Dockers Strike at Liverpool is Tying up Shipping: Critical Situation is Indicated There

LONDON, July 18.—The development today in Liverpool of a serious phase of the dockers' strike is interfering with trans-Atlantic shipping from here and stopping traffic out of the Mersey. This comes as a setback to the hopes of peace that had been aroused as a result of the transport union men having decided to call a conference of strikers in London from all ports involved.

A critical situation is indicated by the decision of London cartage contractors that, unless the men return to work immediately, steps must be taken to safeguard London's food supply. Prices of fruits and vegetables are soaring while bananas are rotting in the holds of ships in the harbor.

It is estimated that 30,000 men are on strike.

TRADE WAR IS FEARED

New York World Suggests What Might Happen if Pulp Wood Embargo Becomes Effective

NEW YORK, July 18.—"A war of trade reprisals" between Canada and the United States is predicted by the New York World if the pulp wood embargo authorized by the Canadian government is put into force. The World declares that such an embargo will close many mills along the border and transfer another big fraction of the paper industry to Canada raising prices for paper to the war time standard. Retaliatory measures, the World suggests, could start with coal, oil and sulphur and other necessary supplies for Canadian mills and extend beyond. Both sides would be hurt and ill will would be engendered all around.

Mysterious Shooting of Woman at Salmon Arm an Unknown Assailant

(Special to Daily News)
 KAMLOOPS, July 17.—As a result of a mysterious affair that took place at the farm of Thomas W. Hall, four miles from Salmon Arm yesterday afternoon, Mrs. Hall lies in the Royal Inland Hospital here in a critical condition with a bullet lodged in her brain. Doctors probed for the bullet last night but were obliged to discontinue on account of severe hemorrhages.

Early yesterday afternoon Mrs. Hall was working with a seventeen year old Barnardo boy in the farm garden when she was stunned by a blow on the head. The lad helped her to the house and she sank to the floor.

It is understood he left her to seek aid and while he was away, the woman discovered the house to be on fire. She tried to get out of the door but was driven back by the flames, her head being slightly burned. She managed to escape from the burning house through a window.

Mrs. Hall's husband and the lad found her afterward near the house and took her to Salmon Arm where Dr. Burnett dressed her face.

On examination of the back of the woman's head the doctor found a hole and was puzzled at its origin. He brought her to Kamloops on the late train and at the offices of Doctors Irving, Murphy and Willoughby, her head was X-rayed and the bullet was located in the brain.

Following the probing Mrs. Hall was taken to the hospital and is in a very serious condition.

The whole affair is still a mystery and provincial police are investigating the Barnardo boy who was with the woman at the time she was hit by the bullet but he appears to know nothing about the cause of the wound. He arrived from the Old Country a few weeks ago.

WEALTHIEST MEN IN WORLD NAMED

Henry Ford is First and John D. Rockefeller Second, London Express Says

LONDON, July 18.—Who are the ten richest men in the world? asks the Sunday Express. It answers the query itself by giving a list at the head of which is Henry Ford, whose fortune it estimates at \$500,000,000. John D. Rockefeller comes next with \$450,000,000; Andrew W. Mellon, secretary of the treasury, is third with \$450,000,000, and then follow the Duke of Westminster, Sir Basil Zaharoff, Hugo Stinnes, Percy Rockefeller, Baron H. Mitsui, Baron H. Iwasaki and the Gaekwar of Baroda, each with \$400,000,000.

James B. Duke, the tobacco king; George F. Baker, of the First National Bank of New York, and T. B. Walker, the Minneapolis timber landowner, the Express says, might be added to the list, since they all have fortunes estimated at \$100,000,000, while there are at least three other Indian rulers whose fortunes probably exceed this amount.

The Rothschilds, Guggenheims, Vanderbills, Weyerhousers, and the Astors, says the writer, do not appear because theirs are family fortunes. The Rothschild wealth has been estimated at from \$250,000,000 to \$500,000,000 and that of Astors at from \$100,000,000 to \$500,000,000.

Richest Man Ever

Henry Ford is possibly the richest man in all history, the paper declares. He has a net business income of more than \$100,000,000 a year. He earns \$250 every minute. Croesus may have been richer, since his famous gift to Delphi cost \$10,000,000, and that, reduced to today's terms, might mean \$200,000,000.

John D. Rockefeller gave away \$500,000,000 to charity and to foundations before 1921. He is the head, however, of the biggest group of wealthy men ever produced by a single industry, and his private fortune must still rank him second.

Mystery Man

Sir Basil Zaharoff is Europe's mystery man, but it is no mystery that he is one of Europe's wealthiest men. He owns more than half of Monte Carlo, and his holdings in armament firms are even larger. He is in oil, finance, shipping; in fact, it is difficult to say what he is not interested in.

The Mitsuis and the Iwasakis are financiers, traders, and shippers. The Gaekwar of Baroda's wealth is almost impossible to estimate, but his diamonds alone are valued at \$1,250,000, and he has a jewelled tapestry worth \$1,500,000. Guns of gold weighing 400 pounds stand at his palace gate.
