Repairing of the damaged fin, which was reported Saturday in mid-air after it had slowed up the dirigible when 1800 miles due east of Charleston, South Carolina, was regarded by engineers as one of the most daring feats in the history of aviation. They were informed that only one man was able to work in the interior of the fin and that others hung outside on the windswept struts while the job was being done. The workmen were led by Engineers Ehl and Baeurle and Knute Echner, the 24year-old son of Dr. Eckner.

As the Zeppelin passed over Washington the large hole in the port horizontal stabilizer was visible. Some observers said they could see through it and it was obvious that considerable damage had been done to that important part of the control apparatus. The ship appear-

CANADIAN FINANCES

It is very satisfactory to know that the finances of the country are in good shape. A despatch from Toronto Saturday stated that all small maturities of outstanding bonds would be taken care of without further borrowing up to the big victory bond loan which matures in 1933. It amounts to four hundred million dollars and some of it at least will have to be refunded.

Magnificent indeed is the Warner special, "When a Man Loves" starring John Barrymore, showing here at week end at the Westholme. The direction is by Alan Crosland who was responsible for the splendors of "Don Juan" and the story is laid in the golden age of France depicting the fabulous riches and unspeakable poverty ir the days of Louis XV.

It retells the well-known and passionately beautiful love story of Manon Lescaunt and Fabien Des Grieux, two youths whose devotion had been to religion until their chance meeting, aroused within each, the fires of un-
