## SIR ARTHUR MOND ASKS U.S. NOT TO INTERFERE EUROPE

### Lord Melchett Rebukes United States For Its Suspicions Of Europe

NEW YORK, Oct. 25.—Sir Alfred Mond (Lord Melchett) speaking last night at a dinner closing a conference with major industries, asserted that England did not desire to reopen the debt settlement with United States and asked that this country, if it wishes to take no part in the settlement of the German reparations problems, "at least would not get in the way."  
The speaker said "our difficulties in Europe are great enough but we feel competent to deal with European problems. Whenever an attempt is made in Europe to come together we are always greeted with suspicion and hostility on the part of the people on this side of the ocean, who attribute to us all kinds of motives which never enter our minds."

### Prince Rupert Should Soon Play Important Role In Pacific Trade Says British Trade Commissioner

"Export trade on the Pacific Coast is making great strides at this time and Prince Rupert, now sharing in that trade, should soon be playing a much more important role therein," declared A. E. Pollard, British trade commissioner for Western Canada, in an interesting talk before the Prince Rupert Gyro Club at luncheon yesterday afternoon. "But as I see it the open spaces behind you must be filled up before the country will ever do the volume of business of which it is capable."

### CONFUSION IN ENGLAND OVER CHURCH RITUAL

LONDON, Oct. 25.—The Anglo-Catholic synod of London and the Liverpool synod, which is more or less Evangelical, have both rejected the proposals of the bishops for the use of the revised book of common prayer in parishes desiring it.

The synod of Litchfield, with its pronounced tendency on doctrinal and ceremonial matters, voted in favor of the bishops' wishes.

It is said that it seems difficult to imagine what guidance can be afforded if the remainder of the dioceses exhibit a like confusion.

### MORNING FIRE GUTS DWELLING

House Belonging to George James Believed Victim of Incendiarism

Fire of mysterious origin about 5:30 this morning gutted the small red house to the rear of the Post Office which belongs to George James and which has been moved around much of late owing to the city's excavation operations in that vicinity. Both Fire Chief D. H. McDonald and the owner express the belief that the blaze must have been due to incendiarism owing to the fact that the house has been vacant for some time. Mr. James states that all doors and windows but one were closed and locked.

The conflagration evidently started in the dining room, the paper and cheesecloth that had been charred. Other parts of the house suffered from the effects of smoke and water. Several windows were also broken and a couple of doors damaged.

When the department was called the interior of the house was ablaze and crackling and the glare was visible for several blocks. The department, however, soon had the fire extinguished.

The house is one of the oldest in the city, having been built nearly twenty years ago by John Christianson. It was purchased by Mr. James from James Postulo a little over a year ago.

### NO POLITICS IN ADMINISTRATION JUSTICE IN B. C.

Pooley Says Some Employees Are Being Dismissed for Political Activities

VICTORIA, Oct. 25.—"As long as I hold the office of attorney general of this province there will be a divorcement of politics from the administration of justice," said Hon. R. H. Pooley, before the annual meeting of the Esquimalt Conservative Association last night. "I preached that doctrine in opposition and heard no objection raised to it. There are a few now that object but as long as I hold the position this policy will be carried out."

Discussing the civil service, Mr. Pooley said it was true that some of those in the service had introduced politics into their work. Some of these had been removed and there would be others who would be discharged.

### STEAMER HITS ROCK VANCOUVER ISLAND

### RUFUS ARGENTA NOT ABANDONED

Work on it Will be Continued in Spring by J. F. Duthie Says Secretary.

VICTORIA, Oct. 25.—"There is absolutely not a word of truth in the report put in circulation that the Rufus-Argenta mines have been thrown up by J. F. Duthie of Seattle," said F. Elliott, secretary-treasurer of the company, here last night. Elliott explained that there had been a closing down of operations for the winter months during the season of snow. Affairs at the mine were in excellent condition, he said.

### Laughs At Tales That Prince Rupert Is Not Making Progress Shows Faith By Opening Here

"It makes me laugh when I hear people talk of Prince Rupert not making progress," stated Frank D. Rice this morning. "I came to what is now Prince Rupert in building a city looked almost an impossibility here then. Now see what has been accomplished. Considering the time, I think wonderful progress has been made. Also I think the future looks very rosy. As an earnest of my faith I have decided to open an office here and to make this my headquarters."

Mr. Rice surveyed the town of Stewart in 1907 and the same year surveyed the mining property at Khutze Inlet where there is great activity today under Detroit control. He also surveyed about the same time the Hazelton and Massett townsites. He has lived in the district much of the time since then and knows it well and sees great progress being made.

"I have great faith in Alice Arm," declared Mr. Rice, "and I expect great things there." The Toric mine he expects to be a great one and also a number of other properties. He is carrying with him some native silver from the Tiger where work is being carried on under promising conditions.

According to Mr. Rice there are ninety men in the hills around Alice Arm now and most of them will continue to work all winter. More work has been done there this summer than has been the case since the shutting down of the Dolly Varden.

Mr. Rice is also enthusiastic over the Peace River country which he says is immense and better the farther you go. He has been there both winter and summer and knows conditions well. He says it will be a great thing to have it opened up and will mean much to the coast.

### MYSTERY ON VANCOUVER IS.

President as Well as Secretary of Aquarium Foundation Now Under Arrest

NANAIMO, Oct. 25.—Edward Arthur Wilson, President of the Aquarium Foundation at Yellow Point near Ladysmith, was last night released on bail of \$20,000 on a theft charge following his arrest in Vancouver yesterday. He is charged with the theft of \$15,000 belonging to the Foundation.

Robert England, secretary-treasurer of the foundation and Wilson's accuser, was recently charged by Wilson with the theft of \$2,800 and is also out on bail. The cases will probably solve what has been regarded as a local mystery concerning ideals and ideas of members of the society who fenced in land at Yellow Point, built a small village and hid themselves from outsiders.

### YOUNG MAN FOUND DEAD IN WELL WHEN VISITING IN ONTARIO

SARNIA, Oct. 25.—Clifford Brown, 21 years of age, son of Judge Brown of Grand Forks, B. C. was found dead in a well on the farm of his uncle at CanLachie, Ontario. He was staying here for the benefit of his health and is believed to have suffered a weak spell and fell into the well.

### MILL SITE IS NOW SECURED

National Airplane Lumber Co. Reported to Have Taken Ground at Seal Cove

While the principals of the concern, J. R. Black and Robert Armstrong of Kewanee, Illinois, are both in the south just now and confirmation is therefore not available, it is reported that the National Airplane Lumber Co. Inc., which is contemplating the erection of a specialty mill here for the purpose of manufacturing airplane spruce for export from limits on Big Falls Creek up the Ecstall River, has secured a site for the plant just across the cove at Seal Cove from the Big Bay Lumber Co.'s mill. To give that site railway connection, it would be necessary to build a bridge across the uncompleted fill of the grade there.

Meanwhile, logging operations have been closed down for a while up Big Falls Creek and the crew of men there is engaged in putting in a two-mile light railway which will connect the limits with the Ecstall River. Over this supplies will be taken into the operations and logs may also be carried out by that means.

National Airplane Lumber Co. is reported to have acquired considerable timber limits on the Queen Charlotte Islands as well as those up the Ecstall River.

### URGES POLICY ROAD BUILDING

Premier Tolmie Would Have Federal Government Return to Former Scheme

VANCOUVER, Oct. 25.—The Federal Government should again initiate the policy in effect between 1919 and 1925 whereby the provinces could earn grants of assistance in the building of trunk roads. Premier Tolmie said yesterday when addressing the Vancouver Board of Trade.

Research work which would enable British Columbia to utilize the waste from logging operations and a vigorous policy of reforestation would form part of the provincial Government's policy, the Premier said.

### POOLEY ANNOUNCES CHANGE OF POLICY

VICTORIA, Oct. 25.—Hon. R. H. Pooley today announced that the provincial police would not in future be allowed to use "stool pigeons" to secure convictions.

## SPORT CHAT

Bob Granger, coach of the Olympian champion, Percy Williams, has written to Dean Cromwell, of the University of Southern California, asking that Charlie Borah and Frank Wykoff, United States sprint stars, be sent to Vancouver to meet Williams in a match event about May 1. Granger says the California institution had planned to have Williams appear there, and that this is a counter-proposal. The race could be held in the Horse Show building at Vancouver, and would attract gate receipts easily large enough to pay the expenses of the visiting athletes. A stop-off at the University of Washington by the southerners would help in the matter of defraying expenses.

Stanley (Bucky) Harris new manager of the Detroit Tigers first act in assuming his new duties was to announce the acquisition of Roy C. Johnson, star outfielder of the San Francisco Seals of the Pacific Coast League. The Detroit club is reported to have given \$75,000 for Johnson who ranked as one of the leading players on the coast. He bats left-handed and finished the season with an average of .359.

## AN INDOOR SWIMMING POOL

by Olive Munro  
 The children of today will be the men and women of tomorrow. It is generally conceded that it is necessary to develop the body as well as the mind in order to make the perfect man or woman. Swimming, physical culture and gymnasium, play an important part in developing the body. Due to the short season and uncertain weather conditions it is necessary to specialize on indoor sports. On account of our geographical condition, every child should be proficient in the art of swimming.

A building to supply the needs of this growing community, with such a large percentage of children and young people, should be about seventy-five feet by one hundred feet, and two stories high. It should be centrally located and of permanent construction. The swimming pool, showers, gymnasium, lockers and so forth, would be in the basement.

DAILY EDITION Thursday, October 25, 1923

**PRINCE RUPERT AND MINING**

Complaint is being made continually that Prince Rupert does not take sufficient interest in the mining possibilities of the district. There is activity all around. Stewart, Alice Arm, Anyox, Porcher Island, and along the line of the Canadian National there is real work being done and results being obtained.

Sometimes the mining is slow and people get tired of waiting for results. However, the work is proceeding each year, and each year will see more real producing camps which will all tend to improve conditions throughout the district. All we suggest to the people of Prince Rupert is that they keep in close touch with activities and lend a helping hand whenever possible.

**BETTER SPIRIT HERE**

Prince Rupert is subject to fluctuations in the mentality of the people. One day they are all enthusiasm and the next they are away down below zero. As we develop we shall take on a more stable atmosphere. Citizens will not think the city is going to the dogs because things are a little dull for a few weeks.

Today Prince Rupert people are feeling in much better spirit than usual, judging from what one hears on the street and the general conversation of the people. There is a hopeful disposition everywhere and this it is possible presages real development. There is nothing to be gained by talking blue ruin, especially when there is no cause for it.

**TAKING CHANCE HERE**

A Prince Rupert citizen of long standing in conversation with the Daily News stated that he had been in four cities during their early periods and had left each just before the movement commenced. The result had been fatal to his success. He stated that he expected there would be a move in Prince Rupert soon and he intended to stay and see it through. He was not going to repeat here what he had done at other places. This time he expected to reap the reward for his faith in the city. He is a property owner here and expects his property to increase in value.

**In The Letter Box**

**MARRIED EMPLOYEES AND MAIL ORDER HOUSES**

Editor, Daily News:  
 As an association we beg the privilege of answering a letter which appeared in your column regarding employment of married women, and dealing with mail order houses.

Without entering into any controversy as to the ethics of employing married women we might state here a few facts. Most employers would infinitely prefer the single girl for these reasons:

A girl starting in can be trained more effectively.  
 She is more amenable to discipline than her independent married sister.  
 She can be corrected when necessary without leaving any permanent hard feelings.

Practically every girl today takes a business course and is not content to work behind the counter. When she does do so, it is only in the nature of a makeshift until the opportunity occurs to get into something where her training will be of use to her. The schools are turning out girls faster than they can be absorbed in office work and they are not looking for permanent positions in our local stores. The percentage of married women employed is very small and does not warrant the attitude of your correspondent.

**Mail Order Buying**

As regards mail order buying and the difference in prices; we would point out that the mail order houses do not as a general rule carry the same line of merchandise as the local dealer, and where it can be shown that the mail order house really has the same article, the local man frequently meets the price. Enquiry among members shows that this is often done. As far as boycotting any store for the help it employs, married or single, that store is performing a service to this city and the money earned goes to buy necessities here in Rupert; pays light, rent and general city upkeep and is a benefit to the community. On the other hand the confirmed mail order buyer is keeping someone else's son or daughter in Winnipeg or wherever they do their purchasing.

Without the much abused merchant railways would lack freight, the stores tenants, and the city revenue, and as a city would soon cease to exist. Those who would be responsible for this would have the satisfaction of moving to the mail order houses they have made so prosperous and filling in an employment form.

In the end it comes to this, if we would have our children employed we must have a prosperous city. If mail order buying ceased today and all purchases were made locally, every store in town would be busy, prices would be lower, and everyone would have a job.

Why does not the Rupert Mother send in an application for a position with the money she sends out? It might be considered.

Another angle rarely considered is the fact that local merchants as a whole are carrying on their books \$200,000.00 all the time in credit accounts. Some people pay in one month, others take twelve months. These people only buy in town when they want it charged. When they have the money it is sent out of town. They pay the mail order house cash before they get the goods. If local merchants had the cash before they supplied the goods, they would be in a much better position to buy in larger quantities and so give better prices.

No mail order house will give credit, they insist on the money before they part with the goods, but a Rupert Mother and her many sisters demand credit and sometimes a very long credit from the local stores.

The local merchant is a necessity in the community, a convenience and is used and very much abused.

Yours faithfully,

gration upon which Mr. Pollard felt it was not his place to express his views.

Speaking, however, on the matter of immigration he referred to what had been accomplished in recent conferences between the Empire Parliamentary party and the provincial government. He looked for much good to come from those conversations.

Canada Needed the People

In the course of his address, Mr. Pollard described to his hearers some of the work which the trade commissioner service, of which he was a member, was designed to carry out not only in the British Dominions but also in foreign countries.

**TWO MEN WHO KEPT SHOP**  
AVAILABLE for YOU & ME

ONCE there were two men who kept shop. Both shopkeepers were in the same mode of business, but their methods differed widely. In fact it was only a matter of time, a short time, before one must close.  
Now the other shopkeeper was different, he was prosperous. His store looked neat and clean, spruce, tidy and colorful, with a front that bespoke quality and service. Now this shopkeeper was a great community booster. His bid for patronage was based on selling his customers the products of his local industries first. He claimed that the industries in his locality employed men who earned wages, who spent wages, and kept others employed. His pet theory was, the more of Pat's mouse traps he sold the more Pat must make, and the more Pat would earn to buy goods from him, the wise shopkeeper. And so he succeeded and became prosperous and popular, and his philosophy and wise counsel spread rapidly.

Now, there's a moral to this story:

Every dollar paid for foreign made goods departs from your homeland never to return; but, each dollar exchanged for a B.C. product remains in British Columbia and quickly grows in value. It enriches industry, ensures employment and introduces prosperity into the homes of the workers.

This is the third advertisement of a series authorized by the B.C. Products Bureau of the Vancouver Board of Trade in the interests of the manufacturers of British Columbia.

## SOME FACTS ABOUT THE NEW FORD

### Production and Demand for New Ford Exceeds All Previous Records

The manufacturing schedules of the Ford Motor Company of Canada, Limited, have been steadily built up until a new daily record for Canadian automobile production has been reached.

Despite this peak output, orders for the new Ford keep uniformly ahead of the rising tide of manufacture. It is therefore necessary to continue a high rate of production. To this end a steady flow of material from more than 385 Canadian sources streams into the Ford plants. And here, with more than 10,000 men on the payrolls (almost double the previous employment record) these materials are converted into New Ford cars.

### Ford Quality of Manufacture Has Been Strictly Maintained

In the effort to build enough New Ford cars to meet requirements, no deviation from the high standard of Ford precision has been permitted. This standard, unbelievably strict, was set before the car was placed upon the market, and it has since been rigidly adhered to.

In the New Ford Car 40 different steel alloys are used. Each is chosen for the specific use for which it is best adapted. In the transmission gears alone there are seven different kinds of alloys. Likewise, the forged steel spring perches, hardly bigger round than a man's thumb, will withstand a strain of 15,000 pounds. This is 30 times greater than the strain put on them in ordinary use.

## The VALUE of BOVRIL to WOMEN

Women who are easily tired need Bovril to prevent them from getting "run down"! Bovril is especially valuable in replenishing a woman's reserves of energy. It acts so quickly. You feel the benefit of Bovril—its warm, stimulating action upon the wearied system—as soon as you have swallowed it.

And if you keep up your Bovril daily you will soon find your strength become equal to the work and worries of everyday life. For Bovril builds up health and fitness by sound nutrition. Bovril is the best of the beef—its vitalizing and energising properties in concentrated digestible form.

**BOVRIL prevents that Sinking Feeling**

permits sustained driving at the higher speeds hour after hour, is little short of marvelous. The ease with which steep hills are climbed in high gear is equally as impressive. Shifting gears, steering and handling the car under the most trying road conditions are exceptionally simple. 25 to 30 miles per gallon of gasoline and remarkably low oil consumption give a worthwhile operating economy.

In city traffic and on country highways, the New Ford performs as well as and often better than considerably heavier and higher priced cars. In the light car field it is absolutely without equal.

By these marks of Ford performance other motor cars are being judged. It simply means that price is no longer the gauge of automobile quality.

### Ford Beauty Is More Than Skin Deep

On the surface the New Ford car is all that you want it to be. Beautiful low lines, harmonious color combinations, sparkling nickel, sturdy steel spoked wheels and balloon tires all play their part in making this a car of graceful proportion and handsome appearance.

But its real beauty is invisible. The quality of materials; careful workmanship; correctness of design; the things that really matter—these are the points in which the New Ford is exceptional.

Windshield of shatterproof glass and a six brake system, fully enclosed, safeguard occupants in any emergency. Four efficient shock absorbers in conjunction with the best proven light car spring system, give matchless riding comfort. All models are completely equipped to provide the ultimate in comfort, convenience and safety.

The excellence of materials used is matched by the careful precision of its manufacture. For example, the eight valve guides in every engine may deviate from perfection only by 1/30th of the thickness of the average human hair.

The simplicity and soundness of Ford design is unparalleled. Such manufacturing methods ensure a

high degree of satisfactory performance over a long period of years.

### Ford Performance is the New Standard for Judging Automobiles

The rapidity of get-away and acceleration of the New Ford is a by-word. Its endurance, which

If you have not ridden in the new Ford car, or experienced the thrill of driving it, there awaits you the knowledge that car values have actually changed; that a really fine car has come into the light car field; and that values offered by the new Ford cannot be duplicated anywhere. Your local Ford dealer will prove these statements by demonstration.

## MADGE RUSH, WILL EDMUNDS AT THEIR BEST

A great reception was accorded Madge Rush and Will Edmunds last night at the Capitol. Miss Rush with her offering of "Jarabe Tapitio" a native Mexican Hat Dance, in which she performs the difficult feat of dancing on the rim of her huge sombrero, was seen to wonderful advantage and on past performances much is expected of this charming artiste on Friday and Saturday when she will offer the "Varsity Drag."

No less a reception was given Prince Rupert's old favorite, Will Edmunds, in his most remarkable impersonation at the cello of August van Biene, the world famous violoncellist. Mr. Edmunds chose for his impersonation that beautiful strain, "The Broken Melody" and used as encore number "Annie Laurie" both of which were artistically rendered.

Both artists will offer these numbers again tonight at the Capitol.
