# Adverse Report Consulting Architect GENOA CONFERENCE GETS DOWN TO RUSSIAN BUSINESS TODAY

## Building Expert Criticizes Booth School From Roof to Base and Declares it Unsafe

"I consider the school building in its present state is absolutely unsafe for occupation," said A. A. Cox, the Vancouver building expert, who has just completed a preliminary inspection of the Booth Memorial School, in reporting at a meeting of the school board held yesterday afternoon in the council chamber, to which the mayor and city council were invited. Trustee L. W. Patmore presided.

In the course of his report Mr. Cox said that he had spent some considerable time in examining the school building. He had made experiments with the various materials used in the construction. He claimed these were inferior in quality and that the workmanship had not been of the best.

The mortar used in the brick work had been mixed with sand of a poor quality which had not given the brick an initial set. Consequently the stability of the work had suffered. He thought that while undoubtedly the fact of so much rain being prevalent in the district had a detrimental effect on the actual setting of the mortar this fact was not wholly responsible for the defects. The mortar had been reduced to a large extent by the inferior sand used in mixing which did not assimilate the cement. It was further possible that the bricks when first used were saturated to the limit under which condition the initial set did not take place and the mortar became impoverished. The leaks at the top of the building made this matter worse, rendering the whole dangerous. In fact if this state of things were allowed to exist for another winter a serious happening might result.

**YOUTH FIRED  
JAIL AND WAS  
BURNED DEATH**

**MURRAYVILLE, April 22.**—John Penman, aged 17, the son of a well known Langley Prairie resident, was burned to death at 5 o'clock yesterday morning after having set fire to the jail. The young man had been arrested two hours earlier after a series of burglaries in Langley Prairie.

**SOVIET RUSSIA PAYS  
POLISH GOVERNMENT**

**Second Payment on Riga Peace  
Treaty of Last Year is Made.**

**WARSAW, April 22.**—Gold bars, diamonds and other precious stones valued at 10,000,000 gold rubles or approximately 85,000,000 have been received by the Polish government from Soviet Russia in lieu of rolling stock due Poland by virtue of the Riga peace treaty of 1921. This is the second installment, the first payment of gold and precious stones having been made last December. The shipment came in special cars convoyed by armed guards and upon its arrival in Warsaw the gold and stones were placed in vaults of the Polish government bank.

**EXPLOSION OF GAS  
TANK NEAR LOS  
ANGELES WOUNDS MANY**

**LOS ANGELES, April 22.**—Five deaths are reported today in hospitals at Downey and Artesia near here as the result of an explosion of a gasoline tank and a gasoline tank wagon. Scores of people are fighting fire in the gasoline filling station at Downey. Five others have been seriously injured and are in a critical condition.

## In Memoriam

A memorial day and service will be held on Sunday, April 23, under the auspices of the G. W. V. A. in honor of the men who fought. Memorial service will be held in the Westholme Theatre at 3 p.m. All ex-service men are requested to parade at the G. W. V. A. rooms at 2:45 p.m. The public are cordially invited.

(Continued on Page 4)

## G. G. McGEER SAYS MISTAKE WAS MADE

Asked concerning the report in an afternoon paper that he was to run as an independent candidate in the approaching by-election in Vancouver, G. G. McGeer, K.C., stated that a mistake had been made.

"I well know my political world here is very much interested in a long declaration by Lord Robert Cecil in which he says that the progress and stability of the country's life is in a middle course between revolutionaries and reactionaries. He says that a policy should be based on the League of Nations with its belief that force is no remedy. He would also condemn class war and considers the workers are entitled to a voice in the direction of industry with complete freedom."

## MANY SEE PICTURES PRESENTED BY CONAN DOYLE IN NEW YORK

**NEW YORK, April 22.**—Spirit pictures of women long since dead, conjured up through the assistance of mediums to sit for their photographs, shown by Sir Arthur Conan Doyle to his audience filled every seat in the Carnegie Hall last night.

## LENINE IS STILL AWAY FROM DUTY

**LONDON, April 22.**—Although official statements made by the Russian government report Premier Lenin's health satisfactory he still continues to keep away from State affairs, says a Reval despatch to the Times.

### Basement Not Strong.

The stone walls of the ground floor, forming the basement, in which the material used was local rock, was formed of poor material for carrying the load imposed upon it. In speaking of the tiles, Mr. Cox said that many of these were porous which did not permit of their proper setting. Parts of the walls were built during the winter weather and it may have been that the bricks and tiles were exposed to the elements in bulk, and the action of expansion and contraction was therefore affecting the walls. "This condition," said Mr. Cox "should not have been allowed." The water percolating down inside the cavities had caused damage to the plaster work. On some parts of the parapet the mortar resembled mush and one's finger could be pushed into it.

### Walls and Tiles.

In speaking on the walls Mr. Cox said the parapets were badly balanced and the cornices were insecurely entered, some of the walls resting on two unequal bearings. Hence if any load was taken the walls would lean over. The main corridor walls of the basement were in fairly good condition. The slabs in the ceiling of the basement showed on the face large pieces of local rock having been put into the mortar not giving it sufficient strength. The concrete carrying the front entrance vestibule was badly mixed and large rocks were evident. Mr. Cox said that, in inserting his arm in a hole in a slab of the cement, that sufficient sand came down to fill his sleeve.

The tiles used in construction appeared to be of different qualities and some had thicker edges than others. They were generally mixed and large rocks were evident. Mr. Cox said that, in inserting his arm in a hole in a slab of the cement, that sufficient sand came down to fill his sleeve.

Despite the \$500,000 outlay, the Granby officials are confident that the new plant will pay for itself definitely fixed for June 1.

## LORD CECIL ON ECONOMICS

Has Lengthy Declaration on British Situation—Freedom of Workers.

**LONDON, April 22.**—The political world here is very much interested in a long declaration by Lord Robert Cecil in which he says that the progress and stability of the country's life is in a middle course between revolutionaries and reactionaries. He says that a policy should be based on the League of Nations with its belief that force is no remedy. He would also condemn class war and consider the workers are entitled to a voice in the direction of industry with complete freedom.

## PRINCIPAL BRADY IS VICE-PRESIDENT OF TEACHER'S UNION

**VANCOUVER, April 22.**—J. G. Lester was re-elected president of the British Columbia Federation of Teachers at the final meeting of the convention here yesterday. J. G. Brady, principal of the Prince Rupert High School, was elected vice-president for Northern British Columbia.

N. M. McKilligan is secretary-treasurer and Harry Charlesworth, general secretary.

Principal Brady, who has been here during the week attending the convention, returned north on the steamer Chelohsin last night.

### FISH ARRIVALS.

The following fish boats sold this morning at the local exchange:

Omnimay, 40,000 pounds, sold to Sinclair Fisheries Ltd., at 5.50 and 3 cents.

Scandia, 65,000 pounds, sold to Sinclair Fisheries Ltd., at 6 and 3 cents.

## New Dam at Anyox Preliminary to Operation of Smelter And Mines by Hydro-Electric Plan

**VANCOUVER, April 22.**—The building of the \$350,000 dam by the Granby Consolidated Mining, Smelting and Power Co. is but the preliminary to a huge \$500,000 hydro-electric plant which the company plans installing at Anyox, announced Valentine Quinn, comptroller of the company, today. The hydro-electric plant will entirely eliminate the necessity for steam-generated power for the plant and smelter.

The dam, which is being built by the Dredging and Construction Co. Limited, will cost alone \$350,000. The contract calls for its completion by September 30 next. Construction of it will commence immediately that the short railway line is being built to it is completed.

The dam will be erected on an ideal location two and a half miles up Falls Creek from Anyox. It will be 630 feet long on the crest, 132 feet high from the bed of the stream and will impound 25,000 acre feet of water. Its construction will require 13,500 cubic yards of concrete, in which will be embedded over 200 tons of reinforcing steel. When the water is at the tip of the spillway the area flooded will be 450 acres.

**Continuous Operation.**

Hydrographic survey reports assure operation of the hydro-electric plant all the year around. Under present conditions, with only a small dam, the company could operate but five months on hydro-electric and the remaining seven on steam.

Despite the \$500,000 outlay, the Granby officials are confident that the new plant will pay for itself definitely fixed for June 1.

## PRINCE EDWARD SEEING JAPAN

One of Most Beautiful Trips Is That Through Inland Sea.

**TOKIO, April 22.**—The Prince of Wales said farewell to Tokio today. He is leaving for Yokohama on a special train via Jujihawa enroute to Enoshima and Kamakura.

**TOKIO, April 22.**—One of the most beautiful sights of the Far East, the trip through the Inland Sea, is reserved for Edward, Prince of Wales, on leaving here for Kobe to continue his tour of the empire as guest of the Japanese government.

The Inland Sea, so-called because it lies almost enclosed between Hondo, the main island of the Japanese Empire, and the southerly islands of Kyushu and Shikoku, is 240 miles long from east to west, and varies in breadth from eight to 30 miles. It is interspersed with numberless islets of various shapes and sizes while the coast is highly indented. Passengers journeying to and from Kobe by steamer are filled with wonder over the fascinating views which present themselves in ever changing variety.

One of the three beautiful scenes of Japan is the Sacred Island of Miyajima, thickly wooded with pine, cypress, cherry and maple trees.

### Sacred Spot.

According to tradition, Miyajima has been a sacred spot for more than 18 centuries. Until the restoration in 1868, births and deaths were forbidden on the island. Sacred deer still wander about, tame enough to feed from one's hand.

The Itsukushima Shrine, the principal shrine of the island, founded in 1644, is built on the beach, with a mountain rising straight up behind it. When the tide flows, the magnificent buildings are surrounded by the blue sea and look like air-castles floating upon the waves.

A favorite motive in Japanese art is the great red Torii, or "Sacred Shinto Gateway" which stands in the sea. This gateway is 45 feet in height and 75 feet in length at the top and consists of two great trunks of camphor wood. Other features of interest are the Senjokaku, "Hall of One Thousand Mats," built by Hideyoshi in 1587 and the Buddhist Temple gateway—the Ni-Omon, or Gate of the Two Kings, near the top of Mount Misen, the highest point on the island. From this peak one can enjoy a magnificent panorama of the Inland Sea. The long stretches of beach, and small pine-fringed inlets as well as the pine-clad islands and islets, apparently floating on the sea, have already acquired a world-wide renown.

Within two years, to say nothing of enabling the plant to compete to better advantage in the world's copper market against low prices. Preliminary to the actual construction of the dam, a start was made some weeks ago on a temporary railway from the wharf to the dam, at a cost of \$40,000. The dam is to be of the Eastwood multiple arch type as designed by John R. Eastwood of San Francisco.

The Dredging and Contracting Co. Limited, which will build the dam, is a newly organized Vancouver firm with offices at 904 Standard Bank Building.

## BALKAN WEDDING FIXED FOR JUNE 1

**BELGRADE, April 22.**—The marriage of King Alexander of Jugoslavia and Princess Marie, second daughter of the King and Queen of Roumania, has been

## Russian Proposition Not Accepted by Conference; France Doubtful Germany

**GENOA, April 22.**—The Allied sub-committee considering the reply to the note received from Russia has adopted unanimously the British suggestion that immediate de jure recognition not be granted Russia in return for the admission of Russian debts.

### Object German Reply.

The French delegation to the conference has submitted a protest against the German reply to the Allied note in which the Germans stated they would refrain from discussing Russian questions settled in the Russo-German treaty signed at Rapallo.

The French contend that under their reply, the Germans may still insist on discussing other questions regarding Russia.

George Tchitcherin, the Russian Soviet foreign minister, gave Italian Socialists and communists a shock today by meeting King Victor Emmanuel on the King's visit here and accepting His Majesty's invitation to luncheon on board the Italian dreadnaught, Conte di Cavour.

### Down to Business.

**GENOA, April 22.**—Actual work on a plan of reconstruction for Russia was started today by representatives of the Russian Soviet Government, Great Britain, France, Italy, Japan, Belgium, Czechoslovakia and Holland.

The heated politics surrounding Russian problems have been somewhat cooled by M. Tchitcherin's note accepting in the main the Allied formula stating terms on which the Great Powers are willing to resume business relations with Russia.

## ENGLISH GOLF PLAYERS WILL VISIT STATES

**Endeavor to Recover St. Andrew's Trophy Taken Last Year by Jock Hutchinson.**

**NEW YORK, April 22.**—Many golfing celebrities will make the trip from England to the United States this year if a tentative international program thus far drawn up may be taken as any indication. The successful invasion of Great Britain last year by the United States professionals resulted in the capture of the St. Andrew's most prized trophy by Jock Hutchinson of Chicago, and it is with the object in view of recovering it that the British have booked passage for the pick of their professional ranks in an effort to turn the tables.

Miss Stephens, domestic science teacher, returned from Vancouver this afternoon on the Princess Beatrice, having spent the Easter vacation in the south.

## Genoa Conference Restored to Order.

After the flurry of excitement coming like a bolt from the blue by the announcement of the Rapallo Treaty having been signed between Germany and Russia, the Genoa Economic Conference appears to be getting down to business once again. Affecting as it does the two nations whose destinies are possibly offering the greatest problem to the convention, it was not surprising that the "outlaw" pact should have offered a serious menace to the conduct of affairs in hand. France seems to have taken the treaty with more excitement than either England or Italy, and it was no doubt due to the cool management of Premier Lloyd George and Premier Facta that disaster to the conference at its very inception was averted. The Russian question is again before the delegates and, although despatches received early today did not seem to be very reassuring of a settlement, it is at least gratifying that the conference is now smoothly in progress.

## Rapallo Treaty May Be of Little Import.

It is true that such a pact as that entered into at Rapallo between Germany and Russia would have, under ordinary conditions, have presented a very strong combination, but it is also probable that conditions in these two nations being such as they really are, the treaty may be of little import. Russia is in no condition to carry out the terms of such a treaty without the sanction of the Allies, and Germany is little better off. Although the Allies are allowing the pact to stand in the meantime, they still have the power of controlling any actions under it and, after all, it may have little effect on any ultimate results and decisions that may be made at Genoa respecting Russia and Germany. A diplomatic coup, it is true, was attained, but it is not likely it will disturb the general European equilibrium to any great extent.

## The Situation in Ireland Today.

Killing and pillage is again going on in Ireland. The situation is now, if anything, more complex than it was before and is now not only a matter of Ulster against Southern Ireland but disagreement is also rife in the south between the Republican and Free State factions. The issue here is very clear and the two sides are distinctly separate. It is simply a battle between the moderates and the radicals as represented by the Free Staters and Republicans respectively. In fact the storm centre has shifted almost entirely to South Ireland between the two contending factions, while matters are by no means quiet between North and South. There is still the same old question: Is political sense and law or sentimental and sectional strife to prevail regardless of rules of majorities or any other recognized political standards?

## UNABLE TO LOCATE BROTHER OF STEWART TRAPPER WHO DIED

## Interesting Sidelight Given by Victoria Man on Late James Holden.

The provincial police have not yet been successful in locating the brother of the late James Holden, the Stewart trapper who perished in the wilderness last month. Orders to proceed to Bowser Lake and bury the remains have been sent to Constable J. P. Scarlett of Stewart, who will be accompanied by a guide and companion on the long trip, which will possibly take several weeks.

Some interesting light is thrown on the late James Holden by F. G. Winkler, 964 Byng Street, Oak Bay, Victoria.

"I was prospecting in the Port-land Canal country last summer," said Mr. Winkler to a Colonist reporter, "and the first week in September, with two others, made a trip into Tide Lake, which is about 36 miles from the head of the

canal. We had crossed Long Lake Glacier and were working down into the Valley of Tide Lake when we met Holden, who was on his way to Hyder, Alaska, for a new pair of long boots. Those he had on were nearly worn off his feet.

## Quarreled With Anderson.

"He said he had quarreled with his partner, Godfrey Anderson (who discovered Holden's body) and had decided to work separately; that he would camp about five miles from Anderson, and would probably see him once in a while. So that then, you see, he had made the decision which cost him his life. At that time he and Anderson were engaged in packing a ton of supplies on their backs in relays into Bowser Lake, and expected to get in by snowfall. The total distance covered in packing would total over 1000 miles, with heavy packs, through rough country, without trails, and with glaciers to cross."

"Holden was an intelligent man, of pleasant personality, but with limited experience in trapping."

O. M. McPherson, of Armstrong, B. C., is registered at the Prince Rupert Hotel.

## THE TORTURE OF INDIGESTION

## Thousands Made Miserable By This Trouble

## "FRUIT-A-TIVES" Relieves It

What is Indigestion and what causes it? As you know, solid food must be changed into a liquid by the stomach before it can be taken up as nourishment by the blood.

The stomach acts as a churn. It is covered by a strong, muscular coat and lined with a soft, delicate membrane which secretes the Gastric Juice which digests or dissolves solid food.

When food enters the stomach, the muscular coat squeezes and presses the food from end to end, or churns it, with the gastric juice to dissolve or digest it.

But—if the stomach muscles are weak—or if the dissolving fluid is poor or insufficient—then food cannot be digested properly and you have Indigestion.

"FRUIT-A-TIVES" is the most wonderful medicine in the world for strengthening the stomach muscles and providing an abundance of pure, full-strength dissolving fluid to completely digest every meal. "FRUIT-A-TIVES" does this because it keeps the kidneys active, the bowels regular and the blood pure, which insures pure Gastric Juice.

"FRUIT-A-TIVES" will correct your Indigestion or Dyspepsia and enable you to enjoy every meal. Try it.

## Ten Years Ago in Prince Rupert

The test piles for the dry dock are being driven and all preliminary work is practically finished for the actual work of constructing the landing stage, building platform and launching ways in connection with the mammoth plant. The contract with the government calls for the work to be completed within two years.

## The Man in the Moon SAYS:-

CLOTHES may not make the man, but they help the man to make his bluff sometimes.

LITTLE Miss Muffet  
Sat in a buffet  
Eating a sandwich of ham,  
When, strange to relate,  
She upset her plate,  
And little Miss Muffet  
Said D—

THIS is no weather for September Morn to be out in.

THEY never say "master" of the sea but always "mistress." This is always true of the matron sea.

THESE are the days when Pa is seeking in the rubbish pile for his last year's gardening pants, and Ma is endeavoring to hunt up his old shoes.

DON'T pity the man with the hoe. He's probably after bait.

THE shy lobster blushed when he saw the salad dressing.

GIVE an Irishman what he wants and you'll find he doesn't want it.

## MEATLESS BONES.

The other day a teacher asked her class if any of them knew what a skeleton was.

For a while the class was stumped. It was obvious that many of the tots knew what a skeleton was but lacked the words to describe it. Finally one youngster waved his hand eagerly and on being asked for his answer stated triumphantly: "A skeleton is a man without any meat on it."

## GREAT SUCCESS OF ELKS' BALL

Three Hundred and Fifty People Enjoyed Balloon Dance in Rink Last Night.

"One of the grandest dances ever held in town," in these words the Elks' Annual Easter Novelty Ball held in the Auditorium last night may be fitly described. The large attendance of 350 persons, the novel balloon decoration scheme and the quality of the refreshments served were the three outstanding features. The whole affair was a great success, taking its place in the long line of enjoyable achievements that have attended the social activities of the Brother Bells in Prince Rupert.

The large hall was decorated entirely with balloons. It was requested that these be not taken down by the guests until after supper. When that time came they were quickly seized to be kept as souvenirs of the happy occasion.

E. A. Wakefield acted as master of ceremonies and kept things moving in great style all the time. Music was provided by the Elks' Orchestra of six pieces, and it was about 2:30 when the last waltz was played. The committee in charge comprised Fred Gilhuly (convenor), Harry P. Lipsett, William Reid, William V. Knight, Herbert F. Glassey, Murdoch McLeod, Ralph Lepine and Ben F. Seif. Harry Lipsett and Ralph Lepine were on the door.

The general committee was also in charge of refreshments, which were of a high order and were served to many sittings in the balcony. W. Reid and W. W. Knight, attired in the regulation uniforms of chefs, were in charge. George Waddell presided over the refreshment serving on the floor.

## ST. GEORGE'S DAY TOMORROW

## All Englishmen Will Celebrate Birthday of Saint and Other Notable Events.

Next Sunday, April 23, is Saint George's Day. Saint George is the tutelary saint of England and special patron of chivalry. He was of Greek origin and Christian parentage, born at Lydda, Palestine, in the beautiful Vale of Sharon (famous for its roses) on April 23 A.D. 270. He held high military command under the Roman martyr Diocletian, during whose reign he died a Christian martyr at Nicomedia on the anniversary of his birth, Good Friday A.D. 303. He was buried at the place of his birth.

The same date, April 23, is the anniversary of the birth and death of William Shakespeare, the national poet of England and the greatest dramatist the world has produced.

He was born at Stratford-on-Avon in the year 1564 and died at the same place in 1616, being buried in the parish church of his birthplace.

## Naval Exploit.

The most successful naval exploit in the Great War was the attack on the German submarine base at Zeebrugge on St. George's Day, 1918, which was carried out by officers and men of the famous Dover Patrol.

The local Sons of England will celebrate the occasion fittingly.

## ST. ANDREW'S CLUB LOOKING FOR HOME

## Committee Given Power to Act on Matter—Building Is Proposed.

The St. Andrew's Society held its regular monthly meeting last night in St. Andrew's Hall, special business being to discuss the matter of moving to new quarters. The report of the committee which was appointed by the executive last Monday to find a new location for headquarters was received, but nothing definite was decided upon. The committee was given power to act by the general meeting and now has full authority to go ahead and secure other quarters. This committee comprises S. D. Macdonald, D. G. Tuart, T. McClymont, G. Scott and J. McKechnie. The St. Andrew's Society has to vacate the present quarters in the near future. Unless a suitable rented location can be found the society will in all probability make provision to build a home of its own.

## SPECIAL STUDY TOUR THROUGH EUROPE IN COMING SUMMER

To send a healthy, intelligent boy on a well-organized conducted tour through Europe is to give him a delightful experience which he will never forget and a cultural treat for which he must always be grateful.

The Jules Home Travel Agencies, who have had twenty-two successful years of experience in arranging tours, are responsible for a special study-tour for boys through Europe this summer, which will be under the personal supervision of Mr. T. H. Matthews, M.A. (Oxon), assistant professor of Mathematics, McGill University. In addition, experienced guides will conduct excursions and lecture on the artistic, historical, literary and economic significance of the sights seen and the towns visited.

This tour will commence from Montreal and Quebec by magnificient White Star Line S. S. "Canopic," Saturday, June 24th, and the following places will be visited: Liverpool, Chester, Stratford-on-Avon, Oxford, London, Paris, Versailles, Fontainebleau, Rheims, Lyons, Marsailles, Cannes, Nice, Monaco, Nettuno, Genoa, Pisa, Rome, Naples, Sorrento, Capri, Pompeii, Vesuvius, Florence, Venice, Trent, Innsbruck, Munich, The Passion Play, at Oberammergau, Nuremberg, Mayence, the Rhine, Cologne, Brussels, Louvain, Ostend, etc. Returning, the party will leave Liverpool, August 19th, on the White Star Line's fine new steamship "Regina," arriving Quebec and Montreal, August 26, after a wonderful tour of two months, in which ample opportunities have been afforded the party of seeing all the usual travellers shrines and enjoying many less frequented places of beauty and especial interest, and which are far too numerous to mention, and for which object many motor trips have been arranged.

Early registration is desirable as accommodations are assigned in the order applications are received. For further particulars as to reservations, rates, etc., apply to any agent of the Canadian National Railways.

Ye Olde English Concert, Empress Theatre, May 2. Artists in costume of Georgian period. In aid of the Boy Scouts.

God. C. W. Peck, V.C., was among the guests registered this week at Riverside Inn, Lake Cowichan, Vancouver Island.

Notice to member L. O. L.

2310. All members are requested to attend Church Parade (S.O.E.) on Sunday 23rd. Assemble at K. P. Hall at 6:45 p.m.

Miss Caroline Mitchell, of this city, is one of the members of the committee of the Provincial Normal School annual ball which will be held in Vancouver next Friday evening.

The fishery patrol steamers Givepchin and Malaspino have been sent to the West Coast of Vancouver Island to keep an especial lookout for suspected Japanese poachers.

Under the auspices of the High School Literary, J. W. Bengough will give an entertainment of Cartoons, Caricatures, etc. in the Empress Theatre, Monday and Tuesday, 8:15 p.m.

Mrs. F. E. Daniels, who has been visiting here with Mrs. L. P. Wright, left on the Princess Mary yesterday for a trip to Skagway and returned to Vancouver for the benefit of her health.

Miss Osbert McPherson, of Brooks, Alberta, successor to Miss Georgia Hall on the Borden Street school teaching staff, arrived yesterday by the Princess Mary to take up her duties next Monday.

Mr. and Mrs. Jack Wynne left the city on the Princess Mary yesterday for the Stikine River. Mr. Wynne is employed in the Canadian Customs Service and will spend the summer in the north.

The Canadian Pacific steamer Princess Beatrice, in port today from Vancouver, is skippered by Captain Bennett who is taking the place for fortnight of Captain Thomson who is Victoria to be married.

George A. Daak, representative of the La Salle Extension University, who has been in the city for the last few days, left for Ketchikan on the Princess Mary yesterday. He will return to Prince Rupert in about two months' time.

An order was issued in the Vancouver Supreme Court on Wednesday that the sum of \$2,000 paid into court by Fred Stork, M.P., last January, when petition for recount was made, be returned. Following the recount the petition was abandoned and application for withdrawal was made some time ago. A. C. DesBrisay represented Mr. Stork at Vancouver.

## ECZEMA

You are not experimenting when you use Dr. Chase's Own Eczema Irritation. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Own Eczema Irritation free if you mention this paper and send stamp for postage 6c a box; all dealers or Edmaston's Bates & Co., United, Toronto.

### PIMPLES ON FACE DIDN'T LIKE TO GO OUT

Those nasty little pimples that break out on the face and other parts of the body are simply indications that the blood is out of order and requires purifying.

There is only one way to get rid of this obnoxious skin trouble, and that is by giving the blood a thorough cleansing which can best be done by that old reliable blood medicine.

#### BURDOCK BLOOD BITTERS

and when the blood is purified the pimples will vanish and you will have a clear, healthy complexion.

Miss Mary E. Flanagan, R. R. No. 3, Stella, Ont., writes:—"I suffered for about two years with pimples and blotches breaking out on my face. The doctor said it was caused by bad blood. My face was so bad that I didn't like to go out among a crowd of people. One day I was talking to a friend, and she advised me to get a bottle of Burdock Blood Bitters and try it. I just took three bottles, and there was not a blotch or pimple of any kind left. Some of my friends asked me what I had used and I said, 'Burdoch Blood Bitters chased them!'"

B. B. B. has been on the market for the past 45 years, so you are not experimenting with some new and untried remedy.

Put up only by The T. Miller Co., Limited, Toronto, Ont.

Cash for Victory Bonds. Thos. McGlynn.

Georgé Sweet leaves this afternoon on the Princess Beatrice for Vancouver.

Frank Brochu, of the Seaview Department Store, returned from Vancouver yesterday on the Princess Mary.

Rebekah's Whist Drive and Dance in the Metropole Hall Monday, April 23 at 8:15 p.m. sharp. Admission 50c.

J. P. Kirkpatrick, Canadian National Railway superintendent from Smithers was in town yesterday and returned to the interior last evening in his special car attached to the time freight.

The new Canadian five cent piece was shown in town today. The coin is certainly an improvement over the old coin. A portrait of the King is on one side, while the words and figure "five cents" appear on the other side, with two maple leaves at the base of the coin.

BUILDING EXPERT CRITICIZES  
BOOTH SCHOOL FROM ROOF  
TO BASE AND DECLARES  
IT UNSAFE.

(Continued from Page one).

ally of a very porous nature and highly absorbent. Considerable seepage water was found in various parts of the basement, and he considered it desirable that a seepage water drain should be constructed to carry off the water around the building.

## Only a Thin Shell.

In speaking of the general scheme of construction Mr. Cox said that this was a most important item to be considered. The structure as it stood today was merely a thin shell, and was absolutely dangerous unless reinforced. The scheme of construction adopted was the hollow tile system. Built vertically as a general rule for small buildings it gave satisfaction, but for a building of this class it was customary to have beams of reinforced concrete, the tiles being used as walls and partitions. Mr. Cox considered that if a reinforced steel skeleton construction had been adopted it would have proved satisfactory.

The fact remained that only a mere shell existed and unless reinforced a great risk would be run. He considered that considerable reinforcing should be made to the present walls, floors and partitions. The timbers supporting the floors were unsatisfactory and were not safe to carry a load of persons in active movement. The roof rafters had bellied out and were consequently pushing the walls outwards.

The stairways were of fairly good construction but required reinforcing with timbers as under present conditions they were unsatisfactory where traffic was great. The flashings and metal cornices were leaking, and the faulty nature of the roof was the cause of so much water getting inside. He advocated the remodelling of the cornices, and constructing water spouts to take the rain water away thus preventing the wind from driving the rain against the walls.

## Where Attention Needed.

Speaking of the items that needed attention Mr. Cox said the walls should be reinforced and properly anchored. Floor joists of the main floor should be fixed. Stairways should be overhauled and reinforced. Walls and partitions of assembly rooms should be reinforced, being at the present time only mere shells. Support of canopy at main entrance should be made secure. There should also be re-arranging of the anchorage for the machinery in the working room. He said that parts of the walls should be taken down and rebuilt with proper materials and efficient workmanship. The cornices all around the building needed rebuilding. The structure should be shored up from the basement to the roof and the walls thoroughly examined. The outside walls needed to be covered with waterproof cement, enamelled face bricks, or cement stucco, the last mentioned being the cheapest form of covering.

Mr. Cox said that he understood provision had been made for fire escapes but he did not consider that the walls at the present time were strong enough to support the iron stairways, he suggested that the repair work should be undertaken piecemeal because it might be that in some parts of the construction the mortar was set better than in others.

## About Foundation.

Alderman Theo. Goillard asked Mr. Cox if the foundation of the school was good, saying that as far as he knew it was built on sloping rocks which might cause the foundations to slide. In re-

plying Mr. Cox said that he had never seen a building before where the tiles were built on edge. It was claimed that when tiles are set vertically they stand greater compression, "but" said Mr. Cox, "when you has compression and nothing to support it you are better without the compression." He had not had time to thoroughly examine the foundation but the rocks should certainly have been made flat to receive the foundation otherwise liable to slip at any time.

Alderman Kelly said that Mr. Cox had in a few days found the main faults of the structure which he (Ald. Kelly) had known to exist for some time. The sand used in the building of the Booth school had been refused for a particular foundation in the city. He thought that Mr. Cox should be asked to go further into the matter.

Mr. Cox said that while he was anxious to return south he wanted to see the school put into shape. To do this it would take all the dry weather throughout the summer. When he came to examine the building he was particularly anxious not to see anybody for always liked to see a building for himself and look for the weak spots in it. He always preferred to get his information direct from the building he was to examine.

**Regarding Rebuilding.** A general discussion took place as to the employing of Mr. Cox to draw up plans and specifications to give an idea of what the cost would be to put the building in proper shape. Mr. Cox advised that it would be necessary to have a contractor on the work who would be on the job all the time under the supervision of the City Engineer. Mr. Whittaker.

Mayor Rochester said that he had been out with Mr. Cox and the city engineer several times to look the building over and knowing a little bit about construction work he was certainly in support of the suggestion of Trustee Patmore to have Mr. Cox stay longer and draw up plans and specifications necessary to carry out the work and give them an idea of what the cost of repair would be.

Alderman Montgomery was in favor of ascertaining what the cost would be and what work was necessary. When the estimate came in they would then be in a position to judge whether to repair the old school or build a new one.

## Only One Thing to Do.

Trustee Patmore said they had engaged an expert who was satisfactory to the School Board and the City Council. Having heard his report there was only one thing to do and that was to act upon it.

Trustee McMeekin thought that Dr. Kergin, who was absent, should be given an opportunity to read Mr. Cox's report. It was pointed out by Mayor Rochester that Mr. Cox was anxious to return south to attend to other important matters. Mr. Cox explained that in order to draw up plans and specifications it would be necessary for him to study

## CORRECT IMPRESSION.

Editor Daily News:

In a letter addressed to The Daily News re summer-time, the following statements are contained therein: "And when such conditions are permitted to continue, proof is furnished of the failure of democracy and the hypocrisy of those who preach it." The writer hastens to assure The Daily News and its editor that the reference was made solely to certain politicians and political writers who preach democracy for a purpose. A perusal of the editorial columns of The Daily News for the past two years clearly seeing.

## FINE PICTURE

"Saturday Night," Being Present-  
ed at Westholme Tonight,  
Worth Seeing.

One of the finest pictures seen here in many a day is Cecil B. DeMille's Paramount production of "Saturday Night," which packed the Westholme Theatre last night and will be repeated tonight. The story is one of exceptional appeal and the action throughout is as rapid as it is thrilling. The leading roles are in the capable hands of such players as Leatrice Joy, Conrad Nagel, Edith Roberts and Jack Mower. The picture is well worth seeing.

## Waterfront Whiffs

Doings of the Mosquito Fleet Which Is the Chief Source of Prince Rupert's Prosperity

The Admiral of the Mosquito Fleet reports that with the inclement weather prevailing during the week the fish arrivals have consequently been on the light side. The big schooners which generally bring in large quotas of the fish have not put into port lately. However some 253,800 pounds of fish have been marketed through the local fish houses, and thirteen carloads of fish had been shipped to the eastern market up to Thursday. The lowest prices prevailed on Saturday last when the Helge land and the Liberty sold 100,000 pounds of fish between them at 5 and 3 cents. The best price was paid on Tuesday when two carloads of fish sold for 10.00 cents and 3 cents.

The weather clerk was certainly very generous with his allowance of sunshine on Good Friday and Easter Day. The majority of the fishermen who were fortunate enough to be in port took advantage of the lovely weather and transformed their trusty boats into "joy riders" for the benefit of their families and friends, forgetting for a day that such a business as fishing existed. Several happy picnic parties left Cow Bay early in the morning while others went out after lunch on both Friday and Sunday last. Salt Lakes and Digby Island seemed to be the favored destinations.

It is reported that a number of sea lions have been sighted on the "high spots" recently. These fish destroyers have become quite a menace around the Queen Charlotte Islands and the west coast of Vancouver Island, so much so in fact that the Dominion Fisheries Department are taking steps to wage war upon them. Machine guns and rifles will be put into action against these marauders. The large hair seals are natives of the Pacific ocean and though related to the fur seals, their coat is not valuable. The largest specimens inhabit the North Pacific and reach a length of some 12 feet. The sealion of the Pacific coast of South America is smaller and has lengthened hair on the neck forming a slight mane.

In view of the foregoing report Flossie Flirt is equipping her new pleasure yacht Olympic with a high power telescopic fire command automatic machine gun, which will be capable of shooting around corners. One of her crew, who was a member of the underground artillery during the war, will be made chief gunner that is when the skipper is not aboard. The gun will be placed in an armor plated turret, plated with Arment's meat tins of course. The Cow Bay Amazon says that it may be possible to get a few otter too on the sea lion hunt but if not she "otter get" something worth while with the new gun; excuse the pun.

The W. R. Love electrical supply shop, situated on the shores of Cow Bay, has been moved back some seven feet to permit of the new roadway being widened out. Jack Prescott and J. E. Jack were the contractors. The work was skillfully carried out and no interference with business was made during the operations.

Capt. Jud Thurber and his men returned to port during the week after a 12 day trip aboard the Mayflower. Cap reports that everything went off fine with the exception of the weather which was D gusty. The wind blew so hard on the return trip that it blew all the color out of Jud's hair to say nothing of his whiskers. However, alls well that ends well, and a bottle of Bill Shrubshall's Oolachan hair oil soon put the color on again.

Launch Oh Baby, Capt. Myhill-Jones, was the busiest boat around Cow Bay over the Easter period. Gangs of happy pleasure seekers were taken to Salt Lakes and adjoining points.

The St. Eloi, skippered by Robert Goodlad, took to the high seas on Thursday on her first voyage since her misfortune in wrecking near Minktrap Bay on October 27 last. It was at this

words were inspired during a storm while Flossie was at the helm:

The Captain cried out to the deaf and dumb doctor, "Don't speak to the man at the wheel."

The chickens refused to lay eggs in the hatchway.

And all of us wanted a meal. The Cook cried "for eggs oh now what shall we do?" The Skipper commanded the ship to lay too,

The Engineer cried, "it's all up with the boat,

The engine wants oiling and so does my throat,"

"Yo ho" he cried, "Yo ho," As he sat on the fires down below.

The Viola, Captain Charlie Strachan, made port on Tuesday and reports a good trip, other than the weather annoyed some.

The Hanago, Captain Charlie Malone, is tied up in Cow Bay having completed her halibut hunting stunts. It is reported that Cap is going to clean her up prior to taking on some repair work around the pipe line in the vicinity of the Gold Storage.

The Provincial Government launch Myfawny is undergoing minor repairs at the hands of Constable Saint.

The power yacht Cuprum, owned by the Whalen Pulp and Paper Company, arrived in port on Thursday morning from Swanson Bay with Captain Harrison and Mr. Nash, company accountant aboard. The Cuprum returned to Swanson Bay yesterday.

The Soya, Captain Frank Armstrong, which is undergoing an overhaul at Cow Bay, will be on a logging expedition as soon as the work is completed.

E. Rosang's new combination halibut and salmon boat was launched on Monday from the Shockley ways, and is now in Cow Bay undergoing finishing touches.

The Caygeon, Captain Jim Morrison, arrived in port on Tuesday and reports encountering the worst kind of weather on the return trip. Cap says that winds may come and winds may blow but the wind he struck was the worst yet. However no particular damage to craft or gear resulted.

Cries of "man overboard" in the vicinity of the Albert & McCaffery dock on Thursday morning set everyone on the jump and a gallant rush was made for the waterside by would be rescuers.

The victim was one of the workers around the lumber scow who could not get wet enough on shore and just to show no ill feeling for the halibut waters of the bay took a header into the salt chuck.

The crane man was on the job however and soon had the hauling chains dangling over the swimmer's head. To this he clung and was hauled on to terra firma none the worse for his experience.

Following is a beautiful nautical poem composed by Miss Flirt while out on the deep blue sea on her recent fishing trip. The

ping-pong nets, on which a time limit has been set for May 15. After this date, should the contractor have failed to complete the contract, a heavy fine will be imposed, but it will only be imposed.

The following boats are at present in port: Narbethong, Birdie B. Dixie, Rupert, Glen, Erin, Soya, Victor, Edwin, Odin, Gray, Roy W., Laura E., Annie May, Kohe, Annie, Red, Viola, Mab, Mink, Progress, Peggy, Ethel June, Gladys B., Eleanor Mac, Flattery, Mayflower, Hanaco, Clara, Minnie V., Knox, Billy Boy, W. & F. Annie Tuck of Vancouver and the National of Sitka.

The launch Vera F. Fry is being overhauled in Cow Bay at the hands of her owner M. M. Stephens. She will be put in first class shape for the forthcoming season.

The launch has commodious cabin space and is an ideal sport trip boat. She measures 40 ft. long x 11-ft. beam and is fitted with a 4-cylinder Palmer engine capable of giving her from 8 to 10 knots per hour.

The following boats marketed fish during the week: Happy Brothers, Lenore, Laning, Lincoln, Roald Amundsen, Mimie V., B. W. & T., Fram, Annie May, Hanaco, Ethel June, W. & F., Mayflower, Plop, Mab, Flora, Margaret, Dolphin II, Tyee, Pair of Jacks, Caygeon, Kinmount and National.

A slow load of lumber arrived during the week from Vancouver for Albert & McCaffery. This lumber is for local consumption.

Captain John Iverson of the Pair of Jacks, who returned to port this week, reports having struck some real bad weather while out on the high spots. The gale was the roughest he has been out in for years, and the wind blew with such strength that it took the pattern off the wallpaper in Cap's stateroom.

**PRETTY POULTRY.**

She—I wonder why they put cornmeal on the floor when they dance?

He—Oh, that's to make the chickens feel at home.—The Leatherneck.

### SEASONABLE SERVICE

We are equipped to serve you at any season of the year, but we can render you a special service at this particular season. Washable rugs, heavy blankets, dainty lace curtains—all the unusual washing which every housewife feels compelled to do at this season, can be safely entrusted to us for laundering. We have special machinery for either wet or dry cleaning, and will return anything entrusted to us fresh and clean as new.

We also offer a carpet cleaning service which has given general satisfaction to our patrons.

Let us relieve you of this heavier work of housecleaning.

A phone call will put you in touch with this labor-saving service.
