Mobilization of Chinese Troops in Manchuria to Defend Railway Announced Today from Shanghai

SHANGHAI, Aug. 17.—As an offset to the mobilization of troops on the Russian side of the border and the attacks made upon Chinese at various points, Marshal Chang Hseuh Laing, governor of Manchuria, has ordered the mobilization of twenty thousand troops to guard the Chinese Eastern Railway, which formerly was controlled by Russia but now is in the hands of the Chinese.

At other points along the frontier or near it, Chinese garrisons are being reinforced.

It has been announced that China will take no aggressive action, but will defend her railway and her territory against any attacks.

CEDAR POLE PRODUCTION

Business Still Active in Central Interior With Hanson Co. Principal Producer

Activity continues in the cedar pole business in the central interior.

Tom Moore of Kitwanga has purchased a large limit in the Kitwanga Valley, north of Kitwanga, and will commence immediately to produce poles from it. Half a million feet or more of poles will be trucked out to the railway with quite a large crew employed.

The Hanson Timber & Lumber Co. has secured timber up the Kispiox River and Henry Cook will be in charge of taking out of the poles there. Albert Elford has taken charge of the company's operations at Bell Lake where 20 men are employed. So far this season, the Hanson Co. has put over 14,000 poles in the river above Hazelton and there are many more thousands of pieces to be floated down.

NANAIMO PIONEER DIED AT PARKSVILLE

NANAIMO, Aug. 17.—The death occurred at his home at Parksville of Joseph Hirst, who was born in Nanaimo 64 years ago. He was the eldest survivor of a pioneer family.

FINE PROGRAM ON LABOR LAY

Trades & Labor Council Planning Elaborate Bill For Annual Celebration on Sept. 2

Aided by generous public support which has enabled it to put up a fine list of prizes for competition, the Trades & Labor Council is arranging a sports program of outstanding merit for its annual Labor Day celebration on September 2.

Three of the feature events of the program will be the 100 and 220 yard dashes and the mile run. For the first time in the history of Labor Day celebrations here, the children's sports, an elaborate program of which is being prepared, will be run in the morning. In the afternoon there will be senior and women's sports and a league baseball game between the Elks and either the Sons of Canada or the Gyro Club. A junior football game about 5:30 will wind up the sports program. In the evening, the usual big dance will be held.

PRICE OF WHEAT

VANCOUVER, Aug. 17.—The price of Number one Northern wheat for spot cash here today was \$1.66 1/2.

THORNTON OFF ON INSPECTION

Leaves Jasper For Vancouver Tomorrow and to Arrive Here Aug. 28

JASPER, Aug. 17.—Sir Henry Thornton, chairman and president of the Canadian National Railways, who has been spending a few days at Jasper Park Lodge, will leave here Sunday evening for Vancouver to commence his annual inspection of the western lines of the company. Officers of the western region who will accompany Sir Henry, include A. A. Tisdale, general manager; H. A. Dixon, chief engineer; G. M. Hair, regional counsel, and the general superintendents of the districts.

During the past year many improvements have been made to the company property in the west, and most of this will be inspected by the president, who will also look over the work now proceeding on various new branch lines, the Lulu Island belt line development near New Westminster and industrial development on or contiguous to the lines of the company. While there may be some minor alterations, the itinerary of Sir Henry will be as follows: Vancouver, August 19-21; Victoria and Vancouver Island, August 22-26; Prince Rupert, August 28; Prince George, August 29; Edmonton, August 30; Calgary, August 31; Saskatoon, September 1, or September 2; Moose Jaw, September 3; Regina, September 3; Prince Albert, September 4; Winnipeg, September 5-8; Fort William, September 9, Port Arthur, September 9.

CHILDREN ARE BURNED TO DEATH

TELFORDSVILLE, Alta., Aug. 17.—Four children of Mr. and Mrs. George Hicks, the oldest of whom is five, were burned to death when a farmhouse near here was destroyed by fire last night. The father and three older children went out, leaving the younger children asleep, and it is presumed one of them woke up and came downstairs and secured matches. Clifford Hicks, the oldest brother working on the farm, was unable to reach them.

AREAS RESERVED FOR BIRDS

Forty bird sanctuaries have been reserved in Canada by the Department of the Interior under the Migratory Birds Convention Act, which is the Federal law for the protection of migratory birds. There are also 51 public shooting grounds reserved by the Dominion Government in Western Canada. Shooting is allowed on these latter areas in the open season.

CROP REPORT RATHER BETTER

Yield So Far Slightly Better Than Anticipated in Fifty Per Cent Report

WINNIPEG, Aug. 17.—Cutting is general, threshing commencing, and one car of new grain is already shipped from the Miami subdivision. On the whole, rather better out-turns except in coarse grains are reported this week and the previously expressed half crop estimates appear, if anything, to have been conservative, according to the sixteenth weekly crop report of the Canadian National Railways.

Seventy-five per cent half damage over 5000 acres at Elie, together with scattered reports of light frosts on August 14, damaging garden stuff only, and rain in northern Manitoba, provided the major weather variations for the week.

Cutting is rapidly becoming general in Saskatchewan, and isolated reports of threshing are noted. With conditions in this province already well defined in government "Feed Situation" maps and in previous reports, threshing out-turns are awaited with interest. Much of the central and southern country will harvest very meagre crops. Oats particularly are light and the feed situation none too promising. North crops are less advanced, but wheat cutting is commencing and should be general next week. Fair to good crops prevail over much of this territory, with warm days and cool nights favoring maturity.

Cutting has started in Alberta and will be general next week except in the north country. With several showers on the Drumheller, Stettler and Three Hills subdivisions, some improvement has been effected on late stuff and feed. Wheat is variously estimated from five to 15 bushels. Seventy-five per cent hail damage over a five-mile area on the Mantario subdivision and less severe frost at Kathryn are reported.

Athabasca and Peace River sections continue favorably with harvest rapidly approaching.

CHARLES SWEENEY WAS NOTED ATHLETE EARLY YEARS OF HIS CAREER

The late Charles Sweeney, who died suddenly here on Thursday night, was an athlete of considerable note in his younger days. His particular lines were such as putting the shot and throwing the discus but he was also a runner and jumper of some ability.

Advices are being awaited from relatives in the Renfrew district of Ontario before making final funeral arrangements.

SPEED BOAT RAMMED INTO SLOWER CRAFT

ALEXANDRIA BAY, N. Y., Aug. 17.—W. Charles Lipe, a millionaire, and his wife and children and the pilot of his speed boat are believed to have been drowned in the St. Lawrence River in a crash which sank his craft and an excursion boat carrying 65 persons. All on board the excursion boat were picked new.

Millions Watch Queen of the Air

Outlined against the sunset skyline of New York, the Graf Zeppelin roared over the metropolis off on the long flight around the world.

Snowden Holding Out in Matter of Reparations at Hague Conference

THE HAGUE, Aug. 17.—Rt. Hon. Phillip Snowden told the other creditor nations at the reparations conference today that if they could not offer something more substantial toward Britain's request there was no use going on with the conference.

The chancellor, who had been demanding a return to the Spa percentages in reparations, as contained in the Dawes plan, repeated the previous statement that Britain could not make any further sacrifice.

After refusing the compromise offer of France, Italy, Belgium and Japan to allow Britain an increased share in the German reparations payments, the chancellor claimed the offer would amount to only about 20 per cent instead of 60 per cent.

SOVIET RAID ON CHINESE

Seven Hundred Cavalry Supported By Artillery Attack Jalainor

TOKIO, Aug. 17.—Despatches from Manchuria today said 700 Soviet cavalry supported by artillery fire, yesterday raided Jalainor on the Chinese Eastern Railway. The Chinese suffered both military and civilian casualties, the Russians later withdrawing.

MANY FIRES IN SOUTHERN B.C.

Eighteen Hundred Men Engaged Fighting the Menace in Interior

NELSON, Aug. 17.—At present there are 1800 men at work fighting forest fires in the southern interior of B.C., according to the forestry office. There are 100 fires burning, 83 of them new.

THOMAS IS AT QUEBEC TODAY

Arrives From England to Get Canadian Education By Seeing and Talking

QUEBEC, Aug. 17.—"I'm going to see everybody worth seeing and talk about everything worth talking about," declared Right Hon. J. H. Thomas, minister of unemployment in the British Government, who arrived here yesterday from England on a tour of Canada.

WINSTON CHURCHILL WILL OPEN FAIR AT NEW WESTMINSTER

NEW WESTMINSTER, Aug. 17.—Right Hon. Winston Churchill has accepted the invitation of the fair board to officially open the fair here on September 2.

Quite a crowd of women attended the lecture by Dr. J. C. Lawson, Vancouver dietician, in the I.O.D.E. Hall yesterday afternoon. No men were admitted.

Farmers Leave Their Crops and Merchants Their Counters Order to Stake Claims Lakes District

A mining boom is reported from the country around Burns Lake with the result that farmers are leaving their crops and merchants their counters to stake mining properties. The rush does not seem to be confined to one point. All around the lakes country to the south of Burns Lake, particularly at Francois, Eutsuk, Nadina and Owen Lake, the country is being combed over for outcroppings, and also at Danskin, Priestley, Sheraton and Tintagel stakes are being planted.

North of Burns Lake to Babine Lake and also on Decker Lake prospectors, farmers, laborers and businessmen are buying licenses and driving stakes.

Just what has caused the excitement does not seem apparent, but probably the sale of the Owen Lake properties to Noah Timmins started it. There have also been a number of good strikes of ore in a number of properties in the district and there are several representatives of the big companies actively engaged in examining some of these. Earlier in the summer there was a lesser staking boom started as a result of a find of good rock on the south shore of Francois Lake, but this latest activity seems to be much more widespread. Much of the land now staked is quite valueless from a mining point of view, but on others there are showings which may develop into mines.

ESPERANZA IS BUYING CLAIMS

Increasing Activity Expected at This Alice Arm Mine

At a special extraordinary meeting of the shareholders of the Esperanza Mines, Ltd., held last night at the Metropole Hall, it was unanimously decided to acquire 16 additional mining claims adjoining the Esperanza property, which action, it is said, will increase the value of their holdings very materially and, in fact, put them in a position where the property will be attractive to large interests. It is understood that the property is attracting big interests at the present moment and there is said to be reason to believe that negotiations now on will result in the Esperanza mine increasing its activity and properly equipping the property with power drills and tramway and possibly a mill to make it a large producing mine.

The stock up to now has been freely taken up in small lots at 50c, but it is thought that, under the conditions now obtaining, the directors will put the price of the stock up to a point more equal to the true value, having regard to the present development and the possibilities from deals pending. Last night Angus McDonald and Norman Fraser left here for the mine property at Alice Arm, accompanied by two capitalists, who came especially to look over the property with a view to investment.

BRIGADIER CARTER AND WIFE SPEAKERS

Spiritual Service Conducted in Salvation Army Citadel Last Night

Brigadier and Mrs. Carter of Winnipeg conducted a spiritual meeting last night in the local Salvation Army citadel. Staff Captain Acton of Wrangell presided and Ensign Yarlett of Glen Vowell was also a speaker. Owing to inclement weather, the attendance was not large.

This morning, Brigadier and Mrs. Carter, Staff Captain Acton and Adjutant William Kerr, local commandant, left for Port Essington to attend the annual native congress. They will return to the city Monday afternoon. Capt. E. Warner will be in charge of services here tomorrow in the absence of Adjutant Kerr.

CHURCHILL ON PROBLEMS OF GREAT BRITAIN

Speaks of the Singapore Naval Base and the Proposed Egyptian Treaty

TORONTO, Aug. 17.—Completion of the Singapore naval base is essential to the security of the Empire communications, Right Hon. Winston Churchill declared here today. There was no justification for the fear that completion of this base would menace the position of Japan.

The speaker declared he had misgivings about the proposed treaty between Britain and Egypt as he doubted whether the Egyptian people were capable of assuming full responsibility of governing themselves. Certain public services, he said, had been turned over in recent years by Britain to Egypt and in every case, whether irrigation or any other form of service, they had deteriorated under Egyptian management.

GRAF ZEPPELIN NEARING JAPAN

Wireless Messages Being Picked Up From Her By Nipponese Stations

TOKIO, Aug. 17.—The Japanese Government wireless stations tonight began picking up messages from the Graf Zeppelin as she drew nearer Japan.

MOSCOW, Aug. 17.—The Graf Zeppelin late Friday night had completed half the distance between Friedrichshafen to Tokio in a flight at an average speed of 68 miles an hour, about 18 miles an hour better than was expected. Under continued favorable conditions the ship may reach Tokio Monday morning.

TWENTY-FOOT PUTT WON CHAMPIONSHIP

VICTORIA, Aug. 17.—The sinking of a twenty-foot putt at the fifteenth hole for a half and the match, J. E. Wilson, veteran Victoria club golfer, retained the 25th championship of the seniors of the Northwest Golf Association yesterday at Oak Bay.

MANCHURIAN SITUATION

It is difficult to write anything about the Manchurian situation, because possibly before this is in print another despatch may arrive which may change the whole complexion of affairs in the Orient. As it looks to us, there is not likely to be war, although we must admit there is a lot of dry tinder around likely to break into flame. Already there seem to have been minor raids, but they can be disowned by the Soviet as unofficial. It seems to us rather like a game of bluff that is going on, but it may develop into war if the present tension is not relieved soon.

The Soviet still looks on the rest of the world as hostile and we must candidly admit that very few countries can hope to be friendly to a country that is ready to help upset the government of that country at any time and indeed is using every possible means to do so all the time.

SIR HENRY'S VISIT

Sir Henry Thornton will be more welcome on this visit than he has been on some occasions in the past, because his railway has shown a greater interest in Prince Rupert recently and there is a general impression current that this interest will increase. It is understood that Sir Henry will be entertained at luncheon by the Board of Trade and that he will give an address on that occasion. Should he do so, it is hoped he will have some announcements of local interest to make.

While everyone recognizes the great work that Sir Henry Thornton has done for Canada in connection with the railway, Prince Rupert will judge him largely by what he accomplishes for this section of the railway. A chain is judged by its weakest link and so to some extent is a railway. We judge the C. N. R. by what we see here. If this end is inactive we judge that there is something wrong with the management, at any rate to that extent.

EXPERIMENTAL RESEARCHES AT LOCAL STATION

D. B. Finn Reports on Work Being Done at Prince Rupert

Three progress reports have been issued in connection with the work being done by the biological board on the Pacific coast of Canada. These are printed in pamphlet form and are being distributed. In the first of these, D. B. Finn, director of the fisheries experimental station at Prince Rupert, gives an outline of the work being done there, as follows:

Refrigeration

1. An examination of the chemical changes which occur in fish during cold storage; (a) a study of the changes which occur in oils and fats; (b) a study of the effect of low temperatures upon fish proteins.

2. A study of the chemical changes which occur in fish oils during "rusting."

3. An examination of the effect of storing frozen fish in various cases.

These investigations are all concerned with the storage of frozen fish, a field which is urgently in need of research, since very little is known about the causes of the deterioration which frozen fish suffers ordinarily during cold storage.

By-products

The work on by-products has been carried on in three directions: fish oils, fish meals and the production of fish glues.

The work on oils includes:
1. A study of the physical and chemical characteristics of pilchard, salmon, herring and dogfish oils.

2. An investigation as to the possibility of using fish oils in paints; (a) the bodying of fish oils by heat and blowing; (b) the character of paint films prepared from pilchard oil.

This work is producing very promising results. Paints manu-

factured in this laboratory are now being tested in Prince Rupert and Saskatoon, Sask.

3. An investigation of the medicinal properties of fish oils. (a) the vitamin A content of dogfish liver oil; (b) the vitamin D content of dogfish liver oil; (c) the irradiation of dogfish liver oil and the effect on its antirachitic value.

A paper on the vitamin A content of dogfish liver oil has been published, one on the vitamin D content is in the hands of the publishers and the work on irradiation is nearing completion.

The work on fish meals includes:

1. The analysis of fish meals, including a determination of the nitrogen partition and the content of essential amino acids.

2. A study of the effect of putrefaction of raw materials upon fish meals.

3. A study of the effect of various methods of drying upon the analysis and nutritive value of fish meals.

4. The biological value of fish meals.

5. The influence of fish meals upon growth.

The work upon fish glues includes:

1. The analysis of waste press-liquors from fish meal plants.

2. The preparation of glues from fish heads and offal.

3. A study of the influence of various constituents of press-liquors upon fish glues.

This work is being carried on in order to find a way of preventing the great loss of nitrogenous materials which now takes place at every fish meal plant.

Amongst other investigations may be mentioned:

An examination of the cause of the discoloration of halibut in the holds of fishing vessels. The discoloration has been found to be caused by a certain bacterium pseudomonas fluorescens. The method for the prevention of this discoloration by killing the bacteria has been found and will be applied during the coming year.

This research will result in saving large sums of money for the industry and at the same time improve the quality of iced halibut.

Enjoy this miracle—

Victor Micro-Synchronous Radio

the most sensational triumph in the history of tone reproduction

Revolutionary in principle—in design—in performance! Victor quality . . . at a price you can afford . . . at all Victor Dealers! Don't Miss it!

VICTOR RADIO CONSOLE R-32 \$255 (Complete with tubes)

FULL VISION, SUPER-AUTOMATIC STATION SELECTOR, ALL STATIONS PLAINLY AND PERMANENTLY VISIBLE . . . JUST SLIDE THE KNOB TO RIGHT OR LEFT — IN COMES THE STATION YOU WANT!

VICTOR RADIO-ELECTROLA RE-45 \$375 (Complete with tubes)

Outstanding VICTOR Features

1. Micro-synchronous balance: Every element in micro-exact resonance at any frequency. Condensers automatically harmonized. Unprecedented sensitivity and selectivity. Perfect performance through the entire range of the dial for the first time.
2. Super-automatic, full vision, illuminated station selector . . . as illustrated.
3. Improved circuit developed by Victor . . . unparalleled stability and fidelity.
4. Push-pull amplification . . . introducing the new power Radiotron 245. Greater and undistorted volume with the entire musical scale.
5. Three separate and distinct units—interchangeable . . . all accessible . . . all parts shielded with scientific thoroughness.
6. Marvelous new improvement in the Victor electro-dynamic reproducer . . . re-creates the quality of voice or instrument in all its life-like realism.
7. Compact cabinet design of all-Victor craftsmanship . . . exquisite in every line. Harmonizes with the furnishings in the finest homes.
8. A remarkable new improved Electrola that reproduces the new Victor V.E. Orthophonic Records in all their brilliancy.

HERE it is . . . the musical sensation of the age . . . the instrument hundreds of thousands have waited for . . . the very newest radio by the creators of the New Orthophonic Victrola . . . the newest radio by the producers of the marvelous Victor V.E. Orthophonic Records!

Radio by Victor . . . created by Victor — designed by Victor — built by Victor!

An instrument that introduces an achievement heretofore thought "impossible" . . . MICRO-SYNCHRONOUS RADIO . . . the goal towards which radio engineers have striven ever since the birth of radio!

an all-electric radio that reaches far into the future . . . that Victor is proud to trademark "His Master's Voice."

Never before has radio afforded such startling tone naturalness . . . reproduction to be compared only with the singing or playing of the artists themselves!

Victor-Radio can be had separately in a handsome walnut cabinet or with the marvelous new improved Victor Electrola . . . combined in one artistic cabinet no larger than your old Victrola!

The best news of all is the price! Only \$255 for the Victor-Radio Console . . . only \$375 for the Victor-Radio-Electrola Combination. You may purchase on the deferred payment plan at all Victor Dealers.

A Face-to-Face Talk With a Watch That Stopped

Why had it stopped—this fine watch? Not from an accident or misuse; but simply from neglect.

Like most men, its owner never gave a thought to the beatings of its delicate, heart—until it stopped.

So we maintain a service department to give proper attention to our customers' watches.

LUNCHEON FOR RAILWAY HEAD

Board of Trade Arranging Public Event and Will Meet Sir Henry

The Prince Rupert Board of Trade has decided to put on a luncheon at noon on Wednesday, August 28, which will be addressed by Sir Henry Thornton, president and general manager of the Canadian National Railway.

It is understood that this luncheon will be a public affair and doubtless a good many will take the opportunity of attending.

It is understood, the Board of Trade will also meet Sir Henry prior to the luncheon and will take up with him matters of mutual interest.

SOCIAL TIME CATHOLIC HALL

Women's League Stage Enjoyable Card Tournament and Dance Last Night

The social given by the Catholic Women's League at the Catholic Hall last night proved a most enjoyable and financially successful event. The early part of the evening was given over to cards and the remainder of the time to dancing to Balagno's orchestra with Harry Astoria as master of ceremonies.

The affair was in charge of Mrs. J. J. Gillis, convener, assisted by Miss Mary Astoria and Miss M. Busenich, with M's. M. Couture and Mrs. A. Murray in charge of refreshments. The results of the card games follows:

Bridge—Ladies' first, Mrs. C. P. Balagno; second, M's. Martin Miller; gents' first, E. Green; second, A. Astoria.

Whist—Ladies' first, Mrs. M. LePage; second, Mrs. Fred Rifou; gents' first, James McNulty; second, J. Mair.

Attendance prize, Mr. Owen, with ticket No. 42.

The raffle for buffet runner was won by Mrs. J. Tennant with ticket No. 25.

HALIBUT SALES

Summary

American — 46,000 pounds, 12.5c and 8c to 14.6c and 8c.
Canadian — 62,500 pounds, 12.5c and 8c to 14.2c and 8c.

American

Tahoma, 19,000, Cold Storage, 12.5c and 8c.
Lumen, 10,000, Cold Storage, 14.5c and 8c.
Eureka, 17,000, Atlin, 14.6c and 8c.

Canadian

Viking I, 8,500, Atlin, 13c and 8c.
Cape Spencer, 19,000, Cold Storage, 13.6c and 8c.
Covenant, 26,000, Booth, 12.5c and 8c.
Margalice, 5,000, Pacific, 14.1c and 8c.
Ringleader, 4,000, Atlin, 14.2c and 8c.

CANADA'S FOREST AREA

The total forest area of Canada is estimated to be 1,151,454 square miles. Of this area, 865,880 square miles are productive and accessible; a little over one-third of this area bears timber of merchantable size; the remainder carries young growth not yet fit for use.

Frank Waterhouse freighter Southholm, Capt. Sutherland, is in the Skeena River today loading canned salmon for Vancouver.

Dr. J. C. Lawson, Vancouver dietician, who has been giving lectures here this week, will sail this evening by the Prince George on his return south.

C.N.R. steamer Prince George, Capt. Harry Neden, is due back at 5:30 this evening from Anyox and Stewart and will sail at 7 p.m. for Ocean Falls, Powell River and Vancouver.

Church Services

CHRISTIAN SCIENCE
Christian Science Society, 245 Second Avenue

This Society is a branch of the Mother Church, the First Church of Christ, Scientist, in Boston, Mass. Sunday morning service at 11 o'clock. Subject, "SOUL." Testimony meeting on Wednesday evening at 8 o'clock. The public is cordially invited. Reading room, 345 Second Avenue, open Mondays and Thursdays from 3 to 5 p.m.

FIRST UNITED CHURCH
Pastor, Rev. A. Wilson, B.A.

Morning worship at 11 o'clock. Subject, "The Responsibility of Personal Influence." Evening service at 7:30. Subject, "Things That Survive the Earthquakes of the Ages." Organ solo by Ewart Lyne, "March Religieuse" and "Fugue on a Theme From Handel" (Guilmant).

NEWS OF NORTHERN B.C.

SMITHERS

Indians of Hagwilget, Moricetown and other native centres in this district have expressed their opposition to any power development of Moricetown Falls on the Bulkley River. They claim that it would ruin their fishing and declare that they would demand a million dollars for their rights.

At the Vancouver Exhibition last week, Owen Lake mine won first prize for copper ore against scores of well known properties in British Columbia. The Omineca branch of the British Columbia Chamber of Mines won first prize in a competition for the best display sent in from any mineral division in the province.

Police are inclined to the belief that Thoms Francis Stephenson, well known prospector of 25 years' standing in this district, has lost his life in the hills south of Hubert. He was last seen on July 6 when he left for a fishing and prospecting trip to that region. A search is being made.

After an illness extending over a period of eight years, Roy Sidney Ridsdale, aged 44, died Sunday night in the Hazelton Hospital. He arrived in 1906 at Hazelton where he was engaged for years in mining and prospecting as well as ranching. More recently he had been an engineer at the Duthie mine. He is survived by his father as well as a widow and three children in Vancouver.

The most active work of the Consolidated Mining & Smelting Co. in the Omineca district is being concentrated on the Copper Island property on Babine Lake where diamond drilling is proceeding. The Emurld and Glacier groups on Sibola Mountain are also receiving attention.

Smithers defeated Rose Lake by a score of five to nil in a football game here on Sunday.

Mr. and Mrs. John McKenzie and family and Miss Avia Wall have returned from a month's holiday motoring in the southern part of the province. During the trip, they visited Vancouver, Victoria and Seattle.

PRINCE GEORGE

Survey has developed at Fraser Lake as to whether the main highway, on which considerable improvements will soon have to be undertaken, should be built along the south or north shore of the lake.

Thunderstorms and showers have been general here during the past few days.

The provincial government's road program in Prince George district is now well under way after having been delayed on account of unfavorable weather. A survey has been commenced by J. W. Miers for the extension of the road from Summit Lake to Davie Lake. The distance is expected to be about 26 miles.

Miss Lottie Davis and Alfred Holmwood, both of this city, were married last Sunday morning by Rev. T. S. DePencier. They have left for a honeymoon trip to Vancouver and other cities in the south and will later take up residence here.

THE GREEN SHADOW

by HERMAN LANDON

INSTALLMENT TWENTY-THREE

He turned quickly into a cigar store, entered a telephone booth, and called the Castle home. Miss Castle's voice, usually so clear and bright, was heavy with depression.

"This is Mr. Dale," he spoke in a low voice, out of respect for the neutrally garbed person hovering outside the booth. "Any news?"

Her answer came after a little pause. "Yes—an ultimatum from—but you know he has given me 24 hours. After that—"

"I can guess the rest," said Dale. His face clouded while he reflected briefly. "Did you—er—hear from him by telephone?"

"Yes, this morning."

Dale reflected again. At the other end of the wire he could picture a brave, lovely girl beset by tribulations. "He will probably telephone you again during the afternoon. If he should do so, ask him to call back at 9 o'clock this evening for your definite answer."

"At 9? What shall I tell him?"

"I'll see you in the meantime. Then we'll decide. Cheerio!"

"Twenty-four hours," Dale thought as he stepped out of the booth. "Dr. Moffett is getting anxious."

Plot and Counterplot

From the telephone booth Dale taxied to his bank, arriving there just before closing time. In exchange for his personal check he received two one-thousand dollar notes and 48 one-dollar bills. The accommodating bank clerk selected fresh, crisp currency and snapped a rubber band around it, forming a compact bundle about as thick as Dale's middle finger.

With a careless air Dale dropped the bundle into his inside coat pocket and went back to his taxi. His next stop was 262 Bank Street, and here he paid and dismissed the driver. Without expecting a too cordial reception he ran up the steps and rang the bell. It was a new face that answered his summons—the face of a man considerably younger than Axelson. He was dark and lithe and slim, with sharp features and a cautious expression.

"Is Mr. Ferryman in?" he inquired.

"You will find him in the next house, sir, 260."

Dale studied the fellow for a moment. He reflected that Ferryman was not particularly fortunate in his selection of servants.

"You are new here, aren't you? What's become of Axelson?"

"Axelson is no longer here, sir. He left this morning." The servant started to close the door in Dale's face. "I doubt if Mr. Ferryman will see you, sir. He is not receiving callers today. But you might try—oh, here he comes."

A tall, bareheaded man appeared on the stoop of the adjoining house.

"Wish to see me?" he asked. "Oh, it's you; Mr. Dale." A chill crept into his voice. "I saw some one from the window, and I wondered. I can spare you a few minutes."

He came down the steps, crossed over to 262, and with frigid politeness motioned Dale to enter. They walked into the library. Ferryman was holding himself a little more erect than yesterday, but traces of shock and grief remained in his fine face.

"Be seated, Mr. Dale. I am rather surprised to see you after what happened here last night." Dale smiled genially. "I saw Captain Summers at luncheon. Queer sort. Summers, physically and mentally. His head is too large, and there are too many crazy notions in it. He gave me a vague idea of what occurred in this house last night."

Ferryman regarded him suspiciously. "You were here, weren't you, in the role of the Picaroon?"

Dale laughed. "That's one of Summer's refreshingly original ideas. Well, when a man has a head as big as his, he has to fill it with something."

Ferryman's eyes were still full of disgust. "Captain Summers

telephoned me an hour ago. He had a very astounding report to make."

A frown of perplexity gathered on his forehead. "The pearls have been recovered."

"Congratulations," Dale murmured.

"Oh, I didn't care greatly about the pearls. They are valuable, to be sure, but of what use are they to me now? My poor wife will never wear them again."

His voice broke, but in a moment it gathered strength again. "There is only one thing I live for now, and that is to see that the murderer is properly punished."

Dale inclined his head sympathetically. "That's a natural sentiment, Mr. Ferryman. But tell me, you don't really believe that the Picaroon murdered her?"

The other man hesitated. His face showed a conflict between stern emotions and gentle ones, between grief and vindictiveness. "I am not convinced," he said. "It is strange that the Picaroon should have returned the pearls. And there are many other incongruities that complicate the matter."

He raised his head a little. "I didn't like the way Axelson acted last night. In a twinkling, as I looked into his face, all my former feelings with regard to him changed. All at once I was filled with distrust. This morning I discharged him. I don't know whether or not I was justified."

Dale looked about the room which had been the scene of Miss Castle's interview with Dr. Moffett and of his own exciting encounter with Captain Summers last night. Somethings seemed to have disturbed its former state of order and neatness. Things were scattered about, the furniture had been disarranged, there were signs of some one's hurried departure.

"Yes, I noticed it this morning," said Ferryman, following his glance. "I called Axelson's attention to it, and he acted sullen and discourteous. Then I discharged him. There is no longer any doubt in my mind but what certain persons have been making improper use of my house, possibly with Axelson's connivance. If so, I hope they are gone for good."

He sighed. "You were inquiring about a certain Dr. Moffett the other day. Lately I have been thinking that perhaps such a person exists."

"You have learned something?" Dale asked quickly.

Ferryman hesitated. For just a moment he seemed inclined to take Dale into his confidence, and then his face closed up again. "No, nothing definite. In fact, I have had only the vaguest sort of inkling. Besides—with a glance over the confusion in the room—all that appears to be happily ended now."

Dale frowned a little. Last night's excitement, together with the subsequent discharge of Axelson, had evidently prompted Dr. Moffett to make new arrangements in great haste. This development was not to Dale's liking. His task had not seemed so difficult as long as he knew where the enemy could be reached. Now he would have to trace him to his new quarters.

Doctor Moffett had added elusiveness to his other formidable qualities. That would mean a new problem to solve and consequent delay.

In the midst of his reflections he found Ferryman regarding him with an intent puzzled expression.

"You are a bewildering person, Mr. Dale," he now murmured with a faint, uncertain smile. "I should distrust you, perhaps hate you as a murderer, but as I sit here looking at you I somehow can't feel that way toward you."

Either I am a very poor judge of character, or else"—he paused, his eyelids drew together, a frown came—"I don't know," he finished lamely.

Dale laughed. "Afraid to trust your instincts, Mr. Ferryman? Well, that's natural. I'll make you a promise. Inside of a few days—within a week at the most—the murderer of your wife will be brought to justice."

He rose, wondering if he had made too rash a promise. Ferryman rose also and followed his caller to the door. There, with still a trace of reluctance in his manner, he offered his hand. Dale shook it. He could see that, although he had not won the older man's confidence, he had made a good impression.

Half an hour later he was again in a telephone booth.

"Yes, he called only a short while ago," Miss Castle told him. "He is going to telephone again at 9."

"Splendid!" Dale glanced across his shoulder through the glass panel in the door. A lanky person in a shabby gray suit was dawdling at the nearby counter. He lowered his voice. "I'll call at half-past eight, if I may. That will give us half an hour for deliberation."

"Oh, do come!" said Miss Castle eagerly. "I'll go mad unless I can talk to some one."

Dale strolled out into the sunshine again. For a while he amused himself by making divers short turns, doubling back on his course occasionally, dipping into subway entrances and out again, and after an hour of such manoeuvres the lanky person in gray was no longer in sight. He laughed at his successful dodge, stopped at an exclusive shop window to inspect a display of neckwear, and in a moment he grew conscious of some one's furtive and deliberate scrutiny.

"Another," he mumbled. "Well, well!"

He turned away and leisurely sauntered down the street, pausing shortly before another shop window. This one had mirrors at three sides, and in one of them he saw a tall, loose-jointed, stylishly garbed person who shortened his steps as Dale stopped.

"Paul Ainsworth, alias Doctor Moffett," he mused. He fingered his jaw and smiled wryly at a recollection. Then he swung round suddenly.

"Oh, hello, Ainsworth!" he exclaimed. "This is luck. I was just longing for the sight of a familiar face. Shall we stroll along?"

"As you please," said Ainsworth with a shrug. His sneering, insolent manner concealed whatever disappointment he may have felt at being thus openly accosted by the person he was shadowing. "Who is the lucky little charmer?"

The—what?"

"You were looking at a display of sealskin coats in that window. When a man shows an interest in such things, it generally means that he is contemplating a present to his lady love."

Sport Chat

Although the automobile has done much to supplant the place of the horse in the commercial and family life of the United States, the equine is again coming into its own in the society centre of Newport, through the efforts of Mrs. Muriel Vanderbilt Church, one of society's most popular leaders. An enthusiastic sportsman, adept at tennis and golf as well as boating, Mrs. Church's real outdoor love is horses. She now has 25 horses, all show animals, in her beautiful \$150,000 stables, erected last fall.

The soccer squad which will go to England this month to represent Worcester County, Mass., in international competition has been selected from the county industrial teams. The team is directed by the Worcester County Sportsmanship Brotherhood and each year meets English teams either in this country or abroad. They will stay in England for three weeks this year, meeting many of the best teams in that country.

Bull fighting will be a popular sport in New York some day predicts Sydney Franklin, Brooklyn's only full fighter. Franklin, who was once a commercial artist and took up bull fighting after becoming interested in it during a visit to Mexico City, says that bull fighting carries the "greatest kick in the world for him."

He said: "That's why I fight bulls. Enjoy every minute of it. I only wish I could fight morning, noon and night." Franklin has fought three times in Seville and once at San Sebastian. He said he was hopeful that he would succeed in Madrid where for the bull fighter to triumph is usually the most severe test of the profession. Franklin is a slim, blond, well-built youth with a boyish grin and looks more like a clerk than a bull fighter. He does not wear the little pig tail that bull fighters used to affect but instead has his hair cropped closely and neatly parted. He has been fighting bulls about five years. Unless a bull gets him, he says he expects to continue in the profession and introduce it in New York.

Rain last night caused the postponement of the league football fixture between Thistles and the Empress Social Club. This makes the third Mobley Cup game it has been necessary to postpone because of unfavorable weather.

Last night's C.N.R. Softball League fixture between the Round House and Superintendent's Office had to be postponed on account of the rain. It is possible the game may be played tonight.

worth's surveillance, but the little episode pleased him.

Soon, however, his face sobered. Ainsworth, with his dual role, was a greater problem than he had ever attacked. Somehow Miss Castle must be informed, but Dale did not relish the part of informer. If only there could be some sort of automatic adjustment, if only Fate would straighten out her own stupid tangles!

After half an hour's aimless roving he dismissed the taxi and dined at a hotel. He lingered over his after-dinner cigar and coffee, then took a walk. At precisely half-past eight o'clock a servant ushered him into the Castle drawing room.

Adele was there waiting for him. She was in a simple gown that yet gave an individual charm to her dark beauty. She looked up at him with a vague smile and gave him her hand.

"Are we alone?" Dale asked, glancing about the stately room.

"Yes, father is still at the office. I have left instructions that I am not at home to any one, but am to be called if I should be wanted on the telephone. Oh, by the way, did you see that horrid editorial in the Sentinel?"

"No, What's the yellow rag howling about now?"

"About the mysterious Mr. Graves. It says he must be exposed and punished in justice to the thousands of poor people he has swindled out of their pitiful savings." Her face flushed. "It says the failure of the police to apprehend him amounts to a public disgrace. It isn't fair! It's cruel! Poor father! He is working day and night so he can make restitution."

To Be Continued Monday

Hard Hitting OF N. Y. YANKEES

Around The World With Sport Fans

(By The Trans)

Won 12 to 2 From Detroit But Standing Not Affected by Result

NEW YORK, Aug. 17.—Although Chicago outfit Brooklyn the Robins donated the league leaders a breaking up game with a three run rally in the seventh inning, winning five to two.

O'Doul hit his twenty-fourth homer in the Philadelphia-Cincinnati game.

The Yankees had an old-fashioned hitting rally, hammering Detroit all over the place aided by Ruth's thirty-second homer, smacked when Uhle was on first with Combs also on base. The win of the Yankees did not help in the pennant race since Philadelphia, league leaders, also won.

The White Sox ended a losing streak by trouncing Washington in a free hitting contest.

Scores for the day follow:

National League
Chicago 2, Brooklyn 5.
Pittsburgh 9, Boston 3.
Cincinnati 7, Philadelphia 3.

American League
New York 12, Detroit 2.
Philadelphia 6, Cleveland 5.
Boston 3, St. Louis 2.
Washington 6, Chicago 8.

ENGLAND OPENS CRICKET MATCH

Scores 166 For Four Wickets Against South Africa Today in Fifth Test

LONDON, Aug. 17.—When the English first innings score in the fifth cricket test match with South Africa stood at 166 for four wickets today, rain stopped play. The match continues on Monday.

Jack Hobbs, the veteran English opening batsman secured only ten runs.

So far South Africa has not won a game.

When the Hon. F. A. Pauline, Agent General for the province, presented to the Canadian Pavilion at Bislely a mounted panther skin in the name of the people of British Columbia, he reminded the Canadian team of the fact that the Pacific Coast had always been well represented in the team and he expressed the hope that the B.C. representatives would deserve well of their fellows. He has been justified of that hope. How Lt. Col. Blair of Vancouver carried off the King's Prize after the most dramatic shoot-off on record has now passed into history. But what perhaps is not so well known or recognized is the wonderful feat he performed in winning the Grand Aggregate on the same day. The two events, the King's Prize and the Grand Aggregate, take precedence of all others in the great rifle carnival of the British Empire, and from a shooting point of view, the Grand Aggregate comes first. Never before have the two been won by one man.

For the first time in the 12 years since the World War, Germany's tennis stars many made their presence felt in the Davis Cup lawn tennis seen Dr. Prehn, top, and Dr. Mallebauer, below, carried the fight to the semi-finals of the international matches before being eliminated by the United States. Tennis experts feel that this year of aces should go even further next year.

Waterfront Whiffs

Salmon Fishing Season Nears Conclusion; Halibut Landings Holding Up Well; Other Waterfront Doings

With the closing yesterday at 6 p. m. for a week of fishing with 5 3-4-inch mesh nets, many of the salmon canneries on the Skeena River discontinued operations for the season and the fleet of active fishermen will now be reduced from 1100 to some 300 or 400 boats. For a week fishing with nets of less than 6 1-2-inch mesh will be prohibited, with the smaller mesh again permissible after that time, although there is expected to be no resumption to any extent of fishing for fall varieties after the intermission. The season is now ended except for chums and cohoes and packing operations will be centralized in perhaps four or five canneries on the Skeena River while the rest close down.

On the whole, the 1929 canning season in District No. 2, of which Prince Rupert is the centre, can be described as having been little better than fair, although it shows a substantial improvement over 1928. The run of the choice sockeye has been up to expectations and quite satisfactory, while the pink run, as anticipated, was light. Throughout the season trollers have been quite successful in taking cohoes and are still continuing operations, while seining and gill netting is now to a large extent shut down. The pink run is pretty well over. It has been practically a failure on the Naas River, while it was fair on the Skeena. The central division has been doing well on pinks.

A gratifying fact during the 1929 season is that large quantities of all species of salmon are getting up the rivers and creeks in the district to spawn. High water has considerably aided the movement of the fish.

The chum run will commence on the Queen Charlotte Islands toward the end of August with two canneries operating in Massett Inlet—the Langara Fishing & Packing Co. at New Massett and the Massett Cannery at Old Massett. These will be the only operating canneries in Massett Inlet this season. The Langara cannery commenced packing cohoes from the trollers this week.

New Patrol Boat

Delivery was recently made by the Hoffer Beeching shipyard in Vancouver of a 45-foot power cruiser for fishery patrol service in this district. The vessel has a beam of eleven feet and a speed of ten and a half knots with a very large cruising range. She is named Cloyah II.

Captain Joe Enos, fish skipper of Provincetown, Mass., is exhibiting a blood-stained eight-inch wooden fork which he says came from the stomach of a large cod-fish caught off Highland Light. The fork has been added to Captain Enos' collection of odd finds, which now includes the skeleton head of a cow, which was found inside a shark, and a half-pint bottle found in the stomach of a horse mackerel.

Motorship Zapora is due in port this week-end from Alaska with load at the Big Bay Lumber Co.'s sawmill a cargo of airplane spruce, which will be trans-

shipped from Seattle to the United Kingdom.

With the practical closing down this week-end of salmon fishing and canning operations, there has been a large movement of fishing boats to port in the course of the week and, during the past few days, there has been quite a congestion at the Cow Bay floats. Many native boats have been coming in and quite a number will remain in port until after the fair, when they will proceed to their various homes to commence the winter's hibernation. Several seineboats have also come in as well as a considerable number of trollers.

Under the supervision of "Buck" Lodge, who was recently appointed foreman for the company, the Pacific Salvage Co. is redecking the west end of its dock to the rear of the premises formerly occupied by the Rupert Marine Works. The shed which was formerly formed a portion of the buildings of the Prince Rupert boat house will be moved down from the government wharf and placed on the Pacific Salvage dock.

Margallice Fishing Again

The well known local halibut boat Margallice, which sank about a month ago on the west coast of the Queen Charlotte Islands, being successfully raised by the Pacific Salvage Co. and repaired at the local drydock, left for the fishing grounds last week-end under command of Capt. Andrew Gorden is now due back in port again. Capt. Jack Christiansen, owner and skipper of the Margallice, who sustained painful burns on both arms from an explosion on board the vessel while she was being repaired, is now nearly recovered from the effects and expects to resume command on the next trip.

George Eckerman, who has been identified with the Nelson Trading Co. on the local waterfront for the past couple of years, left on Tuesday evening aboard the schooner Dorothy for Seattle. It is uncertain whether or not Mr. Eckerman will return to Prince Rupert. He was very popular with many friends along the front and his presence will be missed.

Shel Darton, accountant for the Canadian Fish & Cold Storage Co. and Mrs. Darton had a narrow escape from what might have been serious injury last Tuesday evening when his car, in an attempt to avert a collision with a big transfer truck, went off the street and turned over on its side in a gully on Sixth Avenue East. Fortunately, Mr. and Mrs. Darton were unhurt, although the car sustained considerable damage in its contact with the stumps.

Lighthouse tender Newington, Capt. Harry Ormiston, left yesterday for a two weeks voyage down the coast to service the various lights in its territory between here and Egg Island in Queen Charlotte Sound.

The halibut is the largest of the edible flat fish, one of the most important of food fishes. It is indigenous to both the North Atlantic and North Pacific. It is seldom found south of the fortieth parallel. It is not found south of the equator. It exists in the greatest abundance off the British Columbia coast. Early explorers to the northwest coast of the Pacific noted its abundance. Captain Cook recorded in June, 1778: "Our people caught 300 halibut this morning." He was at that time in the vicinity of Kodiak Island, Gulf of Alaska.

The halibut spends its entire life in salt water. They spawn in deep water fifty to 250 fathoms in depth, in the fall and winter. Their eggs are fertilized after

they have been expressed by the females. They float at varying depths, usually below eighty-five fathoms. Those collected by the commission's staff were taken eighty-five to 750 fathoms in depth. The eggs when ripe are translucent, free of visible globules or floating particles. The outside capsule is marked with delicate short intersecting lines. They are round and 4.86 millimeters in size. The time taken in incubation is unknown. The only larvae stages collected by the commission were taken in the Gulf of Alaska at depths from 250 to 850 fathoms. They were in the yolk sac stage, all under 2.4 millimeters in length. They have long snake-like laterally compressed bodies. The eyes, proportionately spaced on opposite sides of the head, are large and the snout pugged. The pectoral fins are small and larvaal, the dorsal and pectoral fins not yet shown. In the Gulf of Alaska the eggs and larvae drift to the westward. The commission has collected a large number of the very early larvae stages that are much smaller than those previously collected anywhere. But so far the older stages of the very young, fully formed fish have been taken only in Europe.

After the yolk sac is absorbed they swim upright like most fish. Both sides of the head and body are alike. How long they swim upright; and when and what changes occur before they acquire the habit of lying on one side, with the head twisted sidewise, both eyes on the upper side, is unknown. It is one of the most fascinating problems on which the commission is engaged. It is one of the most engaging problems in marine biology.

In recent years there has been no branch of fishery science as rich in results as that of the study of age and rate of growth. Not only does it show the rate of growth at which species develop and the time taken in the immature stages, but it throws light upon their movements—thus in the salmon, the length of time spent in the sea, and the river in which it is hatched. The same method has been used in herring, a classic instance being the discovery that in a certain locality on the Norwegian coast the growth in a particular year was very small. The herring originating there were marked by this small growth—so that their migrations were followed year after year.

The halibut has an inner ear but no external ear. In the ear a stone is developed, which grows in size from year to year by deposits from the outside. The winter growth is more transparent than the summer growth, making a stone which is marked like the rings of a tree. The bones are called otoliths, or ear-bones. They are used to determine age. The scales of the halibut also show growth rings, but they are so constructed as to make it more tedious to determine, than the study of ear-bones.

Halibut Landings

The 1929 season is still maintaining its healthy lead over 1928 in the matter of volume of halibut landings at the port of Prince Rupert, the total up to and including yesterday having been 17,771,550 pounds, as compared with 17,125,700 pounds at a similar date last year. Canadian landings now aggregate 5,439,850 pounds, as against last year's 5,513,800 pounds at a similar date, while total American fares are up to 12,331,700 pounds, as compared with 11,611,900 pounds.

During the week from Saturday to yesterday inclusive landings amounted to 686,900 pounds, of which 258,900 pounds was Canadian fish and 428,000 pounds American. Prices during the week were around an average level. The highest bid for American fish was 15.7c and 8c, which the Frisco was paid for 9000 pounds, while the top bid for Canadian fish was 16c and 9c, received by the Cape Spear for 10,500 pounds. Low bids of the week were 13.2c and 8c for Canadian fish and 12.3c and 8c for American.

The date for the closing of tenders for the construction of the new fishermen's floats here has been extended to September 11. Soon after that time, it is expected, the contract for construction will be awarded by the federal department of public works.
