Monoplane Carrying Parker Cramer May be Lost in the Wilds of Yukon Territory

The Cessana monoplane, piloted by Parker Cramer, trans-Atlantic flyer, on its way back to Chicago after a flight to Nome, is believed lost today in the wilderness of Yukon Territory east of Big Salmon, 125 miles north of White Horse, according to the Government Telegraphs. At 11 a.m. the plane passed over Big Salmon headed east, whereas it should have been taking a more southerly direction. The belief is that Cramer may have mistaken Big Salmon for Yukon Crossing and thus lost his bearings. At 1 p.m. there had been no report at White Horse of the plane since it passed Big Salmon at 11 a.m. The machine was to have landed at White Horse for fuel.

If a mistake has really been made, as is now believed, the ship might be completely lost in a barren wilderness devoid of communication with the outside and with few human habitations. Should it be necessary to make a forced landing, the plane may not be heard from for days, and, possibly, weeks. The only chance is that the aviators find their mistake while they still have enough fuel left to get back on their

course. The plane could not get away from Fairbanks on Saturday owing to the soft muddy field. The takeoff was made this morning and at 10:30 a.m. the ship passed Carmacks.

NORDON CORPORATION LIMITED is a Canadian company, acquiring the property of Nordon Corporation and other valuable oil leases and royalties, deriving substantial present income from existing oil fields of the United States, directed by technical and practical talent of the highest order, which will largely devote its efforts to development of oil in the fields of Western Canada. Nordon Corporation had its inception early in 1928, to acquire exceptional opportunities in various oil districts of Canada and the United States, under the guidance of Mr. C. G. Willis and associates.

PROPERTY HOLDINGS:-Leases @ 24,000 acres and royalty under 76,800 acres on seventeen distinct oil areas of the United States, and 10,000 acres in prospective valuable areas in Western Canada. United States royalty interests include portion of landowner's royalty in one of the finest leases in the Santa Fe Springs field of California. Five wells have here been completed to recently discovered deep and very prolific sands, and thirteen more well's are driffing on the company's royalty acreage. In New Mexico company owns royalty under 70,000 acres, in the latest producing oil area in the United States. In Texas, the latest major producing field in the United States, company owns leases on 7,500 acres in Midland county, part of which is now being drifled on acreage-division basis by some of the larger operating companies of the industry leases on 2,500 acres in Crockett county, where 2,500 checkerboarded acres, transferred on acreage-division basis, is being drilled by Marland Oil Co. and W. A. Moncrieff, and where within the past few days one well reached the sands and was bailing at the rate of 288 barrels daily, with prosp cts that a big producer would be brought in: leases on 960 acres in Pecos county, on the Fort Stockton "high"; and leases on 1,000 acres in Ward county on the Soda Lake structure. In Oklahoma, one-half of royalty under 160 acres on top of a large core-drill structure in the Wilcox sand area, where Marland Oil Co. owns the leases on Nordon royalty acreage. In Kansas, acreage in the vicinity of the recent discovery just north of Wiehita, Central Kansas. In Ohio leases on 80 acres in eastern part of state, where a well within one mile has just come in with yield of 100 barrels of high-gravity Pennsylvania crude. Other royalties and leases are under option or negotiation in Santa Fe Springs field and in other fields in Texas and New Mexico.

in Santa Fe Springs field will presently be at rate of \$300,000 per annu a, and rate is expected to reach \$500,000 per annum before the end of this year, as thirteen more wells are being drilled on royalty leases. Further revenues are expected from Texas and New Mexico fields from wells now drilling.

PRESENT REVENUES :- Royalty revenue from five wells

FINANCES:--Upon completion of this present financing the any will have in excess of \$1,100,000 in its treasury.

INTENSIVE CANADIAN OPERATIONS :-- The immeenate objective of the Corporation is large expansion of its operations in the prospective fields of Western Canada, where its staff, in possession of valuable geological data, believes some of the most important structures on the continent may be developed.

PRINCIPLES OF OPERATIONS: -- The principles which have been and will be followed by the Corporation in building up revenues necessary for execution of its policies, used with marked success by the great royalty companies of the United States, will be rigidly adhered to, thus eliminating, in largest measure, drilling operations—the most costly and most hazardous branch of the industry. Leases and royalties will be negotiated over a wide spread, thus minimizing hazard of loss and increasing the chances of big

The Corporation is not a drilling company and will confine its operations in that direction solely to offset drilling where such operations are imperatively demanded in protection of its holdings.

PERSONNEL: -- The standing of the directors of Nordon Corporation is of the highest order. President and General Manager Glen M. Ruby is acknowledged to be the outstanding authority upon the prospective fields of Western Canada, with the widest experience in continental oil affairs. Managing Director C. G. Willis stands equally high in the Southwest and is generally accorded a portion of the credit for discovery of several of the important fields in the Los Angeles Basin. From time to time, announcements will be made regarding the personnel of a Board of Consultants, which will include oil experts of continental and international reputation.

Application will be made for listing on Eastern and Western Stock Exchanges.

In order to have the annuals in bloom and of sufficeint development to make a showing it is necessary to give many of them an early start.. Otherwise they will not give their full beauty until into August, leaving a gap n the garden.

They should be started in seed boxes. These boxes may be placed either in a cold frame or a winlow of the home. The sun parlors of modern houses, which are usually not overheated, offer an ideal place to start annuals, having plenty of light and a temperature that usually is not as hot and dry as the living room. A few degrees above freezing will be an excellent atmosphere for some of the annuals that like a cool start. Others demand warmer temperature. Zinnias and marigolds are in the latter class while snapdragons and asters may be given a cool start,

In addition to starting annuals indoors, poppies, centaureas and annual larkspurs should be sown outside on any day that is fair enough to tempt a gardener into the garden. Scattered on the surface of the soil where they are wanted, the melting snows and rain will do the rest and they will come on in a hurry as soon as the spring sun calls them.

Paved streets and concrete sidewalks in the business section. Well kept gardens and pretty residences.

Number of clubs and fraternal organizations.

Prince Rupert has:

No severe cold in winter.

No extreme heat in summer.

No mosquitos or other insect pests.

Great opportunities for boating, fishing and hunting. Fewer climatic or other disadvantages than most places in Canada.

A harbor that never freezes.

THE Ford car rolls down country roads as I smoothly and comfortably as over transcontinental highways. Roomy front and rear compartments-lots of leg room, head room, body room-make it the ideal family car. The safety features of the Ford cargive driver and passengers a sense of security and well-

being. They enable one to avoid dangers in traffic and the inbuilt strength of the car resists damage from the careless driving of "the other fellow."

DURABILITY-The durability of the Ford car has never been fully measured because one year of consistent driving leaves it like new. But it is possible to estimate by the materials that go into it, the finer alloy steels, higher grade equipment and better basic quality in every part, that many thousands of miles of service are built into its chassis.

Reliability and low upkeep

SAFETY-The fully enclosed six brake system grips the flying wheels with silent power. The windshield is of shatterproof glass. An all-steel body gives maximum protection. At high speeds the unique and effective Ford spring and shock absorber system provides perfectbalance.

COMFORT-Deeply upholstered scat cushions, set at a restful angle, match in comfort your easy chair. Large windows allow unobstructed vision and open wide in warm weather. Four Houdaille hydraulicshock absorbers, and the unique Ford

feature of transverse, semielliptic springs, give the effect of riding on air.

DEMONSTRATION-Ask your Ford dealer to let you drive a Ford car. He will be glad to take you out. Select the steepest hills, the heaviest going-you will be amazed at the power at your command. Head for the busiest streets. Drive alongside other cars. Try the quick getaway, the swift pickup in second, the easy gearshift. Feel the smooth, sure action of the six brake system. A demonstration will convince you of the outstanding merit

Keep Up With Yourself

TEN who forge ahead in business raise IVI their standards of living. Their wants increase; things that were once luxuries become necessities. But too often, the amount of life insurance remains the same. Should the inevitable happen, the widow and children must effect a drastic cut in their scale of living.

Keep up with yourself-don't let your life insurance fall below a safe ratio to your family's living expenses.

S&LVATION ARMY ALREADY RECEIVING SELF-DENIAL GIFTS

While the Salvation Army annual self-denial collection does not start officially until May 1, Adjutant Kerr reports that he has already received a number of donations, some of them being sent in voluntarily.

At the city council meeting tonight the council is being asked to allow the annual tag on May 18. This will wind up the campaign. In the meantime, a personal canvas is being conducted and envelopes distributed.

WAR LEFT HIM TO SUFFER TERRIBLY

Until He Found Happy Relief in "FRUIT-A-TIVES"

Many a battle-scarred veteran of the Great War has found surcease from pain and suffering in "Fruit-a-tives." This famous medicine, made from fruit juices combined with the finest medicinal ingredients, has helped them to adjust themselves to modern conditions and to correct these faults of digestion and elimination which resulted from their terrible war experiences. "Ever since leaving the army," writes

Mr. E. E. Newman of Iona Station, Ont., "I suffered terribly from Constipation. After spending a lot of money on remedies, I took four boxes of 'Fruit-a-tives' and I can sincerely gay they gave me permanent relief." Other Great War veterans have taken "Fruit-a-tives" for Rheumatism, Kidney Trouble, Indigestion and Dyspepsia, Nervousness and Sleeplessness with equally gratifying results. Try them. 25c. and 50c. a box-at dealers everywhere.
