## DISCORD DARKENS BIG CONVENTION

### FORMER PREMIER MEIGHEN GETS ANSWER FROM QUEBEC

#### Discord Apple Thrown Into Big Conservative Convention at Winnipeg

**Arthur Meighen Declares no Troops Should be Sent Overseas Without General Election; Taken to Task by Ferguson**

WINNIPEG, October 11.—Hon. Arthur Meighen, former Conservative Premier of Canada, and Premier Ferguson, Premier of Ontario, clashed sharply yesterday afternoon at the Conservative convention over Mr. Meighen's famous Hamilton speech in which he said that should war again threaten, the people should be consulted in a general election before troops are sent overseas. Mr. Meighen defended that speech but scarcely had he concluded when Premier Ferguson mounted the platform to attack it.

Premier Ferguson declared that before the Hamilton speech Mr. Meighen called on him and discussed it. He had told Meighen that the opportunity was inopportune and that the action was inadvisable. He had informed Mr. Meighen that the proposed Hamilton speech was grossly unnecessary and therefore unjustified.

#### DAMAGES FOR WRONG SEARCH

**Dry Squad Officer Must Pay \$850 Decides Supreme Court of Canada**

OTTAWA, Oct. 11.—In the supreme court of Canada the judgment was dismissed on the appeal of Alfonso Niekerson of Vancouver. The latter was a member of the dry squad that searched the residence of George Herbert Manning for liquor and prosecuted Manning. The wife of Manning took civil action against him for damages and the lower court awarded \$850 for malicious prosecution and the B.C. court of appeal dismissed Niekerson's appeal and Manning's cross appeal. The supreme court yesterday dismissed the appeal as the damage award remains at \$850.

#### PROTECT NAME THIS PROVINCE

**Government Will Not Allow People to Use Address of B.C. House in Promotions**

VICTORIA, Oct. 11.—On receipt of reports that the British Columbia Mining Company was using B.C. House in London as the address on a recently issued prospectus, the Government has forbidden such practices.

In a statement given out in London it was explained that the Provincial Government does not even by inference wish to be giving financial backing to private promotions, although anxious to do everything possible through the Agent General's office to serve the interests of British Columbia businessmen.

#### BANDIT KILLED NEAR SEATTLE

**Second Man Wounded and May Die in Hospital; Both Were Mere Youths**

SEATTLE, Oct. 11.—C. L. Norris, colored police patrolman, last night shot and killed one bandit and wounded another when the pair attempted to hold him up on the Seattle-Everett highway. He brought the body of the slain man here. It is believed to be Rocco Ampic, 21 years of age. The other, who was wounded and was taken to the hospital where he may die, is Roland Frair, 19 years of age.

#### HEAD OF DOUKHOBORS ARRIVES AT NELSON EN ROUTE BRILLIANT

NELSON, Oct. 11.—After many delays Peter Veregin the younger, who takes the leadership of the Doukhobor community following the death of Peter Veregin who lost his life in an explosion on a railway train near here, arrived last night en route to the Doukhobor headquarters at Brilliant.

#### RECORD FOR THE CHANNEL

**Woman Doctor Crosses From Griz Nez to Folkestone in 13 Hours 10 Minutes**

FOLKESTONE, England, Oct. 11.—Mona McLean, London's mystery swimmer, landed here this morning after swimming from Cape Griz Nez in 13 hours 10 minutes and thus making a new record for women swimmers across the English Channel. The real name of the swimmer is Dorothy Logan, a practicing physician of Harley Street. It was her first attempt. Gertrude Ederle, who previously held the record, made the swim in 14 hours 31 minutes.

#### CHAIRMAN APPOINTED FOR BIG CONVENTION

**Winnipeg, Oct. 11.—Premier Rhodes of Nova Scotia and Senator Beaulieu of Montreal are permanent chairmen of the Conservative convention.**

H. H. Stevens is one of the deputy chairmen for the province of British Columbia.

#### QUALITY OF WHEAT BELOW THE AVERAGE

OTTAWA, Oct. 11.—Canada's wheat crop this year is below the ten-year average in quality but better than last year. The Bureau of Statistics finds the average quality 97 compared with 100 for the ten-year average. Last year it was 95.

#### ASTERUS WINNER CHAMPION STAKES NEWMARKET TODAY

NEWMARKET, Oct. 11.—M. M. Bousquet's French colt Asterus won the Champion Stakes this afternoon by half a length from Lord Derby's Colorado.

#### COSGRAVE IS PRESIDENT OF SOUTH IRELAND

DUBLIN, Oct. 11.—President Cosgrave was today re-elected president of the Irish Free State by the executive council of the Dail Eireann, the vote being a close one, 76 to 70. A. M. Kipp, manager of Arrandale cannery, is a passenger aboard the Catala today bound for Vancouver.

#### RESOLUTIONS AT WINNIPEG

**Conservative Convention Passes Its First Group This Morning and Hears Speeches**

WINNIPEG, Oct. 11.—The resolutions committee of the Conservative convention today brought in resolutions favoring the encouragement and development of natural resources so as to bring a maximum benefit to the Dominion as a whole. It also favored scientific research so as to determine the best methods of caring for and developing them and further declared for a policy of forest protection and reforestation. The convention returned the resolutions to the committee for consolidation.

While waiting for the resolutions committee today the convention heard speeches on the activities of the young men of the party. Mrs. Howard Falls of Peterboro, Ontario, speaking for the women, urged closer co-operation between east and west. Sir Thomas White said the sun of Conservatism would shine as brightly or more so than it had in the past.

#### RESCUER OF WIZARD HERE

**Halibut Boat Viking, Which Towed Distressed Vessel to Ketchikan, Reaches Home**

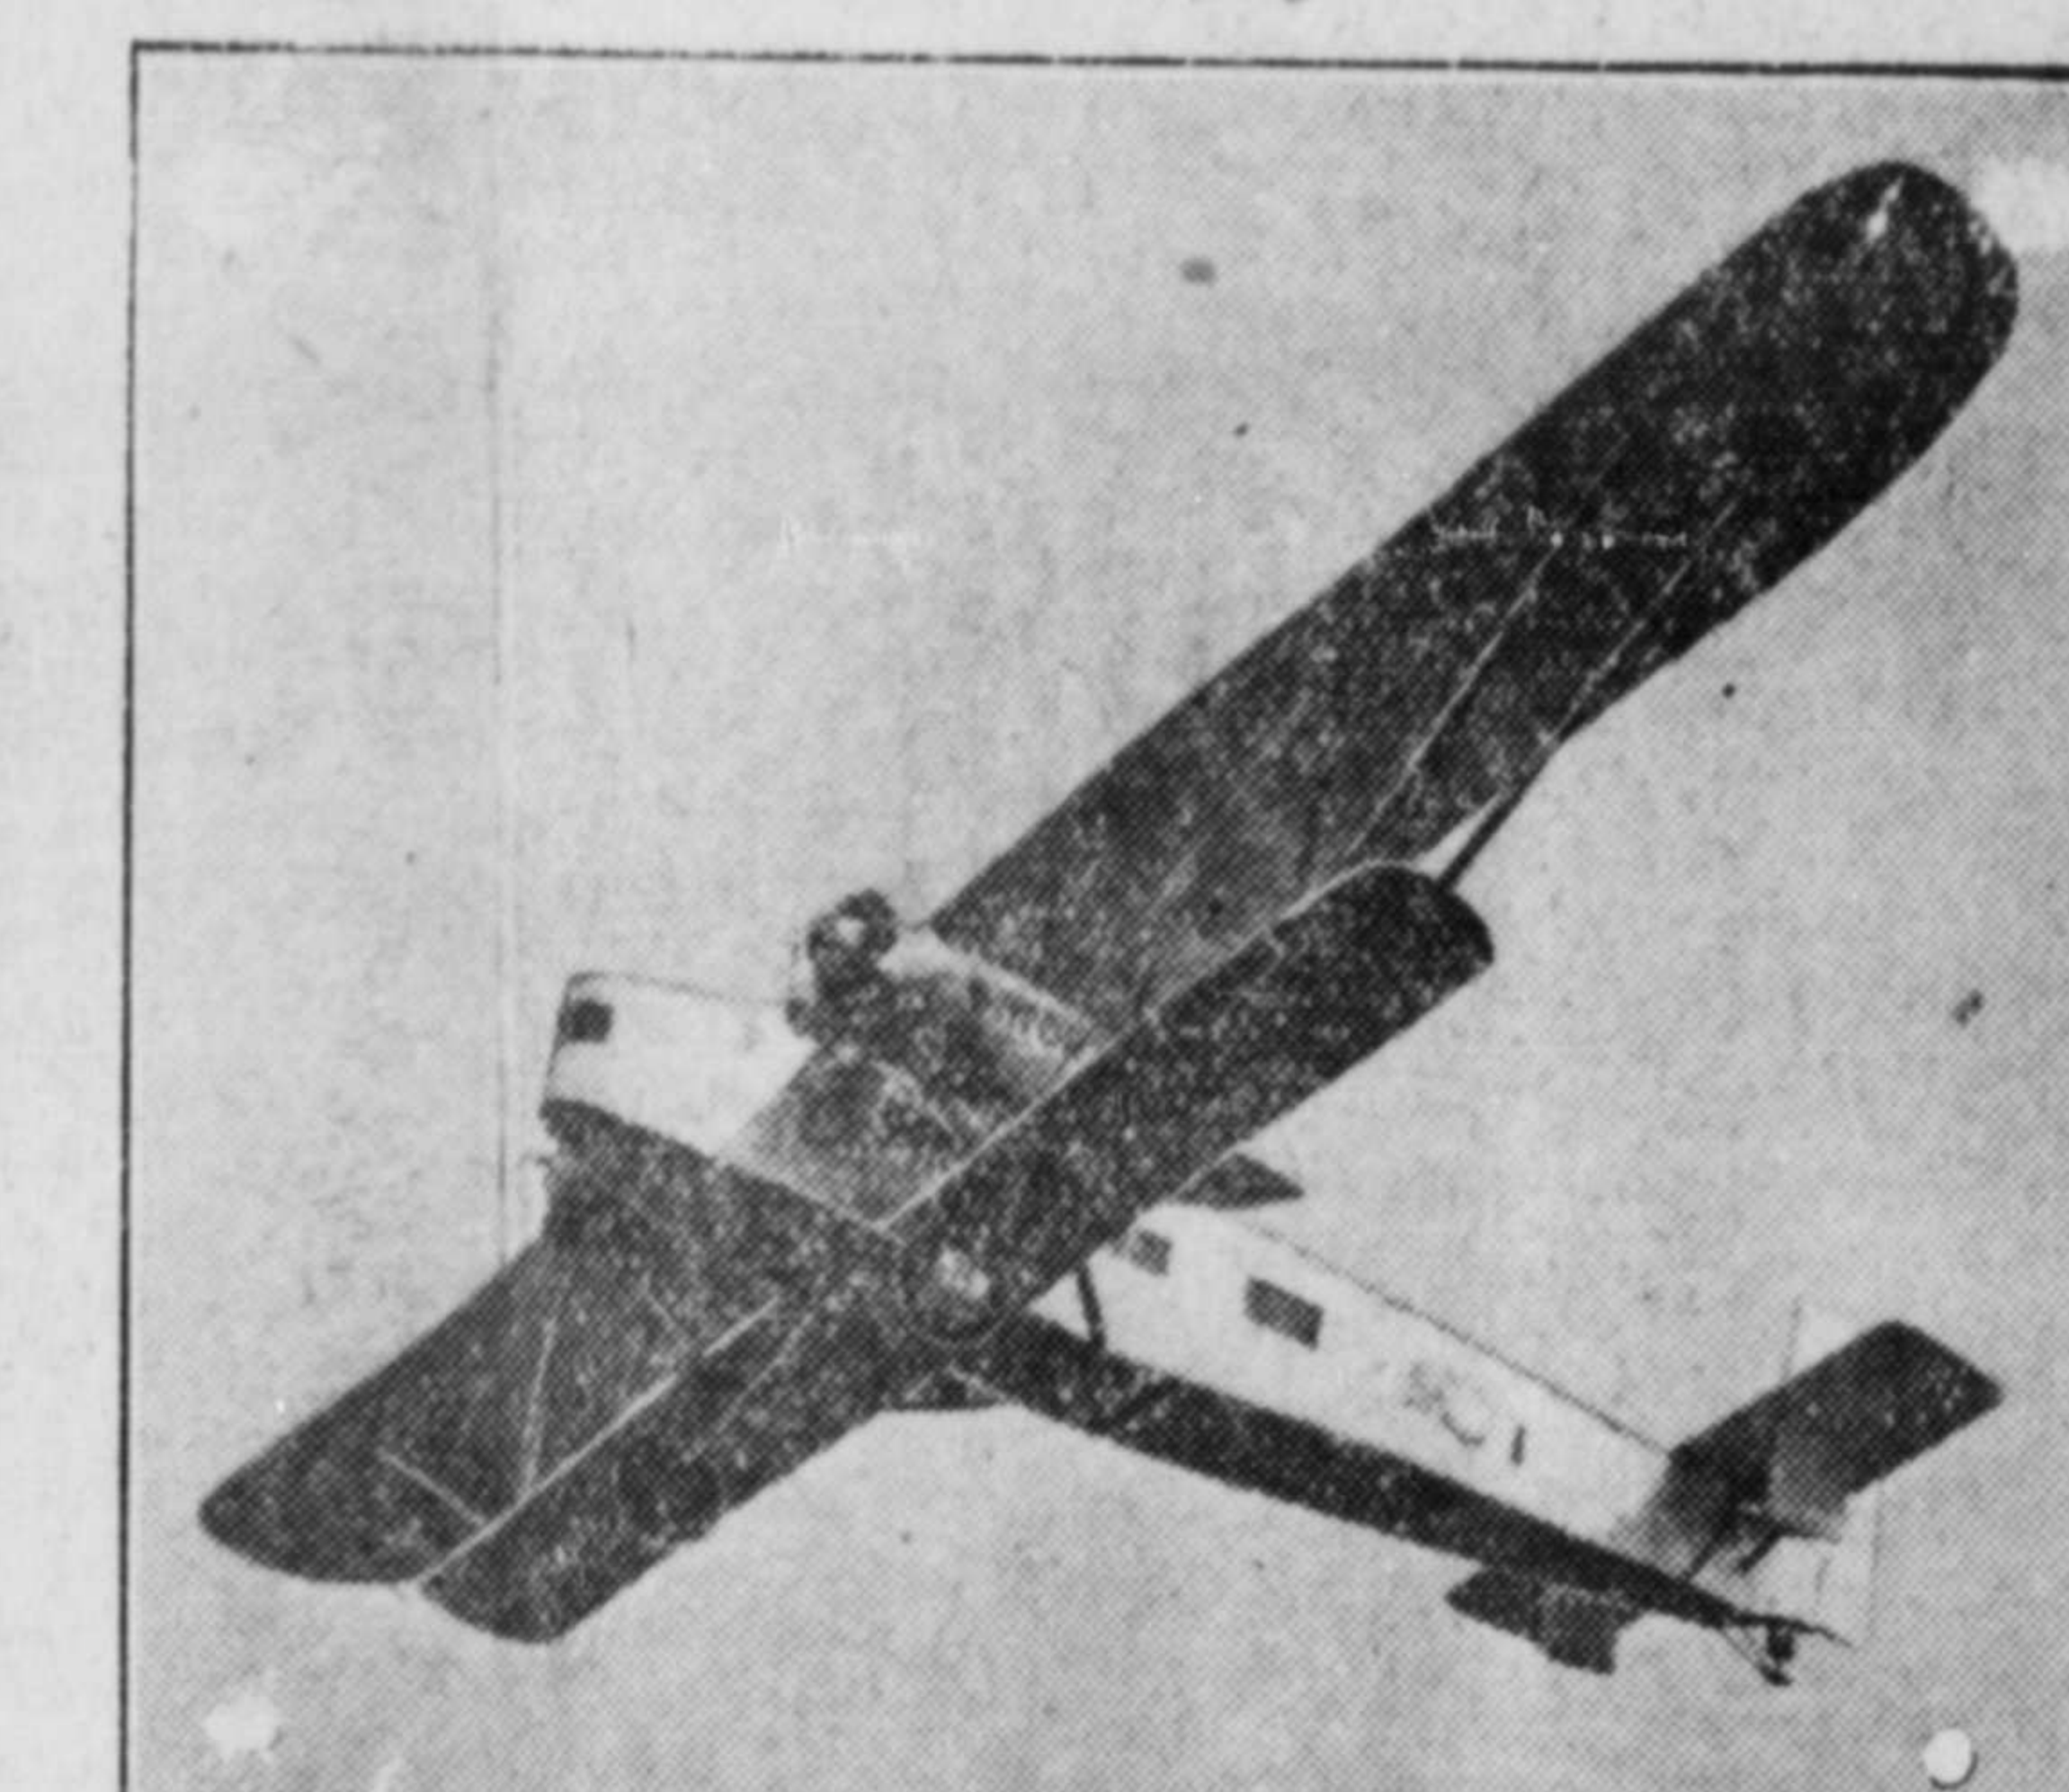

The local halibut boat Viking, Capt. Harold Erickson, which towed the distressed Seattle schooner Wizard, Capt. Fred Ostrom, into Ketchikan on Sunday, arrived in Prince Rupert shortly before noon this morning with a catch of 4,000 pounds to be marketed at the Exchange here. According to Capt. Erickson, the Wizard was proceeding from Seattle bound for the Kodiak Banks when her crankshaft broke, about as serious an accident as can happen to any boat. With the machinery out of commission, the Wizard, which is a ten man boat and one of the larger vessels of the American fleet, immediately had her sails furled to the wind and, from 180 miles out where the accident occurred, the course was set for the Queen Charlotte Islands, the nearest land. Off Port Louis, she was picked up by the Viking by which, with the assistance of the Marguerite, Capt. George Fritz, the long tow of 140 miles into Ketchikan was accomplished, reaching the Alaskan port at 3:30 Sunday afternoon.

#### SOME HALIBUT SOLD AND REST HELD OVER

A total of 122,800 pounds of halibut—66,000 pounds American and 56,800 pounds Canadian—was sold at the fish exchange this morning while 68,500 pounds is being held over for tomorrow's bidding. Sales this morning were as follows:

AMERICAN	CANADIAN
Pacific, 34,000 pounds, Booth Fisheries, 11.5c and 5c.	Alden, 32,000 pounds, Canadian Fish & Cold Storage Co., 11.5c and 5c.
Cape Spencer, 12,000 pounds, Altin Fisheries, 11c and 5c.	Ingrid H., 11,500 pounds, Canadian Fish & Cold Storage Co., 10.8c and 5c.
Pair of Jacks, 7,000 pounds, Canadian Fish & Cold Storage Co., 11c and 5c.	Margaloe, 5,000 pounds, Royal Fish Co., 11c and 5c.
Atil, 8,000 pounds, Canadian Fish & Cold Storage Co., 11c and 5c.	Tramp, 11,500 pounds, Atlin Fisheries, 11.6c and 5c.
Unome, 1,800 pounds, Royal Fish Co., 11.1c and 5c.	

#### NEW GIANT SIKORSKY PLANE: Built specially for Capt. Rene Fonck, makes its first test flight at Curtiss Field, L.I.

NEW GIANT SIKORSKY PLANE: Built specially for Capt. Rene Fonck, makes its first test flight at Curtiss Field, L.I.

#### MEIGHEN IS GIVEN QUICK ANSWER BACK

**Premier Taschereau Flays Former Conservative Premier for Misstatement**

QUEBEC, Oct. 11.—Premier Taschereau said today it was inconceivable after his public denial of words attributed to him in the election campaign of 1925 that Mr. Meighen should not hesitate to quote again the catumny contained in his Hamilton speech and was not even loath enough to mention that those words had been fully denied. "A man like Mr. Meighen who has so often been misquoted and misrepresented in the press should be the last one to use a report which he knows is inaccurate in order to promote discord and distrust between Quebec and a sister province and bring us back to misunderstanding, which we should all try to bury and forget. I can only say that it is despicable to misquote a man whatever may be the purpose in view and to use such unfair methods."

#### SIXTEEN GENERALS HAVE BEEN EXECUTED IN MEXICO IN 8 DAYS

NOGALES, Oct. 11.—The execution near Jalapa in the state of Vera Cruz of General Pauliano Cortez, former director of the National Railways of Mexico, together with fifteen of his followers, brought the known total of Mexican executions in eight days to sixteen generals and 61 others.

#### FRENCH FLYERS REACH SENEGAL

**Complete First Big Hop of Flight to Buenos Ayres From Paris**

ST. LOUIS, Senegal, Oct. 11.—Dieudonne Coste and Joseph Lebrux arrived this morning from Paris, completing the first hop of 2,200 miles in 25 hours 27 minutes on their way to Buenos Ayres. Gus Siffert, prominently interested in mining at Stewart, is a passenger on the Catala today bound for Vancouver. Additional Telegraphic News will be found on Page 6.

#### PROPOSALS ARE DISCUSSED FOR PROVINCIAL AID IN SECURING PROTECTION OF SALMON IN B.C.

**Position of Japanese Outlined and Menace Foreshadowed Unless Definite Action is Taken to Prevent it**

VICTORIA, October 11.—Last Friday the support of the provincial government was asked for drastic reductions in salmon fishing operations by a number of B.C. canners. Premier MacLean received the delegation and listened sympathetically to their requests. The canners asked the provincial authorities to support their proposal to the Dominion government that it reduce drastically the number of fishing licenses issued on this coast and the amount of fishing gear used. The delegation thought that while Premier MacLean and Attorney General Manson were in Ottawa at the conference of provincial premiers they might be able to do something which would assist the fishing industry of B.C.

It was said that recent statements of government officials and many references to the subject in the press, not only in B.C., but throughout the Dominion have attracted public attention to the necessity for some action designed to conserve the salmon fishery of this province. The attitude taken by men well versed in the financial possibilities of the salmon fishing industries indicates that unless something of a very restricting nature shall be given legislative effect, a very fruitful source of commercial return will be denied to B.C. Experts suggest that unless this course of action is taken in the immediate future a capital investment of approximately \$30,000,000 will be wiped out. This means of course a serious menace to the employment of several thousand fishermen who at the present time depend almost entirely for their living on the salmon fishing industry. It is well understood that representations already have been made to both federal and provincial governments on behalf of the fishermen and canners, with a view to the obtaining of such restrictions as will preserve the industry.

#### PROTECTION FOR WHITES

**Cruiser Adelaide Sails From Melbourne on Request of British Government**

MELBOURNE, Australia, Oct. 11.—In response to a request from the British government that protection be given white residents on Maiana Island in view of the recent massacre of Commissioner Bell and others by natives, the cruiser Adelaide today hurriedly prepared to sail for the islands. It will also be understood that employees and employers alike not forgetting the business community, are vitally interested and concerned in the economic considerations that are involved in this industry. Apart from the fact that it is necessary to conserve the salmon fishing industry however, there is an international matter which demands consideration from both provincial and federal authorities. This is a racial question. Up to the present time, as far as the salmon canning industry is concerned, Japanese have been restricted to fishing. It is a matter of record, however, that up until 1922 the industry actually was dominated by the Japanese. Also, as a matter of record the government of Premier Mackenzie King, soon after it acquired office, appointed what is known as the Duff commission to investigate all the factors associated with the industry. This commission, it will be recalled recommended to the government that certain restrictions be placed on the activities of the Japanese and, as a matter of fact these recommendations were put into effect immediately afterwards and fishing licenses to Japanese were reduced by 40 per cent in number and the following year these were reduced by another fifteen per cent and the present regulations provide that Japanese licenses are to be reduced ten per cent per year until they are eliminated altogether.

#### SUTTON BUYS GULF ISLAND

VANCOUVER, Oct. 11.—Portland Island in the Gulf of Georgia has been purchased by General F. A. Sutton, the reported price being \$40,000. The island will be used as a pleasure resort. A golf course and yachting facilities will be provided.

#### DAUGHTER IS BORN TO BELGIAN CROWN PRINCE

BRUSSELS, Oct. 11.—Princess Astrid, daughter of the King and Queen of Sweden, wife of Crown Prince Leopold of Belgium, gave birth to a daughter today.

A recognized reward of merit

The Gruen Pentagon is chosen more often than any other watch to honor achievement—in business, the professions, and school or college life. Colonel Lindbergh, Vice-President Dawes—and hundreds of other famous men wear Gruen Pentagons. Come in and see this celebrated watch—today.

Our Pentagons are priced at \$75 to \$500

DAILY EDITION  Tuesday, Oct. 11, 1927

**BACK LOCAL INDUSTRY**

Prince Rupert people should back the local industry and insist that if licenses are to be distributed to the canneries, the Seal Cove cannery shall get its share. True, it did not operate for salmon last year but neither did Cunningham's. This industry is the only one of its kind in the city of Prince Rupert. Also if it is operated in the salmon canning it is likely to operate in canning clams and every little counts.—We want every industry we have and must as a city be willing to back those operated here.

**IMPORTANT CONVENTION**

The Conservative convention now in progress at Winnipeg is one of the most important gatherings of public men that has ever been held in Canada. The Conservative party is now in opposition and during such a period is the time to formulate policies and discuss affairs. The opposition has not the responsibility of a government. Its business is to oppose and criticize and to take a part in improving legislation which is being passed by the government forces. It looks for weaknesses instead of for strong points. Now and then, however, it has to forsake that policy and let the country know that it still is a constructive force. Therein lies the value of a convention. There it selects leaders, formulates policies and passes resolutions and the leaders from different sections meet each other and the rank and file meet the leaders. That mixing with fellow politicians is one of the important features of the gathering. They learn the necessity of mass action and get rid of provincialisms by rubbing up against their fellows.

**ALL SHOULD REGISTER**

Those residents of the city who are not registered property owners must register as householders if they wish to vote at the forthcoming election. The fact that they have paid their taxes does not entitle them to be on the list. There is more to do than that. They must appear before one of the city officials and make a declaration. It is a simple thing to do, but quite necessary. Possibly next January they may find they very much wish to vote but unless registered they cannot do so. The time to register is now. Today or tomorrow is the time, before it is forgotten.

**GOOD SUPPORT FOR LEADER**

Sir Robert Borden urged his fellow Conservatives to give good support to the leader when he is chosen. That is what some of the Conservatives of British Columbia seem not to have done. They urged Dr. Simon Fraser Tormie to take the position and then when he had commenced his work, there was a movement to unseat him and replace him with the former leader, W. J. Bowser. That smacks rather of the methods of the Mexicans. They are never satisfied and are always ready to change leadership. The only way to make a success of a party of any kind is to stick to a leader when he is chosen, unless he proves later that he has not the ability for the position. Dr. Tormie has as yet had little chance to prove himself. The weak spot in his leadership is that he is not in the Legislature and does not seem to be willing to risk his present position at Ottawa in order to assume his proper position in this province.

**SUPPORT RIDLEY HOME**

Support is being asked from the people of Prince Rupert for the Ridley Home. The place is different from anything else. It is simply a home to which children may be sent by parents residing outside the city, too far from schools to be able to take advantage of them. It also takes care of children who have no homes. It is self-sustaining, so far as the general upkeep is concerned, but the buildings are provided free of cost. Money is now being asked to provide new buildings in order that the scope of the institution may be extended.

The difficulty with the Ridley Home is that its work is carried on so quietly that many people hardly know that it exists and others do not understand what it is for. A visit to the cottages would be the best means of finding out about it. It is pretty sure that anyone who investigates will decide that this is something worthy of support.

A bachelor is bound to become self-centred because he has to sit at home and argue with himself.

Guard the children's health

**SHREDDED WHEAT**

Warmth for frosty mornings  
Protects against stormy weather  
Kind to little stomachs

**BUSINESS IN CANADA GOOD**

**Royal Bank Optimistic Over Present Situation Throughout Country**  
**BETTER THAN STATES**

**Employment in This Country Above Average and in U.S. it is Below**

The excellent wheat crop in the west is the outstanding factor in the Canadian agricultural situation. Alberta expects to harvest the largest crop in the history of the province, and the reports from Manitoba, Saskatchewan and Ontario are sufficiently favorable so that there is little question but that this year's crop will be nearly 100,000,000 bushels larger than that of 1926, fall wheat is now being planted and the farmers of Ontario apparently intend to plough twice as large an acreage as was ploughed in the fall of 1926.

Naturally, the prospect of good business in the farming districts is having a satisfactory effect upon wholesale and retail trade and manufacturing. The situation is exceptionally satisfactory.

The manufacturing situation is classified as excellent because a high level of activity prevails in almost every manufacturing industry in the Dominion. While the newsprint industry was working at higher capacity in 1926 than in 1927, the capacity of the industry has been much increased in the past year; production is increasing in Canada, and decreasing in the United States. Electric energy generated has attained new high levels during the year, but rapid expansion in this industry can no longer be considered exceptional in Canada. There might be some question as to the classification of the forest industry but for the fact that the bad times in the lumber industry have already been discounted and that the actual volume of business in 1927 is well ahead of that recorded in 1926. The continued low level of the price index of lumber and animal products is the only important unfavorable element in the general price situation.

The expansion in various lines of Canadian business which has taken place in the past few years may be measured in a number of ways; but to secure any very accurate picture of the per capita productive capacity of the country, it is necessary to have statistics showing the aggregate value of all the different products manufactured as well as the value of field and mine and forest products. Statistics of this type are not available until they are too old to be of much more than historical value.

**EMPLOYMENT**

On August, 1927, the Dominion Bureau of Statistics index number of employment for all industries reached 102.2—a new high level; the index of employment in manufacturing reached 93.9, the highest point since 1920. It is interesting to note that new high levels have also been attained recently in the employment indices for mining, transportation, construction, service and trade. On July 1, 1927, the United States Bureau of Labor statistics index of employment stood at 89.1.

Before an attempt is made to compare conditions in the United States and Canada, it is important to learn the meaning of these index numbers. The Canadian index number is a comparison of the volume of employment in the current month under discussion and that during January, 1920. The United States index number is a like comparison between the current month and the average volume of employment throughout 1923. In an effort to make a direct comparison between these two index numbers and to eliminate the seasonal factor from both indices, Professor Gilbert S. Jackson of the Economics Department of Toronto University compiled tables showing the average index number of employment by months in both countries from 1921 to 1925 inclusive.

**BETTER THAN U.S.**

According to these statistics, employment in Canada in August, 1927, was 13.7 above the average of the Augusts in 1921-1925, and employment in the United States was 2% below the average for these years.

From December, 1924, to the present time, there has been a steady and rapid rise in the level of employment in Canada, while from January, 1925, until July, 1927, the level of employment in the United States has not quite held its own.

It has been estimated that between 1919 and 1925, the number of wage earners in the United States in manufacturing industries declined 6.7%, while the quantity of manufactured products increased at least 25% in that period. On this basis it is estimated that output per worker increased 34% during that period.

It is difficult, if not impossible, to secure similar estimates concerning Canadian industrial production. Canadian industrial efficiency in 1919 was on a somewhat lower level than that which prevailed in the United States. Since that time, however, there has been a rapid increase in per capita use of electric power in Canada, and this would suggest that the increase in per capita manufacturing production in the past few years has been as great in Canada as in the United States. When the increased number of workers in industry is also considered, one has a remarkable basis for estimating the present level of Canadian manufacturing production.

Southbound from Alaska to Vancouver, C.P.R. steamer Princess Alice, Capt. Thomas Cliff, is due in port tomorrow afternoon.

**Man in the Moon**

LYING is a bad habit and truth telling is sometimes a vice when telling it injures your neighbor.

IT'S no wonder people do not believe in evolution in these days of speed.

BABE Ruth will be dropping out pretty soon and then I expect to get his place as the star knocker.

NEVER mind, children, Hallow E'en is coming pretty soon.

THERE'S a man down east who says he uses balloon tires because they are easier on pedestrians.

NATURALLY the dry bones of the tariff will be rattled a little at the big Winnipeg convention this week. How could a Tory party exist without a tariff?

ONE way to keep cookies and doughnuts safe from juvenile hands is to lock them in the pantry and hide the key under the soap on the washstand.

A PAPER down in New York published this: "John H. Dakin, from New York, is now in town. Factory experience enables him to do all kinds of repairing to both pianos and players."

**PROPOSALS ARE DISCUSSED FOR PROVINCIAL AID IN SECURING PROTECTION OF SALMON, B.C.**

(continued from page one)

are permitted at all. The important point to be considered in this connection, however, is the fact that the Japanese have placed their case in the hands of one of the leading lawyers in eastern Canada and this case shortly is to be placed before the Supreme Court of Canada for a decision. They are asking first for a declaration that the Dominion government has no power to discriminate as between British subjects in the issuance of fishing licenses, or alternatively that the Dominion government has no right to require anybody, whether he be naturalized or not, to take out a fishing license. In other words, that the right to fish shall be open to anybody and everybody who cares to fish.

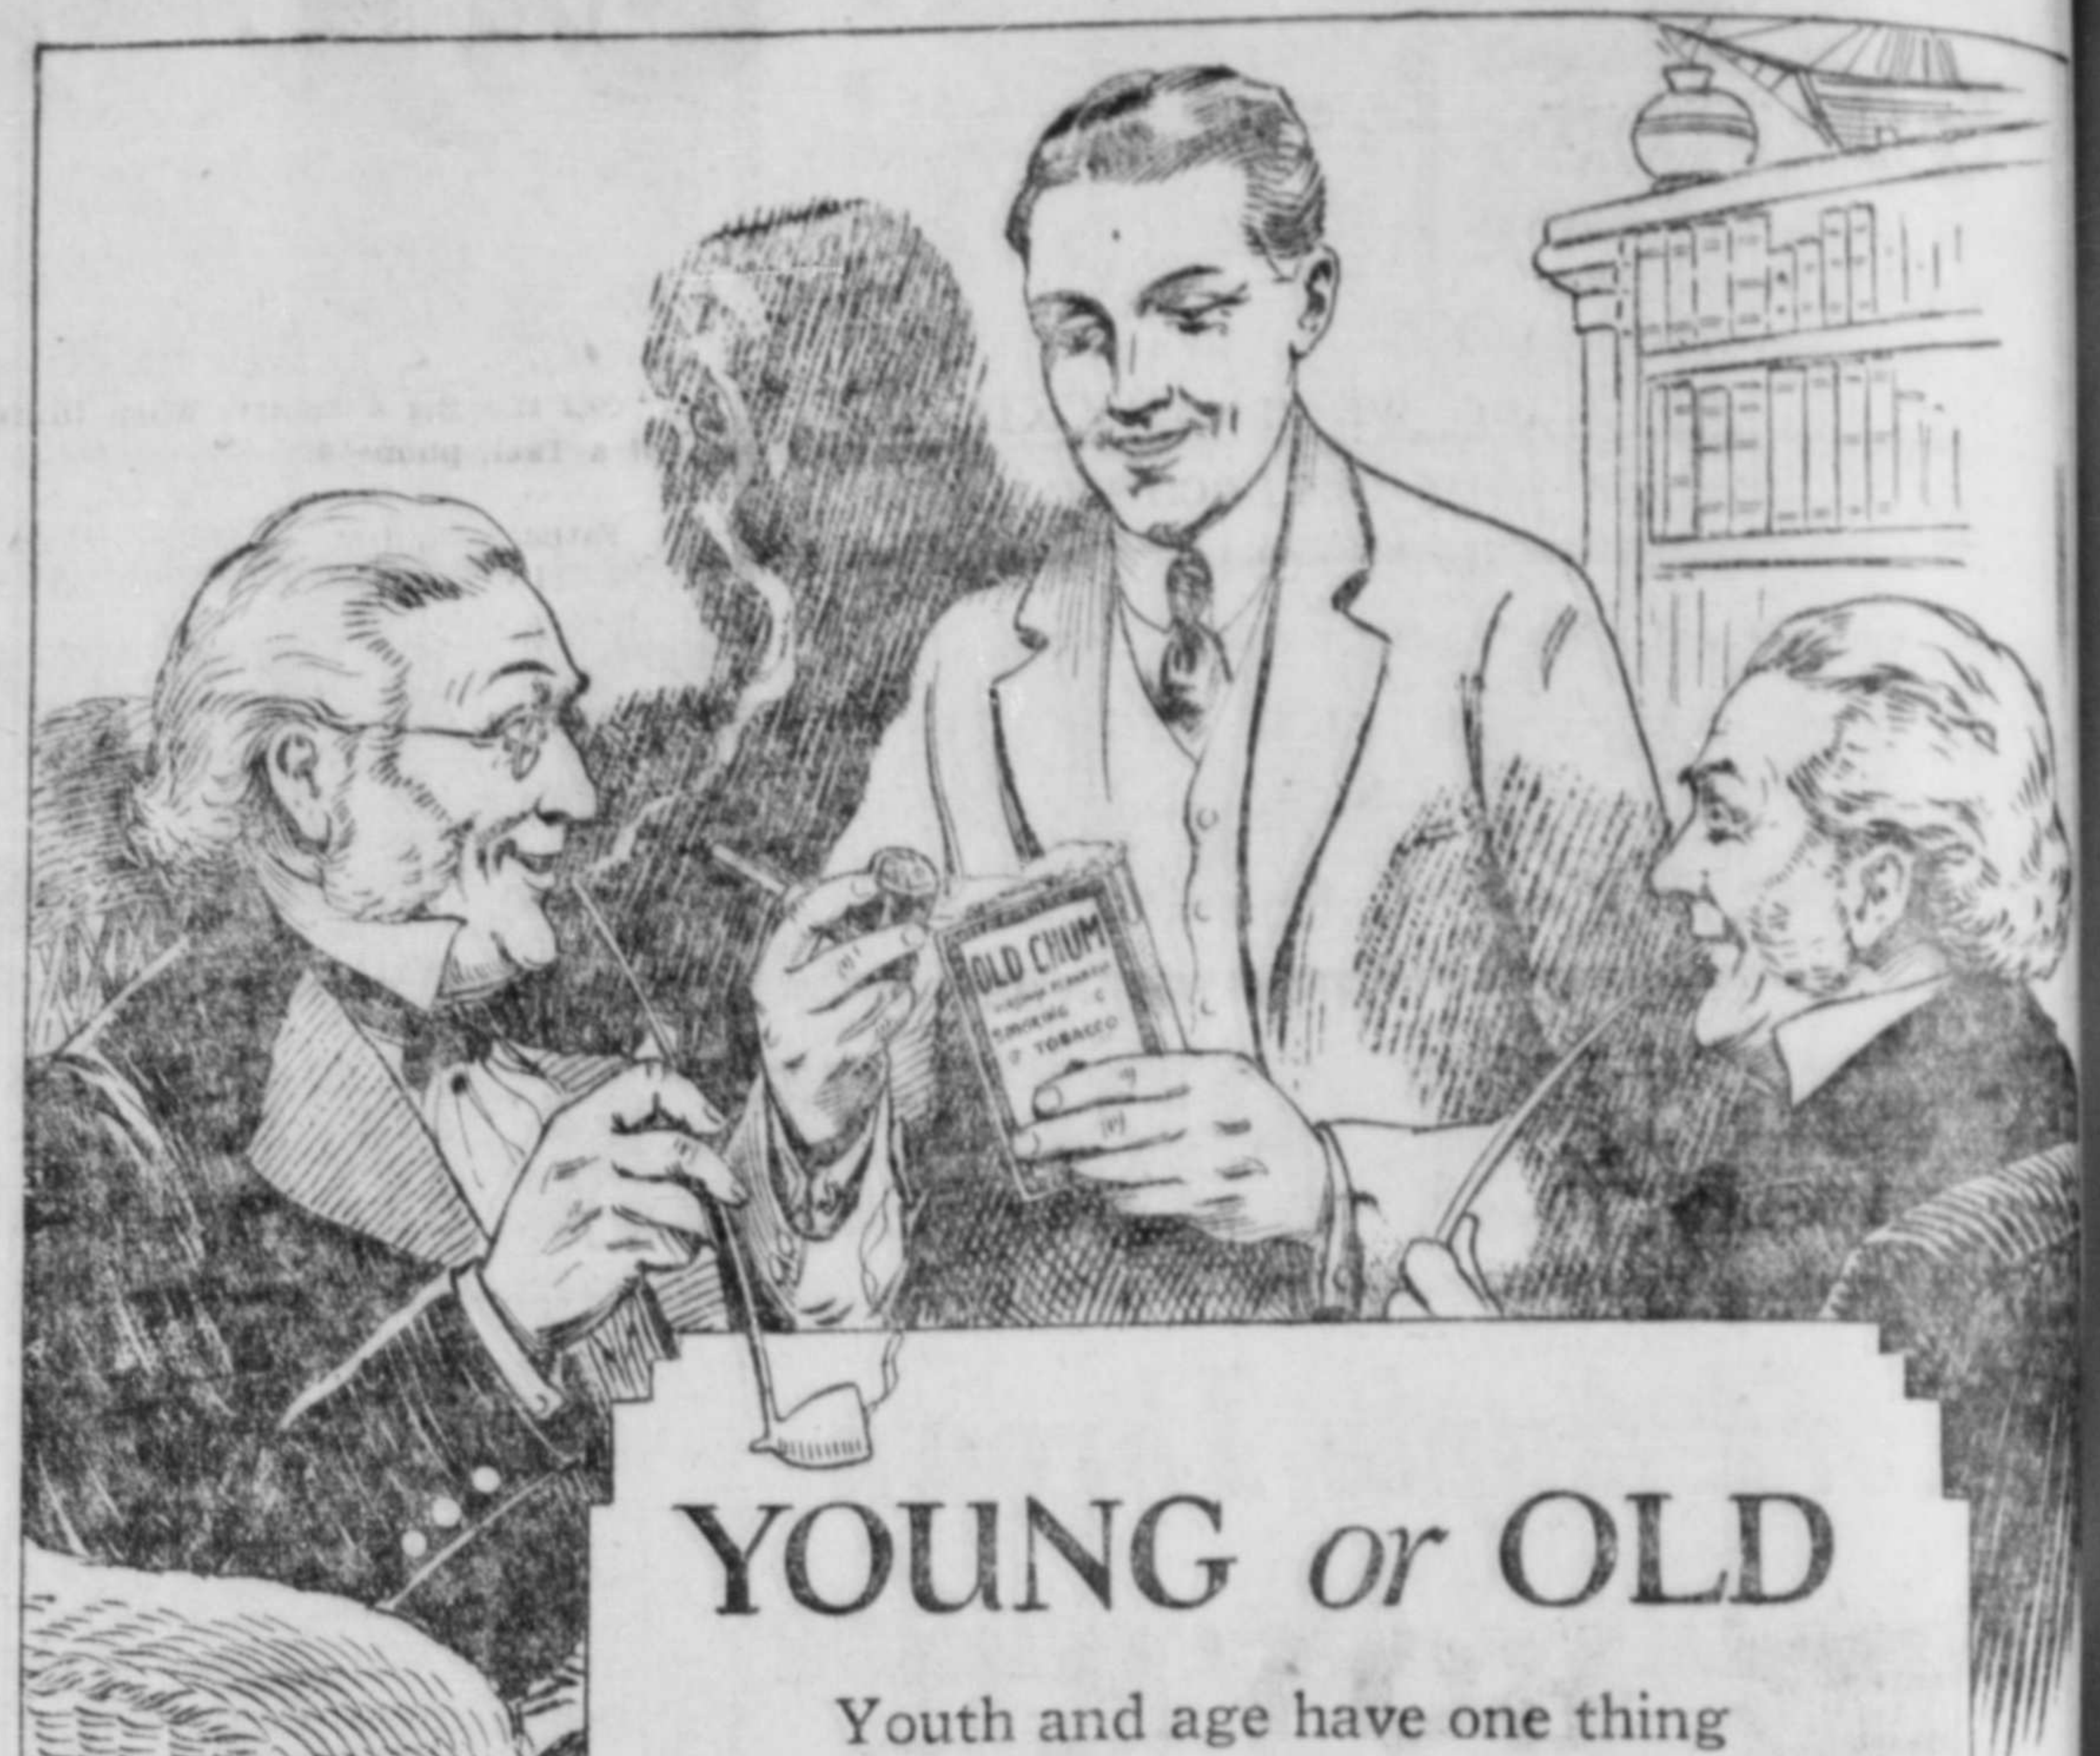

If the Japanese should win their case experts point out all that has been done in the past to make the salmon fishing industry to be a white man's industry will be wiped out and the Japanese within a very short space of time would be in possession of all the salmon fishing operations in B.C. According to the data gathered by the Provincial Bureau of Information 98 per cent of the Japanese who come to Canada stay in B.C. Apart from these considerations, it will be understood that Japanese workmen particularly in the fishing industry are content with standards of living and rates of wages which under no consideration would be satisfactory to the white man. This obviously makes it particularly difficult for the white man, the Canadian, to compete with the man from the Orient, and it also is well known that the Oriental is being brought and has been brought into Canada on the assumption that he works for a very low rate of wage with the understanding that his labor is being paid for by the promise eventually of Canadian citizenship, quite an important consideration.

**MUCH AT STAKE**

Incidentally at the present time regulations are in force whereby Japanese fishing operatives are not permitted to work in pilchard reduction plants and next year if regulations at present in force remain operative, no Japanese will be permitted to dry salt herring and operate salmon salting plants. If the Japanese are successful in their present campaign at Ottawa, however, it will be understood that these regulations will be disposed of completely.

Canning interests naturally are concerned about the outcome of these representations. They think and perhaps not without some reason, that there is a real danger of an important industry involving one of the great natural resources of B.C., passing out of the hands of the white man into the hands of the Japanese. They look upon this as a destruction of both considerable capital investment and a source of employment for the white man consequently they put much store upon the services which Premier Maclean and Attorney General Manson may render

when they are present in Ottawa next month to the cause of the salmon fishing industry and the fishing industry generally as far as the industry as a whole involves and concerns the white fishermen of this province.

**YOUNG or OLD**

Youth and age have one thing at least in common nowadays. They both agree on the wonderful quality of Old Chum Tobacco. Fragrant—mellow—rich in flavour and aroma, Old Chum makes as big a hit with young fellows in their first pipe-smoking years as it does with the oldsters.

And no wonder! Old Chum has stood the test of time.
