MINES OF INTERIOR MAKE PROGRESS

NEW BUILDINGS AT SEAL COVE MILL NEARLY COMPLETED

Mines of Topley Bid Fair to Become Important Producers and Work is Being Prosecuted

Three Different Properties Being Worked and Ore Prepared for Shipment to Smelter at Trail

TOPLEY, September 27.—This district has assumed a permanent place in the mining world today. Its rise has been meteoric but its permanence as a camp is assured. This is due largely to the big showing made at the mine discovered by Frank Taylor and now known as the Richfield Consolidated which was recently under option but which is now being developed by the company controlling it.

If this mine were everything Topley would be on the map, but it is not all. There are two other properties being worked and at least one of these will be shipping ore very soon.

PREPARING TO SHIP ORE

With values running from \$60 to several hundred dollars a ton on a showing of gray copper and silver lead ore little more than a mile south of the Richfield-Topley property where they made location last fall, Dave Heenan and Chas. Matheson of Hazelton are getting out ore with a view to shipping to the smelter at Trail this winter. Both men have worked hard and steadily all year and have a whole lot of work to show for their year's labor. The face at present is four feet wide, and their location adjoins the group of claims purchased last fall by Frank Taylor.

The Cup group of eight claims another mile south of the Richfield-Topley property is being developed by Matthew Sam who is finding some very good ore on the new discovery he has made.

RICHFIELD CONSOLIDATED

With every prospect of being one of the big producers of metalliferous ore in the very near future, work is being seriously prosecuted at the Topley-Richfield Consolidated property here. At the shareholders' meeting held in Smithers last week, the proposal of the directors that the Richfield property, formerly under bond to the Standard people be consolidated with that of the Topley Company and that the newly reorganized company's capital be increased to two million shares of fifty cents par value each was ratified. Application will be made immediately for a Dominion charter which will enable the company to dispose of its shares in every province in Canada should that be necessary.

At the mine, work on the preparing of foundations for the new Petters compressor plant which will carry three air drills is proceeding steadily. This new plant has been purchased and shipped and should arrive at Topley within a few days. With the installation of power, the shaft and tunnel will be unwatered and underground development will be proceeded with right away. Already there are some eight hundred feet of underground working and half of this is in ore. The last shot put in by the Standard Company before they left the property, disclosed a twelve inch vein of high grade ore running 360 ounces of silver, \$16.60 in gold and 23 per cent lead, in a six foot ledge averaging 47 ounces silver and \$8 in gold. The first work will be to drift on this vein after the installation of power, and three shifts will be worked, giving maximum twenty four hour production.

Development work will be accomplished very economically on this Richfield-Topley property; the tunnel to be driven being in ore, which material even if barren would have to be removed in any case. The eight mile road to the railroad is practically all downhill and there is already enough hand sorted ore on the dump to give a return load to every team bringing in supplies. So soon as may be regular shipments will be made to the smelter at Trail.

DOG FISHING IS STARTING

Six or Seven Trolling Outfits to Commence Operations in Edye Pass Immediately

Six or seven trolling outfits are leaving shortly for the vicinity of Edye Pass to engage in dogfishing for the Rupert Marine Products Co. Ltd. which will use the fish for reduction purposes in its plant at Tucks Inlet it was announced this morning by George G. Bushby, head of the concern. The company will maintain a collecting scow and tugboat in Welcome Harbor near the Patterson Mine. Mr. Bushby announced that \$7.50 a ton was to be paid for the fish.

Later in the season it is also hoped to interest halibut fishermen in this fishery with a view to having a constant supply to keep the Rupert Marine Products plant in operation throughout the winter.

APPEALS HAVE BEEN ENTERED

Fisheries Department Pressing Cases Against Fishermen Recently Dismissed at Ocean Falls

Acting on behalf of the Dominion Fisheries, W. O. Fulton filed in County Court yesterday notice of appeal in connection with six cases wherein Stipendiary Magistrate George H. Hill of Ocean Falls recently dismissed six Bella Coola fishermen on charges of fishing during the closed season which was emerently called about three weeks ago. The department is not satisfied with the reason given by Magistrate Hill for the dismissal that sufficient notice had not been given of the close season. The appeals will be heard during the October court.

FISHING IMPROVEMENT ON QUEEN CHARLOTTES

All Canneries are now Engaged in Putting up Chunks and a few Cohoes

Considerable improvement in the salmon run on the Queen Charlotte Islands is reported. Canneries at Massett, Alford Bay, Lagoon Bay and other points are engaged in putting up chunks and some cohoes. The success or otherwise of fishing during the next two weeks will spell whether the pack is to be a fair one or little more than a failure.

WILSON IS NEW TEACHERS' HEAD

Miss E. A. Mercer, Vice-President, and W. W. C. O'Neill Secretary of Local Body

The Prince Rupert branch of the British Columbia Teachers' Federation had its annual meeting last night in the Booth Memorial School. The gathering was well attended and enthusiastic.

The election of officers resulted as follows:

President—J. S. Wilson.
Vice-President—Miss E. A. Mercer.
Secretary-Treasurer—W. W. C. O'Neill.
Executive—Miss Jessie Rothwell, Mrs. K. Mackay, Miss A. A. Pierce and G. H. Stocks.

Convenor of Refreshment Committee—Mrs. B. Walker.

The program of winter subjects for monthly meetings was discussed and the matter of a district convention was referred to the executive.

Miss E. P. Grassie played much appreciated piano selections and J. S. Wilson sang solos as well as leading in community singing. Accompanists were Miss E. A. Mercer and Miss Halliwell. Refreshments were served at the close of the meeting.

STIFF GALE SENDS SMALL VESSELS FOR REFUGE IN HARBORS

Forty Miles an Hour This Morning at Digby Island and Thirty During Night

Wireless despatches state that a heavy gale has been blowing along the north coast and has been sending small craft to the harbors for refuge. The tug Pacific Monarch towing the barge Bayside is weather bound at Safety Cove and the Salvage Princess is storm bound at Banks Island.

The meteorological station at Digby reports that during the night there was a steady thirty mile gale increasing this morning to 42 at the peak and blowing regularly at about forty miles.

URGES IMPORTANCE OF THE MUSEUM TO CITY

Visitor from Scotland Takes Keen Interest in Local Institution

Among the week end visitors to the city was Victor T. Hodgson, honorary secretary of the West Highland Museum at Fort William, Invernesshire, Scotland. He took a great interest in the local museum and urged its importance to the city as a tourist attraction, once it became large enough to make it possible to provide proper housing for it.

Mr. Hodgson was keenly interested in the preservation of Indian names, historical buildings and associations. While here he interviewed several members of the museum board and urged upon them the importance of the work they were doing.

FINANCIAL POSITION OF EXHIBITION WILL SOON BE DETERMINED

The Fair Board is now engaged in cleaning up loose ends in the matters of bills payable and collections still receivable with a view to having a meeting within a week's time when the financial results from the 1927 Exhibition will be definitely determined.

It has been practically assured that there will have been a surplus from this year's operations and it is hoped that there may be a surplus to be applied toward the liquidation of last year's deficit.

NEW BUILDING FOR VICTORIA IS BEGUN

VICTORIA, Sept. 27.—Construction of a brick and concrete building for J. S. H. Matsen has been commenced on Courtney Street by Lumey Bros. Ltd., which firm was awarded the contract at a figure of approximately \$11,000. It will occupy the site of a livery barn erected about forty years ago and which was recently torn down to make way for the new structure.

BISHOP GEORGE O. ARUNDALE, Liberal Catholic prelate of India, and his wife, Mrs. Rukmin Arundale, an Indian woman of high caste, shown on their arrival in New York for a three month's lecture tour

NEW PLANT SEAL COVE

New Buildings Will Soon be Finished for Lumber Mill

Reporting on the progress of work in connection with the establishment of the new sawmill at Seal Cove on the site of the old Prince Rupert Spruce Mills, George McAfee, manager of the Big Bay Lumber Co., stated this morning that it was expected that the buildings would be finished as far as the contractors, Mitchell & Currie, were concerned, by October 10. Then will commence the installation of machinery and it is expected that the new plant, having a daily single-shift capacity of from 40,000 to 50,000 feet, will be in operation, as per original plans, not later than March 1.

The most imposing building will, of course, be the mill building itself which measures 40 by 200 feet. Smaller buildings will be the steam plant, machine shop and boiler house which are now up and the planing mill on which a start is yet to be made.

C. McRae is supervising the construction of the new plant.

HENRI BOURASSA TO SPEAK AT EDMONTON

EDMONTON, Sept. 27.—Long known as the stormy petrel of Canadian politics and one of the leading orators of the Dominion, Henri Bourassa, M.P., will address a public meeting in the Pentages Theatre on Saturday evening, October 6, under the auspices of the Native Sons of Canada. The announcement of arrangements for the address was made at a meeting of the local organization.

As Mr. Bourassa is to address the Canadian Club on the following Monday, it is not known yet what subject he will deal with at the public meeting. It is expected that this will be either "The Natural Resources" or "Canadian Problems in General."

NOT SEA SERPENT BUT SOME OTHER CREATURE SEEN MORESBY ISLAND

SKIDEGATE, Sept. 27.—The skipper and crew of the salmon seiner Waterfall report that while travelling outside of Tasseo Harbor, Moreby Island, they saw a huge creature travelling on the surface of the ocean. It had huge wings or fins just back of its head and was planing on the surface with these wings when Skipper H. Whitehead and his crew saw it.

COURSE OF EASY SAILING IS NOW COUNCIL'S SIGHT

With the railway taxation agreement now safely ratified by the people, prospects are that the city council will have a course of easy sailing from now until the end of the year. Nothing of a contentious nature seems to be now in sight for its consideration although obstacles may yet arise. The council will be in session again next Monday when one of the matters for consideration will be the final ratification of the taxation agreement with the railway.

BIG DRAWING TO BE HELD FOR BENEFIT NANAIMO HOSPITAL

In the form of a big drawing with first prize of \$5,000 and other corresponding prizes down the line, the hospital board of the city of Nanaimo, having failed in its efforts to raise the sum of \$35,000 necessary for the completion of a fine new hospital there, is now appealing to the people of the province for money needed.

MINISTER AT EDMONTON

EDMONTON, Sept. 27.—Hon. J. A. Robt, minister of finance, is expected to arrive here Thursday of this week and will be entertained jointly by the Board of Trade and the Rotary Club.

Saunders Tells of His Plans for a Mill on Ecstall River; Expects to Close Deal Today

An investment of at least \$1,500,000 is involved in the sawmill and pulp mill which he proposes to establish on the Ecstall River, a tributary of the Skeena near Port Essington, states H. Saunders of Hamilton, Ontario, who is in the city to close a deal with James A. Brown, pioneer sawmillman, for the purchase of the site. Mr. Saunders stated that he expected the transaction would be completed by this afternoon or tomorrow. It will probably take two years to build the plant.

Mr. Saunders contemplates proceeding immediately the deal is closed, with the erection of a 50,000 foot a day sawmill and a pulp plant having an output of 100 tons per week. Grinders and beaters will be used in manufacturing the pulp as acids cannot be employed in fishing waters such as these. One beater will be installed at first and it is expected about one hundred men will be employed this winter on construction work.

The plant will be entirely waterdriven and a generator will be installed deriving its power from Brown's River at the confluence of which with the Skeena River the site of the new plant is located.

Part of the old Brown's mill will be used in the construction of the new sawmill. Mr. Saunders, who is financing the project, will personally supervise construction. The pulp mill will be built on the unit system so that it can be added to. As a matter of fact, Mr. Saunders contemplates the construction of an extra beater each year until a total of five have been installed. Something in the neighborhood of 300 men will be eventually employed in the mill when it gets under operation.

Logs to be used in the plant will be towed to the mill from the Skeena River and various parts of the coast, Mr. Saunders already having arranged for his limits. The output will be towed to Port Essington on scows and shipped from that point.

Mr. Saunders states that he has been working on plans for the project for several months.

FISH ARRIVALS

Total of 52,500 Pounds of Halibut Sold at Exchange This Morning

A total of 62,500 pounds of halibut was sold at the Fish Exchange this morning, two American vessels disposing of 15,600 pounds for 16c and 7c and 16.6c and 7c, while five Canadians sold 47,500 pounds for bids ranging from 14.6c and 6c to 15.4c and 6c.

Arrivals and sales were as follows:

American
Tahoma, 2,000 pounds, Canadian Fish & Cold Storage Co., 16c and 7c.

Road Amundsen, 12,000 pounds, Canadian Fish & Cold Storage Co., 16.6c and 7c.

Canadian
Alken, 10,000 pounds, Booth Fisheries, 14.6c and 6c.

Morris H., 7,500 pounds, Royal Fish Co., 15.1c and 6c.

Scrub, 15,000 pounds, Canadian Fish & Cold Storage Co., 15.4c and 6c.

Edward Lippett, 8,000 pounds, Atlin Fisheries, 14.8c and 6c.

Margalice, 7,000 pounds, Booth Fisheries, 14.8c and 6c.

Under the Canadian law, however, no distribution on stock can be considered as from capital as long as a single bond is outstanding. Therefore any distribution to be non-taxable will have to be deferred until the first of May next year when the \$600,000 first mortgage comes due and are paid.

British Columbia, where the company is incorporated, has tax laws no less onerous than those existing in this country, says a Boston report. Dividends of \$4 per share per annum paid from earnings by the Granby Co. would be subject to British Columbia tax of over \$220,000. As in the United States, distributions paid from capital, however, are not taxable.

Under the Canadian law, however, no distribution on stock can be considered as from capital as long as a single bond is outstanding. Therefore any distribution to be non-taxable will have to be deferred until the first of May next year when the \$600,000 first mortgage comes due and are paid.

VENIOT TELLS OF FINANCES

Postoffice Expected to Lose Five Million But This Reduced to Two

WINNIPEG, Sept. 27.—Addressing young French Canadians here yesterday Hon. P. J. Veniot, postmaster general, said it had been expected when a reduction was made in postal rates that there would be a deficit of \$5,000,000 in the fiscal year but, owing to increased business, the deficit had not been more than \$2,000,000.

The revenue for the first five months of the present fiscal year was approximately a million more than for the same period a year ago. Expenses had increased owing to the furnishing of additional service by about \$400,000, of which salaries to employees due to statutory increases and reclassification of the civil service commission were responsible for \$240,000.

DAILY EDITION

Tuesday, Sept. 27, 1927

SIMELTER FOR DISTRICT

A despatch from Victoria to the Vancouver Province states that it is believed the Consolidated Mining & Smelting Company which is controlled by the C.P.R. and which recently acquired three properties in the Portland Canal district will build a smelter at some point on the coast. Where its location is to be no one can state, but doubtless the point chosen will be the best from an economic viewpoint. The Trail smelter has been a great success and there is no good reason to think any other smelting industry established by the same people would not also succeed. Nothing succeeds like success.

Some people are inclined to connect this move with the visit to Stewart of J. G. Sullivan, who has been looking over the Mackenzie and Mann Railway at Stewart which is for sale. The C.P.R. has made investigations in the district before and it is possible that the scheme of the Consolidated may be connected with this venture. There are also some people who think they see a possibility of the C.P.R. building through from Peace River to Stewart under a Dominion and provincial subsidy but that is a big venture and hardly looks like a present possibility.

PRINCE RUPERT AS SITE

Prince Rupert has often been mentioned as the best possible site for a smelter. Located here it would serve not only the Portland Canal district and part of Alaska but also it would be able to handle more economically than anyone else the product of the mines of Hazelton, Smithers, Topley and the Babine country. Such an institution would give an immediate impetus to mining both in the interior and at the coast and a big industry would undoubtedly develop.

The visit of Lorne Campbell to this city a year or two ago when he inspected the power possibilities of the Ecostall River is possibly connected with this move. At that time it was announced that Mr. Campbell was interested in mining more than anything else.

COMBINE POWER AND SMELTING

It has been suggested that the establishment of a smelter in this neighborhood, say at Port Edward, would mean the development of power at the Ecostall River and that this might be combined with a proposal to sell power to the citizens of Prince Rupert; that the optioning of the mill and power concession at Brown's River is connected with the same scheme; that in fact, Prince Rupert is on the verge of great development. These are more or less guesses but they are interesting as indicating a trend of thought. If there is anything Prince Rupert can do to advance any development scheme, it is pretty sure she would be ready to do it. She has shown a desire of late to co-operate.

The activities of the old power company in making proper surveys and preparing to dispose of their interests all point to some possibility of move here. People do not spend a lot of money on surveys, options, and investigations unless they have an idea of doing something. It is to be hoped that this something will soon take concrete form and that in the near future there will be industrial activity in this neighborhood.

NEW MAP OF ISLANDS

Of late considerable attention has been drawn to the Queen Charlotte Islands as a field for development and the department of lands under the member for this district has had prepared a new and complete map of the islands giving complete information in regard to the industries, the character of the country, the surveys already made and practically everything of interest in connection with this important section of British Columbia. It is understood the maps can be obtained from the department.

Good advice helps but it won't pay for a meal at a restaurant.

A new Gruen Cartouche in solid gold—\$40!

Here is truly remarkable watch value! A dainty wristlet, newly created by Gruen, with an adjusted movement cased in 14kt. solid white gold—at half the price you'd expect to pay for such a watch.

As a gift or a watch for your personal use, no more satisfactory watch purchase could possibly be made at this price. See these remarkable timepieces at our store—today!

DARWIN THEORY IS DEFENDED

Presidential Address Before British Association Tells of Discoveries
SIMPLY STATES FACTS

Sir Arthur Keith Does Not Make Any Special Plea But Says Let Truth Speak

More complete reports of the proceedings of the British Association are now to hand and the London Times publishes the following account of the leading paper of the great annual scientific gathering, the presidential address of Sir Arthur Keith:

"Fifty-six years have come and gone since 'The Descent of Man' was written; an enormous body of new evidence has poured in upon us. We are now able to fill in many pages which Darwin had preferred to leave blank, and we have found it necessary to alter details in his narrative, but the fundamentals of Darwin's outline of man's history remain unshaken. Nay, so strong has his position become that I am convinced that it never can be shaken.

"Why do I say so confidently that Darwin's position has become impregnable? It is because of what has happened since his death in 1882. Since then we have succeeded in tracing man by means of his fossil remains and by his stone implements backwards in time to the very beginning of that period of the earth's history to which the name Pleistocene is given. We thus reach a point in history which is distant from us at least 200,000 years, perhaps three times that amount. Nay, we have gone farther, and traced him into the older and longer period which preceded the Pleistocene—the Pliocene. It was in strata laid down by a stream in Java during the latter part of the Pliocene period that Dr. Eugene Dubois found, ten years after Darwin's death, the fossil remains of that remarkable representative of primitive humanity to which he gave the name Pithecanthropus, or Ape-man: from Pliocene deposits of East Africa Mr. Reir Moir has recovered rude stone implements. If Darwin was right, then as we trace man backwards in the scale of time he should become more bestial in form—nearer to the ape. That is what we have found. But if we regard Pithecanthropus with his small and simple yet human brain as a fair representative of the men of Pliocene period, then evolution must have proceeded at an unexpectedly rapid rate to culminate today in the higher races of mankind.

A "ZIG-ZAG" DESCENT

"The evidence of man's evolution from an ape-like being, obtained from a study of fossil remains, is definite and irrefutable, but the process has been infinitely more complex than was suspected in Darwin's time. Our older and discarded conception of man's transformation was depicted in that well-known diagram which showed a single file of skeletons, the gibbon at one end and man at the other. In our original simplicity we expected, as we traced man backwards in time, that we should encounter a graded series of fossil forms—a series which would carry him in a straight line towards an anthropoid ancestor. We should never have made this initial mistake if we had remembered that the guide to the world of the past is the world of the present. In our time man is represented by many and diverse races—black, brown, yellow, and white, some expanding, others disappearing. Our searches have shown that in remote times the world was peopled, sparsely it is true, with races showing even a greater diversity than those of today, and that already the same process of replacement was at work. To unravel man's pedigree, we have to thread our way, not along the links of a chain, but through the meshes of a complicated network.

"As in our search for man's ancestry we expected to reach an age when the beings we should have to deal with would be simian rather than human, we ought to have marked the conditions which prevail amongst living anthropoid apes. We ought to have been prepared to find, as we approached a distant point in the geological horizon, that the forms encountered would be as widely different as are the gorilla, chimpanzee, orang, and confined, as these great anthropoids now are, to limited parts of the earth's surface. That is what we are now realizing; as we go backwards in time we discover that mankind becomes broken up, not onto separate races as in the world of today, but into numerous and separate species. When we go into a still more remote past they become so unlike that we have to regard them not as belonging to separate species but different genera. It is amongst this welter of extinct fossil forms which strew the ancient world that we have to trace the zig-zag line of man's descent.

ORDERLY CHANGE

"We expected that man's evolution would pursue not only an orderly file of stages but that every part of his body—skull, brain, jaws,¹ teeth, skin, body, arms, and legs—would at each stage become a little less ape-like, a little more man-like. Our searches have shown us that man's evolution has not proceeded in this orderly manner. In some extinct races, while one part of the body has moved forward another part has lagged behind....

"There still remain great blanks in the geological record of man's evolution. As our search proceeds these blanks will be filled in.... All the evidence now at our disposal supports the conclusion that man has arisen, as Lamark and Darwin suspected, from an an-

thropoid ape not higher in the zoological scale than a chimpanzee, and that the date at which human and anthropoid lines of descent began to diverge lies near the beginning of the Miocene period. On our modest scale of reckoning, that gives man the respectable antiquity of about one million years.

"Our geological search has not produced so far the final and conclusive evidence of man's anthropoid origin; we have not found as yet the human image emerging from its anthropoid enclosure. Why, then, do modern anthropologists share the conviction that there has been an anthropoid stage in our ancestry? I must touch on the sources of this conviction only in a passing manner. Early in the present century Professor G. H. F. Nuttall, of Cambridge University, discovered a trustworthy and exact method of determining the affinity of one species of animal to another by comparing the reactions of their blood. He found that the blood of man and that of the great anthropoid apes gave almost the same reaction. Bacteriologists find that the living anthropoid body possesses almost the same susceptibility to infections, and manifests the same reactions, as does the body of man. So alike are the brains of man and anthropoid in their structural organization that surgeons and physiologists transfer experimental observations from the one to the other. When the human embryo establishes itself in the womb it throws out structures of a most complex nature to effect a connexion with the maternal body. We now know that exactly the same elaborate processes occur in the anthropoid womb and in no other. We find the same vestigial structures—the same 'evolutionary postmarks'—in the bodies of man and anthropoid. The anthropoid mother fondles, nurses, and suckles her young in the human manner. This is but a tithe of the striking and intimate points in which man resembles the anthropoid ape. Is what other way can such a myriad of coincidences be explained except by presuming a common ancestry for both?

HUMAN BRAIN AND MIND

"The crucial chapters in Darwin's 'Descent of Man' are those in which he seeks to give a historical account of the rise of man's brain and of the varied functions which that organ subserves. How do these chapters stand today? Darwin was not a professional anatomist and therefore accepted Huxley's statement that there was no structure in the human brain that was not already present in that of the anthropoid. In Huxley's opinion the human brain was but a richly annotated edition of the simpler and older anthropoid book, and that this edition, in turn, was but the expanded issue of the still older original primate publication. Since this statement was made thousands of anatomists and physiologists have studied and compared the brain of man and ape; only a few months ago Professor G. Elliot Smith summarized the result of this intensive inquiry as follows: 'No structure found in the brain of an ape is lacking in the human brain, and, on the other hand, the human brain reveals no formation of any sort that is not present in the brain of the gorilla or chimpanzee.... The only distinctive feature of the human brain is a quantitative one.' The difference is only quantitative, but its importance cannot be exaggerated. In the anthropoid brain are to be recognized all those parts which have become so enormous in the human brain. It is the expansion of just those parts which has given man his powers of feeling, understanding, acting, speaking, and learning.

"Darwin himself approached this problem not as an anatomist but as a psychologist, and after many years of painstaking and exact observation succeeded in convincing himself that, immeasurable as are the differences between the mentality of man and ape, they are of degree, not of kind. Protracted researches made by modern psychologists have but verified and extended Darwin's conclusions. No matter what line of evidence we select to follow—evidence gathered by anatomists, by embryologists, by physiologists, or by psychologists—we reach the conviction that man's brain has been evolved from that of an anthropoid ape, and that in the process no new structure has been introduced and no new or strange faculty interpolated."

NO FINALITY YET

The President, continuing, said that finality had not yet been reached and that many issues had not yet been made clear. We did not know why the brain of man had made so much progress while that of his cousin the gorilla had lagged behind, although, as Sir Ray Lankester had

pointed out, the Miocene period was marked by a rapid increase in the size and complexity of the brains of many vertebrates. The production of new types in the animal kingdom might possibly receive a partial explanation in the modification of the internal secretions known as hormones.

"Was Darwin right when he said that man, under the action of biological forces which can be observed and measured, has been raised from a place amongst anthropoid apes to that which he now occupies? The answer is Yes and in returning this verdict I speak but as foreman of the jury—jury which has been empanelled from men who have devoted a lifetime to weighing the evidence. To the best of my ability I have avoided, in laying before you the evidence on which our verdict was found, the role of special pleader, being content to follow Darwin's own example—Let the truth speak for itself."

A harvest of happiness

There's a whole harvest of pipe-happiness to be reaped from Old Chum!

Experienced smokers know that the famous Old Chum quality never varies and many have smoked it daily for over forty years. It is Canada's most popular tobacco.

Valuable presents are offered in exchange for the "Poker Hands" in every package and tin.

The large 25c. package contains two "Poker Hands"

WATER NOTICE.**DIVERSION AND USE**

TAKE NOTICE that E. Rousseau, whose address is 410 Seymour Street, Vancouver, B.C., will apply for a licence to take and use 1 cubic foot of water out of unnamed stream which flows southwardly one mile east of Bluff Point. The water will be diverted from the stream at a point about 500 feet from the mouth and will be used for commercial purposes upon the lands described as Lot 2750, Range 4, Coast District. This notice was posted on the ground on the 26th day of July, 1927. A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed in the office of the Water Recorder at Prince Rupert, B.C. Applications to the application may be filed with the Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is August 20, 1927.

EUGENE ROUSSEAU,
Applicant.

LAND ACT.**NOTICE OF INTENTION TO APPLY TO LEASE LAND**

In Queen Charlotte Islands Land Recording District of Prince Rupert, and situated at Jedway Harbor, Moreby Island.

TAKE NOTICE that Millerd Packing Company, Limited, of Vancouver, B.C., occupation Packers, intends to apply for a lease of the following described lands: Commencing at a post planted at the northeast corner of Lot 88, Q.C.I.; thence northwesterly and along high water mark 18 chains, more or less, to a point N. 56° 37' E. from the N. 56° 37' E. line, thence N. 56° 37' E. 18 chains, more or less to low water mark, thence southeasterly along low water mark to a point N. 56° 37' E. from the location post; thence 22 chains, more or less, to the point of commencement, and containing 5 acres, more or less.

Neglected Eyes

NEGLECT is doubtless the cause of most of the ills that afflict humanity. This is so self evident that it seems hardly necessary to tell you. If your eyes are giving trouble, have them attended to—and at once.

OF ALL absurdities in the kingdom of foolishness, surely the loss of eyesight through neglect is the most inexcusable.

DON'T lose health and efficiency through neglect. Come and see!

WOMEN'S AUXILIARY HEARS REPORT FROM DELEGATE TO VICTORIA

The regular monthly meeting of the women's auxiliary to the Prince Rupert General Hospital was held yesterday, the business being largely of a routine character.

The report of the delegate to the B.C. Hospitals Convention, Mrs. R. C. Parsons, was received. Mrs. Parsons reported that representatives of 69 provincial hospitals and many private institutions were present and other auxiliaries were very enthusiastic about the work. It was said that a number of the smaller hospitals would find it very difficult to carry on without their help.

On Friday afternoon the Lieutenant-Governor attended the session and brought British Columbia's greetings. He spoke of the people's growing gratitude to those who were doing so much for the relief of suffering humanity. He then invited the delegates to tea at Government House where they were entertained by Miss Mackenzie. As the local delegate was presented the Lieutenant-Governor expressed pleasure at meeting the Prince Rupert delegate.

In the course of the convention there were lectures by leading medical men and useful suggestions from other auxiliaries and matrons of hospitals that were in attendance.

After hearing the report and thanking the delegate, the local auxiliary made arrangement for the annual Holloween Ball which will be held this year on Friday, October 28.

HOTEL ARRIVALS.

Prince Rupert

Dr. and Mrs. Large and child and S. Wilson, Port Simpson; George McAfee, Georgetown; W. F. Trant and F. Gordon, Vancouver; George E. Pierce, Hamilton, Ont.; Mrs. James Richmond, Terrace; J. F. Ellis, A. Smith and W. Salisbury, Sunnyside; Mrs. Clara Coates, Anyox; George A. Barnes and Kenneth C. McCannel, Victoria; D. T. Lutes, Lowe Inlet; H. Saunders and J. E. Cote, Port Essington.

Savoy

John Matson, Porcher Island; M. Cain, Smithers; W. H. Thorne, D. Morrison and R. Goodfellow, C.N.R.; Mr. and Mrs. D. Ashwood, and Gua Elstrom, Port Edward; E. Clements, Prince Rupert; Olof Ouse and James A. Wauchope, Jap Inlet; Mr. and Mrs. G. Wouden and F. Marshall, Inverness.

Central

J. Watt, Sunnyside; F. H. Nelson and A. Haut, Seattle.

Vanderhoof

Cecil Steele has sold his racing mare, Nellie B., which won the free-for-all at the Vanderhoof Diamond Jubilee celebration, to Cline Dexter of Telkwa.

News has been received here of the death in California of Elton Myers, former employee of J. M. Johnston's store, who had gone south to finish his high school education but who was stricken with heart failure.

Mr. and Mrs. E. A. Mitchell announce the recent marriage in Edmonton of their eldest daughter Margaret Aleita, to Gilbert Francis Wilks. Mr. and Mrs. Wilks are residing in Vancouver where the groom is a member of the staff of the Canadian Bank of Commerce.

Word has been received here of the recent wedding in Vancouver of Miss Joyce Ruttan, who spent her school days in Vanderhoof, and J. R. Morrison.

Miss M. Bowman spent a few days in town last week on business.

Mrs. H. Samuels, who has been ill recently, is reported to be still in a serious condition.

Mr. and Mrs. E. Roberts and family have moved into the Porter House on Burrard Avenue.

Interesting news received here was to the effect that the baby daughter of Mr. and Mrs. Don Corker, former residents of the Nechako Valley and also of Prince Rupert, won first prize at the New Westminster Exhibition for babies between six and twelve months of age.

Rev. William Sweetnam of Endako was here last week for the purpose of arranging a reception for Rev. Mr. Hale who is coming from the Diocese of Saskatchewan to succeed Rev. George J. Gray who has gone to England.

FLY-TOX HELPS REDUCE INFANT MORTALITY

Every year in the United States 250,000 children under 3 years of age die. Health authorities say it is significant that more deaths occur during the time flies are most active. Flies transmit more than thirty diseases. Every fly should be killed. Fly-Tox kills flies. It is fragrant, safe, stainless, sure.—Advt.

SKIDEGATE

Two huge barges were towed into Queen Charlotte City by the Pacific Monarch and Cape Scott. They will load lumber and logs.

Captain Bill Cummings has taken command of the seiner Greyfish and will fish for dog salmon.

Mrs. T. H. McCubbin and daughter Beth, spent Sunday and Monday in town.

Repairs are being made to Sandspit and Skidgate village wharves. The work is being done by outside contractors from Victoria and objection is being raised by a good many local people who think while they are struggling to develop the islands they should be given a chance to do work of that kind.

A good many cohoes are being caught Captain Jim McKay has been getting some good catches.

Chum salmon are coming into Skidgate Inlet from the east side this year, which is something new. They have in the past always come from the Pacific Ocean on the west coast of the islands.

Captain Bill Hansen arrived from Massett on his troller Thelma and is trolling for cohoes here.

TERRACE

Miss May Andrews of Vancouver, who has spent the past two weeks at the home of Mrs. E. T. Kenney, left on Friday for Prince George where she will visit with her sister, Miss Grace Andrews.

George (Andy) Anderson who has been relieving in the local bank for the past three weeks while Mr. Taylor, teller, was on holidays, returned to Prince Rupert on Saturday. Mr. Taylor returned on Friday from a holiday spent in Vancouver.

A farewell dance was given in Badminton hall on Wednesday evening in honor of Mr. and Mrs. Wm. Wm. Vanderlip and was attended by a jolly crowd. Mr. and Mrs. Vanderlip left the following day for Victoria where Bill has secured employment. They will be much

DUDE HUNTER MUCH FIRING

Guide Tells How Goat Was Victim of Barrage and Finally Succumbed.

CHARGED TORMENTOR

When Ammunition Gave Out Rocks Were Used in Effort to Kill Quarry

EDMONTON, Sept. 26.—A wild, very wild billy goat got Al Turner's goat, nearly taking Turner's life at the same time, according to a story brought back from the fields along the continental divide to the west of the Big Smoky river, by F. A. Long, entrance guide. Long was out with a party of sportsmen from Toledo, Ohio, and arrived in the city at the completion of a 30 day hunt in the mountains.

The party started out from the ranch of Stan Clark, at Entrance, a few days before the hunting season opened on September 1, it being the desire of the party—Al Turner, Howard Bare, and Harry France, all of Toledo—to take in some of the wonderful trout fishing to be had in the mountain streams and to take photos of wild game before starting their hunt.

MONSTER MOUNTAIN GOAT

It was when Chester Smith, Turner's guide, saw a monster mountain goat summing himself on a rocky ledge, that the fun—from the point of view of everyone except Turner—really started.

"There, my lord, is your goat; here is your gun," said the guide, handing over the tourist's deadly weapon, after he had been assured by Turner that he had "enough shells to blow the goat clean across into British Columbia."

Cautious was recommended by the guide and Turner crawled over some two or three miles of rock-strewn Alberta scenery on his belt-buckle before the guide decided that he was close enough to the goat to make a hit certain.

GOAT WAS PLACID

"Now is your chance," whispered Smith, pointing to the goat, which still lay on the ledge, contemplatively chewing his cud and regarding the valley below.

Mr. Turner raised his gun, squinted carefully along the sights, and fired. There was a loud report but the goat did not move.

"Maybe you killed him, but you better fire again to make sure," the guide advised. "He knew dudes."

So Mr. Turner fired again. And he fired again and again. At about the fifth shot the goat scrambled to his feet. Casting a look of disdain at the hunter, he scampered off along the ledge, apparently in the best of health and spirits. Turner reloaded his not-so-deadly weapon and went in chase of the goat. He caught sight of it again, scrambling along the face of the hillside, and again the echoes of his barrage roared and echoed around the valley.

REAL MILITARY TACTICS

About the tenth shot a bullet struck the goat in one of his legs and crippled him. Spurred on to fresh enthusiasm, the hunter again charged his magazine and charged the goat with reckless disregard of the consequences, firing as he advanced, as recommended in all the best books of military tactics. Then, by a clever flanking movement he cornered the goat in a corner from which there was no escape—except over the dead body of Mr. Turner.

The goat recognized this too and immediately charged the startled hunter. Uttering bleats of rage, with its head lowered and its horns aimed at a point which would seriously impair Mr. Turner's digestion, if they hit the mark, it came on at a brisk trot, despite the handicap of the wounded limb.

ROCKS AS AMMUNITION

His ammunition all gone, the tourist had nothing but rocks to stop the goat and commenced bombarding the goat with these. One hit the goat on his head and staggered him. The hunter yelled to his guide, but the guide had no gun. The goat renewed its attack and once again the hunter stopped its charge with a brisk barrage. The guide was sent back to camp for more shells, while the hunter kept a vigilant eye on the goat. With the other he hopefully estimated his chances of coming out unharmed from the 300-foot drop over which the goat was determined to hurl him.

Two more charges were made by the infuriated billy before the guide arrived, out of breath, but well supplied with ammunition. By this time Turner was loath to kill the brave billy, but he knew that it would only eventually die of its wound.

The whole party were well pleased with the result of the trip and intended to return to Alberta next fall. Each was successful in bagging good heads of goat, bighorn sheep and caribou. They failed, however, to obtain any grizzly.

DOMESTIC PHILOSOPHY

"That was an excellent paper your daughter read on 'The Influence of Science as Applied to Practical Government'."

"Yes, Helen is the pride of her class, and now that she has mastered the influence of science as applied to practical government, I hope she will be willing to find out something concerning the influence of the vacuum cleaner as applied to the parlor rug."—Boston Transcript.

ANOTHER ENGAGEMENT

"Rather a sharp thunderstorm last night."

"I hadn't noticed; I was talking with my wife all evening."—Life.

TAX SALES

Sales of Land for Unpaid Delinquent Taxes in the Prince Rupert Assessment District

I HEREBY GIVE NOTICE that, on Wednesday, the 12th day of October, 1927, at the hour of 10 a.m., at the Office of the Provincial Collector, in the City of Prince Rupert, B.C., I will sell at Public Auction the Lands on the list hereinafter set out, for delinquent taxes unpaid by said persons on the 30th-day of June, 1927, for Lands other than Farm Lands; and for Farm Lands on the 31st day of December, 1926, and for interest, penalty, costs and expenses, including the costs for advertising said sale, if the total amount due for the period ending 31st December, 1926, is not sooner paid.

STEWART AS THE TERMINUS

Sir Donald Mann Still Maintains
Northern Route From Peace
River Best

In the course of an interview recently
given, Sir Donald Mann is reported to
have said:

"Before the Yellowhead line to Van-
couver was completed I discovered that
a railway run due East from Portland
Canal through the Peace to the Sas-
katchewan River would far exceed the
C.N.R. line in grades and curvature and
in the actual costs of transportation."

"The route to the Portland Canal at
its apex is a thousand feet lower than
the Yellowhead Pass and there are no
deep rock canyons to be negotiated be-
tween the Saskatchewan and Portland
Canal."

"From Saskatchewan to Portland
Canal stretches the most productive
mineral and agricultural potential em-
pire in North America."

"That Portland Canal line will tap
bigger and vastly better agriculture,
coal, metal, mineral and water power
resources than the Maritimes, New Eng-
land and New York possess."

GREAT COAL FIELDS

"Three hundred miles east of Port-
land Canal are immense deposits of the
highest grade smokeless coal ever yet
mined or discovered. It contains but two
per cent ash, fifteen per cent moisture
with seventy-six per cent carbon. It
is better than the best Welsh smokeless
coal and it is much better fuel than
the best Pennsylvania anthracite."

"The Peace and Portland Canal Rail-
way will tap these coal fields where are
billions of tons above the railroad
tracks."

"When a canal is built around the
Grand Canyon of the Peace, a short
canal at Vermillion and one at Fitz-
gerald, this coal can be taken in barges
to the Arctic Ocean and west into the
interior of British Columbia over the
Peace, Fludy, Parsnip and Omineca
Rivers."

"A dam built at the Grand Canyon of
the Peace can develop 1,500,000 horse-
power of hydro energy. When an outlet
is provided at Portland Canal this
smokeless coal of the Peace will have
a monopoly of the coal markets of every-
