION—COUNCIL IS TO
BE CALLED IN.

(Continued from Page 1).

as big as his hat in the
construction masonry was ex-
aggerated. There were no cracks
under the corridor floors al-
though there quite possibly were
surface cracks. Mr. Potter said
there were no sags in the floor
before the heating of the build-
ing.

Mayor Gives Opinion.
Mayor Rochester maintained
that there were sags in the floor
before the heating. He had vis-
ited the school before that time
and had noticed them in more
than one room. The janitor had
told him that water ran into
the centre of the rooms.
There is no question of the
fact that value was not given
to the floors not built accord-
ing to specifications. It is
a matter for discussion. It is
the slab need reinforcing,"
stated Mr. Cox.

Artificial Stone.
Regarding the artificial stone,
Mr. Cox said that it was ab-
solutely saturated when he saw
it. Mr. Potter said that he had
tested several samples during
construction and there had been
less than one percent absorption
in 48 hours.

"Did you see all the mixing,"
asked Mr. Cox.

"I will not say that Mr. Cox
is mistaken," replied Mr. Potter,
"but what I tested were alright."

Sand.

Mr. Cox said that the sand
used was full of mud and cement
would not assimilate. It was
not suitable sand.

"I was quite satisfied with the
sand," said Mr. Potter.

Mr. Bassano-Bert, who owns the
Conrad Street pit, said that the
sand was of good, yes excellent
quality. Other contractors had
said it was the finest sand that
could be obtained. The surface
contained some mud but the
lower strata from which this was
taken was very good. The sand
that had been delivered at the
school was only of the best quality
for Mr. Potter would accept
no other than the best. He had
seen practically every load of it.

There was a long discussion
about the sand in the course of
which a sample was produced.

Mr. Cox said that, if that was the
sand used, he would condemn it.

The history of the sand pit was
gone into. Mr. Bassano-Bert said
that the good strata had been
opened up shortly before the
school construction com-
menced. T. H. Johnson's house
was plastered on the outside
with it. Mr. Johnson, who was
present, said he did not know
where the sand came from but
he did know his house was quite
dry. Other contractors present
said the sand could not be used
because it contained dirt.

No Side Slopes.

Potter said there were no
slopes that he knew of
might be the appearance
on account of the exca-
vations that had subsequently
been made for the proposed
building tank.

Mr. Cox' report indicates that
building has no stability and
no capacity. Mr. Potter,
Dr. Kergin, "What is car-
rying the weight now?"

"I do not understand this
wall proposition advance-
Mr. Cox,"
"probably you don't," inter-
rupted Mr. Cox. "You did not un-
derstand the other."

Cox was here checked by

Dr. Kergin.

Reply to Potter.

In opening up his reply to Mr.
Potter's report, Mr. Cox said
that it was so misleading that
he would have to go into it
clause by clause.

"First, the brick was the brick
according to specifications?"

"No," replied Mr. Potter. "The
Seattle bricks specified were not
available and the contractor had
to obtain the best he could."

"This comprises a serious def-
ect," said Mr. Cox. "The bricks
used were not even first class
pressed bricks nor were they
vitrified pavers as the specifica-
tions called for.

Artificial Stone.

Regarding the artificial stone,
Mr. Cox said that it was ab-
solutely saturated when he saw
it. Mr. Potter said that he had
tested several samples during
construction and there had been
less than one percent absorption
in 48 hours.

"Did you see all the mixing,"
asked Mr. Cox.

"I will not say that Mr. Cox
is mistaken," replied Mr. Potter,
"but what I tested were alright."

Sand.

Mr. Cox said that the sand
used was full of mud and cement
would not assimilate. It was
not suitable sand.

"I was quite satisfied with the
sand," said Mr. Potter.

Mr. Bassano-Bert, who owns the
Conrad Street pit, said that the
sand was of good, yes excellent
quality. Other contractors had
said it was the finest sand that
could be obtained. The surface
contained some mud but the
lower strata from which this was
taken was very good. The sand
that had been delivered at the
school was only of the best quality
for Mr. Potter would accept
no other than the best. He had
seen practically every load of it.

There was a long discussion
about the sand in the course of
which a sample was produced.

Mr. Cox said that, if that was the
sand used, he would condemn it.

The history of the sand pit was
gone into. Mr. Bassano-Bert said
that the good strata had been
opened up shortly before the
school construction com-
menced. T. H. Johnson's house
was plastered on the outside
with it. Mr. Johnson, who was
present, said he did not know
where the sand came from but
he did know his house was quite
dry. Other contractors present
said the sand could not be used
because it contained dirt.

Usual Material.

Mr. Foster, who had worked

splendid opportunity to camouflage workmanship," said Mr. Cox, in referring to the rubble walls. Forms were used and stones of any size could be thrown in and facings put on the outside with cement. He maintained that the method of construction here was wrong for a public building and gave excellent opportunity for the covering up of sloppy work. He would not condemn them altogether at this time, however.

Mr. Bassano-Bert went at length into the use of such walls, referring to buildings in Europe built exclusively by this method. It had been first class material. Mr. Potter said that the form of construction used here was just about the right system for local rock.

Mr. Cox said it was not equal to concrete. The rocks themselves would not stand up and the form of construction was rotten.

Mr. Bassano-Bert referred to the DeLuxe Block which had been built in this manner. "Dances have been held there for three years. Do you think if it was no good that it would not have collapsed?"

Parapet Walls.

In regard to the parapet walls, Mr. Cox said he could show where it would have been possible to make a much better job under the cornices. There were irregular joints and longitudinal wood had been put in the brick work. The fire walls had an unequal bearing on brick and tile and were badly balanced. This constituted a very weak point.

Mr. Potter said he did not know anything about longitudinal wood being used.

Cracked Tiles.

Mr. Cox inquired why broken tiles had been used. They had become pinched and had slivered off. He had pushed his finger through the holes. Nine hole tiles specified had not been used. He would condemn six hole tiles as the building stood without pillars and beams. It made it nothing but a shill.

Mr. Potter said that the nine hole tiles could not be obtained so six hole were used. They had been ample for the purpose, however.

The question of laying the tiles on end instead of on their flat sides then came up. Dr. Kergin said that this was probably the crux of the whole matter and asked Mr. Parfitt for his opinion.

Mr. Parfitt said that workmanship had a great deal of bearing on the success of laying tiles on end. They were not laid on end for carrying weight unless they were filled with concrete. In a building of this nature he would say that they should have been laid flat especially because of local weather conditions.

California Contractor.

Mr. Valentine, a California contractor, who was called upon said that he had laid tiles in the vertical way on many buildings and it had been satisfactory. In the case of the school he would not say that it was necessary to fill them with concrete although the method of laying them on end needed careful workmanship and supervision. It would be impossible to get a perfect job in this manner if the tiles were saturated with water and frozen.

R. Bryson, court house construction superintendent, said that the vertical plan should not have been used in building the school. It should have been interlocking tile.

Mr. Potter said that metal clips had been used in holding the tiles.

Mr. Cox declared that the building was bulging in some places and the mortar was practically dust. When he scraped the joints the mortar had come out like porridge.

Mr. Potter said some defects were due to frost and wet, others to poor workmanship.

Usual Material.

Mr. Cox doubted if the building

was anchored in every direction as Mr. Potter stated. It

was a long discussion about the sand in the course of which a sample was produced.

Mr. Cox said that, if that was the sand used, he would condemn it.

The history of the sand pit was gone into. Mr. Bassano-Bert said that the good strata had been opened up shortly before the school construction commenced. T. H. Johnson's house was plastered on the outside with it. Mr. Johnson, who was present, said he did not know where the sand came from but he did know his house was quite dry. Other contractors present said the sand could not be used because it contained dirt.

Rubble aisle.

"I claim that there was a

on the tile and brick laying, was called upon. The materials used, Mr. Foster said, had been as good as ever used in Prince Rupert. Some of the mortar had become like wet sand on account of the frost during and after laying. He had put pointing on the fire walls to replace the facing which had become rotten. It had been used to cover up the old mortar. (Laughter.)

Answering a question put by Mr. McLennan, Mr. Foster denied that mortar which had been allowed to freeze in a pile outside the building was smashed up with a pick and used. The mortar had really been frozen after it had been laid.

Threw a Bomb.

Mr. Watts threw something of a bomb into the proceeding when he declared that during the laying he had seen the walls bulge and knocked back into place with a trowel and the work carried on from there. He had said to the workman: "For God's sake, Fred, quit," to which the reply had been given that orders were to go on. The bricks could be picked off.

Mr. Patmore asked Mr. Watts why, when he knew of this, he had not notified the board. If they had known of it, it would have been stopped.

Mr. Watts replied that it was not his duty to report to the board and was really none of his business to go over Mr. Potter who had told him, when he drew the matter to his attention, that it was a mere detail. The school board might have taken a look at the work once in a while themselves.

"Were you aware of this, Mr. Potter?" asked Mayor Rochester.

"When I was there, 3 or 4 hours a day, 4 or 5 days a week, the work was being carried on properly. Regarding Mr. Watts' statement when I saw such work being done I ordered it fixed. However, it would have been possible for the workmen to trim it and it would take a mighty clever man to keep his eyes all over the job at one time."

"You were responsible for the release of Col. McDermott," observed Mrs. Ling.

"Was the building built according to specifications," asked the mayor.

"With such modifications as I sanctioned," replied Mr. Potter.

"Looking back now," asked Mr. McLennan, "is it your opinion that the faulty mortar was caused by frost?"

"Yes. If I built another building of this kind it would be held in the months of June, July and August," said Mr. Potter.

"How would you account for the fact that, in some places, the mortar is quite hard and in others quite soft?" queried Mayor Rochester.

"I would assume that there was more concrete in some places than in others."

Mr. Potter then gave a history of the tile and brick laying. The work had commenced at the beginning of September and had continued until March with a shutdown during the cold weather around Christmas and in January.

Explosion Danger.

The question of explosion in the building through fire was then spoken of. Mr. Cox declaring that disasters of the greatest kind had occurred in buildings of this nature through the walls blowing out. If the concrete wall was put around there would not be the same danger as in a shell such as the school at present, was.

Floor joists were then discussed. This, Mr. Cox said, was a great factor in the safety of the building for deflection of joists had a tendency to weaken the walls.

Regarding the roof, Mr. Cox said that it looked to him as if temporary supports had been added after the roof had been put on.

Mr. Cox doubted if the building

was anchored in every direction as Mr. Potter stated. It

was a long discussion about the sand in the course of which a sample was produced.

Mr. Cox said that, if that was the sand used, he would condemn it.

The history of the sand pit was gone into. Mr. Bassano-Bert said that the good strata had been opened up shortly before the school construction commenced. T. H. Johnson's house was plastered on the outside with it. Mr. Johnson, who was present, said he did not know where the sand came from but he did know his house was quite dry. Other contractors present said the sand could not be used because it contained dirt.

should be alright if the walls were good.

Speaking of fire escapes, Mr. Cox made the assertion that the putting of fire escapes had been held over because it was feared that the walls would not have supported them and would have collapsed.

Mr. Patmore took objection to such an imputation against the board.

Fire Escapes.

Mayor Rochester—"Were the fire escapes ordered, Mr. Potter?"

Mr. Potter—"No, this was held in abeyance. At first the board had deemed them unnecessary and when instructions arrived from the council to install them I received orders from the board to get quotations. In the meantime the trouble arose, so nothing more was done."

Mayor Rochester—"Do you not remember, Mr. Potter, in the presence of City Treasurer Vance telling me that the fire escapes had been ordered four months ago? I would swear on oath that you said that."

Mr. Potter—"It was only in April or March of this year that the order was given to get quotations. I deny entirely the mayor's statement."

Mr. Vance said he did not remember the incident in question but he did know the fire escapes had never been ordered.

Mr. Cox said the walls along the corridors

MONEY INVESTED IN VICTORY BONDS can be made to earn larger interest by selling the bonds and investing in first mortgage on improved City property. And the mortgages are just as safe, although not so readily convertible into cash. Money invested in mortgages is, generally speaking, fixed for the term of the loans which run from 6 months to 5 years. Hence the larger rate of interest. Drop in and talk it over.

WILL RECOMMEND THAT BUILDING OPERATIONS BE CARRIED THROUGH

M. Parfitt Would Build Permanent One-Storey Building on McLaughlin Site.

M. Parfitt, the Victoria contractor, who came here to inspect the McLaughlin building site with a view to proceeding with operations already commenced there by the late W. B. McLaughlin, returned south on the Prince George last night. Mr. Parfitt made a careful examination of the site and local conditions and is now going to recommend to Mrs. Gray of California, sister of the deceased, that the structure be built but that the plans be changed to provide for a one-storey concrete building with pressed brick front divided into three store premises with plate glass windows.

The idea of having a second floor with apartments Mr. Parfitt would not recommend at this time, although he will probably suggest to Mrs. Gray that the building be such that the second floor may be added at a later date. The approximate cost of the building that Mr. Parfitt proposes will be \$90,000.
