DAILY EDITION

Tuesday, September 1,

Congratulations To Railway Company.

The Canadian National Railways steamship department is to be congratulated on its decision to place the Prince Charles on the Prince Rupert-Alaska run. The development of the Alaskan business should mean a lot to the railway company and also to this port. With a weekly service there throughout the year business should gradually increase and this should benefit Alaska as well as the railway. What Alaska needs is what every country needs. That is good transportation. If the G.N.R. can build up a steady business between the big territory and this port it will have justified its existence. The next step will be to develop the Alaska tourist business through Prince Rupert.

Swanson Bay Business Held Up.

The Swanson Bay operations are still held up by the fact that the affairs of the Whalen Pulp and Paper Company are still in liquidation and there are numerous delays over effecting a settlement. A special despatch to this paper yesterday told of a further delay.

Everyone wants to see the people who put money into the big company get all they can out of it. If there is a better offer they want to secure it. At the same time it is to be hoped the affairs will be settled up soon so that the mill may be operated next year. It is a pity that any industry in the north should be held up as long as the products are in demand.

Tropical Valley Is Not Tropical.

The so called tropical valley is not really tropical. People here must not be misled by that. It is undoubtedly warmer than the surrounding country, the warmth being caused by hot springs which bubble from the earth and by the clouds of vapor formed from the heated earth. It is a very interesting place undoubtedly but whether it would be a good place for human habitation is doubtful.

Art Department At The Fair.

The fact that a number of pictures are to be shown this year made by some of the famous artists will be an art education to the people of Prince Rupert. Often very crude efforts are seen in the homes and other places in all parts of Canada and the tendency of these exhibitions will be to improve the taste of those who buy art products.

It is to be hoped that in addition to the brush work shown, a number of local photographers will put in samples of their work. For two years past there have been pretty fair exhibits of photography and it would be a pity for this branch of the exhibition to be neglected.

Variad Interests Of Different People.

Different people have different interests. It is impossible to find any one thing which will interest everyone. If this were possible the work of amusing or entertaining the public would be a simple matter. The newspaper that can cater to everybody will make a fortune. The theatre that can produce movies or other forms of entertainment that appeal to every citizen will coin money. The difficulty is that people differ very greatly and also that while today a feature may be in favor the public quickly tires of it and wants something new. So it goes. We are eternally changing and yet our basic tastes remain much the same.

LOCAL DAIRIES QUITE HEALTHY

Inspector Reports that Tuberculosis has been Exterminated and Everything O.K.

J. D. Macdonald, provincial veterinary and inspector of dairies, who has been in the city for several days testing the cows and inspecting the premises of the local dairies, reported before leaving last evening that tuberculosis had been entirely exterminated here among the cattle and that the dairies were in good order.

Mr. Macdonald was here in June and at that time found a few infected cows. He discovered the one that was causing the mischief and the infected ones have been slaughtered. Now, following a careful test, he announces that all are quite healthy.

The inspector says there is nothing about Prince Rupert that would cause tuberculosis cattle. Probably the disease was brought in from the outside. Conditions here are perfectly all right for keeping cows as long as they are looked after well and kept free from outside infection. Mr. Macdonald has gone to Port Clements from here and will then return south.

TROPICAL VALLEY OF LIARD RIVER FOUND AND DESCRIBED BY COL. WILLIAMS WHO RETURNED FROM THE NORTH.

(Continued from Page One).

Finding the Valley

After finding the message, the exploration party pushed on by foot and, about a mile distant, was discovered the first hot spring, also a second cabin built by Smith. This cabin was well furnished for that part of the country and even contained the luxury of a gramophone and records.

Giving further particulars of the valley which lies in the Rocky Mountain range, Colonel Williams said that there were springs - all through it - for a length of probably 40 or 50 miles and a width of 20 or 30 miles. Boiling water bubbled up in the middle of the pools and around the edges where the water was tepid, bathing could be comfortably enjoyed. The heat given off by the springs, together with the mineral effect of the fumes, seemed to have a very stimulating effect on the natives there as did Columbus' birds when they landed first from Spain to the consternation of the North American aborigines in the West Indies.

The summer's adventures were not devoid of many amusing incidents. One afternoon, Caldwell was bathing in one of the sky blue lakes when he spotted an animal close by on the mountain side. He called to Col. Williams, who was engaged in making bannocks over a fire: "Get the gun. There's a moose." Hot foot with visions of fresh steak, Col. Williams started in pursuit but to his consternation he found the moose was a bear a ferocious one and big "it seemed to me," said Col. Williams telling of this incident, "as big as the Prince Rupert Hotel. When it showed its teeth and started a conversation in growls, let me tell you I forgot all about my gun and it did not take me long to get back to camp. That was the second time Caldwell had fooled me about moose so I informed him that from that time on I was 'off his moose' for good."

Speaking of the actual work of flying in that region, Col. Williams said that, on account of the swift and varying waters, the greatest skill and care was required in landing and taking off. The machine must have good performance. The country flown over averaged 2500 feet above the sea level and many times a flying altitude of 7,500 feet was reached. "Taking off and flying in such a country requires great power. Smaller power than our 350 h.p. engine would have been useless," declared Col. Williams.

Purposes of Trip

The visit to the "tropical valley," Colonel Williams says, was only incidental to the exploration of the country, which was conceived by Mr. Little, with the backing of Detroit capital, for the purpose of mineral investigation. Mr. Little is bringing out with him numerous samples and naturally Colonel Williams is not in a position to tell of impressions and findings along this line. It was the contract of the Laurentide Air Service, of which he is general manager, to provide the transportation, and this was successfully done.

Since leaving early in June, the big Wickers Viking flying boat engaged in 100 flying hours covering something over 6,000 miles during its activity in the north. The machine penetrated the Coast, Cassiar and Rocky Mountain ranges working within a radius of 250 miles from Liard Post which was the base of operations for part of the time. The Yukon boundary was also crossed when the 300 mile flight from Dease Lake to Francois Lake was made. Places were visited where white men had never been before.

Air Pioneering

Of course as far as the work

with the airplane was concerned, it was air navigation pioneering in the first degree. During many of the flights, the party had no idea of what would face them the next turn through the mighty mountains or of what landing facilities would offer. Should anything have gone wrong with the machine, there were places where it would have taken years to find a way out to say nothing of the hardships and possible death that would have to be faced if stranded there.

"It is a wonderful country containing without a doubt marvelous possibilities," says Col. Williams. "However, transportation proves the one big difficulty but this may be solved by aerial means. In fact it is an ideal country for aerial transportation."

Col. Williams then went on to give comparisons as to the time taken for air trips as against trips by foot or water. The flight from Dease Lake to Francois Lake took three hours by air. By foot and water it takes three months. Two Indians were taken in the plane from Liard Post to McDermes. They were so amazed when they reached McDermes that they could not believe they were there and had to be led around to prove it to them. The flight had taken 35 minutes. By coming up the Liard River in boats it would have taken five days.

Amazed Indians

It was the first time that natives in that remote district had ever seen an airplane. Their only acquaintance with such things as gasoline engines had been the occasional gasboats that might find their way down the Liard River. These mostly had outboard motors. So started was one Indian when the big plane reached Liard Post, that he took to the bush and there viewed the landing. Immediately he vanished on a raft saying that he was going to Fort Nelson to tell the big chief. However, he came back in a day or so. The arrival of the big flying boat in the Cassiar wilderness probably had somewhat similar effect on the natives there as did Columbus' birds when they landed first from Spain to the consternation of the North American aborigines in the West Indies.

The summer's adventures were not devoid of many amusing incidents. One afternoon, Caldwell was bathing in one of the sky blue lakes when he spotted an animal close by on the mountain side. He called to Col. Williams, who was engaged in making bannocks over a fire: "Get the gun. There's a moose." Hot foot with visions of fresh steak, Col. Williams started in pursuit but to his consternation he found the moose was a bear a ferocious one and big "it seemed to me," said Col. Williams telling of this incident, "as big as the Prince Rupert Hotel. When it showed its teeth and started a conversation in growls, let me tell you I forgot all about my gun and it did not take me long to get back to camp. That was the second time Caldwell had fooled me about moose so I informed him that from that time on I was 'off his moose' for good."

Before finishing up their flying in British Columbia, Col. Williams and Mechanic Caldwell plan on making a non-stop flight from here to Vancouver. If it is successful it will be the first time that the distance between Prince Rupert and Vancouver has been covered in one hop though the American world flyers flew from Seattle to Prince Rupert without a stop on the first leg of their great adventure last year. The take-off to Vancouver is planned for tomorrow morning. At Vancouver, the big Vickers Viking plane, which has given such yeoman service since being assembled at the dry dock here last May, will be taken down and shipped to the headquarters of the Laurentide Air Service at Three Rivers, Quebec.

Speaking of the actual work of flying in that region, Col. Williams said that, on account of the swift and varying waters, the greatest skill and care was required in landing and taking off. The machine must have good performance. The country flown over averaged 2500 feet above the sea level and many times a flying altitude of 7,500 feet was reached. "Taking off and flying in such a country requires great power. Smaller power than our 350 h.p. engine would have been useless," declared Col. Williams.

BOARD GETS \$600 GRANT

City Council Not Unanimous as to Vote for Publicity Purposes

Difference of opinion as a result of discussion having been resolved to unanimity, the city council last night decided to pay the Board of Trade its usual grant of \$600 this year, this to be in addition to the payment of some \$350 which was made by the city to cover half the cost of a publicity booklet recently issued by the board.

The matter was referred to the council by the finance committee without recommendation. It was pointed out by Ald. Casey that the council had borne half the cost of the booklet. The question arose as to whether this \$350 should be deducted from the annual grant to the board or whether the full \$600 should still be paid. His mind was open on the question though, in speaking of the work carried out by the board this year he was inclined to think that its urgencies on the matter of closing the port to U.S. fishermen had been directly at variance with the expressed wishes of the majority of the citizens. He thought that the city might have a publicity organization of its own if grants as high as \$900 were to be paid annually to the Board of Trade.

Effective Booklet

Ald. Larsen, while of the opinion that it was rather steep to pay the Board of Trade an annual grant of \$900, defended the effectiveness of the booklet even if it had cost \$700.

Ald. Brown, seconded by Ald. McKechnie, moved that the balance of \$600 be paid over to the Board of Trade after the city's share for the booklet had been deducted.

Ald. McMordie felt that, in view of the fact that it had been at first decided to grant the Board of Trade \$600 for the year, and subsequently at the suggestion of a committee of the city council the booklet had been published, it was up to the council to live up to its contract and pay the \$600 over and above the booklet. The board should not be called upon to pay the entire cost of something that had been suggested by the city.

Not a Member

Ald. Stephens was inclined to take a view similar to that of Ald. McMordie. A grant of \$600 had been promised the Board of Trade and he thought the council was in honor bound to carry out that promise. It would have been different if the booklet had at first been included in the \$600. As far as the booklet was concerned, he thought it was the best publicity effort that had ever been undertaken for the city. "I am not a member of the Board of Trade and I am not attempting to defend the board, but I feel that credit should be given where credit is due. It may have been a gentlemen's agreement, but I think it should be as binding as if it had been a written one."

Stating that he had been convinced by the argument of Ald. McMordie and Ald. Stephens that it was the duty of the city to pay the full \$600, Ald. Casey asked Ald. Brown and Ald. McKechnie to change their resolution accordingly. This was done and a resolution to pay the full \$600 was unanimously passed.

The usual annual bylaw providing for the exemption of crown lands from tax sale was given its first readings at last night's meeting of the city council.

WEDDING OF MUCH LOCAL INTEREST

Sister of Mrs. Joe Jack Marries Cloverdale Man

A wedding of much interest locally was solemnized yesterday afternoon in the Presbyterian Church, Kamloops, B.C., when Miss Margaret Armstrong, daughter of the late Mr. and Mrs. J. Armstrong of Cloverdale, B.C., and sister of Mrs. Joe Jack, Stork Apartments, was united in marriage to F. G. White, member of the firm of Armstrong & White, Cloverdale, B.C., by Rev. H. R. McGill. Mr. and Mrs. White will spend their honeymoon at Banff and Niagara Falls and will take up their residence in Cloverdale, B.C. Mrs. White made many friends in the city while visiting with her sister, Mrs. Jack, last summer.

MUSICAL ECKARDTS GAVE A GOOD SHOW

Proved Themselves Accomplished Musicians and Clever Entertainers—Here Tonight

When the curtain went down at the close of the entertainment given last night by the Musical Eckardts at the Westholme Theatre there were instant demands for more and prolonged applause from the large audience. The program was an excellent one and was highly appreciated by those present. So seldom does a good entertainment come to this city that local people appreciate a good show, and they were not disappointed last night.

The Eckardts were first rate. They played all kinds of instruments. In addition to the Swiss Bands, which they feature, they also proved themselves well able to play the xylophone, saxophone, trombone, chimes, musical glasses, flute, piccolo and

**PRESENTATION WAS MADE
MRS. F. R. ROSS, TERRACE**

Bridge Party and Travelling Shower Given by Mrs. Morse Hall

TERRACE, Sept. 1.—Mrs. Morse Hall was hostess to about twenty guests on Saturday evening when she entertained at a combined Bridge party and Travelling Shower for Mrs. F. R. Ross who is leaving shortly to join her husband in Florida.

During the evening Mrs. Ross was presented with a goodly number of articles which will be found very useful in travelling. A unique guessing contest was staged at which Mrs. A. L. Barker proved to be the prize winner, while the honors in Bridge were carried off by Mrs. Geo. Little. Very dainty refreshments were served by the hostess.

TERRACE NOTES

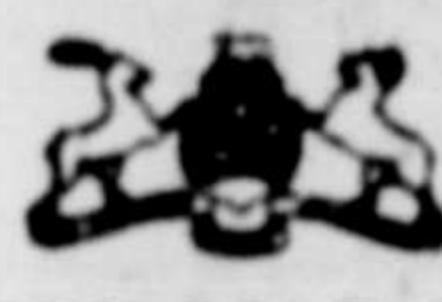

Miss Owen, daughter of Rev. E. C. Owen of Christ Church, Vancouver, and her uncle Mr. Gandy of Toronto, are spending a holiday at Hill Farm.

Wm. Farr returned to his home here on Sunday after spending the last month in Penticton.

Miss Lavinia Eby of Smithers is holidaying in Terrace, the sister of Misses Clara and Dorothy Little.

Miss Etanda Marsh, who has spent the last two months visiting friends in Toronto, Montreal and Lindsay, Ont., has left for her home, but will spend a few days with friends in Vancouver before coming north.

Mrs. Geo. Dover entertained

Miss Arlene Kirkpatrick and Miss Marjorie Roberts, who have been holidaying in the south for several weeks, have returned to Smithers.

Big Clean-up Sale

In order to clear our shelves of goods that have accumulated and for which there is not a big sale here, we are offering the following list of articles at prices that will make it worth your while to buy. These are all good stock and in other towns are in demand but are not so well known here, goods which are nationally advertised selling faster. Some of the goods we purchased on the promise of a big advertising campaign which promise was not fulfilled.

These goods will be sold for cash only and the prices quoted hold good until the quantity listed has been sold. Postage will not be prepaid on out-of-town orders for sale goods.

AUGUST BUILDING PERMITS \$16,750

New Residences and Repairs to Existing Structures Provided for in Last Month's List

Building permits issued at the city engineer's office during the month of August totalled \$16,750 in value. A few new residences were provided for but the most of the items were for repairs to existing structures.

The list follows:

U. Suga, repairs to house on Sixth Avenue West, \$150.

Mrs. L. S. Clark, addition to residence on Ninth Avenue, \$50.

J. C. McLennan, repairs to foundation of Commercial Hotel, \$2,000.

P. Bruno, residence on Fifth Avenue West near Dunsmuir Street, \$3,500.

D. Grainer, repairs to Inlander boarding house, \$500.

C. McAuley, residence on Fifth West at Grant Place, \$4,000.

P. Gamula, residence on English Hill, \$3,500.

J. Garon, garage on Second Avenue, \$250.

Salvation Army, repairs to foundation of citadel, \$600.

F. J. Fuller, residence on Seventh Avenue East, \$2,000.

P. Byrne, glass veranda on house on Westview, \$200.

PLAYGROUND WANTED ACROSS HAYS CREEK

Petition Presented to City Council and is Referred to Board of Works for Report

A petition signed by 79 persons was presented to the city council last night asking that a playground be put in for the benefit of the many children living beyond Hays Creek bridge.

Ald. McDermid stated that he understood it was the intention of the Gyro Club to put in a playground in that district next year.

Ald. Casey was of the opinion that, even if the Gyro Club did put in the playground, the city would have to pay a good portion of the cost. In that case, the Board of Works might just as well take the matter in-
