## Modern Refrigeration is New and Interesting Innovation on Pacific Halibut Vessels

THE DAILY NEWS

A most interesting innovation adopted by a number of the North Pacific halibut schooners for 1927 season is the insulation of fish-holds, combined in several cases with installation of refrigerating machines of the compact, automatic modern type, says the Pacific Fisherman. Such equipment, though new in the halibut fishery, has been in use during the last few years by a number of Southern California tuna boats, which have to contend with far more difficult conditions of temperature. The results there have apparently been quite satisfactory, and on the basis of thorough demonstration under conditions more\*

or less closely approximating those of which should prevent any appreciable the halibut vessels, together with the loss of ice. To preserve the fish procalculations of engineers, it is expected perly, however, the ice must begin to that the new installations will fully thaw; so when fishing starts and fish prove their value within the next few commence going into the hold, the months. much better results in keeping the fish in condition, and would permit the oats to go further in the exploitation of more distant grounds.

While insulation will no doubt be a great help in keeping down the temperature, some of the vessel owners believe it cannot be expected to solve the entire problem. More or less heat will penetrate, and considerable warm air enters the hold when hatches are opened for stowing fish, etc. To absorb this heat, or "put more cold into the hold." several of the boats, including the Attu and the President have just added refrigeration machines.

The purpose of these machines, it may be mentioned, is not to make ice nor to freeze the fish, which would be undesirable; but simply prevent the ice from melting too rapidly. The method of operating is as follows: after the ice is taken aboard, the machine run sufficiently to keep it from melting until the banks are reached-normally about five days. For this purpose it is desirable to keep the temperature down to 32 degrees F. or a little under,

All day long your hands are coming into contact with things that others have touched. Newspapers, doorknobs, telephones, office papers, street-car straps . . . everywhere lurks the elusive disease germ. Even in the friendly handclasp there is danger of picking up one of the 27 disease germs listed below.

#### Let Lifebuoy Soap Protect You

Lifebuoy is the favorite toilet soap of millions who use it for the bath, shampoo, for every day use . . . for every toilet soap purpose.

In addition to keeping the pores of the skin clean, open and breathing, the mild but efficient and antiseptic penetrating qualities of Lifebuoy's creamy lather offer you protection against these germs, which lurk in all manner of dust and grime.

The people of Skeena are not beggars; they are as big as the mountains, and they are not plead- ing for some little petty gift from the government. Whatever the government gives them they will give back ten- fold, yes a hundred fold, in the revenue which will be derived by this govern- ment. <b>DRAIN ATLIN RIVER</b> "I do not wish to take up too much time: we are anxious to get through these estimates, but I do wish to say one word about Atlin, which is in the northern part of my constituency. I wish hon, members of this House were able to took over that country and real- ize the greatness of the struggle and the yastness of the problems which be- set those splendid people. All that I ask the government is to place in the supplementary estimates a paltry sum of not more than \$5,000 and not less than \$3,000, in order that the boulders in the Atlinto River, which drains the great Atlin Lake, may be removed giving an opportunity to small craft to ply from Atlin along Atlin Lake, down the Atlinto River and into Lake Taku	The the restrict of the eastern portion of Omineca district. The western end of the district will be under the super- vision of Kenneth Warner, with head- <i>Why! This is My Old Standby!</i> We use it at our house every day. TENTATIVE PLANS MADE AT MEET-ING OF EXECUTIVE COMMITTEE LAST NIGHT

S. D. Macdonald, vice-chairman of the celebration committee, presided over well-attended meeting of the executive last night in the City Hall when further plans were considered for the three days' festivities. It has been decided to ask Ketchikan to send a ball team second day and invitations will be extended to the mayor and council of the northern city to come and join in the celebration. The first day's program will probably be given over to children's sports, including a flag parade. In the evening it is planned to have a monster beacon fire in keeping with the general program throughout the country. This will probably be followed by a dance.

Included in the sports program there will likely be a junior lacrosse match and it is possible that either a five and it is possible that either a five

In The Letter Box

. ...

The second cribbage game between the Canadian National Operators and the Cold Storage will be played tonight. If the Cold Storage team should win it will be necessary to play another game. If, on the other hand, the C.N. Operators win, the Dawson oup, emblematic of the city championship, will be awarded to them.

If it is possible for an American, Japanese or British warship to visit Prince Rupert during the Jubilce celebration, there will be plenty of material for various sporting events to round out the three days program. Football, baseball, wrestling, boxing and swimming are a few of the sport specialities of the marines and crew of the modern warship and their presence in the city should stimulate interest in all athletic events.

The basketball season is over at Anyox. While the Intermediate and Ladies' championships were pretty well determined some time ago, the final attraction was the Senior League con-

## These treacherous Spring Days/ dvink hot Optoo

Spring days are dangerous days. You can never tell what the weather is going to be. Raw and sunny; warm and wet; or chilling you to the bone.

Wednesday, M

Whenever you have been out, these changeable spring days, have HOT "OXO" on coming in, and you won't have chills and colds.
