INVERMERE MAN IS NAMED LIEUTENANT GOVERNOR OF BRITISH COLUMBIA

Sensational Charges Before Grand Jury Liquor Indictments

SEATTLE, Jan. 21.—Sensational statements were made to the grand jury today at the hearing of the conspiracy case in which 46 defendants are invoked for conspiracy in connection with alleged liquor selling. PRINCE GEORGE, Jan. 21.—The trial of Fred Cyr on a charge of murdering his partner Alex Ducharme, a well known trapper at Chilco Lake last November, was held yesterday before Mr. Justice Murphy and a jury in the assize court, resulting in the acquittal of the accused.

Immediately after the killing, Cyr went to Williams Lake and gave himself up to the police there and made a statement in writing admitting that he killed Ducharme by claiming that he did so in self-defence. This statement and the evidence of Oliver Purdue, John Henderson, Dr. Agnew and police officers who investigated the case were all given at the trial.

WOMEN INFRINGE MAN'S DOMAIN IS VIEW OF STUDENTS

CHICAGO, Jan. 21.—War on cigarette smoking by women was declared at the University of Chicago by the college co-eds. An editorial article in the student publication declares smoking to be man's exclusive vice. Some of the members of the student council declare cigarette smoking is a "filthy habit" and "certainly does not add to the grace of woman."

The editor of "The Circle" another student publication, takes ground against the vice. He says: "If they must smoke, I wish they buy their own instead of expecting the men to provide them with their supplies."

SNOW MOTORS ARE FAILURES

Tests Made at Fairbanks Say Steering Gear Failed to Work

FAIRBANKS, Jan. 21.—Observers of tests with a snow motor of the type to be used for hauling supplies for the Wilkins' polar expedition expressed the opinion yesterday that the machines will never make their destination, declaring them helpless on the ice and bare ground, which they said would be encountered in the wind-swept reaches of the Arctic.

The Alaska Railroad Commission reported a test made over a 58 mile snow stretch Monday also proved unsatisfactory. The steering gear failed to guide the machine.

Cheap transportation certificates were issued to 76 men going to jobs in the Prince Rupert zone which includes that territory between Smithers and this city along the line of the Canadian National Railway, between Swanson Bay and the Alaska boundary on the coast and the Queen Charlotte Islands.

Of the 1153 vacancies registered 557 were of a casual nature, the work lasting from one day to one month.

The majority of placements, including casual work, were for unskilled men such as general laborers, loggers, miners, section laborers, mechanics, cooks, flunkies, firemen, deckhands, watchmen, etc.

Back Up Oliver In Grain Rates Fight.

Irrespective of political affiliations, this is the time to back up Premier Oliver in his fight for the very best grain rates possible to this coast. He has made good so far and we can trust him to carry on the war. Step by step we are obtaining that measure of justice which is our due.

It is not likely that Mr. Oliver will again appeal to the province as premier. He is getting older every year and must drop out soon. For that reason it cannot be looked on as a political move to ask for support for him.

We do not agree with Premier Oliver in all he does. He makes mistakes. We do not agree that the taping of the Peace River country should be linked up with the fate of the P.G.E. and there are other things in which we take issue with Farmer John. On this freight rates question, however, we can all unite. Every British Columbian should be on the same side in regard to it. This is a good time to let the Premier know that the people are behind him.

Difficult Position Of Progressives.

The Progressives find themselves in a difficult position, and one not of their own seeking, according to their leader, Robert Forke. People will sympathize with them. However, a great many people would like to be able to hold the fate of a government in their hands. It is a great responsibility, we must confess, but it carries with it great possibilities. It makes it necessary for the men in that position to enlarge their outlook as much as possible and refuse to be carried away with the temporary power which has been placed in their hands.

Public Library And The City.

There is probably no public institution that serves as large a part of the public as does the library. It brings enjoyment, occupation and education to hundreds. It is used, we can say, by thousands, right in Prince Rupert. Its patrons take great interest in its conduct.

Naturally the library comes in for its share of criticism. We all have our favorite authors and some imagine that the authors they read are the only ones worth reading. However, the management endeavors to cater to all classes, although it tries to encourage the educational feature. The chief demand is for fiction but the library provides a large share of non-fiction and tries to interest readers in that class of reading.

The library, which was established over three years ago, has now become a permanent institution. The next step will be to provide for it a permanent building, but there is time enough for that.

Henri Bourassa And Canadian Politics.

The Manitoba Free Press, discussing Henri Bourassa says: "Henri Bourassa has put away his six-shooters. This generation of Canadians remembers Mr. Bourassa as a daring two-gun man of the Canadian political ranges. He rode 'em all, he paid scant attention to the color or the temper of the beasts. He left the beaten trail and poked off into all sorts of by-paths and corners where he might have more success in courting trouble. He found considerable of it—enough to make him a lively political figure all the way from Cape Breton to Vancouver Island. Mr. Bourassa has been hucked, thrown, up again, thrown, and up again. This last time he has landed neatly back in a parliamentary seat in Ottawa. Rising from this seat on Tuesday Mr. Bourassa made a speech—a moderate speech—a speech that smacked of the fireside and philosophy instead of fire and fury. Mr. Bourassa is getting older, of course, Time cools the pulse; the mind, if it remains active and vigorous, takes in more territory; the eye catches more hints in the picture.

"Mr. Bourassa on Tuesday was the 'elder statesman,' speaking from a long political experience, but at this stage of life without fervor and without rancor. Mr. Bourassa said some things that it is worth while to have said at this stage of the development of Canada's parliamentary institutions and methods of procedure. He said the appearance of groups in the Canadian House of Commons was not something to be deplored. The appearance of groups meant that there were sectional viewpoints that were pressing for expression. They might represent prejudices, but Mr. Bourassa believes in publicity for these prejudices. 'It was far better,' he is quoted as saying, 'to tell the naked truth than to stifle it under the yoke of party.' He believed that groups had come to the Canadian parliament to stay; he was determined to learn and understand their movement."

SIR OLIVER LODGE GIVES HIS VIEWS HOW WORLD CREATED

Evolution of Religion Commenced When First Man Got Assurance that there were Higher Beings

LONDON, Jan. 21.—Sir Oliver Lodge, in another of his addresses on evolution, given at Westminster, viewed man as an infant on the earth, and an infant with perhaps a lot of time to grow up in. He believed the order of evolution was first some grade of plant, then water beasts, then land beasts. The first truly land animals were lizards or reptiles, some of which took to the air and became birds, while others developed into mammals which were in the line of human ancestry and were comparatively late comers on this planet. We could not really follow the whole process of man's evolution, which must have been gradual, but at some stage a special kind of consciousness must have begun, and these higher faculties must have shown themselves markedly in some early human ancestors. They had an imagination which gave the assurance that higher beings must exist, although they were not apparent to the senses, a feeling of awe at the unknown power by which they were surrounded. Here was the first crude idea of religion, and if we supposed we had attained to perfection in the matter of such development as this, we were surely mistaken. It was not easy to specify at what stage the developing creature might be called "human," but he thought all agreed that it was only a case of thousands of years, perhaps 50,000, perhaps 100,000, but certainly a short time. So far as humanity was concerned we were still in the morning of the times and the human race was still in its infancy. The human race began but a short time ago and might have millions of years before it on this planet.

THE MAN IN THE MOON

say: DON'T wait for someone else to make Prince Rupert prosperous, expecting to make money while you wait. You'll have to wait too long.

IF a legless age should come, as predicted by scientists, what should we do to provide a beautiful chorus.

PEOPLE in the south when told there is no fifteen cent store in Prince Rupert want to know how in the name of the holy bald headed eagle they buy their Ford supplies here.

I AM not sure what apartment agent in town it was who when it was suggested he asked a lot of rent for the rooms, remarked that he was always asking for the rent but seldom got it.

ONE newspaper facetiously remarks that Mackenzie King and Arthur Meighen both offered Robert Forke their coats, vests, shirts, collars, ties, pants, underwear, and were even ready to hand away their fancy garters for the support that finally did not go to either of them.

CIVILIZATION is just learning to do old fashioned things in the most spectacular and foolhardy way you can think up.

A LOT of people have been watching which way the cat would jump at Ottawa, and all pussy did was purr and hurrp her back.

SO great is the suspense at Ottawa it is almost audible.

Hon. C. E. Tisdall of the provincial cabinet is a visitor in the city. Last night he was met by the council of the Board of Trade. C. W. GOOD PHOTOGRAPH OF LOCAL DRYDOCK IN HARBOR AND SHIPPING

Harbor and shipping, published at Vancouver, has this week a good picture on its front cover of Prince Rupert Drydock with the Canadian Observer on the pontoons. Beneath the picture is the caption: "The management of the Government owned floating drydock at Prince Rupert has now been vested in the Canadian Government Merchant Marine Ltd. The new government elevator is now completed and will be in operation this month. The northern port expects early development of the grain and lumber traffic, particularly to the Orient."

TWO CONGREGATIONS AT VICTORIA CITY TEMPLE LAST SUNDAY EVENING

VICTORIA, Jan. 21.—Rev. Clem Davies, pastor of the City Temple, which holds its services in the Royal Victoria Theatre, preached to two congregations last Sunday evening. So great was the throng of people trying to get into the theatre that a

second evening service was announced to follow the regular service and commencing at nine o'clock. The first congregation was asked to leave quickly so that the others might get in. As soon as the first two thousand had been cleared from the theatre, the second instalment came trooping in and the evening service commenced again. The attraction of the evening was a message given personally by the murderer Soxwash to Dr. Davies just before his execution.

FEASIBILITY OF TRAVEL BY SNOW MOTOR CAUSES DISCUSSION ON COAST

SEATTLE, Jan. 21.—Doubt is expressed by many authorities here as to the feasibility of using snow motors in taking supplies to Point Barrow. The same opinion is expressed by residents along the Alaskan coast. They expect that resort will have to be made to the old fashioned method of mushing it with dog teams. The backers of the Wilkins supply expedition are confident that their tractors will get through and a grand effort will be made to cover the thousand miles of snow field with the machines in order to deliver the gasoline and other requisites for the North Pole flight at Point Barrow.

UNITED STATES IS OUT AFTER HOCKEY HONORS

BOSTON, Jan. 21.—The United
 States is making eyes at the
 Stanley Cup, emblematic of the
 world championship ice hockey.
 Boston entered a team last year
 in the National Hockey League
 and this year two other clubs
 have followed suit. New York
 and Pittsburgh. The result will
 be that great efforts will be made
 to capture the cup from the
 northern neighbors. Last year
 Victoria, B.C., landed the silver-
 ware but this year the Victoria
 team seems to be off its game
 and Portland, another American
 team, is showing up well.

While it is hardly expected an
 American club will win this
 year, the managers on this side
 are endeavoring to build up their
 teams and will make a big ef-
 fort to get at or near the top next
 year.

KU KLUX KLAN SCORED BY NELSON NEWSPAPER

Says Organization is Being Dis-
 credited in United States
 Today

(Nelson News)
 Canadian admirers of the Ku
 Klux Klan—who by their admira-
 tion of that order do their
 brains poor justice—should note
 some of the revulsion that is
 now encompassing the organiza-
 tion in its home country.

Just as the south is throwing
 off servitude to its least intel-
 ligent residents, so New England
 at last is awakening to its shame
 and all of the better element in
 the Klan are quitting it. Dis-
 patches tell of a great secession
 from it in New Haven, which has
 been a hotbed for Klan activi-
 ties.

There the local leader, speak-
 ing for several hundred other
 members, has announced to the
 present ruler of the organiza-
 tion that he and they can stand
 it no longer—that it has become
 a mere instrument for the col-
 lection of graft—that the only
 requisite for membership now
 is the ability and willingness to
 pay a \$10 initiation fee—that
 the avowed ideals, patriotic and
 other, of the Klan, have been
 forgotten.

JAPANESE ARE NOT MARRYING EARLY AS IN THE DAYS OF OLD

TOKYO, Jan. 21.—Very young
 Japanese are not getting mar-
 ried these days, governmental
 statistics show. In the old days
 marriages were contracted be-
 tween young men of 17 or 18 and
 girls of 15 and 16 years of age.
 An official inquiry indicated that
 the average marriageable age for
 men is 27 and for women, 23.

The tendency toward late mar-
 riage is said to be due to modern
 economic conditions.

TRYING TO MAKE HENS LAY TWO EGGS DAILY

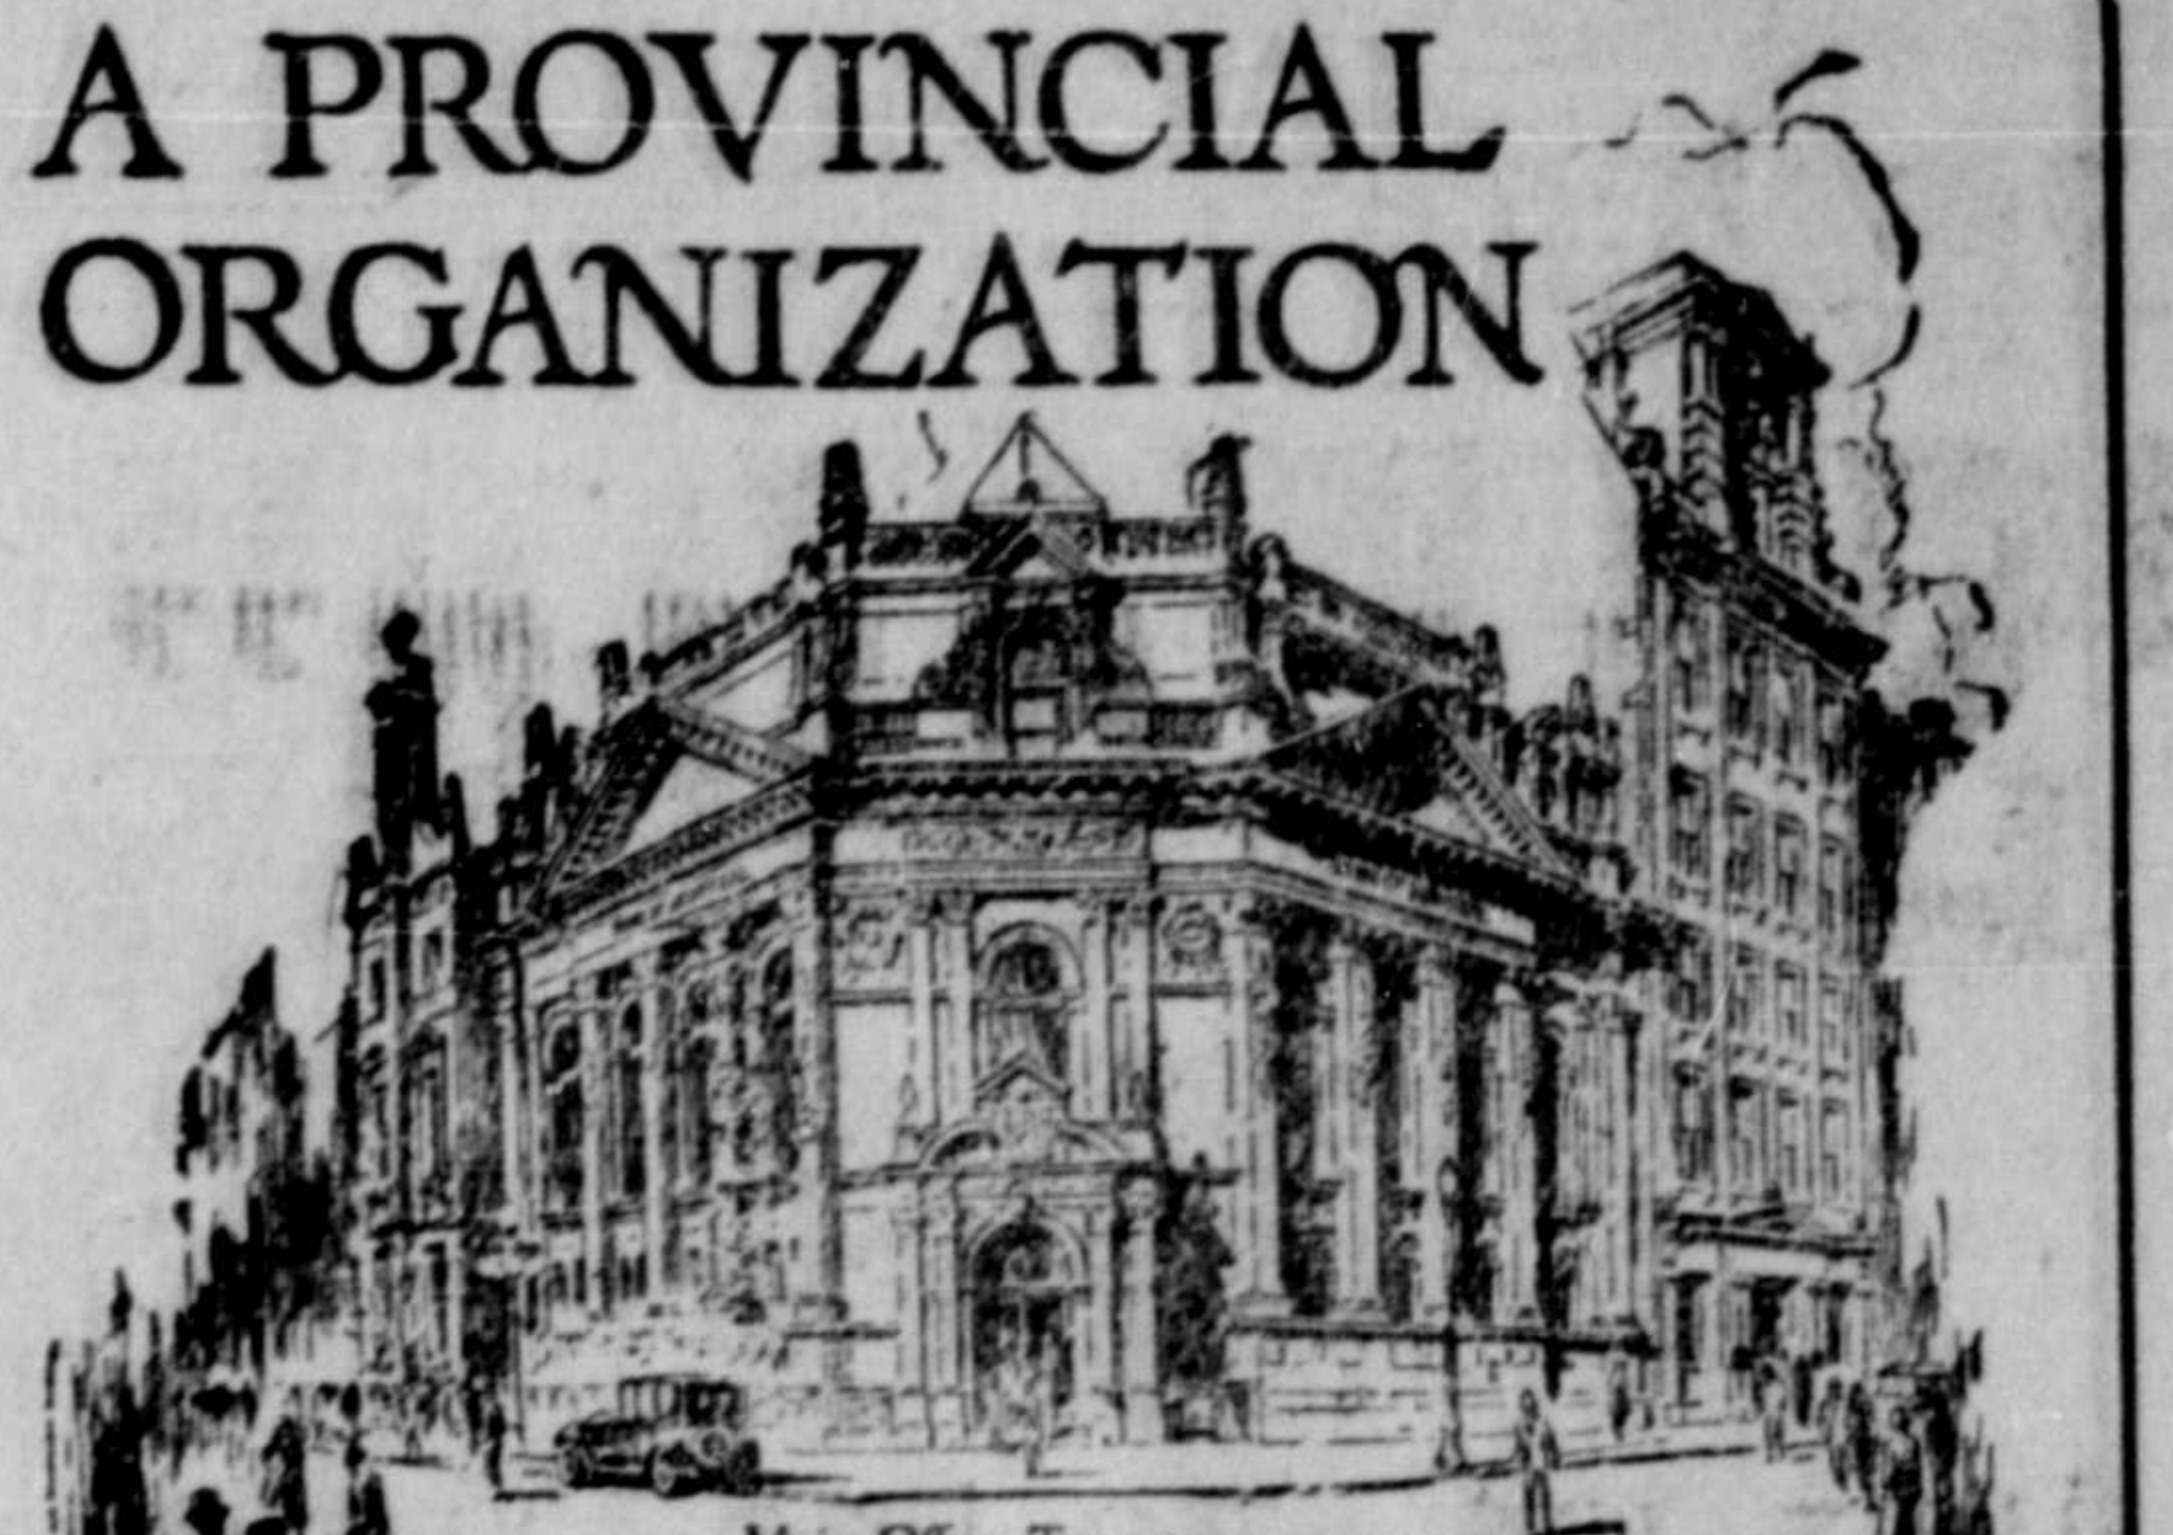

MORGANTOWN, W. VA., Jan.
 20.—How a hen can be made to
 lay two eggs in a day, is the text
 of an experiment being conduct-
 ed at the State University poultry
 farm here. It is hoped that by
 cross breeding this will be made
 possible and enable the univer-
 sity to equal the world's record
 of 346 eggs in one year.

OWNERS OF CARS HAVE NOT TAKEN LICENSES

Many Risk Appearing in Court Through Failure to Conform to Regulations

It seems that a good many owners of autos and trucks are driving them without licenses and are in danger of being fined. The new licenses were supposed to be purchased at the beginning of the year but some have not done this. The department is not anxious to have them haled into court, officials say, but the new licenses must be taken out and severe measures are likely to be taken unless the owners of the cars conform to the regulations.

Horrible Crimes Committed by Factional Leaders in China to Impress Villagers says Visitor

Returned Banker From Harbin Tells of Condition in Manchuria: Says Influence of Japanese is Strong There

EDMONTON, Jan. 21.—Most atrocious crimes are committed in China and Manchuria in connection with the struggles for supremacy of the various factions and life is not safe there for Europeans or others, according to J. P. Hall, who was connected with banking interests at Harbin and who has just arrived here with the idea of taking up land in Alberta.

The disturbances in China promise he states, no likely solution for years, perhaps for hundreds of years. He was forced to leave the home he had established in Manchuria when on June 25 of the past summer, the lives of himself and his wife were imminently threatened by a "demonstration" which took place in Harbin. These "demonstrations" are largely ruled by fanatics, and the crowds apt, at any time, to break all bounds of control. Only the prompt action of the British consul in informing the leader of the troops that he, as commander, would be held personally responsible for any outrages committed forestalled a massacre of the European population. China, however, cannot be regarded as entirely to blame for the unstable condition of affairs in those parts, this arising in large degree from the number of armed forces organized for war purposes at the instigation of the western powers and now become vagrant over the land.

Commit Atrocious Crimes
In an endeavor to convince the conquered villages of the might of the victorious captains the most atrocious crimes are inflicted upon the humbled populace. Old men and women are dragged about the streets, or after horrible disfigurement, are massacred in the eyes of the citizenry.

One instance mentioned especially, as indicative of once pursued to this end, as well as the ferocity of the measures of the bitterness of the feeling

GROUSE AND RABBITS DISAPPEARING FROM PRAIRIES THIS YEAR

Disease Cycle Proves Effective in Exterminating Birds and Rodents

WINNIPEG, Man., Jan. 21.—(By Canadian Press)—In Northern Alberta the government officers and the heads of the Alberta Game Protective Association, state that grouse are so scarce this winter that they are almost extinct. This they ascribe to a cycle that periodically strikes certain birds and small animals every seven years and exterminates them. This cycle is said to be due this year and rabbits have been particularly affected in Manitoba.

Due to the measures taken by the Manitoba legislature last year in declaring a closed season on prairie chicken, it is not believed that there will be any shortage of this game next season. According to J. H. Evans, deputy minister of agriculture for Manitoba, prairie chicken have a number of enemies against which it has a hard fight for existence.

Many Enemies

First there is the crow which is the greatest of all its enemies and devours the eggs of the chicken voraciously. Then there is a newly-discovered disease attacking the birds and the department of agriculture at Ottawa has secured specimens, and given them to the research bureau to find out what is the nature of the disease, with a view to attacking it. Then the sportsmen, who use automobiles have proved a serious menace to chicken and grouse. They can get much nearer the birds in their hunting trips and move quicker and this enables them to bag larger numbers in the fall.

Mr. Evans stated that it was thought at one time that the Hungarian partridge, a number of which have been released in Manitoba, were driving out the native bird, but this has been found incorrect, as the chicken and grouse have come back to places where the imported partridge makes its roving quarters and does not seem to be afraid of the newcomer.

No Shooting

The Northern Alberta Game Protective League has announced that there will be no grouse shooting in the province this year and for some time after. The cycle, which affects all animals, is now coming down from the north and the grouse and rabbits are reported to be fast disappearing.

TRAPPING SECRETS SOLD BY FARMER TO TRUSTING HUNDREDS

REGINA, Jan. 21.—William Wroblewsky fresh from his farm at Gretna, Man., decided to enter business life at Regina. He advertised in various newspapers that he would give away trapping secrets among them how to catch a skunk by the tail for the sum of 25 cents. He pledged his 30 years experience as a guarantee of his knowledge. Letters poured in on him. When the bulk reached nearly 800, practically all of them containing money, the postoffice authorities became suspicious. A charge was laid of obtaining money under false pretenses and the 28-year-old man who boasted of his 30 years experience was convicted and fined \$20 and costs.

The leniency was shown first because the accused offended

through ignorance, rather than intent, and second, because he agreed to the return of the hundreds of letters to the senders. His counsel in pleading for him said that the public response to the advertisements exceeded the widest dreams of his clients. And again it was proved Barnum was right.

Coughs and Colds

Are dreaded by Mothers who do not know of Dr. Chase's Syrup of Linseed and Turpentine.

What a weight of responsibility rests on the mother of the family during the cold weather season. In every cough and cold she seems to hear the warning of serious developments. She dreads croup, bronchitis, pneumonia and consumption and realizes that these are the natural result of neglected colds. But Dr. Chase has provided a prompt relief for coughs and colds and a preventive for more serious ailments of throat and lungs, in his Syrup of Linseed and Turpentine. This medicine is so well-known that only a reminder is necessary to most people to recall its effectiveness in relieving croup, bronchitis, asthma and all forms of throat and bronchial troubles.

An Infallible Guard

HEIMDAL, according to Celtic mythology, was the perfect sentinel. His hearing was so acute that he could hear the wool growing on a sheep's back. His eyesight was so keen he could see everything that happened even though it occurred while he slept.

Advertising, if you use it properly, is an infallible sentinel for you. It guards you against fraud and inferiority. It protects you against making unwise and unsatisfactory purchases.

Merchants and manufacturers who advertise must give full value because they have good names to protect. The makers of well-known products and the stores that sell these products often value the names at millions of dollars. They cannot afford to jeopardize the worth of these names by selling any but good goods of full measure and fair price.

So, you can bank on this. Advertised goods must be as advertised. That is why it pays to deal with advertisers and to buy advertised products.

Advertising is your guard
