Girls Go Back to Defense Plants

FAMILIAR FACES are reappearing in British defense plants as the country's rearmament program, costing the equivalent of over \$13 billion, gets under way. Pictured is Janet Rooney, World War II munitions worker, again making breech rings for 20-pounder gun barrels in a Cardiff (Wales) plant. Rearmament in Britain means continued rationing and other austerity measures for Britons.

PULP AND PAPER CLASSES-

Local People Learn About Logging From Ray Johnson

Tuesday night's class in pulp and paper making sponsored by Columbia Cellulose Co. Ltd. heard the second in a series of lectures on woodland operations by R. L. Johnson, the company's woods chief. Sixty interested people are taking the full course at Booth

Memorial Highschool.

Following is a condensed vers on of Mr. Johnson's first lect ire, entitled "Woodlands Opera-

and at the same time protect the iorest from destruction. FOREST MANAGEMENT The timber in which Columbia

Cellulose Co. operates near Prince

Wood was in common use by Rupert is owned by the governnen before the dawn of history, ment and leased to the company traced by excavations. Today, under a forest management for a products have created an license. This type of lease reis ustry which is one of the quires the company to develop peripal sources of national the timber area by roads and walth. There are few objects or camps, protect it from fire, procut benefit of roads. For this products in use which do not at vide a mill for marketing the purpose, often crawler-type tracsome point require wood as a raw timber and to remove from the

out into the forest sometimes under adverse conditions of weather, or in hazardous positions, find the work which has o be done, then do it.

UMBERJACK

Physical strength and stamina so is required. Such men are the lumberjacks and among them are found many sober, respectable, industrious, intelligent family men, good citizens and neighbors, many with better than average education, as well

as the more highly publicized irresponsible roisterers famed in ong and story of bygone days. Timber harvesting is begun by cutting the trees, or "falling." most of which is done today by light power driven saws, operated by two men. These trees then

have to be cut into convenient lengths for handling. This process is "bucking" and produces logs in lengths from 10 to 100

After being felled and bucked. logs must be removed to market mill, and the first stage of transportation is called "yarding" which means moving logs from the stamp elsewhere, withE .

omic Weapons

ENERAL EISENHOWER has warned against placing too much confidence in the power of nic weapons to win wars.

Of course, atomic weapons are tremendously portant and must be prepared and guarded nst but they should be kept in their place.

It should not be forgotten that equal or greater ruction is possible through gases and germ waralready available or possible of development. Already tactical rather than strategic uses of ic weapons loom as potentially more effective, ng into consideration the possibilities of dees against them.
