Freedom of Seas Likely To Be Taken Up in Lon- Premier's Daughter don and Halifax Base With Canada, According To Newspaper Reports

NEW YORK, Oct. 10. - A special despatch to the New York World from Washington says: "From an unimpeachable source the World learns that during the recent conversations after the naval tonnage question had been discussed, President Hoover, to Premier Macdonald's surprise, raised the queston of the "freedom of the seas." Mr. Hoover explained his fears of adverse action on the naval treaty, the necessity of dealing with the problems of the sea law, and suggested the invocation of the world

Mr. Macdonald explained the reasons why this was difficu't for Britain, but promised immediately on his return to London to open negotiations on the question in all its aspects.

Mr. Hoover, according to the World's authority, discussed the British naval bases in the Caribbean and at Halifax, Nova Scotia, and before the official visit closed visiting Canada and the United Mr. Macdonald was able to secure a statement from United States naval sources that these bases were not regarded by her admirals as a menace to the United States, but he promised to discuss the subject at Ottawa next week and raise it at once on his return to London.

Along the same line, a special despatch from Wash-

ington to the New York Post says:

"Washington gossip in well-informed circles has it that there is a possibilty of the premier's departure being capped with a gesture of peace and good-will in the grand manner to consist explicity of an offer to de-militarize the British naval bases at Bermuda, Trinidad, Jamaica, and possibly Halifax, if Canada consents."

Let us cheer Connie Mack's Philadelphia Athletics for winning the first two games of the World Series on foreign ground. Let us might just as well have won one or both of those two games instead of losing all. When one team exceeds another in hitting in two games and loses both, that is our idea of bad luck. But, on the other hand, it must be admitted that the A's outgeneralled the Bruins on both occasions for it is good management when a team, though virtually outhit in two games, wins both games.

Nevertheless, the Mackmen have staged a great surprise in winning both Chicago games and start at home today with the series, in the estimation of most observers, a virtual cinch. The big preponderance of dopesters will tell now that to take the next two winning games will be but a matter of form for the Athletics. Indeed, it would appear quite probable up to today that Philadelphia will take the four straight and end the series before the Quaker Sunday. Anyway the next two games are at home for them and the third if necessary.

If it is going to turn in new records in some respects, the 1929 World Series is at least not going to constitute a financial record, it seems certain now, although at the start there was reason to believe that it might. Thousands of Puffins Island Off Labrador Says Com. MacMillan

SYDNEY, N.S., Oct. 11—An island swarming with Puffin was discovered off the Labrator coast this trip by Commander MacMillan, who says that thousands of the picturesque little birds make the place their breeding ground each From Vancouverseason. These birds build their nests by burrowing underground lyike foxes. They dig into the soil about three feet-a very convenient distance, as the investigators, by lying on the ground and shoving an arm in up to the shoulder were just able to reach the nest to secure specimen eggs for their collections. The Puffin is a picturesque little creature with that sailors generally call them "Sea Parrots."

Peace River Is Subject Discussed By Terrace Board

Letters of Thanks to Be Sent Acknowledging Hospitality to Delegates

TERRACE, Oct. 11—The quarter-ly meeting of the Terrace Board of Trade was held on Tuesday eve-ning in the lower G.W.V.A. hall to hear the reports of the Peace River delegates. E. T. Kenney presided. . K. Gordon gave a good general description of the general features of the country covered and incidentally claimed that the section | of the country from Prince Rupert to Hazelton offered more difficulties in road building than any other part covered. He claimed that the Prince Rupert delegation while small in numbers were a force which could not be overlooked, and he was confident that much good would result from their efforts. The development of the Peace River district was bound to have a good effect on our own district by creating a market for our produce and he claimed he had no fears of there not eventually being an outlet from the Peace through the north. Mr. Kenny also presented a

splendid report of both the trip and the convention which followed. He likened the conference to a business parliament and claimed that much good was bound to result from the meeting of representatives of capital and labor, professions and tradesmen, manufacturer and producer, east and west, and repudiated a statement published by a coast paper that it was in reality a political gathering.

Mr. Kenny claimed accommodation at Jasper was already overtaxed and he felt the time was ripe for a movment to be started to have the C.N.R. take over the velopment there to accommodate 300 the overflow from Jasper. He recommended that the Board of Trade

to the hospitality extended, par-ticularly to the Prince Rupert delegation, by A. E. Warren, vice-president of the C.N.R., and it was decided to have the secretary write him, as well as George McNicholl, Phone 208 Payne, secretary of the Vancouver Saturday.
