## Pacific Price Cutting Likely to Cease APPEALS MADE BY MAYOR AND ALDERMEN TO VOTE FOR BYLAW

### EDITORIAL

PUBLIC LIBRARY.

Tomorrow the ratepayers of the city are being asked to vote for or against a proposal to establish a public library in the city. Already the committee has 2,000 books donated by the citizens gratis. What is needed now is the machinery to administer the library. The cost will be small and the benefit to the city large. We urge every property owner in the city to turn out and vote in favor of this bylaw. It is supported by all who are interested in the betterment of the community. The city has been slow in taking up the matter but now that the institution is started is the time to carry on. Vote yourself and take your friends to the polls with you.

### LLOYD GEORGE WILL RESUME

Will Ask for a Vote of Confidence on April 3, on His Return to Commons

LONDON, March 21.—Lloyd George will resume his place in the House of Commons on April 3, and will immediately ask for a vote on the Government's policy in regard to the Genoa Economic Conference. As the Chamberlain, Government leader in the House of Commons announced in the House this afternoon. He said the Government intended to put the motion clearly, raising the question as to whether it possesses the confidence of the House.

### GRAVE DANGER IN IRELAND

Little Needed to Start Actual Civil War Between North and South.

LONDON, March 21.—The dangerous situation in Ireland is emphasized in the morning papers, several of which take the view that little more is needed to start actual civil war there. Sniping between the entrenched forces on either side of the Ulster boundary has been going on for several days and yesterday machine guns reported to have been brought into action.

Ald. McLeod inquired at last night's council meeting as to what action the Utilities Committee was taking towards the adoption of the two platoon system in the fire hall. Members of the Utilities committee reported that conflicting reports on the matter had been made by the Fire Chief and the Board of Underwriters and these were being investigated. The proposed cut in the city salary scale had also a bearing on the question.

A letter written by J. G. Scott, owner of some coal leases in the Groundhog country on behalf of the B.C. Skeena Coal Company, Ltd., to D. W. Morrissey was read last night at the meeting of the council of the board of trade yesterday afternoon. Mr. Scott urged the development of the port and the desirability of securing good coal for bunkering rather than the lignite coal of Alaska or the inferior grades of bituminous coal.

Advertise in the Daily News.

### Rate War Hotter Yesterday but It Likely to be Settled

SAN FRANCISCO, March 21.—The marine freight rate war which started several days ago waxed hotter yesterday with new reductions, each company bidding against the other. Whether this will end in the formation of another Pacific pact or continue, is being decided today by the operators of the trans-Pacific steamers, who are here to attend a conference with United States Shipping Board representatives.

### FATHER OF LOCAL LADY HAS PASSED AT BELLA COOLA

Dr. W. Reinhard is Dead—Interment to Take Place at Vernon.

Dr. W. Reinhard, of Bella Coola, father of Mrs. W. I. Fulton, of this city has passed away. Dr. Reinhard was well known in the north and was formerly on the Queen Charlotte Islands. Mr. and Mrs. Fulton sail tonight by the Venture for Bella Coola and will go from there with the remains to Vernon where interment will be made.

### ATTEMPT WAS MADE AT LIFE CHINESE MINISTER TO FRANCE

PARIS, March 21.—An attempt was made today to assassinate Chen Lu, the Chinese minister to France. Four shots were fired at him by a Chinese youth but none took effect although the Chinese engineer, who was accompanying the minister, was wounded in the head. The assailant was arrested.

### PRINCE OF WALES ARRIVES CEYLON

COLOMBO, March 21.—The British battle cruiser Renown with the Prince of Wales aboard arrived here today.

### FISH ARRIVALS

Thirty five Thousand Pounds Halibut Marketed at Exchange This Morning.

Thirty five thousand pounds of halibut was marketed from seven boats at the Fish Exchange this morning. The weather is reported to be improving on the banks and some good catches may be coming in the course of a few days. Of late all boats arriving have had exceptionally light catches.

The following were today's arrivals and sales:

Reville, 6,500 pounds; Teddy J., 11,000 pounds, and Imperieuse, 6,000 pounds, sold to the Canadian Fish and Cold Storage Co., at 17.7c and 7c.

Pair of Jacks, 4,000 pounds, sold to the Canadian Fish and Cold Storage Co. at 18½ and 6.

Star, 2,000 pounds; Bringgold, 5,000 pounds, and Wolverine, 500 pounds, sold to the Sinclair Fisheries at 14½c, and 5c.

The letter of the Inter-Trade Organization of Canada suggesting the development and encouragement of Imperial trade was again laid on the table for a week by the city council last night. This is the fourth time that this letter has been dealt with.

### DEMONSTRATION CALCUTTA CITY

Little Disorder, However, Followed Sentence of Mahatma Ghandi.

CALCUTTA, March 21.—There was a demonstration here on Saturday following the sentence of Mahatma Ghandi, the non-co-operationist leader, to six years imprisonment without hard labor. A bonfire was made of foreign flags but, otherwise, the demonstration was orderly.

It is announced that the railway workers are going back to work at many places in satisfactory numbers. In many places the strike also continues.

### POWER RATES TO RAILROAD

Utilities Committee Recommends That C. N. R. Be Given Flat Rate of 4c and 1c.

A report from the utilities committee recommending that a new contract for the supplying of light and power be entered into between the city and the Canadian National Railways was presented at the council meeting last night and was laid over for a week. Under the scheme now proposed the railway company will receive its power in bulk from the city and will build its own connecting lines and put in all its own equipment for this line. In view of the consequent saving in overhead expenses and the increased consumption that will be needed by the company, it is recommended that a contract be made for the flat 4c to 1c rate.

In speaking to the report Ald. Perry said that the present consumption of the railway company was 90 kilowatts but with the station, new dock and possibly round house, 225 kilowatts would be needed. The company, up to the present, had been paying 10c and 7c for its light and power while others had been getting it on the 5.3 and 1.2c scale for light and 4c and 1c for power. The company was entitled to these rates. The company would do all its own installation and the city would get back eight transformers and there would be a large annual saving in overhead. In view of this it was recommended to give the company the flat 4c and 1c rate for all its consumption delivered wholesale.

General Reduction Discussed. Ald. Montgomery felt that the citizens should also get some benefit in reduction of rates. He had been waiting with interest for a report from the utilities committee on this matter.

A general discussion of the utility then took place between Ald. Montgomery and Ald. Perry, the

### PRINCESS MARY'S GORGEOUS WEDDING IN WESTMINSTER.

The wedding ceremony in Westminster Abbey, just as the bride and bridegroom were kneeling on the altar steps, while the Archbishop of Canterbury read the services.

former maintaining that some reductions in rates should be made and that the utilities should be operated on the basis of municipal light and power at cost. This was not being done now but the surplus of the light department was going to the relief of general revenue.

Ald. Perry said he concurred in the principle that the consumers of light and power should get the benefit of all profits in this manner. Ald. Gollart pointed out that general revenue had paid for some of the extensions so was entitled to share in the profits.

### CLOSE SEASON FOR SALMON

Six Hours to be Added if the Licenses Exceed a Certain Maximum.

VICTORIA, March 21.—According to an announcement made by Hon. W. J. Sloan, the close season for sockeye salmon in District 2, the section of the province contiguous to Prince Rupert, is as follows:

Nas River—Close season of 48 hours with the provision that if the gill-net licenses exceed 350 an additional six hours shall be added. The weekly close season last year was 42 hours.

Skeena River—The close season to be 48 hours and if there are 1100 gill-net licenses issued six hours will be added.

### FLU AT USK.

USK, March 21.—Almost everybody around Usk has suffered this winter from influenza or la grippe but there have been no very serious cases. The epidemic is now showing signs of ameliorating.

### MAYOR'S FINAL PLEA TO VOTE FOR RAILWAY BYLAW

Just a final work of admonition regarding G. T. P. Tax Bylaw upon which you will vote on Wednesday. All figures furnished you over my signature are absolutely correct, notwithstanding derogatory reports to the contrary.

The Railway will pay us annually approximately \$80,000.00 in taxes as follows:—On Railway lands alone a lump sum of \$45,000.00 general taxes; \$5,600.00 Local Improvement taxes; Leaseholds which last year amounted to \$8,900.00; and on Railway Development lands they will pay over \$21,000.00 taxes.

This later amount is computed on exactly the same basis as the smallest ratepayer. As you are aware, a certain percentage of the taxes collected from individual ratepayers must if necessarily be paid out again to furnish streets, light, water, telephone, and other necessities to the occupant, which reduces the revenue from such property to that extent; whereas, the \$45,000.00 from the Railway is absolutely clear and free from a "blow-back" of any kind. It is customary, and the municipal law permits a municipality to quote a lump sum for taxation to any railway company (but not to a private individual) in lieu of development work contemplated, and by which the city naturally benefits.

The Railway company is right now spending upwards of \$800,000.00 in the construction of a new salmon dock and railway depot, and we have assurance from the minister of railways at Ottawa, that more will be spent as improvements are required. Technically speaking, we are in the bush, and if we are going to get out, it must be through the assistance from the Railway Company; therefore, you would be well advised not to follow a policy that would undoubtedly prove antagonistic to the source from which we must look for help. We will accomplish more by friendly co-operation, and get somewhere,

but "bucking the tiger" will surely mean ruin. In proof of this statement Port Arthur and Pembroke, Ont., two of the most prosperous cities 25 years ago, are today still suffering from the effects of foolish legislation, and antagonizing the railway. Several real estate men are working hard to defeat this bylaw believing that should it be defeated and the railway carry its appeal to a higher court a substantial reduction in the assessment will be made, and thus enable them to appeal from next year's assessment. Why are they so anxious for a big reduction in assessment? Because it is hard to get property listed at a price less than the assessed value. But how about the welfare of the city as a whole? It matters not whether you pay 30 mills on a \$1000.00 assessment, or 50 mills on a \$600.00 assessment—you pay the same taxes in each case; but by lowering the assessment you endanger the city's credit and borrowing power which will very materially hamper future development work.

After mature consideration the majority of the city council believe this bylaw to be the proper solution of the problem, and we trust you will give the bylaw your whole-hearted support. Your interests are our interests, and vice versa, so VOTE FOR THE BYLAW.

### FLAT RATE FOR WATER VACANT LOTS PLANNED

Board of Works Brings in Recommendation to Cover Operating Deficit of Some \$5,000.

The Board of Works has recommended to the city council that a bylaw be prepared for the levy of \$2 a year on all vacant lots in the city facing on city water mains and service mains with the exception of those lots on the Shawatlans pipe line between Donald Street and Shawatlans Passage. The matter was discussed by the council in committee last night, was tabled for a week, and, in the meantime, referred to the city solicitor for advice on the legal aspect of it.

The most of the discussion came up in regard to the exemption of the lots between Shawatlans Passage and Donald Street. Ald. Silversides, Ald. McLeod and Ald. Kelly were of the opinion that such an exemption should not be made. Ald. Montgomery said that the entire matter should be fully considered for already the taxation on vacant property was high without this extra \$2 per lot being put on.

Ald. Kerr explained that there had been a deficit of some \$5,000 in the operation of the waterworks department last year and it was with a view to taking care of this that the flat rate was being proposed. With the adoption of this system the waterworks department would pay for itself.

Ald. Montgomery thought that the system of special levy to cover such a deficit was best. Ald. Gollart was of the opinion that a flat rate of \$2 might not seem so hard as further increasing an already high mill rate as would be necessary if special levy were made.

### ATTEMPT TO CHECK CRIME WAVE IN NEW YORK IS LAUNCHED

NEW YORK, March 21.—A fleet of 72 motor cars, each carrying half a dozen policemen, was launched by the police department yesterday in a further effort to check the crime wave. The fleet will be in service night and day.

### THREE BANDITS MADE CLEAN SWEEP CHICAGO PAWNSHOP YESTERDAY

CHICAGO, March 21.—Three bandits yesterday held up Marcus Nieman in his pawnshop here and escaped with virtually every bit of jewelry in it. The value placed on the goods stolen is between \$25,000 and \$30,000.

### U. S. AMBASSADOR

BERLIN, March 21.—Dr. Otto Ludwig Wiedfeldt has been appointed German ambassador to the United States.

J. Craig, Canadian National Railways building inspector, sailed for the south last night enroute to his headquarters in Winnipeg. Mr. Craig has been making an inspection of the station building here.

versa, so VOTE FOR THE BYLAW.

H. B. ROCHESTER, Mayor.

DAILY EDITION
Tuesdays, March 21, 1922

Alderman Dybhavn Has
Final Word on the Bylaw
to be Voted on Tomorrow

The following is the final appeal by the chairman of the
City Finance Committee in regard to the G. T. P. agreement and
bylaw:

Re G. T. P. Agreement and Bylaw, will you kindly allow me
space for the following: In this connection I think it essential
that the ratepayers review the conditions of today as they con-
front us. The Railway Company holds certain property in our
city; chiefly waterfront and strips of land adjoining the water-
front, and these properties are held for railway purposes gener-
ally. For civic purposes the
city has assessed these prop-
erties at about \$2,600,000.00;
the balance of the townsite rep-
resents a rateable assessment of
about \$6,000,000.00. This amount
includes the assessment on the
G. T. P. Development Co.'s
lands, Sections 3, 4, and 9 and
certain undivided parcels, to the
extent of about \$700,000.00. The
Development Co.'s properties are
in a different category from
those of the Railway Co., in that
they are held for speculative
purposes and the Development
Co. pays full taxes on their lands.
The whole affairs of the Railway
Co. are now in the hands of the
Dominion Government and is
being operated through the Cana-
dian National Railway System.
Last year this system had a de-
ficit of about seventy-million
dollars.

Work Hand in Hand

Would it not be good judg-
ment on our part to work hand
in hand as far as possible with
the Government in these mat-
ters? Remember that as citi-
zens of Canada we are now share
holders in this railway system,
and that as citizens of Prince
Rupert we will have to sit as
judges of our own destiny in
these matters. Vote for this ag-
reement to-morrow and in my
opinion you are doing your duty
to your city.

If we are to let a policy of nar-
rowmindedness dominate and
guide our actions in these mat-
ters, then I venture the opinion
that most of us will feel sorry
that we ever set our foot here.
We came here to take advantage
of great opportunities and I
firmly believe that there are bet-
ter things ahead for our city.
But as citizens we have responsi-
bilities in these matters.

Under a bylaw approved by the
ratepayers in 1919 the drydock
property has been exempt from
General Taxes. This proposed
agreement provides that the said
property, provided it is operated
continuously, shall be exempt
from taxes. Personally I feel

Change of Control

Since last December a new
Government had been in charge
of affairs, a Government which
we believe to be more friendly
toward this city and its prob-
lems than their predecessors in
office. We firmly believe that
conditions will change for the
better as far as this city is con-
cerned in relation to it being
the terminal of a trans-continen-
tal railway. About a month
ago we sent a strong delegation
to Ottawa to present our needs
and desires before the govern-
ment and although no final re-
port as to the ultimate results of
their mission is at hand as yet,
we have every reason to believe
that the government has given
our delegation all reasonable as-
surance of their intentions to
carry out the original principles
of the G.T.P. In view of the
enormous deficit last year, it is
hardly to be expected that the
new Government after about two
months in office can be prepared
to say as yet just to what extent
they are prepared to go. As rea-
sonable men and women we have
got to give the minister of rail-

LAST CALL---CONTEST CLOSES APRIL 1

It Costs
Nothing
To Try

25 Cash Prizes

Contest Open to Every Resident of British Columbia
Here's a Contest that will exercise the ingenuity and skill of every member
of the household, young or old, the whole family can work at it.

List Below

Contest Rules

1. Any man, woman or child living in British
Columbia who is not an employee or related to an
employee of The Vancouver Sun may submit an
answer. There is no entrance fee.
2. All answers must be received by mail and
postmarked by post office closing time, April 1,
1922.
3. Write date of words on one side of paper and
number all words (1, 2, 3, etc.). Write full name
and address on next page in the upper right-hand
corner. If you have anything else to write, use
separate sheet.
4. The answer having the largest and nearest
correct list of names of visible objects and articles
shown in the picture and in the list will be
awarded first prize, etc. Neatness, style or hand-
writing have no bearing on the decision of judges.
5. Contestants may co-operate in answering the
puzzle, but only one prize will be awarded to any
one household; nor will prizes be awarded to more
than one of any group of persons where two or
more have been working together.
6. If a contestant sends more than one list under
the name name, or assumed name, or a pre-arranged
name, over all lists of such contestant will be
disqualified. If more than one list is sent by any
group who have co-operated in the preparation of
such lists, then all lists of such contestant will
be disqualified.
7. Three independent judges, having no connec-
tion with The Sun, will judge the answers submit-
ted and award the prizes at the end of the con-
test, and contestants agree to accept the decision
of the judges as final and conclusive.
8. All answers will receive the same consideration
regardless of whether or not a subscriber for The
Sun is sent in.
9. The announcement of the prize winners and
the list of words will be printed at the close of
the contest and a copy mailed to each person
sending in a subscription to The Sun.
10. There is no pre-arranged answer and the
prizes will be awarded to those who, in the opinion
of the judges, have submitted the best answers.
11. You must complete against each other, not
against the manager of the contest. AND
THIS IS THE WAY TO WIN

How Many of the Listed Objects Can You Find in This Picture?

Where objects appear more than
once, one location only is necessary.
Make out list on separate sheet.

menting object and where found
in picture.
Don't expect to find all the objects
—list those you can find, that's all.

It looks simple but just start—you'll find a lot
of fun in it. Something new every time you look.

Wrongfully Collected

A person who wrongfully col-
lects money and does not refund
it is generally considered a
"crook" or a criminal. Last
year the city collected \$22,500.00
from the Railway Co. If the Rail-
way Co. had not paid these
monies the city could not have
collected it. The error occurred
on the part of the city and the
dry dock property was billed for
full taxes although partially
exempt. Knowing all the sur-
rounding circumstances as I do
I most unreservedly state that
it is a moral obligation on the
part of the city to refund this
amount, and not take advantage
of "sleek" methods as advocated
in certain unscrupulous quarters.

LIBERALITY.

An African was on trial in a
Southern court for an offense
against the dignity of the Com-
monwealth. The jury filed in
his honor asked for the verdict.
"We find the defendant guilty,"
the foreman replied, "and fix his
punishment at 35 years in the
penitentiary."

INCINERATOR TO BE BUILT

City to Take Steps to Secure
Suitable Plant—Site Not
Yet Selected.
A report from the Health Com-
mittee that an incinerator be
constructed in the city and that
steps be taken at once towards
securing the most suitable plant
was adopted by the city council
last evening.
In speaking to the report, Ald.
Kerr said that in view of the fact
that repairs to the present gar-
bage scow and wharf would prob-
ably cost between \$5,000 and
\$6,000 it had been deemed in the
best interests to proceed with

COULDN'T DO HOUSEWORK HEART WAS SO BAD

Many women get weak and run down
and unable to look after their household
duties owing to the heart action becoming
impaired or the nervous system unstrung.
Nature intended women to be strong,
healthy and happy instead of sick and
wretched. But how can a woman be
strong and healthy when day in and day
out she has to go through the same rou-
tine of work, sweeping, dusting, cooking,
washing, etc.? Is it any wonder that the
heart becomes affected and she gets irri-
table and nervous, has hot flashes, faint
and dizzy spells, smothering and sinking
spells and can't sleep at night?

LENIN WAS PUPIL OF ELDER KERENSKY

REVAL, Estonia, March 21.—
An interesting coincidence in the
lives of Nikolai Lenine, Premier
of Russia, and Alexander Keren-
sky, whose government Lenine
overthrew to set up the Soviet
regime, has just been brought to
light.
It appears from records just
published that Lenine was a
pupil in a high school at Sim-
birsk, Russia, of which Keren-
sky's father was principal and
that the elder Kerenksy reported
him to be one of his best pupils
and a gold-medal winner for
good conduct.
Simbirsk was the birth place,
and scene of the early life of
Lenine, whose real name was
Vladimir Oulanov and who was
the son of Ilija Nikolaievich
Oulanov, a citizen of Astrakhan,
the port near the mouth of the
Volga river.

The city engineer is to call for tenders for a list of supplies for the public works department store for three months following the decision of the council last week to buy supplies for this department in wholesale quantities in the future.    \*

A letter from D. McKenzie, managing secretary of the New Westminster Exhibition, asking that this city arrange to send an exhibit to the annual fair in the Royal city this fall, was referred to the city council to the Fair Committee last night with a recommendation for action on the matter.    \*

A report from the city engineer regarding the installing of catch basins in connection with the downtown street surfacing work was received by the council last night and referred to the Board of Works for an estimate on cost. The engineer reported that there were no engineering difficulties in connection with the catch basins but that it was all a matter of finance.    \*

Progress is being made in connection with Ald. Collart's motion regarding the limitation of the keeping of hens and pigs in the city. The city engineer last night brought in a report suggesting that a bylaw, similar to that in Vancouver, limiting the number to be kept in certain prescribed areas be introduced. The report is referred to the health committee until a copy of the Vancouver bylaw can be obtained for reference.    \*

The report of the fire chief for the months of January and February, as presented to the city council last evening, showed there had been 7 alarms in that time with a damage of \$4,545.35, the net loss being \$30. The cost of the department had been \$2,604.77. The purchase of a first aid kit for the fire hall was recommended. Ald. Montgomery criticized the usefulness of the Ford chemical truck saying that it was too slow for practical use. The Utilities Committee is to look into this.    \*

**K. P. CRIBBAGE.**  
In the Knights of Pythias cribbage tournament last evening, G. W. Johnstone beat C. C. Westaway and H. M. Daggott beat W. Burken. The draw for the semi-final is as follows: E. E. Wernig vs. H. M. Daggott; D. Wiggins vs. G. W. Johnstone or W. Blake.    \*

### In the Letter Box

#### OPPOSITION TO BY-LAW

Editor, Daily News.

From the meeting called by the Mayor last Saturday for the discussion of the G.T.P. bylaw one can gather that the most strenuous opposition to the said bylaw came from the real estate men of this city.

The fact is that the policy of the real estate men in this case is not so much to fight the reduction in the G.T.P. taxes but to secure through the G.T.P. threatened actions in the court the lowering of the assessment to the level of the market value of the lots in order to improve their chances of doing business.

When they write to property owners living out of town for listings giving the approximate value of the property, the property owner, in nine cases out of ten, answers that he will take the assessed value of his property, thus limiting the chances of doing business for the real estate man.

Mr. Gibbons as well as Mr. Stephens stated plainly that they wanted the G.T.P. to fight the fight of the whole city. They could have said also that seventy per cent of the property owners are not living in town.

#### General Interest

I believe the general interest of the community should take precedence over the interest of any particular section of this city and that is the reason I am supporting the by-law even if I would benefit also in my business by the lowering of the assessment.

On the other hand I must agree with Mr. Gibbons that this city should be run as a small and not as a big city, and I do hope that an honest and sincere effort will be made, by the present city council to cut down expenses to a minimum through a drastic reorganization of all the municipal services. Failing that a city manager would surely be the best thing for this city.

I would advise the rate payers to consider seriously, before voting, what is actuating the people who are fighting this bylaw, which, I believe, is the best way to arrive at an arrangement with the railway company without going to the Court.

ALD. COLLART.

### PRINCE GEORGE

The city council has fixed the millage rate for the year at 35 mills divided as follows: sinking fund and interest, 23; schools, 10; general purposes, 2. This is a decrease of 2 1/2 mills from last year.    \*

The striking loggers in the McArthur tie camps have asked for a board of arbitration.    \*

The body of Matt Hilton, a trapper, missing since last April, has been found four miles south of Aleza Lake, by Ed. Lamee. It is thought that he was overcome by cold weather when in a delirious condition. The provincial police are investigating.    \*

James Dunn, writing in "Farm and Home" declares that the district around Prince George for a fifty mile radius would support 250,000 population.    \*

Mayor Johnson gave a luncheon last week in honor of John Kendall, city auditor, who has been here for several days.    \*

The Gatto's curling cup has been won by Ogilvie's rink over Steacy's. The rinks were as follows: Ogilvie's—Ogilvie, Pidgion, Goring and Golder. Steacy's—Steacy, Atkins, Dupree and Burden.    \*

The Queen Charlotte Islands.

By Thomas Deasy

One would imagine, from the mass of correspondence passing between the chairman of the Overseas Settlement Board and Charles Harrison, that we are about to have another influx of "Pilgrim Fathers," or men of such ilk, in the thirty settlers proposing settlement on Graham Island, jutting out on the westernmost limits of the Dominion, where men and women will become "uncongenial and unfitted to earn a livelihood."

Some bright morning in the month of May we will look for the landing of a "junk" on the shores of Massett Inlet, from which men and women will emerge, prepared to dispense the Gospel, and worldly goods to the benighted natives of the "white" and "aboriginal tribes" in their lined cabins, scattered here and there, living on fish and codliver grease. A boy of doctors will accompany them, to bind up the scarp locks when the Indians are forced to remove them from their belts, and Canada will become a prosperous nation, with the prospect of outclassing the one hundred millions of "Americans" in the neighboring republic.

**Prospect Bright.**  
 The prospect certainly looks bright and we may look forward to the landing of the followers of Robin Hood from the green fields of Lincolnshire, with their "bows and arrows," prepared to bring us to a realization of all that goes towards making our islands a land of peace and plenty. It certainly looks good for those who have spent their lives with the "unso-phisticated wards of the British government." They will emerge into a world free from turmoil and strife, prepared to meet the "Pilgrim" is a spirit of friendliness, casting aside their superstitions and totem poles for the golden opportunities presented to become "commercialized."

Truly the residents of "Merrie England" must have a queer idea of the condition of the people on the Pacific Coast, according to the information gleaned from the column after column of correspondence with which they are straining their eyes and puzzling their brains. They take little thought of the sniping in Ireland or the holdups in England when they worry over the condition of things in this far away land.

**Natives and Savages.**  
 It might enlighten them some, and also those who live within a few miles of the islands, to understand that the original settlers of the continent landed on these shores and spread out over the mountains and prairies before the Pilgrim Fathers ever thought of sailing for America. Where they may look for war canoes and tribes of benighted savages, they will find towns peopled by natives who are able to hold their own with any other race in the civilized world. Their Christian churches are duplicates of some of the best in the old country and the most modern in build and equipment to be found on the Pacific Coast. Their schools are the best in the northern country, and each family is the possessor of a modern home, with a gasoline launch lying in front of each residence, fully equipped for producing a means of catching and shipping the food necessary for the markets of the world and for themselves. Crime is unknown, and the annals of the police will not show where one crime has been committed in the past twenty years. In fact, their

towns are free from debt and are governed by chief councillors and councillors, elected by ballot annually, and working under bylaws approved by the Dominion Government.

**Congenial Spirits.**  
 With reference to the so-called "uncongenial" spirit of those who have spent many years on the Queen Charlotte Islands it appears to me that the overcrowded cities of Europe and America produce many thousands of people who require the simple life in order to again become normal. No doubt people would leave the pavements and the slums if in a position to change their environment for something "uncongenial" in a land where Dame Nature provides health and happiness, far removed from the sights of men and women starving while the granaries are filled with food and profiteering is rampant.

Our giant spruce grows from the smallest of seeds. Towns and cities spring up from the clearing of the lonely settlers. Vancouver was "Gastown" in my early experience. Little specks of gold brought the early settlers to this province. Victoria was an outpost of Empire in my young days. The Queen Charlotte Islands are the Heligoland of the Pacific Coast, and will one day prove the barrier which will prevent the Asiatics from entering our portals, as a glance at the map of Canada will show. Japan is prepared to settle millions of her surplus population on these islands. We have natural wealth that must be developed, and it behooves us to produce the food and other natural products required by the world. We can not find the means of livelihood in the cities where men and women are walking the pavements crying for bread and for their children.

**Poor Policy.**  
 It is all very well to say that "isolation" and hard work will make men and women "uncongenial," as the chairman of the Overseas Settlement Committee states, but where does the food come from, and who will produce the necessities of life, if all remain in the cities and our fish and forest wealth neglected? The revenue from our forest and stream may now be spent in the building of automobile roads for the wealthy tourist, going from place to place, seeking that "congenial" atmosphere known only to those who exploit mankind, instead of taking off their coats and indulging in "manual labor." Let the government spend on these islands the billions produced in revenue from even one industry—the production of timber—and we would have everything the most optimistic requires. Building up cities at the expense of the country is a poor policy. People can not eat the bricks and stones in the skyscrapers of "modern" places, where jazz dancing and holdups are the order of the day.

**Wealth Is There.**  
 We have the land which will produce food. We have the sea, with its wealth of fish. We have mineral resources which require development. We have no starving millions crying for bread. Sixty-two years of experience in this country should be a criterion. With no axe to grind, and after pioneering in all portions of British Columbia, one is in a position to tell the prospective settler that it would be useless to take up a home on these islands without the necessary capital. It is no country for a man with only a "shoe-string." The prospective settlers

mentioned by the correspondents have each a supply of capital. So I am informed. Let them come to the islands. If they are not satisfied they will have sufficient funds to carry themselves away again. Others should visit the islands before making up their minds to become "uncongenial." A summer excursion, even from Prince Rupert, might enlighten many located there. Our "isolation" might be easily remedied, and will be when the knockers and axe grinders are all killed off.

UNIVERSITIES IN BRITAIN

President Klinek Tells of Evolution of Higher Education Across Seas.

What might have been entitled "the evolution of the university" but which was a report on the Congress of Universities at Oxford last year proved an interesting topic for President Klinek of the University of British Columbia at the Canadian Club luncheon yesterday, president Patmore in the chair.

President Klinek showed that the universities of the Empire were gradually changing their methods and outlook. Their view of what constituted education was undergoing modification. The attitude toward the classics, the sciences and professional and technical training was changing. While they refused to abandon for any student the teaching of Latin and higher mathematics, they were looking with greater favor on science and its adaptation technically. Science was now being discussed in its relation to life as a whole with the main end human welfare.

**Two Dangers**  
 There were two dangers in education. One was that abstract teaching should prevail at the expense of the concrete and the other that education should be too concrete. As a writer had said true education was the humanistic spirit as applied to utilitarian subjects.

In every university there were the generalists, the specialists and the nihilists, the last mentioned being those who want there to study as little as possible. It was the duty of the university to turn out all three, the nihilists as soon as possible.

**Introduced by President**  
 The speaker introduced by the president of the club who in presiding for the first time since his election to the position explained that the chief aim of the Canadian Club was to foster a spirit of patriotism and love of country by studying Canadian institutions. The universities, more than any other institution, fostered this spirit. Just as did Oxford and Cambridge in England, Harvard and Yale in America so the University of British Columbia fostered the spirit here.

President Klinek told of his visit to England to attend the conference of the universities of the empire. Such outstanding men as Curzon, Balfour and others had presided at the meetings and there were 35 addresses given on eleven subjects. The most important phase of the conference was the discussion on the relation of the university to secondary education. In the Old Country they had difficulties just as in this country. The universities demanded a good academic education with a grounding in Latin and mathematics in order to maintain their standing.

**Different Standards**  
 Unlike the systems in force in this country, he found in Britain different standards to meet different courses. They were making an honest attempt to get away from the deadening effect of the written examination and were basing their standings not only on it but also on the reports of the headmasters and the inspectors. The whole aim of the modern movement was to open up a few avenues of education. The question of the training of school teachers professionally was a new one and was taken

up with reluctance in the Old Country. In the past there had been no such thing as professional training. The older universities were not aware that there was such a thing. For centuries they had taught men and sent them forth without effort to fill them for their work. The professors therefore looked askance on the movement and only the urgent demand made them yield and take the matter up. Departments of education were organized and one fourth of the time was allotted to professional training for those preparing to become teachers.

There was at first bitter animosity against the introduction of scientific education and later against technological education but times changed and while the chief glory of some was still the ancient studies, natural science made a brilliant display and technical education was demanding as much time as was formerly devoted to the older studies. There was just a danger of devoting too much time to technical studies so that the student became cramped. Science in relation to life of the community as a whole with the main end of study human welfare was the ideal.

### Your Daughter

IS your daughter at that critical age, approaching womanhood, when nothing is so important to her as mother's care and mother's advice?

It is during this time that her whole future health and happiness may be at stake.

With most girls this important development takes place at a time when school work is most exacting and the nervous system is consequently under a most severe strain.

An enormous quantity of rich, red blood is necessary to meet the demands of the system, and, this failing, there is the development of anaemia, chlorosis or some form of nervous trouble, such as St. Vitus' dance.

Most mothers now know about Dr. Chase's Nerve Food and the promptness with which it enriches the blood and builds up the nervous system of the growing girl.

It is mother's duty to see that a reasonable amount of rest and sleep is obtained, that the food is wholesome and nutritious, and that the treatment is used regularly and persistently so as to keep up an abundant supply of pure, rich, nourishing blood.

Dr. Chase's Nerve Food 50 cents a box. All dealers, or Edmanson, Bates & Co., Ltd., Toronto. The portrait and signature of A. W. Chase, M.D., are on every box of the genuine.

### Sport Chat

Prince Rupert boxing fans are very interested in the Canadian welterweight championship bout at Vancouver last Friday evening between Frank Barrieau, of Vancouver, and Heino Schumann, of Denver, in which the former was given the decision in ten rounds. The meeting went the full time and neither boxer was hurt much although Barrieau had a little the better of it. During one of the intervals the fans stood with heads bared while Captain J. A. Fullerton, time keeper, tolled the bell ten times as a mark of respect to the late Johnny O'Leary who came to his death so tragically at Seattle recently.

Boxing bouts are being held regularly in the Country Club at Prince George where a regulation ring has been installed. A referee governing each bout and two judges, representing each newspaper in the town are used. The bouts last Friday night at Prince George were as follows: Dick Corliss vs. Harold Taft; Henry Bailey vs. Bill Graham; Bert Knight vs. Young Geal, Amelans vs. Bob Macdonald, Bert Hughes vs. Charles Houghtaling; Harry Anderson vs. Robert Porter.

The second of the big games between the Toronto St. Patricks and the Vancouver Millionaires for the Stanley Cup, emblematic of the world's hockey championship, will take place at Toronto tonight. The Vancouver team, which all of B. C. is supporting, is hoping to make such a decisive win in this contest that there will be no doubt of the outcome regardless of what the third game may bring forth. On the other hand, the Torontos believe that they have the stronger team and that they will be able to overcome and pass the one point lead that Vancouver now has as a result of the first game last Friday night. Several local fans were aggrieved that Vancouver could not have maintained on Friday night the three goal lead which she had at the end of the second period. All matches are being played in the Toronto arena and Cooper (meat), Toronto, is referee for the series.

### BOUT BETWEEN MISKE AND MADDEN IS OFF

ST. PAUL, March 21.—The proposed ten round bout between Billy Miske, of St. Paul, and Bartley Madden, of New York, light heavyweights, set for April has been called off.

To expect a single advertisement to pay is as foolish as to hope to grow fat from the effect of one meal.

### SERVICE FROM PRINCE RUPERT

Citizens of Stewart and Port Clements Complain of Steamship Service and Rates.

At the meeting of the council of the Board of Trade yesterday afternoon president C. H. Orme in the chair, two letters were read in regard to the steamship service and the rates charged, one from the Stewart Citizens' Association and the other from R. S. Thompson on behalf of some of the citizens of Port Clements. The latter enclosed letters which had been sent to Hon. T. D. Pattullo and Fred Stork and the general sentiment of these letters was endorsed and the writer will be informed that the Board of Trade will co-operate with them in every way possible.

In regard to the Stewart resolution, it was felt that the Board of Trade should have further information before taking action. There was also some objection to the wording of the resolution. The letter was accordingly handed over to the railway transportation committee with a view to securing the data required and they will report back to the council of the Board of Trade at its next meeting.

The resolution among other things asked that the Prince George and Prince Rupert make calls at both Anxox and Stewart every trip giving them a twice a week service during the summer. It asked for a further reduction of the passenger rate and a reduction on the freight rate.

### SORES SPREAD All Over FACES AND BODIES.

Mrs. Howard Houllette, Waslatenu, Sask., writes:—I wish to tell you of the benefit we have received by using your valuable medicine, Burdock Blood Bitters. My children started to break out on their faces with small white pimples which kept getting larger each day. Pus would form under the scales and they would come off, and each time the sores would be larger; some were as large as a twenty-five cent piece, and would spread all over their bodies. I was nearly in despair and sent to the village for a bottle of good blood medicine. The druggist sent me a bottle of Burdock Blood Bitters, which I commenced giving them at once. In about ten days I saw an improvement and they grew steadily better each day, and in one week the sores had all disappeared.

All blood and skin diseases are caused by hot blood, and to get it pure and keep it pure you must remove every trace of the impure and morbid matter from the system by a blood cleansing medicine such as BURDOCK BLOOD BITTERS a remedy that has been on the market for the past forty-five years, and one without an equal for all diseases and disorders of the blood.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

### UNIVERSITY AND PEOPLE

President Klinck of University of B.C. Tells of Work of That Institution.

The story of the work of the University of British Columbia, of its difficulties and its aims, as told by President Klinck at the public meeting last night in the Empress Theatre under the auspices of the Elks proved most interesting. The speaker told of the efforts to make the university serve the whole people of British Columbia. In addition to giving courses in arts and science, applied science and agriculture the university did work of non-university grade such as vocational training for wounded soldiers, teacher's summer school and courses in public health and nursing. Then there was the university extension work, the professors going out to outlying points of the province and delivering lectures.

President Klinck told of the difficulties under which they labored in carrying on the work in army huts and tents and underlying the lecture was a plea for the support of the community with a view to better housing of the institution. He said that the students complained more than the faculty of the present conditions. There were no playing fields and no opportunities for physical culture. Most of their money had been put into equipment and salaries so far. They had a loyal and enthusiastic staff and a rapidly growing student body which would be the nucleus for a fine institution.

### High Standard

The speaker told of the high standard demanded of the students, higher than at the universities of the East. In enrollment in science and arts they came second in the Dominion of Canada, exceeding the number of students either Queen's University or McGill. The students appreciated the high standard. The growth of the university had been very rapid, the number of students rising from 379 in 1915 to 1011 this year or including those taking short courses the number would be close to 1700. The enrollment showed that nearly one-third of the students came from points outside of Vancouver, 78 different points being represented. The university was serving the province as a whole.

It was the aim of the university to extend the work but they felt it was better to carry on along certain lines well than to extend themselves at the expense of the existing facilities. They hoped to add home economics, music and advanced science to the curriculum in the future.

### Home of Culture.

Pres. Klinck gave some intimate information in regard to university life and showed the efforts to keep the standards high and the institution useful to the whole province. They hoped to make it a home of culture, not exclusive, self-centered but a radiating centre. It was as not to be a place where truth was kept for the use of those who might come into close contact, but a place where discoveries are made and distributed inside and out. They wanted to make it an efficient servant of the people. While it was difficult to get money it was more difficult to get the right men for the work.

Dr. Grant presided and at the close thanked the speaker for his intensely interesting lecture. There was also on the platform M. Gonzales, Fred Roberge and Ralph LePine, all officers of the Elks.

### Ten Years Ago in Prince Rupert

Charles Halsey returned yesterday afternoon by the steamer Falcon from an electrifying trip to the Bella Coola district.

Pat Scott and Joe Bayley will meet at the Westholme Theatre in a bout for the lightweight championship of the Northwest. Nelson Dunn will be referee.

The Conservatives held a campaign smoker in the Empress Theatre last night. R. A. White was chairman and the speakers were: Ald. Douglas, Mayor Newton and O. H. Nelson.

### TAKING ACTION BOOTH SCHOOL

Fire Walls Will be Torn Down at Once and Lower Walls to be Dried Out.

Acting on a report from P. W. Grahame, station contractor, on the condition of the Booth Memorial School which set out the real cause of trouble there and recommended a process for the remedying of it, a definite course of action in regard to the matter was decided upon at a joint meeting of the School Board and the city council which was held yesterday afternoon in the council chamber.

The report presented by Mr. Grahame was as follows:

"After an inspection of the Booth Memorial School it is our opinion that the school has never been dried out, the walls being practically in a green (soft) state as when constructed.

"This has had some structural deteriorating effect but special efforts should be made to dry out the building when such defects will be apparent and may be remedied.

"We would recommend that the fire walls be rebuilt, also that the flashing and metal cornice should be reconstructed.

"Further it may be necessary to strap with lath and plaster the walls when dried out where they are defective.

"The whole trouble in a nutshell is that the building has not been dried out."

### Action Decided On

After some discussion of the report, the following resolution was moved by Ald. Perry, seconded by Dr. W. T. Kergin, and passed unanimously by the meeting:

"That, in view of the report by P. W. Grahame, it be decided to tear down the fire walls entirely and cover the top with cement or other waterproof material; reinforce the cornices with cement or waterproof so that no more water may leak in; when good weather comes operate the furnaces at the school day and night so as to dry out the walls; then have a competent local practical man examine the walls thoroughly to locate defects in them; wait until summer to take some definite action as to waterproofing the walls; until permanent repairs are made the city engineer or building inspectors make inspection of the school every few days so that its safety may be assured.

There were present at the meeting Mayor Rochester, Ald. Collart, Ald. Perry, Ald. Montgomery, Dr. W. T. Kergin, chairman of the school board, J. C. McLennan, City Solicitor T. B. Hooper and W. D. Vance, secretary of the school board.

Instructions have been given to J. W. Potter, architect, to have the work ordered in the resolution carried out.

### Adopted by Council.

The report of the joint committee was adopted by the council in regular session later in the evening. With it was received a report from the city engineer on the condition of the school and a letter from the secretary of the school board both of which are filed for future reference.

The report of the engineer expressed the opinion that some of the classrooms were unfit for occupation and were harmful to the health of the children, that the attempt made at waterproofing could not be satisfactory and that other means would have to be used for remedying the trouble, possibly at great expense, that the alternating dry and wet condition of the walls and the action of frost was bound to have an effect on the stability of the building, that the School Board should immediately get expert advice on the condition of the school with a view to making repairs and that, in the meantime, it should be closed until fitted for occupation.

Ald. McLeon, who had not attended the joint meeting, had some theories of his own to advance in regard to the matter. He said that the mortar throughout the building, in his opinion, was useless and that the veneer should be stripped and an examination made of what was inside the walls. The plastering inside the building was also not up to standard and even at the back of the radiators, where one would expect it to be dry and in good condition, it was soft and could be worked back and forth and into the bricks.

The mayor suggested that this

**PLAYER'S**

Greatest Value  
in the World

10 Cigarettes

might be due to the fact that the building had never been properly dried out as indicated by Mr. Grahame's report.

### No Danger of Collapse

Ald. Montgomery said he had always doubted the stability of the school, but up to the present, there had been no expert report to the effect that it was really unsafe. It seemed that nothing could be done until the building was dried out and there was no danger of collapse in the near future. The School Board was just as anxious as the council in the matter and had expressed its willingness to do everything in its power to work in harmony with the council. There might be real danger in a year's time but, in the meantime, the building should be allowed to dry out and then what method should be taken in making repairs would be ascertained. The engineer would practically be put on his own responsibility in the matter and should immediately give notice if there appeared to be any danger.

Mayor Rochester stated that the examining contractor had said he had known of cases of a similar nature where the mortar in a building had taken its final set months after the building had been erected. It would soon be ascertained if that was to be the case here.

Ald. Perry inquired as to the cost of the immediate work on the school and the mayor replied that he thought the estimate of \$7000 brought down by the school board for waterproofing would amply cover it.

### ST. PATRICK'S DANCE AT USK ON FRIDAY NIGHT BIG SUCCESS

USK, March 21.—There was a lively St. Patrick's Day dance held here on Friday evening under the auspices of the Usk School Board, the purpose being to raise funds towards the purchase of a new school site. The dance was enjoyed by all and was successful for \$65 was raised which will help considerably in covering the purchase price of the lot. The pies of every variety proved a feature of the refreshments and must have proved a delectable treat for the numerous bachelors and young men present judging from the way they hid for and bit into them.

The intelligent, shrewd attention which is given to selling should include advertising.
