UNITED STATES ELECTION

The returns from the United States elections seem to indicate that the country is turning against the party which is in power there. Republicans lost out considerably although not sufficient to put them in a minority.

This election is in line with other elections in other countries which in time of stress have turned against the government, clutching at any straw to try to save themselves from the uncomfortable position in which they have found themselves.

MAY DIVERT P. G. E.

J. W. deB. Farris declared at North Vancouver that it was the known policy of the C. P. R., if it should take over the B. G. E., to divert it to the main line at Ashcroft and not build into North Vancouver as originally planned.

As the Daily News has pointed out before, there is a possibility of the Peace River outlet emerging on to the main line of the C. N. R. at such a point as would make it possible to connect up with the P. G. E. going into Vancouver by way of Ashcroft and the C. P. R. main line. This is not at all certain. It is at best a roundabout route and one that would not commend itself as a main grain outlet but rather as a means of connecting the southern part of the province with the north.

We still maintain that the reasonable policy would be for the two railways to unite on making one northern port for interior shipments and we believe this northern port would be Prince Rupert. That this has been under serious consideration, we know, and there seems to be no good and sufficient reason why this should not be brought

MAY BE AN ELECTION

When it was stated in this paper last summer that there would likely be a provincial election next year, the announcement was greeted with smiles or scoffs. Now it is being taken more seriously. It seems' very probable that there may be an appeal to the country in the near future. The result of the election ysterday will have an effect on the decision of the government. Other by-elections which are likely to take place will be still more important. If the government feels itself secure and has a real issue to place before the electors it is likely to take a chance on a general election before the end of the year 1931.

MERCHANIC BUILDING

BONUSES OR BUYER

Everyone agrees that it would be a fine thing to induce some large industry to build a plant in British Columbia. Some communities would be willing to bonus such an undertaking, give it a free site, or exempt it from local taxes. But it is not bonuses that make an industry successful . . . it's buyers. Why not support the industries that are already here and give them a chance to help you pay the taxes. Insist on B. C. Products every time you make a purchase and you will be doing your share.

A RAGING STORM. Uprooted trees. 11 freezing coats of ice—getting heavier on wires that bind us town to town. Then a snap—a city cut off from communication—isolated—alone.

Bitter weather-almost impassable snows—it's the lineman's job to bring relief. His tools must be right. But of even greater importance is his clothing. Warm it must be! It must not bind or impede his movements—and it must be as sturdy as the man himself.

Perhaps that's why you find more linemen-more outdoor men of all occupations-wearing Stanfield's underwear than of any other kind. Soft-warm-durable, it brings utmost comfort.

Tailored to exact measurements it fits without cramping or bunching. And because it is unshrinkable, it keeps its fit throughout the entire long life of the garment.
