BRITAIN WITHDRAWS OFFER TO

Russia in on Pearl Harbor Plan

Communist Spy Ring Influenced Sneak Attack

WASHINGTON (A Japanese official swore Monday that a Communist spy ring helped to influence Japan to attack United States in Second World War and had tipped off Russia before Pearl Harbor that plans would bear fruit.

This testimony was given by Mitsusado Yoshikawa, director of special investigations for Japan's attorney-general, at surprise meeting of the senate internal security sub-committee.

Yoshikawa, speaking through an interpreter, said that he learned the story from the confession of Richard Sorge, head of spy ring, hanged in 1943 for espionage by Japanese.

Assets ex- when the dollar was freed, but ceed liabilities by \$204.573, an remained below the previous fixed price of \$38.50. The 1950 working capital position of the average price for gold in Canada, however, was higher than the

1949 average, the report said. More placer gold was recovered stood at \$597,018, compared to in 1950 than in the previous year, 19,134 crude ounces compared with 17,886 in 1949. Quantity of ore mined at lode mines in 1950 was greater than in any previous year, except from 1939 to 1942.

Silver production of 9,507,225 ounces exceeded that of 1949 by 25 per cent. Copper production of 42,212,133 was less than in 1949

Lead production of 307,122,803 pounds and zinc production of 324,263,778 pounds were more than 1949 and their combined value of \$93.274,295 was exceeded only in 1948. Coal production dropped ap-

proximately 400,000 tons to 1,542,404 in 1949, the report said. It warned that coal producers face severe competition from Alberta coal, oil and possibly gas. Average number of men employed in all mining-industry branches in 1950, was 16,612, with salaries and wages \$42,738,035. Dominion taxes were \$14.877.802

Whom Shall We Choose?

IN OUR pride in the ways of democracy we boast of our right to choose our own rulers. In practice actually we often leave the choice to a matter of chance. The choice of a mayor will become the responsibility of the citizens of Prince Rupert shortly. How shall we carry out that responsibility? In fact how many of those entitled to vote will cast their votes on that day? Or alternatively how many will leave it to chance?

It seems to be a daily pastime to blame our city council for things not done. We blame them for unpaved streets; sidewalks that are of doubtful security, with an unholy capacity for upending, as one steps on where the other end should be; unsightly, unoccupied blocks with their accumulation of debris and discarded pipes and odds and ends. We blame other people for lack of attention to many daily inconveniences and drawbacks but how about facing the situation and putting the blame where much of it belong-namely on ourselves? We wait until an unfortunate situation crops up and then we look for a scapegoat. Why not be honest about it and recognize that it is our job to foresee where possible and to suggest remedies when it is not possible to foresee. This applies to the election of the mayor.

What kind of a person should he, or she, be? What qualifications are needed? What experience should he have had? Should he have had experience as an alderman? What are the objectives of the candidate for the office of mayor? Is he in it for what he can get out of it? Or for what service he can give to the city? Is he a self-seeker? Does he seek the office or does the office seek him, or her?

We have been fortunate in the main in our holders of the office in the past. Maybe that was just our good fortune. But how about some effective plan in advance? Will it be left to a few to foregather and name a likely candidate? What will be the objectives of the few who will nominate?

The choice will be a challenging one. The responsibilities are great. It is time that we thought seriously about our choice.

Practical Pensions

THE primary purpose of old age pensions should be to provide for those who are worn out to the extent that they are no longer able to provide for themselves.

To grant pensions at 70 to those who don't need them, and refuse them to those whose occupations have worn them out at an earlier age, may be a wrong conception of the state's duty toward its citizens.

Serious study to the problem of prolonging the working life of the citizen might also be given.

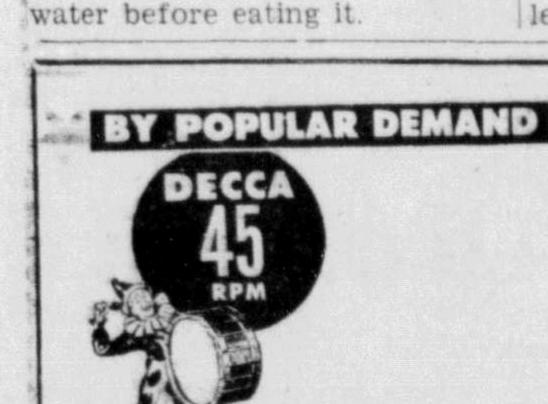

The best old age security any person can have is the ability to do some useful work for which the world will pay. The longer we can keep people usefully active the more enjoyment they will get out of life and the less assistance they will need from the state.

Scripture Passage for Joday

"Woe to them that go down to Egypt for help." -Isa. 31:1.

QUEER HABIT The raccoon has a well-known *habit of dabbing its food

As I See It

Farm Boom and Bust

NEAR SASKATOON. -

At the deepest part of the great depression I got the chance to know Saskatchewan well.

Here you saw at its worst the great paradox of our age-poverty in the midst of plentypeople half ragged and even half ed because they had produced

Not too much for the human needs, even here, let alone in the vast hungry belly of the old world; but too much to keep the wheels of the commercial system turning profitably.

THESE PRAIRIES are really prosperous today. This is partly due to natural bounty—the tapping of vast new oil pools in Alberta; the surge north for new metals, such as uranium, and for new timber limits for lumber and pulp. It is partly due to the boom market for what the farmer has

Saskatchewan farmers received \$119.986.000 from sale of wheat in 1939 and \$237,991,000 in 1949. \$8.987.000 in 1939 and \$74.011.000 \$2,362,000 in 1939 to \$8,644,000 in even in these days of inflation.

wan story:

Cheques cashed (1939) \$788 000.000; (1949) \$2,412,000.000. Personal income (1939) \$288.-00C.00C. (1949) \$827,000.000.

Retail sales (1939) \$187,000,000. (1949) \$520 000 000. Farm machinery sales (1939) \$8 380,000. (1949) \$72,032,777.

Number amployed (1939) 30,000. (1949) 49.645. Production (1939) \$302.000.000 gross; \$217,000,000 net. (1949)

\$924,000.000 gross; \$495,000,000 government has ignored the re-E'ectricity production (1939)

167,242,000 k.w.h. (1950) 400,062,-000 k.w.h. Telephones (1939) 83,000. (1949)

Commercial failures (1939) 67

OUTSIDERS might think Saskatchewan farmer did not have a care in the world. But just as stern experience has taught these people, that after the short hot summers, cruel winter comes rushing in on the wind from the north; so they know that world conditions could change overnight, to knock the Wellington. bottom out of farm prices.

That is the real reason for the coming to new life and strength of the farmers' union movement. Believe it or not there is, right now, talk of a "farmers' strike." To me it sounds vague, and a bit wooly because I can't find out of men were not made to proprecisely what they would strike

for, and whom against. tance to the decision recently tion. Even women often found taken by the three prairie farm it a severe strain.

Wisiting Canadian Won Fair Souvenir More Power In

ler, principal of Dougall School at Windsor, Ont., journeyed all the way to London to acquire a ready been drawn up for the inlovely bunch of coconuts.

That wasn't the whole purpose of his trip, of course. He has visited Scotland and the continent and now is searching available records for traces of his ancestors who settled in Kent hundreds of years ago.

In London he was attracted to the fun fair while taking in the sights at the Festival of Britain along with his wife and young son. Fuller couldn't resist the temptation of trying his throwing arm when he stopped in front of a coconut stand.

He knocked down one coconut new unit is established there. with the first pitch, and won two more in five tries. "Not bad for a guy who hasn't given the pitching arm a real workout since the days I was with the Canadian artillery in the First World War," said Fuller.

"But when I carried my prize into a crowded bus I had a difficult time convincing the amused passengers that it was going back home with me as a memento. They looked at me just as much as to say "Another screwy

(M. E. ANDERER)

It was a Sunday afternoon about two o'clock testing booth, where both the Serving in the kitchen were the city on the Camosun Sun- when the telephone rang and a voice said: "Are you day night from Vancouver where she went in company with the very busy or would you like to take a run out to remains of the late Jack Mowat Georgetown?" My answer was: "I'm not busy and I should like to take a run out to Georgetown. I'll be one pint-of blood is easily and son made coffee. at the Yacht Club right away." And I was.

owing a round trip to Stewart It was a glorious afternoon. up with its well-wooded background and newly erected pier in the foreground. With the tide just right the boat made its way across the bar inside Tugwell Island and out towards the open water and Georgetown. A couple of packers leisurely chugging their way and three gill-netters tied abreast in a friendly "we're together" clasp were passed. A few ducks dived and then took off. A porpoise surfaced leisurely, and in the distance was a large freighter. Skirting the reef and the seaweed we finally came to the entrance to Georgetown

impressive, broken occasionally the bar. But if you see the sand by the honking of geese and the at the base you had better go quacking of ducks. In conversa- outside;" there spoke the voice of tion with a permanent resident experience, and safety. the season begins.

The smell of cedar, the blue of the sky reflected in the calm sea beneath, the freshness of the air, many wild berries, all combined to make one feel the charm and restfulness of the sheltered bay.

There was dinner, varied and ample, and then it was time to head back to the city. A short row took me back to the boat and a cheery good-bye and we were on our return journey.

The sky was clouded over and it was not long until the rain began to fall gently but steadily. The sea was like glass and the boat sped along steadily, the engine never missing a beat. But this time we had to go outside Tugwell Island as with the tide out there would not be enough water to clear the bar. The skip-

Today the names "Peribonka" and "Kitimat" mean nothing to most Canadians. Right now they head blueprints — blueprints of work in the planning stage, of work in progress with thousands of men already on the job.

"Shawinigan", "Shipshaw" and "Arvida" were new names, too, many years ago. Today they are living reminders to Canadians and to the world — that Alcan has grown, developing this country's resources so that now it produces a quarter of the world's aluminum supply.

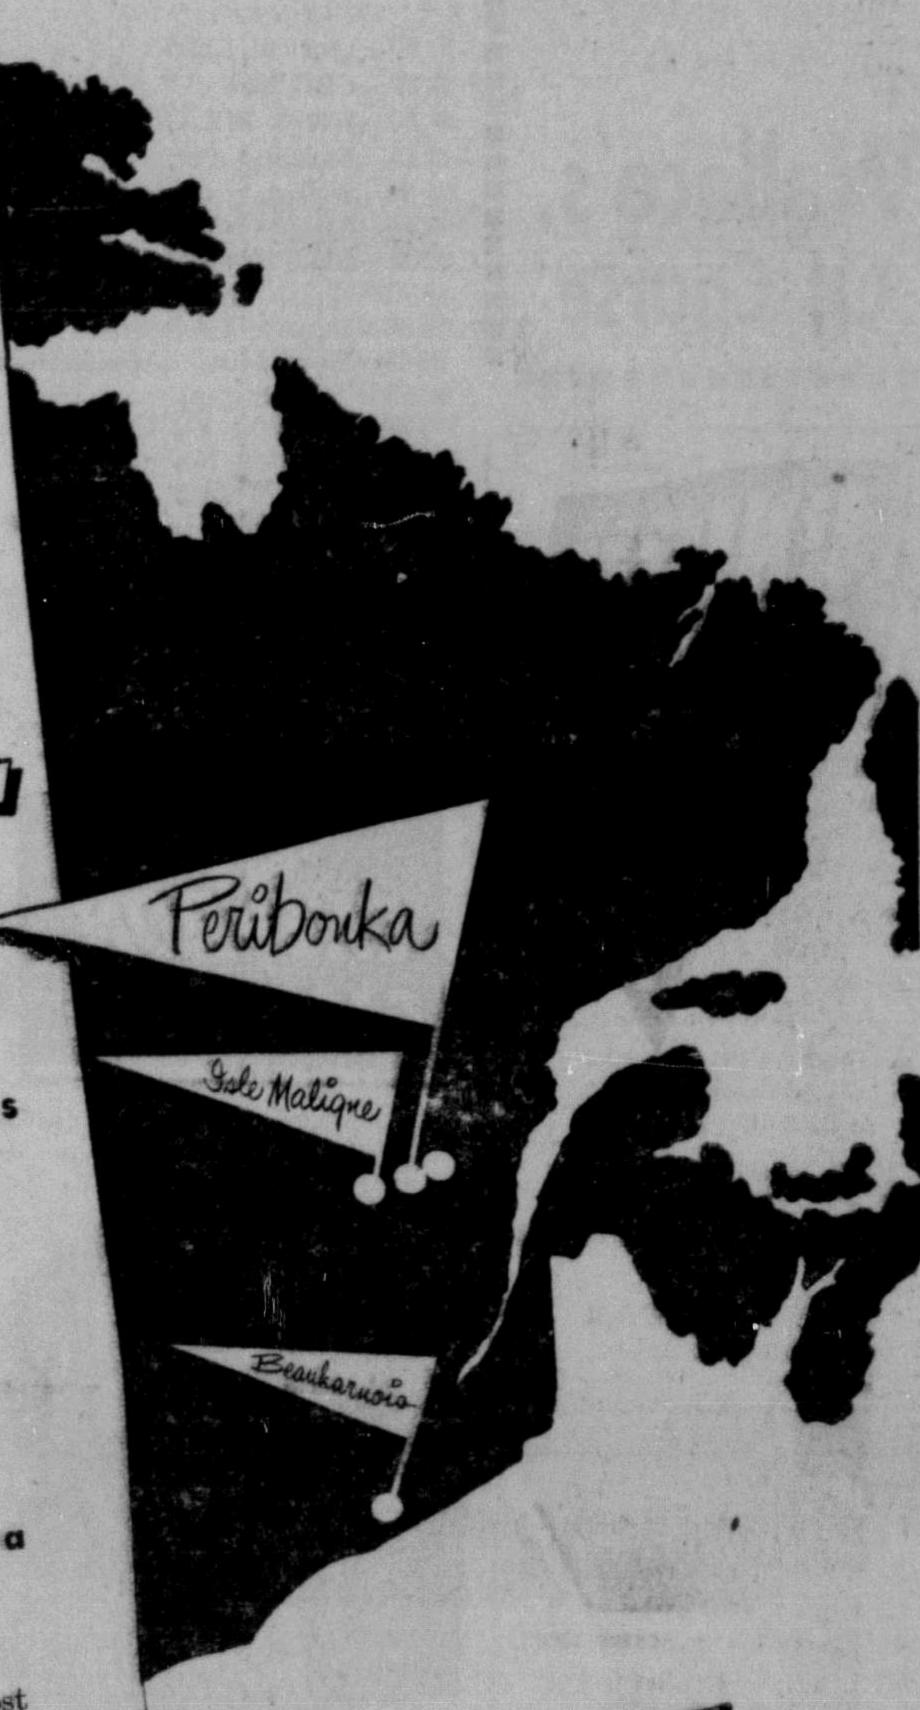

On the Peribonka River in Quebec, Alcan is harnessing two cataracts— Chute-du-Diable and Chute-à-la-Savanne. These will provide hydroelectric power for a big addition to aluminum output and additional power resources for the Saguenay District.

Meanwhile, up coast 400 miles from Vancouver, a whole new aluminum operation is planned. Where now stands the tiny Indian village of Kitimat, a whole new town will be built; here Alcan will construct a huge smelter. At Kemano, 50 miles away, Alcan will build a powerhouse inside a mountain; a ten-mile tunnel through this mountain will carry water from a chain of lakes down a 2,600 foot drop to develop an eventual 2,000,000 h.p. capacity.

This "Operation Aluminum" means jobs for thousands of Canadians. It means additional millions of dollars coming into this country from abroad, for much of this aluminum will be exported.

It means additional low-cost aluminum for Canada's own use metal which a thousand plants throughout the country use to fashion everything from utensils and toys to airplanes and bridges.

"Operation Aluminum" is a big thing for Canadians and for the free democratic world. It means a further line of defence against aggression. And it means a busier, more prosperous country in which to live and work.
