LIQUOR DISAPPEARS IN TRANSIT TO YUKON

EFFORT BEING MADE BY LEAGUE OF NATIONS TO PREVENT WAR IN FUTURE

Large Illicit Liquor Shipment Discovered on Arrival at Dawson

Was Hidden Among Fruit and Potatoes: Government Consignment 90 Cases Short: Empty Bottles Found

DAWSON, Oct. 1.—Territorial Secretary and Treasurer Malby last night seized 118 cases of fruit and potatoes consigned to Dave Godin from Vancouver which were found to contain in all 633 bottles of Scotch whiskey and rum, all of which were seized.

Several crates were reported missing and from others the liquid contents had, it was stated, been removed during transit. Godin denies any knowledge of the shipment.

A shipment of liquors for the territorial government from Vancouver was 90 cases short and many of the cases arriving here are said to show evidence of having been tampered with. Empty bottles have been found in some cases, officials state.

PRINCE LEAVES ALBERTA TODAY

Will Visit Jasper, Vancouver and Victoria and Return to Ranch for Two Days

HIGH RIVER, Alta., Oct. 1.—The Prince of Wales leaves tonight at 8 o'clock for the West. He will spend several hours at Jasper Park, one day at Vancouver and another day in Victoria. His itinerary calls for reaching Vancouver on Saturday. The Prince will return to his ranch here about October 9 for two days leaving for the East on October 11.

ALEXANDER MACKAY WAS BURIED TODAY

Funeral of Halibut Fisherman Took Place This Afternoon, Rev. Dr. H. R. Grant Officiating

Under the auspices of the Deep Sea Fishermen's Union, the funeral took place this afternoon at 2 o'clock of the late Alexander MacKay who died at the end of the week. Rev. Dr. H. R. Grant officiated and, after a service in the chapel of the R.C. undertakers, interment took place in Fairview Cemetery. The pallbearers were Robert Hanna, James Leask, Leon Sandvar, Robert Marsh, J. P. Reid, and Jack Christiansen.

Those sending floral tributes included Mr. and Mrs. D. McLeod and family, Deep Sea Fishermen's Union, Fishermen's Club, Mr. and Mrs. George Davis and Capt. Billy Beak, Mr. and Mrs. McKenzie, Miss Bella McKenzie, N. McDonald, James McLeod, Angus McVoy, George McAuley, D. McAuley, Ewan McAuley and Mr. and Mrs. D. Glenzie.

VANCOUVER MAJORITY REDUCED ON RECOUNT OF BEER PLEBISCITE

VANCOUVER, Oct. 1.—As a result of the recount of the vote in the city of Vancouver on the beer plebiscite the majority in favor of beer has been reduced from 3 to 18.

FORT YUKON IS DESTROYED

Residence and Mission Building Go up in Flames: Hospital is Saved

DAWSON, Oct. 1.—The residence and mission buildings at Fort Yukon with their contents including winter supplies and clothing were destroyed by fire caused by defective wiring, according to information brought here by the steamer Yukon. The hospital building adjoining was saved.

RATE REVISION ON RAILWAYS

Hon. Dr. King Suggests That They Are all Obsolete and Should be Changed

Hon. Dr. King, Federal Minister of Public Works, is not far astray when he says that the whole structure of Canadian railway freight rates is obsolete, says an Edmonton paper. The present schedules were built up under conditions which have radically altered and complete reconstruction on a different basis will be necessary before justice is done to shippers everywhere and to shipping companies.

The cost of operating the railways has gone up since the Crows Nest agreement was framed, and will probably never again sink to that level. The ports on the Pacific have become outlets for prairie products and inlets for prairie imports, because of the construction of the Panama Canal. The railways say they cannot afford to apply the Crows Nest rates everywhere. But people living in one part of the country cannot afford to pay higher rates than are paid by people living in another part for the same service rendered under comparable conditions as to cost.

Discrimination will have to be eliminated in respect to commodity rates from eastern points to prairie centres. The movement of goods to and from Pacific ports will have to be put on a parity with the cost to and from eastern ports. The railways declare that these changes cannot be brought about by the simple expedient of rate-slashing without wrecking railway revenues and securities—and they are probably right. The present agitation for the general application of the Crows Nest rates is very probably only the beginning of the re-making of rate schedules. There must, almost certainly, come sooner or later a complete recalculation of the scales of transportation charges based upon present conditions and regardless alike of precedents and outlived conventions.

NEW TELEPHONE DIRECTORY

A new Telephone Directory is about to be printed. All persons desiring any change or additions to service, listings or new service, please notify Telephone Department in writing not later than October 8. 233

PENNSYLVANIA FLOODS

PHILADELPHIA, Oct. 1.—Eight deaths and heavy property damage is reported due to flood conditions in eastern Pennsylvania.

Here are shown King George and Queen Elizabeth, the exiled monarchs of Greece, pictured in their apartments shortly after their arrival in London. They are to spend several months visiting in England

Protocol Before League of Nations Prohibits War and Makes for Pacific Settlement

GENEVA, Oct. 1.—The amended draft of the protocol on arbitration and security was presented to the assembly of the League of Nations today for approval, accompanied by a general report historical and analytical in regard to the future. Special chapters are devoted to condemnation of aggressive war and compulsory jurisdiction of a world court of justice, strengthening of pacific methods of procedure, domestic jurisdiction of states, sanctions of reductions of armaments.

The report concludes: "Our purpose was to make war impossible. The plan drawn up leaves no loophole. It prohibits war of every description and lays down the rule that all disputes shall be settled by pacific means."

SHIRLEY TRIAL IS TO BE HERE

Was to Have Taken Place at Prince George but Change of Venue Ordered

VANCOUVER, Oct. 1.—Venue for the trial of the case of Robert Sidener, a Francois lake farmer against Sheriff John Shirley of Prince Rupert was fixed for the latter city by Mr. Justice Morrison yesterday. The action had been set down for the assizes at Prince George on November 26.

SEATTLE TEAM OFF TO BOSTON

Will be Only American Hockey Team in Eastern Canadian League This Season

BOSTON, Oct. 1.—The Seattle team of the Pacific Coast Hockey League will play here during the forthcoming season under the presidency of Charles F. A. Adams who will be the only United States member of the National Hockey League which includes teams from Ottawa, Toronto, Hamilton and Montreal.

MAJOR ZANNI AT SHANGHAI

SHANGHAI, Oct. 1.—Major Zanni, the Argentinean round-the-world aviator, arrived here today from Foo Chow. He landed his plane in the outskirts of the city at a point where the hostilities of the war will not interfere with him. Zanni's next hop will be across the China Sea to Kagoshima in Japan.

WILL NOT RESIGN

VANCOUVER, Oct. 1.—The defeat of the provincial secretary in the North Okanagan by-election held during the Premier's absence is not regarded by John Oliver as an even warranting the Government's resignation.

Finding of the Railway Board Will be Appealed Says Premier J. Oliver

Criticism That Too Much Time Occupied in Legal Quibbling; Not Functioning Well

VANCOUVER, Oct. 1.—No matter which way the railway board adjudicates upon the recent hearing of complaints against discriminations arising from the restoration of the Crows Nest Pass agreement schedule of freight rates there will be an appeal. This is the conviction expressed by Premier Oliver, who returned from Ottawa this morning.

"Certainly if British Columbia is not granted the rate she is asking, we shall appeal to the Governor General in Council," he said.

CUSTOMS COLLECTIONS SEPTEMBER \$26,056.26

Lack of Development Work Going on in District Responsible for Decrease from Last Year

Customs collections for the port of Prince Rupert for the month of September totalled \$26,056.26 as compared with \$37,015.23 in the same month last year. The main reason for the figures being lower this year is that there is little development in progress and little new machinery is being imported. It is stated that customs collections are lighter at almost all points in the Dominion this year.

PORT ESSINGTON MAN RETURNS FROM VIST ST. JOHN NEWFOUNDLAND

H. W. Morry Says Poor Fishing Year in Colony and Cost of Living High

H. W. Morry of Port Essington arrived from the south on the Prince George this afternoon after visiting his old home in Newfoundland accompanied by Mrs. Morry. The latter is at present in Victoria visiting but expects to return some time this month.

Mr. Morry, who is an employee of the B.C. Packers at Essington was naturally interested in the fishing business in Newfoundland. He says they have had a poor year. Living there is expensive, meat and woollen goods especially seemed high.

The service of the Canadian National appealed very strongly to Mr. Morry who said he was treated with every courtesy and enjoyed the trip both ways very much.

12,000 LOSE JOBS

SAARBRUCKEN. — Twelve thousand workmen are added to the unemployed of the Saar state by the announcement of the Roehling Iron & Steel Works closing down the plant. A deficit of 25,000,000 marks was shown on the last balance sheet, since which time the works have been kept running by state subsidies.

PRISONER'S FUND LOW

DUBLIN.—In a recent address Eamonn de Valera stated that the fund for the assistance of the dependents of prisoners put in jail by the Free State had received \$275,000 from America and \$125,000 from other sources. At present, he said, the fund has only \$100.

SUCCESSOR TO BROWNE SOUGHT

Burnaby Council Will Replace Labor Member Elected as Municipal Accountant

VANCOUVER, Oct. 1.—The Burnaby Council at Edmonds instructed the clerk to advertise for a successor to Frank A. Browne, M.L.A., elect, as municipal accountant. The action followed the protests of several labor union bodies protesting at the council's refusing Browne leave of absence to attend the session of the Legislature.

MESSAGE FROM KING GEORGE

Admiral Field Complimented on Success of Empire Cruise of Special Squadron

LONDON, Oct. 1.—The King sent a message to Rear Admiral Field congratulating the commander of the special squadron on the conclusion of the Empire cruise. The message says: "You have proved yourselves worthy representatives of the British navy and maintained its best traditions in distant lands." It concludes with thanks for the great service rendered the Empire.

Field has been advanced from rear-admiral to vice-admiral of the fleet.

BIRTH RATE DECLINING

Bureau of Statistics Reports a Steady Dropping off in Canada Since 1921

OTTAWA, Oct. 1.—According to the Bureau of Statistics, the Canadian birth rate has steadily declined since 1921. The rate during March of that year was 28 per thousand of population. This March it was 22.2.

DAILY EDITION

Wednesday, Oct. 1, 1924.

Demand Bulkley Valley Beef.

As soon as it is available Prince Rupert residents should insist on getting from their butchers Bulkley Valley beef. The farmers want to sell their beef and it is of excellent quality. The people here like Bulkley beef as has been evidenced on many occasions. The best action they can now take is to make sure that they are getting the beef that has been grown in the neighboring valleys. If their butchers do not have it, insistence will make them sell it. "Bulkley beef only" during the autumn will solve the farmers' problem of marketing.

Co-operation Must Be Real.

It is very nice to talk co-operation with the farmers of the interior but now comes the test. Will people here really co-operate? Are they sufficiently interested in the district to make themselves a factor in the marketing situation. They can do it easily.

The success of Prince Rupert depends very largely on the success of the farmers of the interior. We stand to benefit by their success. The least we can do is to help them to succeed. The matter lies very largely in the hands of the women of the city. If they make it quite clear that they want the home grown beef, they will get it.

Local dealers have promised to co-operate and to take as many Bulkley beeves as possible. If the people here ask for that beef and will take no other it will be easier for the local dealers to make good on their promise.

Woman Question Again To Fore.

The question of the eligibility of women to take part in public affairs is again to the fore. The Anglican General Synod has by a majority vote denied them admission on an equality with men. An attempt was also made in Prince Rupert by a very small minority to exclude them from the luncheon to be tendered to Premier Mackenzie King. Apparently it is not yet recognized that women are citizens entitled to all the privileges of citizenship. When the Prime Minister of the Dominion comes here and is honored by being entertained at a public function it would be a matter of disrespect to him and to a large section of the community to exclude women from that event.

Must Register To Vote At Election.

Those who wish to vote at the next municipal election for mayor and aldermen must register during the present month unless they are registered property owners in the city. The fact that they pay a trade license does not exempt them. They must go in person and sign the form at the office of the city clerk.

Every year the same story is heard. "I did not register." Then the person who has so neglected hemoans the fact.

Just now it is impossible to say who will be a candidate for municipal honors. There may be a number of new names on the list and it is just possible that citizens may be much interested in the campaign when it comes on. At any rate it costs nothing but a little effort to get on the voters' list and this is the time to do it.

Railway To Meet Vancouver Rates.

It is satisfactory to know that the Canadian National Railway will meet through this port the rates on export flour through Vancouver. The milling companies found some handicap in doing business this way and do not seem to have inquired for a special export rate through Prince Rupert. At any rate they wrote a local firm that they could give a better rate through Vancouver.

It is clear that as the local railway is managed from Vancouver there is not much help to be expected from them in securing shipments this way. It will largely lie with local initiative to get the business started.

The Man in the Moon SAYS--

ONE way to raise money with which to construct the highway from here to Terrace would be for the city to conduct a sweep-stake on the chances of its being built.

IF they make paper out of straw they may possibly use their old newspapers as fodder for the cattle. That would be putting the newspapers to some useful purpose.

BIG heads and little minds are often part of one and the same person.

HIGH priced goods are often the cheapest, but who wants a cheap wife?

TWO of the latest colors are "midnight blue" and "morning after."

IF the Prince comes to Prince Rupert, he'll have to sell that old panama and buy a hat.

"Prince Rupert will soon be a large city?" Let me think awhile. Where did I hear that once or twice before?

PUBLICATION OF VERSES IS SOMETIMES DELAYED

Only Makers of Newspaper Know Why Things are Sometimes Left Out or Held Over

Sometimes there are delays in publication of news and this applies particularly to anything of the nature of the verses in a competition. If the verses do not appear on the day following their arrival it does not mean that they will be left out. Only the makers of a newspaper are aware of the reasons for delay or for things being omitted altogether. They know only too well and often regret having to keep things back. Following are a few of the verses received to date in the verse competition:

Polly's Lamb Polly had a little lamb 'Twas just as cute as it could be, It wandered away to the meadows one day Where it romped so merrily.

A wolf chanced by, The little lamb did spy, 'Tis a sad, sad tale to tell, The little lamb very soon disappeared And went--Oh! Reader, why do you ask, "Well! well!" The wolf he knows, as he winked his eye, The lamb has gone to the sweet bye and bye.

Ode To Our Forefathers

One day I went to Stanley Park Zoo, To see if what they had told me was true. A monkey sat with a mirror in hand, And powder puff, saying, "Isn't this grand?" "I'm like women in the things I do!" Said I, "The Darwin theory is true."

Tragic

There once was a halibut gay, Who said, "In the depths I shall stay."

But some succulent bait, I am grieved to relate Held a hook. (He's bound eastward today.)

The bee is a wonderful thing, Honey to you it will bring, But don't get too nigh, Just look at Dad's eye-- It has a most beautiful sting.

The Blue Jay "Compensations," do you say? "Though clouds burst Rupert way?"

Yes; storms from our blue Dash out all gloom of hue. In the rain, watch the Blue-jay-- Royal Rupert's bit of blue!

The verse must have to do with some form of animal life such as a bird, fish, animal, insect or germ. It may take any form desired such as an ode, a quatrain or even the popular limerick. Three prizes will be offered. \$5 for first, \$3 for second and \$2 for third.

The verses will be published as submitted but the name of the author will be reserved to be used only in case of his winning a prize.

The verse should be neatly

written on one side of the paper might spurt, made it a draw 3-3 only and addressed to "Competition Editor," Daily News. No manuscripts will be returned.

Ten Years Ago in Prince Rupert

October 1, 1914

News reached the city late this afternoon that the body of L. J. Hoyt, the victim of the recent hunting accident in the woods across the Skeena River from Port Essington, had at last been located. The body is being brought into Prince Rupert.

The hardest fought football game of the season was the match between the Callies and Merchants today to decide possession of the Exhibition Cup. Up to almost the last minute, the Callies were leading by 3 to 1 but the Merchants, with a

Sterling Furnace COAL. Delivered in Bulk. At \$10.00 per ton. This is a very superior furnace coal. It gives a clean hot fire and is entirely free from soot, cinders, slack and dirt.

John May, Indian, is under arrest at Hazelton in connection with the murder of Harry (Bert) Taylor at the Sealy Gulch bridge. Great credit is given Chief Minty for his quick work on the case. Liquor is said to have been the cause of the crime.

The People's Partnership in British Columbia Timber

Every citizen of British Columbia, though he may not realize the fact, is a partner in the timber holding business of the province.

By virtue of the public's right in its national domain every inhabitant of B.C. possesses a certain defined right in the development of its forest resources.

The partner of the public is the investor who, relying on fair and equitable treatment, has risked millions upon millions of dollars in the purchase of standing timber in British Columbia.

The value of the public's equity in the province's forests is very clearly shown indeed by the fact that although it put no actual cash into the concern it netted three and a half million dollars income from forest revenue last year.

This amount was collected by the government and applied to public works, education and other expenditures. The value of the standing timber to both partners lies in the

possibilities it possesses of conversion into merchantable products.

If the lumber industry of British Columbia were taxed out of business the investor would lose his money and the public would lose their revenue.

The public of British Columbia would then be left with a fine scenic stand of timber which would cost them a vast amount of money to protect but would not yield a cent in return.

They would also be left with a reputation that would scare every sane investor out of the province.

This series of articles communicated by the Timber Industries Council of British Columbia.

TAX SALE

Balance of Lists of Lots Purchased by Bidders from City Yesterday

The following is the balance of the list of purchasers at the municipal tax sale yesterday, the prices in each case being the upset figures unless otherwise noted:

Section 7 Mrs. S. M. Johnson, block 1, lot 15, \$40.69; block 1, lot 16, \$68.68. A. Brookbank, block 7, lot 18, \$32.91.

W. M. Wright, block 4, lot 53, \$34.46; block 4, lot 53, \$34.46; block 4, lot 54, \$38.84; lots 55,

56 and 57, \$34.46 each; block 4, lot 60, \$37.36.

M. M. Stephens, block 6, lot 56, \$40.60.

J. Warrehee, block 11, lot 2, \$41.24.

L. Astoria, block 36, lot 1, \$179.67; lot 2, \$49.03; lot 3, \$35.44; lot 4, \$74.03.

E. C. Gibbons, block 39, lot 36, \$45.17.

Section 2 Lot 5, block 2, Mrs. Mary F. Allistone, \$72.06.

Those wishing to purchase lots that have not already been sold may do so until Saturday by applying at the office of the city treasurer. After that time it will be necessary to apply to the council.

Section 8 W. M. Wright, block 3, lot 30, \$35.49; lot 32, \$36.68; block 6, lot 4, \$23.86; lot 14, \$36.11; lot 15, \$18.23; lot 17, \$16.20; lot 18, \$15.68; block 13, lot 17, \$14.40; lot 53, \$19.80; lot 54, \$16.71; block 38, lots 16, 17 and 18, \$16.65 each; lot 22, \$17.91; lots 23, 24 and 25, \$15.64 each; lot 33, \$17.67; lots 31, 35, and 36, \$15.64 each; lots 36 and 47, \$16.65 each; block 42, lot 20, \$19.67; lot 21, \$17.45; block 48, lot 9, \$15.18; lot 10, \$17.09.

M. M. Stephens, block 46, lot 10, \$24.83; lots 41, 42 and 43, \$17.67 each; lots 65 and 69, \$22.27 each.

H. B. Rochester, who has been spending the past week holidaying at the Sealy ranch at Smithers, will return home on his afternoon's train.

L. F. Hoy arrived in the city on the Cardena yesterday afternoon from Alice Arm where he has been investigating the possibility of securing spruce logs for several log exporting companies which he represents. He continued through to Vancouver on the steamer.

The Board of Trade council yesterday decided to take over from the Canadian Club the management of the luncheon to Premier McKenzie King and the entertainment committee of the Board will have the matter in charge. The executive also voted in favor of admitting ladies to the luncheon.

FASHIONS & FOIBLES
by Shirley Sharon

However hazy her knowledge of French verbs, the young girl is well versed on French fashions, even to the point of recognizing the smart ornament for her draped dress.

"It is complete!" exclaims Worth when he fashions an exquisite ornament at one side to hold a drapery there, and one could search through many shops without finding the exact duplicate of such an ornament. They are very easily and inexpensively made, however, and give the draped frock the same individual look as an expensive imported frock. Black satin crepe is a smart material to use for this type of draped dress, either for the entire dress or with beige or white to use the caprice and to face the drapery. A very smart young person wore this identical dress made of a lovely printed crepe de Chine with navy and strawberry on a pale-gray ground.

Mrs. M. M. Stephens returned on the Prince George this afternoon from a trip to Vancouver and Vancouver Island.

Mrs. Weldon R. McAfee of Georgetown, who has been visiting in Vancouver, arrived from the south on the Prince George this afternoon.

D. McCorkindale, who has been spending a vacation in Fort William, returned to the city on the Prince George this afternoon.

With only one dissentient vote, the council of the Board of Trade last night decided to admit ladies to the luncheon on October 13, to Right Hon. W. L. Mackenzie King.

United States Consul A. E. Wakefield, who has been on a trip to the Eastern States, returned to the city on the Prince George this afternoon. Mrs. Wakefield, who has been as far as Seattle and Bellingham, also returned.

Mr. and Mrs. W. L. Armstrong and family of Prince George, who have been on a vacation trip to Vancouver, arrived from the south on the Prince George this afternoon and will proceed to the interior on this evening's train. Mr. Armstrong is C.N.R. station agent at Prince George.

Capt. Griffiths, head of the Coastwise Steamship & Barge Co., and Mrs. Griffiths arrived from Seattle on the Prince George this afternoon and will proceed to Anyox on the Prince John tonight. The vessels of Capt. Griffiths' company carry ore between Anyox, Stewart and Tacoma. He is one of his periodical visits to the district.

Arnold Evans, assistant purser of the steamer Prince George, joins the Prince John today as purser in place of Bert Robson who is going to Vancouver on leave-of-absence. T. G. Gilliland, assistant purser of the Prince Rupert, goes to the Prince George in place of Mr. Evans.

Passengers arriving on the Prince George this afternoon and leaving for the north on the Prince John tonight include Capt. and Mrs. Griffiths, R. Hill, D. C. Brown, James March, Miss Pearl Rose, Miss Carter, D. McAuley, A. R. Kent, F. C. Townsend and Mr. Wishart for Anyox; H. Bidder for Stewart.

Capt. John McKernan, who is being transferred from command of the Canadian Volunteer to the post of C.G.M.M. company pilot at Vancouver, arrived from Ocean Falls on the Prince George this afternoon and will proceed south this evening. Capt. McKernan will be succeeded on the Canadian Volunteer by Capt. Gilbert.

C.N.R. steamer Prince George, Capt. Harry Nelden, inaugurating the new fall schedule, arrived from Vancouver and way ports at 1:30 o'clock this afternoon and will return south direct at 8 o'clock this evening. The Prince John, Capt. Neil McLean, will connect for Stewart and Anyox sailing from here at midnight tonight.

ONTARIO AND QUEBEC SHAKEN BY EARTHQUAKE

OTTAWA, Oct. 1. — Ontario and Quebec points as well as Maine, Massachusetts, felt the earthquake shock early yesterday. People were awakened by the rattling of dishes, trembling of windows and the furniture in the houses was shaken and moved.

BOAT ARRIVALS

Passengers arriving from the south on the Prince George this afternoon included H. W. Brown, Mr. and Mrs. R. Law, W. C. Jones (Terrace), A. Paten, H. Cameron, Miss J. Lindseth, J. Alice, Mr. and Mrs. W. L. Armstrong (Prince George), E. C. Nevison, W. Ritter, W. S. Prinz (Montreal), C. Geddes, Miss H. Sumner, F. W. Jobb, Mrs. M. M. Stephens, J. Barber, Mr. Gebhart, C. **JUNEAU EMPIRE IS
 REJOICING WITH US**
 Says Prince Rupert Cannot Grow
 to Greatness Without Aiding
 all the North

A recent number of the Juneau Empire says editorially: Engineers are expected to arrive at Prince Rupert before the end of the present month to make surveys and plans for the erection of a grain elevator at that place according to an announcement made by Fred Stork, member of the Dominion parliament for the Prince Rupert district. It is proposed to have the elevator in operation in time to handle wheat in 1925.

The success of the efforts to make Vancouver a grain shipping port augur well for the proposed enterprise at Prince Rupert. Three years ago the wheat shipments from Vancouver for the United Kingdom and the Orient were less than 2,000,000 bushels. This year they were nearer 30,000,000—more than 24,500,000 were shipped through the Panama Canal for the United Kingdom in 1923.

The Canadian National Railways run through a wheat country that can ship cheaper to Prince Rupert than to any other seaport, and the building of an elevator at the latter place should bring a considerable quantity of wheat to the Northern British Columbia town.

The people of Alaska will rejoice with their Prince Rupert neighbors at this new development at our doors. Prince Rupert cannot grow to greatness without aiding in the growth of the entire north. Let the good work proceed.

E. K. Knott, x-ray expert who has been in the city for the past week, left on last night's train for Hazelton.

ANYOX SOCCER SEASON CLOSSES

Close Struggle For medals Ends in Win For Mine Team

ANYOX, Oct. 1.—The greatest football season in the history of Anyox has been concluded and there will be no more play until the season of 1925 rolls around. Hard fought games were the order right through, the Mine and the Smelter teams having the edge in the schedules. The Beach, although losing regularly in the schedule, built up a team that was strong enough to beat both the Mine and the Smelter teams in the cup games, and annexed the silverware, leaving the two teams to fight it out for the medals.

The Anyox Football Association schedule is decided in two series, the winners of the first half to play the winners of the second half for gold medals presented by the Granby Company. The Mine won the first half easily, and all but had the second series, there being but one point difference between it and the Smelter team. A win would have given the Mine team the medals and a draw, which resulted, gave the second series to the Smelter. Then it was a matter of Greek meeting Greek, only these particular Greeks were near Canadians from all manner of places north and south of the wee Clyde.

Many Ties

Here is the record for possession of the bangles. It was a tie game on September 2nd when the Smelter qualified for the running. On September 4th, these teams tied again. On September 7th the same result happened. On September 19th, in an overtime game, neither side could score more than one goal. It began to look as though neither team would win, and it was suggested that the money to purchase medals be devoted to the annual sports banquet, which, of course, could not be allowed. So the executive decided to set another date and full teams were fielded on time, although there was a drenching rain all day which continued right through the play, the ground getting very heavy. In the first seven minutes of play, the Smelter, pressing hard, managed to net two goals kicking up grade, and it looked as though the Mine's chances were nil; but the Mine players, all good sticklers, played for all they were worth, and in the second period, working up hill, managed to equalize with two goals. This necessitated overtime, although it was rapidly growing dark, and ten minutes was set each way, the Mine

SPORT CHAT

The chances of the Washington Senators to cop off the world's series this year in addition to having won their first pennant in the American League look good. When the big contest starts next Saturday, the Senators will be at home. Their advantage seems to lie principally in the fact that the Giants, their opponents as winners of the National pennant, have a somewhat crippled line-up with two of the best players laid up on account of injuries. It looks like Gohman may lose world's baseball honors which she has held exclusively for the past few years.

Epinard, the great French champion race horse, has lost his second race in America. Last Saturday afternoon, Ladkin won the International Special No. 1 at New York beating Epinarid who was second, by a head. Wise Counsellor was third and the three other horses in the race were Zev, My Own and Little Chief. Epinarid was badly jumped by Wise Counsellor at the beginning of the last furlong. The opinion of experts was that, had it not been for his unfortunate incident, Epinarid would have won. Ladkin belongs to the Belmont stables.

American League Washington 1, Boston 13.

BOBBED HAIR

BERLIN.—A young student of philosophy, Robert Vogelmann, in a newspaper article scores bobbed hair as "the deadly sin against the holy spirit of Dame Fashion, and urges German fraulein to scorn the style. It was invented by a clever sister wanting to camouflage the poor growth of her hair by trick, he declares.

MAY CLIMB FUJI

TOKIO.—Application for permission to build a cable railway up Mount Fuji has been filed with the departments of home affairs and railways by a group of Tokio capitalists. The government has ordered a survey of the mountain's slopes preliminary to issuing the necessary permits.

Father J. A. Allard returned to Terrace last night after having attended a meeting of priests of the diocese in the city.

BADMINTON CLUB TO USE MCINTRYE HALL COMMENCING SOON

At a meeting of the executive of the Prince Rupert Badminton Club held last night it was decided to take the McIntyre Hall for the use of the club during the winter. Some work is to be done at the hall before it is taken over but this it is expected will be done within a week. In the meantime members will be enrolled and preparations made for the opening.

WHIST DRIVE AND DANCE WAS SUCCESS

Large Attendance at Enjoyable Event in Elks Home Last Evening

The Elks whist drive and dance in the Elks Home last night was a great success. There were something like forty tables of bridge and a good many of the dancers came later. The winners at bridge were: Ladies first, Mrs. Olof Hanson. Consolation, Mrs. L. M. Fuller. Gents first, C. Biggart. Consolation, Dr. Eyoifson.

The committee in charge did excellent work under the sponsorship of Mrs. Arthur Bailey assisted by Mrs. William Reid and Mrs. H. F. Glassey. Mrs. Bailey sat at the receipt of customs and Mrs. Glassey was master of ceremonies. Excellent music was provided by Miss St. Cyr's orchestra. The event was under the auspices of the Ladies of the Royal Purple.

GOOD NEWS FOR BUYERS OF COAL

Some fifty years ago a remarkable coal was discovered on Vancouver Island. This coal caused a sensation at the time and quickly established a reputation for greatest heat, very little ash, no clinker or rock. It was called Wellington coal. Many other mines have since been opened on the Island and the name "Wellington" has been given to them. But the public should not be confused. "Nanaimo-Wellington" coal has the

reputation of being the best domestic or steam coal mined on Vancouver Island. The mine has an output of 3,000 tons per day which is surely satisfactory evidence as to its quality. The public is cautioned against substitution and in order to make sure that they get the real "Nanaimo-Wellington" coal they should order direct from Albert & McCaffery, Ltd. who are sole agents for this coal in Prince Rupert. Their phone numbers are 116 and 564. You can buy a ton or a sack. We have our own trucks and team and can give prompt service.

RADIO STATIC

By The Daily News Radio Expert.

The Earle C. Anthony Incorporated, Los Angeles, owners and operators of station KFI have announced that they are installing a new and better broadcasting station in place of the powerful equipment now in use. It is to have ten times the power of the present set which is rated at 500 watts and will cost approximately \$75,000. As the laws now in force in the United States only permit 1000 watts to be used, KFI will be operated at that power but will have a reserve of five times that amount in case of emergency, and for experimental purposes. One of the primary objects of the new station is to establish daylight reception throughout the entire state of California.

KFI is well known here by its Sunday night dance programs and this news is of special interest to northern listeners in, since good reception from this high class station will be ensured every night. The fact that an individual company is prepared to spend such a large sum upon a broadcasting station serves again to prove that radio has come to stay.

KFI's new station will probably be on the air by November 1.

Here and There

Moose hunting opened in the Province of Quebec on September 10th. Indications are that an unusually large number of hunters will invade the woods this fall and the rush for licenses is well under way.

Edward A. Patterson, mining engineer of London, England, visiting Nova Scotia, states that the mineral resources of that province are practically lying dormant and that with proper development along scientific lines, mining could be advanced to first place in the province's industries.

Calgary, Alta. is planning an artificial ice rink because of the prevalence of chinooks in the winter, but the project will not be carried out in time for the coming season. Calgary had to abandon its scheme for an annual winter carnival because it could not count on weather that was cold enough or on snow.

The members of the band of the famous Princess Patricia's Canadian Light Infantry were among the passengers sailing for England aboard the Canadian Pacific liner "Empress of France" on September 28th. Under the direction of Lieut. T. W. James, they are to play at the British Empire exhibition at Wembley.

The Duke de Alba, 17th of that name and 10th Duke of Berwick in the British nobility, together with the Duchess of Alba and several other distinguished Spaniards, is touring Canada over Canadian Pacific lines. Their itinerary includes Niagara Falls, Toronto, Banff, Lake Louise, Vancouver and Victoria.

Transformation for the better wrought among the Eskimos in the last 25 years is almost unbelievable, so Bishop I. O. Stringer, of the Anglican diocese of the Yukon, reported on a recent visit to Edmonton, Alta. The Bishop attributes this improvement to the influence of the missionaries and the Royal Canadian Mounted Police.

The "Calgary process," the newest method of oil refining, was examined with interest by the members of the British Association for the Advancement of Science during their recent visit to Calgary, Alta. This process has become world-famous ever since the experiments conducted at the local Imperial oil refinery proved so successful.

Thousands of Belgians are waiting to cross the Atlantic to Canada as soon as the Dominion can assimilate them, it is reported by authorities in touch with the situation. Belgium's interest in Canada is further evidenced by the visit to the Dominion of Louis Strauss, veteran member of the diplomatic corps and member of the Belgian Parliament for Antwerp, who, as guest of E. W. Beatty, Chairman and President of the Canadian Pacific Railway, is touring the country studying economic conditions with a view to stimulating Belgian immigration.

The Radio Shine

The latest thing down in Cincinnati is the radio shine! Customers having their shoes polished just have to lift an earphone nearby and catch whatever may be on the air at the time. An assistant is kept on the job tuning the receiver which supplies the entertainment.

The Thomas H. Ince Corporation of movie producers at Culver City, Calif., is considering the installation of a broadcasting outfit. Mr. Ince is of the opinion that radio and the movies, the two big educators, should co-operate and he intends to begin it.

Fun Out of Radio

The amateur who wants all the fun there is in Radio from the very start, that is by either making or installing his set himself bit by bit, will have one or two jobs of soldering on his hands. Most people at one time or another have seen soldering in progress. There is of course, a difference between seeing soldering done and doing it. Yet with radio, it is of the utmost importance that the soldering to be done be done properly, for a single poorly soldered joint will often be the direct cause of the set not functioning as it should, and occasionally not working at all. The amateur erector will need a half pound soldering iron, some soldering flux and of course some solder. Soldering paste can be bought at any radio or hardware store, or it can be made by mixing some rosin to a paste by adding alcohol to it. Solder 60-40 that is 60 per cent tin and 40 per cent lead, will be found the best for radio purposes. If in the form of wire, it will be much easier to handle.

The Process

First, the iron must be tinned, that is, the point of the copper has to be covered with a thin layer of solder and this must not be allowed to be burnt off by excessive heating. A new iron can be tinned by first filing the tip of the iron clean, then dipping it hot into some paste and rubbing solder vigorously on to it until the tip is thoroughly covered. A soldering iron should also be wiped with an old rag before applying it to the joint.

One of the most important requisites is that the surface to be soldered be very clean. This may be accomplished by rubbing with emery cloth or by scraping with an edged tool. When ready to solder, place the two objects together, and apply a little paste. Then apply the hot tinned iron to the joint and feed the solder to the iron when the hot solder will run off the iron to the joint. Keep rubbing the iron over and around the joint until it is covered with a film of solder. Then let the joint cool and clean off any superfluous paste with a cloth dipped in alcohol, or even water. Most factory made paste will corrode the joint if left in permanent contact and in time will eat through the very wires, thus causing a broken connection. When soldering aerials or grounds, it will be wise to use the rosin-alcohol combination already mentioned which will not corrode. Do not rely upon solder alone for mechanical strength, but first twist wires together and then solder. Do not use too much solder or flux either. The least possible always gives the best joint. Don't heat the iron until red and then test the joints after soldering. With a perfect joint, both mechanically and electrically—which is not outside the capacity of the average individual—the poor working of a set need never be blamed upon the solder joints.

KGO Program in Brief

Thursday, October 2, 8:00 p.m.—Comedy, "The Man on the Box," by the San Francisco KGO Players, under the direction of Wilda Wilson Church. Music by Trio Nouveau.

FASHIONS & FOIBLES

by Shirley Sharon

The beltless dress is a fashionable chameleon, appearing in certain colors for silk and again in bright glowing shades of linen.

The French continue to be wary of waistlines, only hinting at them with a few small buttons on beltless dresses. They use the exquisite lingerie sets of collars and cuffs and an embroidered motif to lessen too plain an effect. Silk alpaca which is an utterly satisfactory material since it does not wrinkle easily and has a sufficient body for these beltless styles is smart for the beltless dress. For the city one chooses beige, burnt bread, cocoa, gray or almond green. For the country, linen in the very fashionable bright colors of yellow, green, rose or madonna blue makes a very smart frock.

BULKLEY BEEF IS DISCUSSED

Annual Difficulty in Regard to Marketing is Before Board of Trade

TELEGRAMS TO BE SENT P. Burns Ltd. Will Make Effort to Handle Cattle Offering by Farmers

The council of the board of trade yesterday decided to send telegrams to the minister of agriculture and the general managers for this province of P. Burns Ltd. and the Swift Canadian Company in connection with the marketing of the cattle raised in the Bulkley Valley. D. D. Munro, representing the land settlement board and R. Moore and G. E. Gulick representing Burns and Swifts respectively were present at the meeting. Munro Explains In explaining the situation Mr. Munro said there were a number of cattle in the Bulkley Valley which had to be marketed and he had come to Prince Rupert to interview the local dealers in connection with the matter. What the farmers wanted was to sell their cattle at market prices.

F. G. Dawson said P. Burns Ltd. had announced they were going to build an abattoir but had not done so. They were fiddling along. He thought there should be an effort made through the Burns or Swift Companies or in some other way to handle the cattle. Last year they had dealt with the potato problem with the result that only local potatoes were sold here. He was strongly of the opinion that the Bulkley Valley beef should be consumed on this market. Mr. Munro said it was useless to ask settlers to come to the valley if those already there could not sell their product.

Site For Abattoir

Mr. Moore explained that the site for the new abattoir had just been fixed and they would probably build in the spring. The amended plans had only just come through and it was too late to do anything now. If the farmers held their beef until spring they would get a better price for them. His firm was not using much beef just now. About twelve head a week was all they could handle altogether. He agreed that as long as there was beef in the valley it should be used in preference to that from the prairies.

M. P. McCaffery said they knew it was more convenient to bring the beef from Edmonton. There had been talk of doing something to meet this case for three years but so far nothing had been done.

This Last Time

Mr. Moore said that after this year there would be a market all the time. He suggested that they might ship the cattle to Edmonton as he did not favor killing them in the country. On suggestions being made he said they might arrange to kill them here if they could secure a suitable place. One or two were suggested and it was thought that one of them might be secured. After a good deal of desultory

discussion in which Mr. Moore said he would do the best he could to handle the situation and Mr. Gulick expressed a desire to co-operate, it was decided to send the telegrams explaining the situation in order to strengthen the hands of the local managers.

URNS TO ENGLISH

BERLIN—English is becoming the language of international intercourse, declares Dr. A. von Wilke, in an essay concerning the language of diplomacy. He says that French in this field, is losing its dominance.

TIMBER SALE X 6615.

Sealed Tenders will be received by the District Forester, not later than noon on the 29th day of October, 1924, for the purchase of Licence X 6615, on west side of Coste Island, Kitimat Arm, C.R. 4, to cut 314,000 feet of Hemlock, Balsam, Spruce and Cedar sawlogs. Two (2) years will be allowed for removal of timber. Further particulars of the Chief Forester, Victoria, or the District Forester, Prince Rupert, B.C.

TIMBER SALE X 6528.

Sealed Tenders will be received by the District Forester, not later than noon on the 29th day of October, 1924, for the purchase of Licence X 6528, Fountain Lake, Kitimat Arm, C.R. 4, to cut 733,000 feet of Hemlock, Balsam, Cedar and Spruce sawlogs. Two (2) years will be allowed for removal of timber. Further particulars of the Chief Forester, Victoria, or the District Forester, Prince Rupert, B.C.

TIMBER SALE X 6433

Sealed Tenders will be received by the Minister of Lands, at Victoria, not later than noon on the 9th day of October, 1924, for the purchase of Licence X 6433, to cut 272,000 lineal feet of Cedar Poles on an area situated near Sewall, Massett Inlet, Queen Charlotte Islands District. Two (2) years will be allowed for removal of timber. Further particulars of the Chief Forester, Victoria, B.C., or District Forester, Prince Rupert, B.C.

TIMBER SALE X 6488.

There will be offered for Sale at Public Auction, at noon on the 9th day of October, 1924, in the office of the Forest Ranger at Burns Lake, B.C., the Licence X 6488, to cut 20,800 line, on an area situated on the south shore of Francois Lake, at Lippincott Bay, Range 4, Coast District. Two (2) years will be allowed for removal of timber. "Provided that any one unable to attend the auction in person may submit a sealed tender to be opened at the hour of auction and treated as one bid." Further particulars of the Chief Forester, Victoria, B.C., or District Forester, Prince Rupert, B.C.

LAND ACT. Cassiar Land District.

Recording district of Prince Rupert, and situate in Atlin Lake, about one half mile due west of Atlin Township. TAKE NOTICE that Paul L. Eggert, of Atlin, in the Province of British Columbia, occupation jeweller, intends to apply for permission to purchase the following described lands:— Commencing at a post planted at the south point of the small island known as Second Island in Atlin Lake, situated as above; thence northwest and on around this island following the shore line to the place of commencement; and containing two acres, more or less. Sept. 3rd, 1924. PAUL LOUIS EGGERT.

WESTHOLME THEATRE

Wednesday and Thursday, 7 and 9 p.m.

"Wandering Daughters"

A photo-play that deals with just exactly what it's title suggests. A story of everyone's daughter, sooner or later. An adventure in the land of Jazz. A tale of modern girlhood, adoration, and of a girl whose father should be a night watchman. A delightful drama of jazz hearts among shattered dream castles. How far along life's rough road should a girl go unguided? How far can she be trusted? Take your daughter to see this picture. It mirrors the experiences of girls hungry for life's forbidden fruit. Strong cast. Pat O'Malley, Marguerite de la Motte, William V. Mong, Noah Beery, Allen Howell, Marjorie Daw and others.

COMEDY. FOX NEWS-GAZETTE.
Admission 35c and 10c.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes, minimum price for first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to ten head.

Our real courteous attention

Reliable work, fair profits and prompt service is what you may expect to get at this shop. We are experienced and properly equipped.

Phone us to call for your garments. If you want to confer with us about cleaning our advice is always at your command. Our rapid cleaning and pressing for men is popular priced.

ONLY FEW CANNERIES ARE NOW OPERATING

Cohoos Still Being Caught on Skeena River and Chums at Islands

Adam Mackie, inspector of fisheries, returned last night on the Malaspina from a trip of inspection to the Rivers Inlet and central divisions of this district.

Mr. Mackie reports that there is only one cannery now operating in the Rivers Inlet district, this being the plant of the Standard Packing Co. at Goose Bay. It is packing cohoes and chums.

In the central division Namu and Bella Bella canneries are still in operation, their present packs being almost entirely chums. Butedale and Lowe Inlet canneries are closed. The run of chums is practically over and seine fishermen are getting small catches. In point of quantity, the pack in the central division this year is especially good and the total will exceed last year's. The pack of pinks has not been so large as in 1923 but the chum pack will be considerably in excess.

On the Skeena River a number of gill net fishermen are still engaged in catching cohoes. Three canneries are still running—Sunnyside, Inverness and the Millard cannery at Prince Rupert. All other plants are closed and, in many cases, the crews have gone south.

On the Naas River, the Somerville cannery is the only plant still operating.

An improvement early last week in the chum run on the Queen Charlotte Islands fell off towards the end of the week. Lagoon Bay and Lockport canneries are still running.

Z. Higashi, Japanese missionary, left on last night's train for the Skeena river.

BUILDING PERMITS MONTH OF SEPTEMBER

Amount Totals \$11,750 and Includes Two Residences and a Small Apartment Block

Eleven building permits representing a total value of \$11,750 were issued at the office of the municipal building inspector during the month of September. They were as follows:

C. Finley, residence, Seventh Avenue East between Eberts Street and Hays Cove Circle, \$2,500.

Mrs. A. Johnson, repairs to residence, Ninth Avenue East near intersection of Eighth Avenue, \$150.

J. Krikeyevsky, residence, Eighth Avenue West between Tatlow and Lotbiniere Streets, \$2,000.

E. S. Hughes, repairs to residence, Sixth Avenue West, between Fulton and Taylor Streets, \$50.

W. F. Browne, repairs to residence, Eighth Avenue between Thompson and Lotbiniere Streets, \$100.

B.C. Butchers & Grocers, Ltd., repairs to store on Third Avenue near Third Street, \$250.

George James, apartment house on Third Avenue near Ninth Street, \$5,000.

Olof Hanson, addition to residence, Sixth Avenue and Taylor Street, \$300.

James Killas, repairs to resi-

SAYS DIAMONDS CANNOT BE MADE

Scientists Not Having Much Success in Attempts Manufacture Precious Stones

For over twenty years Sir Charles Parsons, famous as the inventor of the turbine engine, has been seeking to solve the mystery of the origin of the diamond, and recently he confessed at a meeting of the Royal Microscopical Society in England, that after spending thousands of pounds in his search for a solution he had been forced to the conclusion that the manufacture of artificial diamonds was impossible.

In the last fifty years many eminent scientists have tried to make diamonds in the laboratory, and some have claimed to have succeeded. The late Sir William Crookes, in language anyone could understand, gave the apparently simple formula for manufacturing diamonds when he said that the process consisted simply of dissolving charcoal (for a diamond is just charcoal, or graphite) in a liquid, and waiting for the dissolved substance to separate into crystals by slow evaporation. The ultimate crystals would, he said, be true diamonds. Nature thus transforms carbon into diamonds by subjecting it to enormous pressure and temperature in the earth.

The French chemist, Henri Moissan, subjected carbon to temperatures around 3,600 deg. C., and pressures exceeding fifteen tons to the square inch, the carbon being enclosed in pure iron. The crucible containing the iron and carbon was then plunged into cold water, which had the effect of solidifying the iron, which enclosed the carbon

In a giant grip. In this condition the dissolved carbon separated out as hard, transparent crystalline fragments indistinguishable from a true diamond. But the largest "diamond" Moissan was able to produce was scarcely visible to the naked eye; fifty side by side could be comfortably accommodated in the space of one inch.

Sir William Crookes himself was convinced that Moissan's crystals were true diamonds, and later repeated the French chemist's experiment with similar results. That was eighteen years ago, but since then none of the many that have worked at the problem have succeeded in manufacturing a diamond big enough to compete with the smallest natural diamond. Sir Charles Parsons, after twenty years' labors, has admitted his failure, and he has expressed the opinion that the microscopic crystals obtained by Moissan and Crookes were not diamonds, but carborundum or silicon compounds.

Probably Sir Charles Parsons will now abandon his experiments. But others will continue to seek the solution of one of the most fascinating problems of chemical science. The quest, however, is enormously costly, and attended by serious risks of explosions that may for ever end the career of some adventurous experimenter. The topaz, amethyst, ruby, emerald, and sapphire have all been made artificially, but the chemist has yet to imitate the methods by which Nature, in her laboratory beneath our feet, transforms a piece of black carbon into the most beautiful of all precious stones.
