Grain Rate to Prince Rupert Averages \$1.77 Lower Under the Reduced Railway Freights

Prince Rupert gets an export grain rate from Alberta averaging \$1.77 less than formerly since the reduction ordered by the Board of Railway Commissioners, but there is also a reduction to the Great Lakes. Duscussing this the Edmonton Journal says:

The proportion of grain going west will be larger and not smaller as a consequence of the recent rate judgment. Fears were expressed in Vancouver at the time that the Pacific route would suffer. There seemed to be no grounds for them and an analysis that has been made by the provincial traffic supervisor makes it clear

that the movement in that direction on the C.N.R. it is 1.77 cents. will be stimulated. The western route is thus the gainer

WHITE AND YELLOW Wu," Which Was Shown Here

Last Night, is to be Repeated Tonight

At ten years old, Wu, heir of a powerful Chinese family of high and ancient lineage, is sent to England to be educated so that he may learn the way of the white race and he will be wel equipped to fight the European invasion of China when he is a man. After fifteen lonely years he returns to China. now head of his family, since his venerable grandfather has gone to join the family ancestors. He marries, and his wife later dies, leaving him with daughter, Nang Ping.

The story proper opens with the revelation of a secret love affair between Nang Ping and a young Englishman, Basil Gregory, whose father has big business interests in China. To Basil the affair has been merely a charming episode. He has come to tell Nang Ping that he is going back to England with his people; and learns to his consternation that she is have a child. He brings his sister and parents to tea and during a conversation with Mrs. Gregory, Nang Ping realizes that no child of hers would be welcome to the white family. Basil, taken to task by Wu's old

Steens Limited

YOUR doctor will tell you that natural moisture in the air you breathe is necessary for good health. The "Hecla" is equipped with a patented circular pan designed to maintain the proper moisture in the home. Even distribution of clean warm air to all registers is assured by the special construction of radiator walls. No gas or dust leaks-real heating comfort with the "Hecla." The Patented Steel-ribbed Firepot has three times the heat radiating surface of the old style firepot. It is guaranteed for twenty years, and actual tests show that it saves 13%

to 15% of your fuel.

The Hecla Warm Air Furnace is famous for economy of fuel.

Clare's "Success" Warm Air Furnace is lower in cost and has some of the famous "Hecla" features.
