It is to be hoped that Mr. Brady will have some real suggestions "LADIES AT PLAY" to offer at Ottawa and that he will not fall into the habit that has characterized so many of the members of his political party of engaging in destructive criticism with nothing of real value to offer.

The electors of Skeena riding, whether they supported him or not at the September election, expect something more from Mr. Brady than futile criticism and useless verbosity. They hope that, now he is elected, he will be an asset to parliament and a champion for his district. On his record of sound counsel or concrete accomplishment will his fate depend if he should come back for re-election four years from now. QUEBEC NOT LETTING HER SONS MIGRATE.

One province, at least, Quebec, is taking very definite and practical steps to prevent her sons from migrating to the States. his article, "My Friend, Jean Baptiste," appearing in MacLean's Magazine for January 1, George Pearson outlines them and some interesting information about education methods in the province. He says:

"The government is interested not only in retaining within Quebec its sons, but in reclaiming those who have left, and it has marry. taken a lead in this respect that might well be adopted by the Federal Government and the other provinces. BUCK JONES HAS NEW BAG OF TRICKS IN "30 BELOW ZERO"

Western Ace Springs Some Hot Stunts in Felm of Snow Country

Buck Jones, whose latest picture, "30 Below Zero," will be seen at the Westholme Theatre tonight and tomorrow, could not hide the fact that he started his screen career as a "stunt man" even if he wanted to. Because with every succeeding picture he brings new thrills to the screen.

In "30 Below Zero," his latest Fox film, he abandons the horse and the good, solid earth for the thrills of the air when he embarks on a mammoth airplane headed for Arctic regions. For Buck has remained a stunt man even though he has soared to the heights of stardom.

He has always loved adventure though his bashful, diffident, slowmoving manner and drawling speech would fool anyone. Before entering motion poctures he was a daredevil strange and educated ways, in the "101 4 Ranch" show.

The Well-Managed Home

THE manager of a household is the purchasing agent for a large proportion of the family needs. In order to do a good job she must know what, when and where to buy. She must study goods and the concerns which make goods and have them to sell. She must put her home on a business basis and run it on business principles in order to make the most of the family income.

Information is the only basis for intelligent purchasing. And the right way to get the greatest amount of necessary information is to read the advertisements.

Advertisements tell you what is new and good in merchandise. They reveal improvements and inventions to make your home life easier, more comfortable and more convenient. They give you information about a thousand and one things that are useful.

Every manager of a household---every member of the household who shares the responsibility for the family's welfare---should make a habit of reading the ads.

Read the advertisements in order to buy wisely

WEATHER WAS NOT SO GOOD **DURING 1926**

YEAR WAS COOLER, RAINIER AND CLOUDIER THAN 1925-ONLY IM-PROVEMENT WAS LESS SNOW

Looking back over the weather during 1926 one finds that the year was a sunshine in 1925. The only point in which 1926 proved a better year from a pleasant weather standpoint was in the fact that there was less snow whereas there was more rain to make up for that. The year 1926 was better in most ways, however, than was 1924.

Rainfall during 1926 may be said to have been about average in amount. A total of 94.03 inches of rain fell as compared with 87.6 inches in 1925 and 103.16 inches in 1924. Snowfall during 1926 totalled 13 inches, all of which came in December, as compared with 34.9 inches in 1925. October was the rainiest month in 1926 and December was a close second, the total for the two months having been 12.86 and 12.39 inches respectively.

During 1926 there were 740.3 hours of bright sunshine as compared with about 1000 hours in 1925. The finest month, as usual, was September when there was only 1.09 inch of rain and

170 hours of sunshine. The warmest day of 1926 was August 25 when the thermometer went up to 82. The warmest day in 1925 was June 25 when 88 degrees was registered. The coldest days in 1926 were December 13 and 16 when the mercury registered 18 above. The coldest day in 1925 was
