#### WONDERFUL PROGRESS OF THIS PROVINCE.

Few people realized the wonderful progress made by British Columbia in the past decade during which the Oliver Government old mandolin. has had charge of the administration of affairs. With the doubling of the basic industries, as pointed out by Hon. T. D. Pattullo yesterday, there must also have been great increase in other industries, auts. especially in the building trades. The interview given by Mr. Pattulla yesterday in which he told of these advances was the cause Eve who tempted the moths to get of a great deal of favorable remark. And the best of it all is that busy. the progress is still going on and in a few years British Columbia will be making a real mark in the world and her influence in Canada will be increasing.

#### TEMPORARY LULL IN SHIPPING AT END.

The temporary lull in the grain shipping from this port is at an end and once more the elevator is to function as intended. At present the big house is bulging with wheat and incoming shipments have been halted. Now grain will commence rolling this way once more and everybody will be busy again.

#### MINING ON INCREASE SHOWN BY REPORT.

The rather long report prepared by J. D. Galloway appearing in yesterday's paper and the interview by the minister of mines on present mining conditions made interesting reading. Mining is one of the industries in which we are particularly interested here as we are in the centre of a mining country. All around us are producing mines and the number is increasing. Next year should see a great improvement if only the price of metals keeps up.

#### CONDITION OF CHINA IS

MENACE TO THE WORLD. The condition of China today is a menace to the world. There is no stable government in that country and there seems to be no hope for the future. While the Chinese object to foreigners interfering, they also object to any government taking charge. The result is disastrous. There is probably no country in the world today where there is more graft, piracy, and robbery by violence than in China, a country that is not a military country and that does not believe in military systems.

The country is so large, the communication so poor and the people so ignorant, generally, that the task of bringing about a better condition seems hopeless unless a strong dictator should arise who would first bring order out of chaos and then set about edu cating the people in regard to democratic government.
