## Proclamation

"Prosperity week."

I am appealing to all citizens of Prince Rupert to do their bit to make this event an epoch in the history of this city. We are fortunate in having had a prosperous year and in order to keep prosperity in our midst and to have everyone sharing it I suggest that we make it a point to buy at home and to spend whatever money we can in various ways to keep the money in circulation.

A big effort should be made to show that Prince Rupert is always leading in everything. I do hope that a feeling of optimism and enthusiasm will prevade the whole town, next week, and that henceforth every man, woman and child will be sold body and soul to the idea that Prince Rupert has really the best prospect for the future of any city in the Dominion.

### THINK RIGHT AND YOU ARE RIGHT

"Think right and you are right," or in other words, "as a man thinketh so he is." Think prosperity and you become prosperous. Apply that to the local situation and we find that Prince Rupert will be much more prosperous if citizens unite in looking on the bright side of things. In other words they get the prosperity habit.

Take as an example the situation as it arose last spring. Business was quiet and many people saw blue ruin staring Big Rotary Club Event Closed Last them in the face. They talked in mournful terms of the outlook and it was a wonder we ever recovered. Then came the fish and the improvement and finally the busiest week or two that Prince Rupert has ever had. On the whole we have had a prosperous season and everything points to much better times ahead. Let us continue to thing prosperity so that greater prosperity may come to us.

## CRITICISM OF PREMIER BENNETT

Premier Bennett is being criticized for his attitude in bringing before the Imperial Conference a proposal that the nations of the British Commonwealth shall impose a ten per cent tariff against the rest of the world.

- It may be suggested that in doing so he is merely suggesting to Great Britain that the people shall tax them- secure a list of all the winners of selves for the purpose of entering the fiscal ring and that the operation for appendicitis if Britain were to propose such a line of action to this went to John Hoskins. That is the only possible criticism we see from Greenville, Jonah Gray, was that can be made and we doubt if it can be justified. If among the prize winners. We of the raffles: know of no nation of the Empire better fitted to make such a proposal than Canada for this country has for years given a preference to Britain. Under these conditions we see no justification for criticizing Mr. Bennett for making the suggestion. In fact, we rather like the idea. azan.

# Do You Play Bridge

THE chap who overbids his hand always loses in the long run. No person can continually bid what he hasn't got and make it.

Business in one way is something like a game of bridge . with merchants and manufacturers playing for your patronage. You want furniture and breakfast foods, books and clothes, radios, cigarettes and toys, groceries, fruits, vegetables, etc.—they want to sell you theirs. They bid with advertising.

The merchant who advertises an unworthy product can't win. He is simply inducing more people to find out in a shorter time how poor it is. He is overbidding his hand, and is bound to get set. Losing is too costly . . . depend upon it, products that are advertised must be good!

The advertisements in this newspaper are guides to the finest merchandise of every sort, merchandise carefully and faithfully made, of certain, honest value. You can trust the manufacturers who write them.

Featuring a greater exploitation of commercial fisheries inland in British Columbia during the winter of 1929-30 was the filleting of some 9,000 pounds of whitefish in the Burns Lake district and the successful marketing of the fillets in towns along the line of the Canadian National Railways between Prince George and Prince Rupert. Owing to heavy prairie province production of fish common to western inland waters, the operators at Burns Lake and other lakes in the vicinity found that market conditions were a bit difficult and they looked about for new avenues for the disposal of their catch.
