We are continually trying new methods of administration in the hope that better conditions will follow. Then when the changes are made we find there is little difference in conditions. Schooner Bowdoin has returned from the Arctic after being away fifteen months. She went to undertake scientific work but what it is best known to the public for is a fact that it was by amateur wireless that it kept in touch with the outside world. It was a Prince Rupert amateur who first got in touch with the vessel after she reached her winter quarters and kept in touch for months. Later messages were exchanged with other points. For that reason we take a particular interest in the vessel and it was in this paper that Prince Rupert people read of her return from the northwestern coast of Greenland.

THE Cunard-Canadian Route to Europe is absolutely unique in one respect - Montreal is the only "ocean port" in the world situated 900 miles from the sea, while Quebec is about 750 miles inland.

Both ports are used by the Cunard Line steamers. The magnificent oil-burning 20,000-ton ships, "CARMANIA" and "CARONIA" sail from Quebec to Queenstown and Liverpool - the popular "A" ships, "ANDANIA," "ANTONIA" and "AUSONIA" from Montreal to Plymouth, Cherbourg and London.

Cunard appointments, cuisine and service make your trip to Europe one of uninterrupted enjoyment, that will ever hold a treasured place in your memory of life's pleasures. And you are assured this, whether you travel Cabin or Third Class. For rates and sailing dates, see the Cunard Agent in your town, or write to
