PREMIER KING MAKES STAND CLEAR

Intention of Government Is Now and Always Has Been to be Fair and Generous to All Provinces

Political Complexion of Local Administrations Has No Effect on Federal Treatment, Prime Minister Declares—Explains "Five-Cent" Speech

OTTAWA, May 20:—In a statement issued last night, Rt. Hon. William Lyon Mackenzie King set forth his own attitude and that of his government toward the provinces.

LADY SQUIRES ELECTED WITH LARGE MAJORITY
ST. JOHN'S, Nfld., May 20:—Lady Squires, wife of Premier Squires, was elected to the legislature of Newfoundland in yesterday's by-election in Lewisport with a large majority over the Opposition candidate.

STRIKE IN PALESTINE

National Council of Jews Takes This Means to Protest at Immigration Stoppage
JERUSALEM, May 20:—The Jewish National Council today proclaimed a general strike throughout Palestine from Thursday noon until midnight in protest against the stoppage of immigration into the country by the British government.

TEA RATE IS PASSED

Reduction in Tariff Adopted by House of Commons at Ottawa Last Night
OTTAWA, May 20:—After a debate in the late afternoon, the new tea schedule in the Dunning budget was passed by the House of Commons without further discussion last evening.

FISH SALES

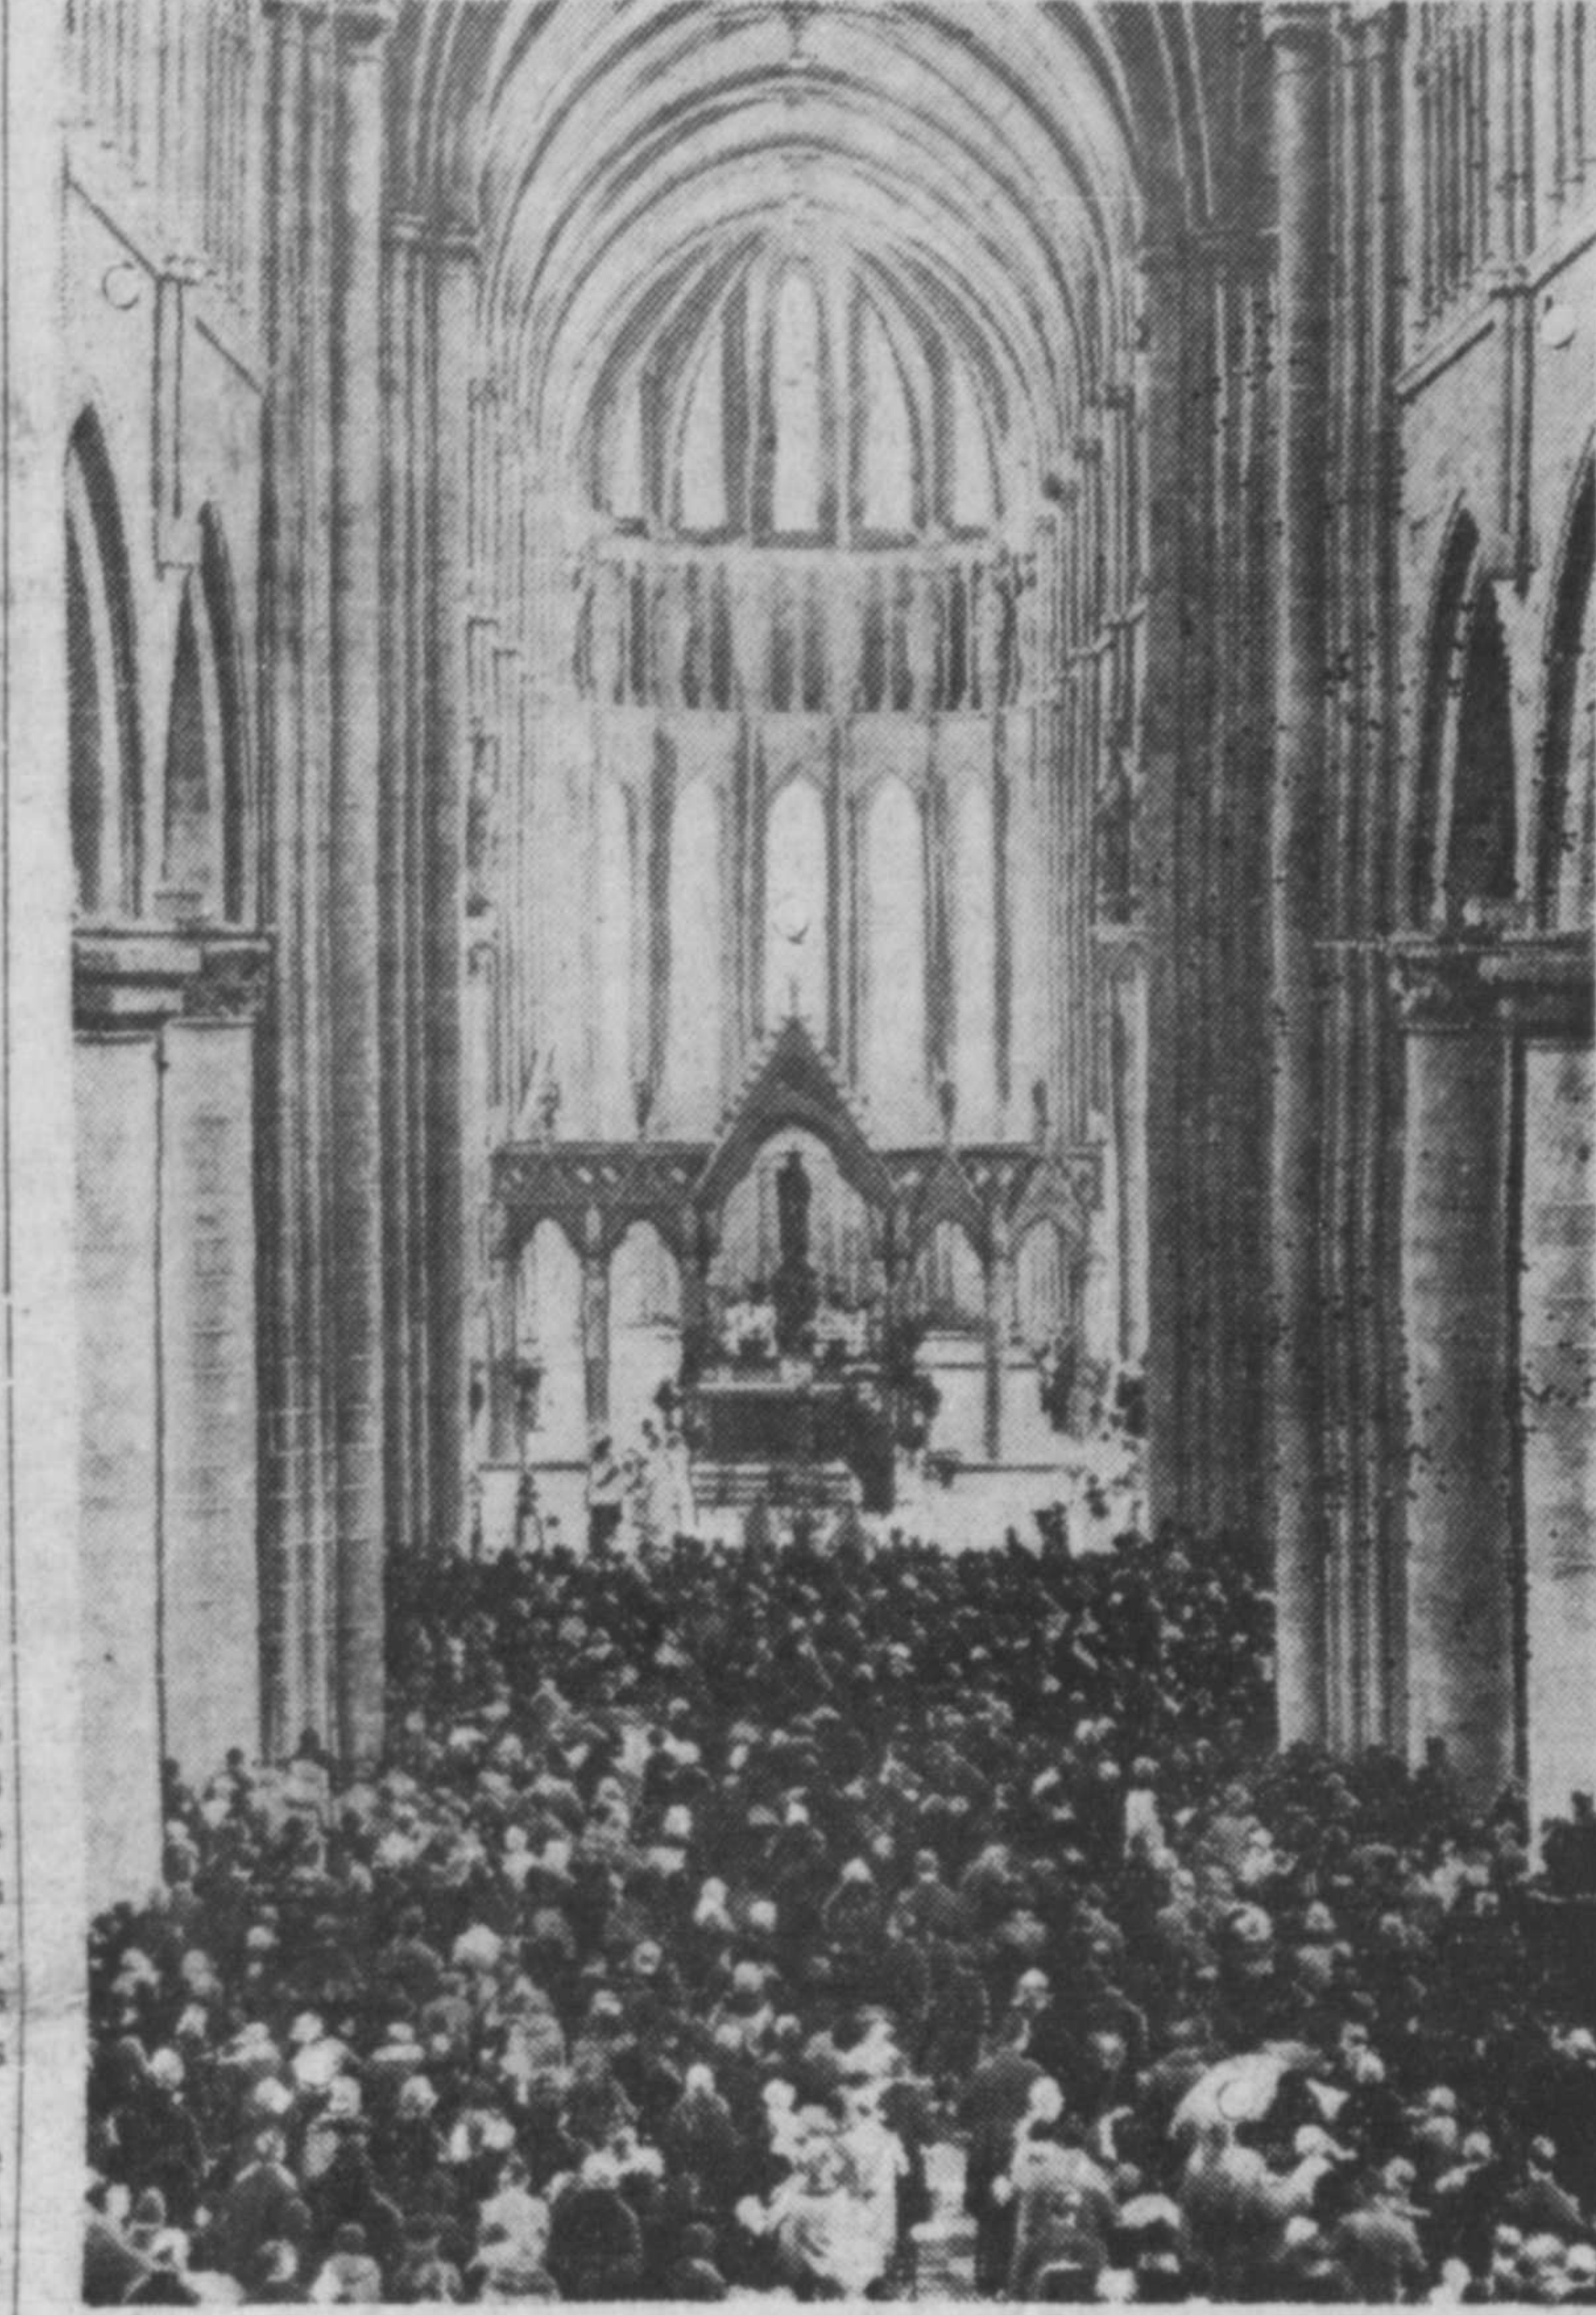

Summary
American—28,000 pounds, 13.8c and 7c to 14.3c and 8c.
Canadian—33,000 pounds, 12.1c and 6c to 12.3c and 7c.

Postage Rates Are Increased

SHANGHAI, May 20:—As a result of the depreciation of Chinese silver currency, the Nationalist government postal administration is planning to increase the rates on ordinary mail and parcel post to America and Europe by 50% on June 1.

RECEPTION FOR AMY JOHNSON

Governor of State and Mayor of Darwin Would Have Refused Greeting

Scene inside famous Ypres Cathedral during first mass following its restoration at cost of 20,000,000 francs from ruins left by the great war

Ypres Cathedral is Restored

Scene inside famous Ypres Cathedral during first mass following its restoration at cost of 20,000,000 francs from ruins left by the great war

PREMIER SCULLIN STEPS IN AND ORDERS FEDERAL RECOGNITION OF GIRL FLYER'S FEAT IN REACHING AUSTRALIA ON FLIGHT—STILL IN JAVA TODAY
VANCOUVER, May 20:—A Vancouver Province cable from Sydney, Australia, says that much dissatisfaction was expressed when the governor of the state and the mayor of Darwin announced that they would not tender an official welcome to Amy Johnson on her arrival in Australia on her flight from England.

Works Years on Embroidery For Papal Surplice

VENICE, ITALY, May 20:—Twenty-four years' work was needed to finish the ermine and lace surplice given to the Pope by the Italian Government on the occasion of the eighth anniversary of the Pontiff's coronation.

Safe at Sourabaya

SOERABAYA, Java, May 20:—Amy Johnson arrived here this afternoon from Samarang and Tjomal where yesterday she made a forced landing in a field spiked with bamboo sticks, having run out of petrol on the flight from Singapore.

United States of Europe Envisaged

MONTREAL, May 20:—Kiwansians glimpsed Posen Fair—the middle-European Wembley—a great military review conducted by Pilsudski, and fragrant hayfields in Poland and Czecho-Slovakia, through the medium of a graphic, informative lecture by Dr. William Caldwell, of McGill University, on the topic of "Some Experiences in Europe."

Egypt Villages Visited By Fire

CAIRO, Egypt, May 20:—Twenty-six persons were killed and 326 dwellings were destroyed by fire in the villages of Timsahia and Beni-saleh last Saturday.

### SALMON FISHING TREATY

It is satisfactory to know that the opposition of federal Conservatives to the provincial Conservatives and to the Ottawa government in regard to the Fraser River salmon treaty is at an end. It was a foolish and frivolous opposition at the best and wholly unnecessary. To say that the Toimie administration and its permanent fisheries force were unable to advise Ottawa in regard to what was needed was going a little far when none of the opponents to the treaty had any fisheries experience. It looked too much like opposing for the sake of opposition rather than for the good of the country. Now they have seen the error of their ways and there is likely to be action at Ottawa.

### SENT COPIES AWAY

A good many readers of the Daily News sent Saturday's issue away to friends in order that they might read the editorial summary on the front page "Evidences of Prosperity." Those who have not done so are advised to take action yet. So many inquiries for copies have been received that we have decided to use it again as a free advertisement for the city of Prince Rupert.

### ETERNALLY AT IT

The only way to do business effectively is to be eternally at it. The moment you let up in your efforts, you begin to lose out. So it is with any cause. Spasmodic enthusiasm does not count for much. It is all right for getting away with a good start, but a good start is not enough.

In Prince Rupert we are great starters. We have abundant enthusiasm for a new cause, a new organization, new work, new amusement, but we do not always stay with it. Perhaps that is why we sometimes fail. A little more sustained effort and we should do better.

### Baggage Car Mail Service

All Kinds of Mail Carried to Larger Places Along Railway Every Day

The post office announces that the hours of closing for the east-bound mail by the regular mail car Mondays, Wednesdays and Saturdays is now 11.30 but that for the baggage car service leaving here Tuesdays, Thursdays and Fridays the mail will not close until noon.

The baggage car service carries all classes of mail including letters and newspapers to the following points only: Edmonton, Vanderhoof, Fort Fraser, Burns Lake, Telkwa, Smithers, Hazelton, Terrace, and Prince George.

### Fireside Club Holds Meeting

Second Coming Is Subject of Address By Pastor, Rev. Dr. F. W. Dafoe

The regular weekly meeting of the Fireside Club was held in the Baptist Church parlors last night. Miss A. Dawson's group had charge of the meeting and the chair was occupied by Miss Edith Johnstone. Miss Steina Phillipson led the devotional exercises. The address was delivered by Dr. F. W. Dafoe, who strove to impress his hearers with the nearness of the return of Christ, and the imperative need of the individual turning to Christ as the Savior.

Refreshments were served at the close.

## A SIMPLE STEP TOWARDS HEALTH

Kellogg's ALL-BRAN is a Daily Essential and Millions Know Its Effectiveness in Relief of Constipation

Perhaps the one simple thing you are not doing to guarantee permanent health is having sufficient roughage in your food. Absence of this roughage is the direct cause of constipation which results in so many other ills—headaches, listlessness, general depression, indigestion and, sometimes, serious disease.

Kellogg's ALL-BRAN is roughage. It is positively guaranteed to relieve both temporary and recurring constipation or the purchase price will be refunded. Two tablespoons daily (in serious cases, with each meal) is the proper amount.

Kellogg's ALL-BRAN also helps you to health in other ways. It is rich in iron, practically all of which goes into the blood, bringing

red, healthy color to the complexion. It helps prevent anemia. Be sure to include it in reducing diets.

Many eat Kellogg's ALL-BRAN with cream or milk added. It is a delicious addition to cereals, fruits and soups. In cooked foods, such as bran muffins, it is just as effective in the relief of constipation. Recommended by doctors. Ask your grocer for Kellogg's ALL-BRAN in the red-and-green package. Served everywhere. Made by Kellogg in London, Ontario.

ALL-BRAN  
"Improved in Texture and Taste"

## REFRIGERATION IN RELATION TO THE FISHING INDUSTRY

By D. B. Finn, Director, Fisheries Experimental Station, Prince Rupert

Man's insatiable curiosity has been responsible for the great changes which have taken place in ways of living. The systematization of knowledge which he has gained in his attempts to satisfy this curiosity has made possible all those things which science has given us. Without science we would not have the engineer—without the engineer, we could not have had industrialization—and without industrialization, there would be no dense masses of population. Thus, the very acquisition of knowledge has indirectly created the problems which today we are called upon to solve. The existence of these large and dense masses of population has made necessary elaborate systems for procuring, preserving and distributing of food. In this, refrigeration is destined to play an ever increasing important role, particularly in its relation to the fisheries.

The fisheries of today are faced with two important problems which are, broadly stated, conservation and preservation. This paper will deal in a very brief way with the part that refrigeration is playing in the preservation of fish and will set forth some of the problems encountered in relation to its uses. The ideal preservative would be one which would not cause any change in the preserved product. Most methods of preservation do bring about change. Thus, in treating fish by canning, smoking, salting, drying, pickling and freezing, marked changes are brought about in the preserved materials. Refrigeration brings about the least change of all, though even in this there are irreversible changes which it is the object of our research to reduce to a minimum.

A great deal of research has been undertaken upon the engineering problems of refrigeration and much useful information with regard to the production and maintenance of low temperatures has been gained. On the other hand, very little is known with regard to the biophysical and biochemical properties of materials frozen and stored. As yet hardly anything is known of the simplest physical constants of the materials stored or of the subtle chemical changes which take place and result in the destruction of flavor, texture and those other qualities which are characteristic of the fresh material.

The introduction of quick-freezing methods has done much to improve the quality of frozen fish. These methods are being widely applied and the excellence of the resulting product is doing a great deal to overcome prejudice which existed in the minds of the general public against frozen or cold-stored foods. There is still a great deal to be learned. Our problems are by no means solved, for it is one thing to produce a product which has undergone very little deterioration by the act of freezing and quite another to maintain this product without deterioration in cold storage.

**Crystal Formation**  
It is well known that when the rate of freezing in a tissue is rapid the number of crystallization centres is very large which results in the production of a large number of very minute ice crystals instead of a smaller number of large ones such as appear in a slowly frozen tissue. When the phenomenon of one ice crystal growing at the expense of another, under conditions of fluctuating temperatures, is considered, it is readily seen that even though the ice crystals within a tissue may be uniformly small in the newly-frozen product, after a period of storage under such varying conditions, these small crystals will be replaced by large ones. This has the effect of disrupting the tissue, spoiling the texture, and making the product very much more like slowly-frozen material.

Variations in temperatures also have the effect of bringing about changes in internal pressure within the frozen material. Under conditions of fluctuating temperature, there is continual expansion and contraction, which may have a bearing upon the migration of oil towards the surface of the fish such as occurs in the stored salmon. Oils at low temperatures are only semi-solids and under conditions of increasing pressure tend to migrate in such a way as to relieve that pressure. This condition of oil oozing is not met with if the temperatures are held at a constant low level. The reason for this is probably two-fold—the lower temperatures bringing about a greater solidarity of the oil and the constancy of temperature preventing variation in internal pressure.

There are many other phenomena connected with deterioration in cold storage which must be investigated from the biochemical point of view. Consideration of these may be

aided by first referring to the processes which occur in the fish as it lives in the sea. During life, there are constantly going on within the organism processes of building up, and breaking down. These processes are carried on by substances within the body called enzymes. During life, these two processes are nicely balanced. At death the balance is disturbed and the enzymes responsible for breaking down the tissues are greatly accelerated in their action. The struggles which the fish undergoes before death, produce a condition within the body which favors the action of the autolytic (or breakdown) enzymes. So powerful are these destructive agents that at temperatures above freezing they would in time completely liquefy all the tissues of the fish quite apart from any bacterial activity. This autolytic (or self-digestive) process is slowed up by low temperatures and, by cooling the fish immediately it is caught, the rate of enzymatic decomposition is greatly decreased, while by freezing it is almost arrested. Recently, however, this laboratory has been led to believe that some of the enzymes may have slight activity at temperatures in the neighborhood of 10 degrees F. and over a period of months or years, may produce distinctly observable and undesirable effects.

### Bacterial Action

During life the living organism has certain mechanisms of defense against the invasion of bacteria. With the advent of death, these mechanisms cease to function and bacterial invasion starts immediately. While it is true that bacterial activity is decreased by lowering temperatures it by no means follows that reducing the temperature to 32 degrees F. will entirely inhibit it. This laboratory has isolated bacteria which are quite active at that temperature notably *Pseudomonas fluorescens* which is thought to be responsible for much of the discoloration of halibut which occurs in the holds of fishing vessels. Investigation is being prosecuted with a view to examining the role of bacteria in cold storage at low temperatures and while as yet nothing very definite can be said in this regard, it seems quite probable that bacteria do play a part in the deterioration of the frozen product.

The loss of water in stored materials is another undesirable feature in long storage and, one which can hardly be greatly reduced by proper temperature control. It is well known that the presence of cooling pipes in a cold storage room has a dehydrating effect upon the stored products and that if differences of temperature between the pipes and the product could be eliminated, this drying or shrinkage would be greatly reduced. The experiment conducted by the Biological Board was based upon the following considerations: (1) that the amount of heat generated by stored material within itself was extremely small and need not be considered as having an appreciable influence upon the temperature of the room (2) that while a room is closed, the principal source of heat is the leakage through the insulation. (3) that providing the heat could be taken up before it came all the way through the walls, the presence of bodies much colder than the stored material, such as ammonia pipes, inside the rooms, would be unnecessary and thus shrinkage would be avoided.

In the experiment, an air-tight insulated room was built within a cold storage room in such a manner as to leave a space all the way round its walls, its ceiling and floor. Through this space was circulated cooler air which was maintained at a temperature only very slightly below that at which it was desired to store the frozen fish. This circulating air served to pick up the heat which leaked through the outer insulation. In this way, it protected the stored fish from undergoing any rise in temperature and since the temperature of the walls of the inner room was almost the same as that of the stored material, there was extremely little transference of water vapor from the pro-

## Your Breakfast Shot from Guns

so you don't have to cook it

Read how this amazing invention gives Puffed Grains the virtual nourishment of hot cooked cereals.

WHEN Professor Anderson found the way to shoot wheat and rice grains from guns he solved an important problem. He gave these crisp, delicious, ready-to-eat cereals the virtual nourishment of hot cooked cereals.

Every grain of wheat and rice contains 125 million food cells. Every food cell must be broken before the grain can be completely digestible. It takes long hours of cooking to do this. But Professor Anderson found a better way. He seals grains of wheat and rice in bronze guns. He revolves them in fiery ovens. Then fires the guns. This causes 125 million explosions in every grain. It blasts open every tiny food cell. Puffed Wheat and Puffed Rice are thus made completely digestible. Hence practically as nourishing as hot cooked cereals.

The grains become 8 times normal size. They have all the buttery crunchiness of fresh toast. They are made to taste like sweet new nut-meats. Never before was rich grain nourishment made so delectably good to eat.

You owe it to your family to give them this extra delicious grain food that tastes like nut goodies. Order Puffed Wheat and Puffed Rice from your grocer today. The Quaker Oats Company.

## QUAKER PUFFED WHEAT AND PUFFED RICE

duct. In this way, shrinkage was reduced about 70%.

In an ordinary cold storage room, the heat which gains admittance through the walls travels through the stored material causing air to pick up water vapor which is subsequently transferred to the cold pipes. The cooled, desaturated air sinks and once again begin this cycle resulting in the continuous transference of water from the material to the pipes. This is more serious than a mere loss of weight in the product since such dehydration always brings about a loss of "texture" and "appearance" with a consequent effect upon price.

### Rusting

The "rusting" or yellow discoloration which occurs in oily fish during cold storage is another problem which seriously concerns cold storage companies. Fish such as halibut salmon and herring which contain appreciable quantities of oil immediately underneath the skin are particularly subject to this which kept in storage for long periods of time. The phenomenon seems to be one which concerns a change in the fats and oils though there is some indication that the nitrogenous constituents of the tissues play an important part in the oxidative changes which occur. These discoloring reactions seem to be dependent upon a certain chemical state existing within the tissues themselves. It is quite possible that conditions of alkalinity or acidity of the body tissues may have a profound effect.

It is known that low temperatures such as zero or slightly above, will greatly reduce the possibility of the occurrence of "rusting." It is found difficult to use such temperatures in ordinary practice for long periods of time because of the excessive shrinkage which they produce. This is, no doubt, due largely to inadequate insulation; for it is evident that the poorer the insulation, the lower must be the temperature of the coils to produce a given condition. This results in a greater differential between the stored product and the coils and it follows that shrinkage will increase in proportion to this temperature difference. Such low temperatures could be maintained without serious shrinkage and with avoidance of a good deal of these undesirable chemical changes by the introduction of the jacketed cold storage room as developed by Doctor A. G. Huntsman at Halifax and discussed earlier in the paper.

There are very good reasons for believing that in the future most of our fish will be processed by modern methods of refrigeration and distributed in the frozen condition. Recent experiments carried on by the Biological Board of Canada have shown that fish fillets placed in the cooking utensils in the frozen condition are superior to those

that are thawed before cooking. The advantage of such a procedure in the elimination of spoilage of thawed fish in the hands of the retailer will be apparent, for, if the public were to buy and keep fish in a frozen state until the time of cooking, the spoilage which that most perishable product—unfrozen fish—is subject to during this period, would be avoided. Fortunately, such a procedure is steadily being made more possible by the development of small, low temperature refrigerators for use in shops and homes.

Thus, as one views the progress which has been made by refrigeration engineers in the construction of apparatus, together with the determined efforts of the biochemists and biophysicists to define the best freezing treatments and optimum storage conditions, one cannot but feel, as was stated earlier in this paper, that refrigeration is certain to play an ever-increasingly important role in the fishing industry and to eventually revolutionize existing methods of procedure.

### Shower For Miss Alberta Hill Is Pretty Affair

A dainty miscellaneous shower was given last evening by Miss B. Campbell and Miss J. Stalker at the home of the latter, 515 Tatlow Street, in honor of Miss Alberta Hill, whose marriage takes place early next month. The rooms were decorated in mauve, pink and white and the tea table was centered with a miniature bride with pink and white carnations and rose tapers in silver scones. Many gifts were presented by Miss M. Stalker in a daintily decorated wagon. Music was enjoyed and refreshments served.

Those present include: Mrs. Geo. Hill, Mrs. E. Kinny, Mrs. T. Sprout, Mrs. J. Campbell, Mrs. W. Cummings, Mrs. V. Menzies, Mrs. Joe Cook, Mrs. J. H. Meagher, Mrs. Prendergrast, Miss Chris McKenzie, Miss Alida Johnson, Miss E. Ross, Misses Annie and Netta McLeod, Miss Mae Davis, Misses Nellie and Mollie Lawrence, Miss Frances Cummings, Miss Edna Parker.

Horace McN. Fraser, engineer for the United-Eastern Mining Co., one of the original companies operating in the Taku River field, will be here on the Princess Louise tomorrow morning enroute from Vancouver to Juneau. Mr. Fraser's father was for years gold commissioner at Atlin and he was brought up in that district.

## MUCH WORK AT JASPER

Tourist Resort Enlarged to Meet Increase of Visitors

WINNIPEG, May 20.—In the international exchange of holiday seekers who now annually cross the Canadian-American border, an enormous flood of tourist travel to the Canadian Rockies is predicted for this season by R. Creelman, passenger traffic manager for the Canadian National Railways, who left yesterday to complete arrangements for many tours and special parties to Jasper National Park.

"Year by year," Mr. Creelman said, "increasing thousands are turning to this playground which has necessitated the enlarging of Jasper Park Lodge each season and today the accommodation for 650 guests is an increase of 100 over 1929 capacity. New buildings ready for the official opening tomorrow will include: Two ten-room cabins, one 16-room cabin, one eight-room cabin, one two-suite cabin, a sleeping building for golfers with 23 bedrooms, each cabin being equipped with baths for each room and with sitting rooms, two additional staff cabins, with 16 rooms each, a new building for the nurses, who stay at the Lodge to give service to guests. The dining rooms, laundry, powerhouse, private service room and the garage are enlarged and improved, new buses and cars were acquired, the curio shop is enlarged, the ticket office moved and a new specialty shop opened up. Enclosed verandahs are placed in some of the cabins. The program of landscaping is being continued."

The Alpine Club of Canada will meet this year at Jasper. Their headquarters camp at Maligne Lake will be in operation for their use from July 28 to August 16.

Mrs. Annette Stone returned to the city on the Catala this morning from a brief business trip to Anyox.

Mr. and Mrs. J. P. McMillan of Sunnyside Cannery arrived in the city yesterday for a brief visit in town.

J. E. Nick, well known Alice Arm prospector, was an arrival in the city on the Catala this morning from the north.

A. S. Baillie, Granby Co. auditor at Anyox, is a passenger aboard the Catala this afternoon bound for a trip to Vancouver.

Father Chartiez, O.M.I. of Anyox, arrived in the city on the Catala this morning from the smelter town for a brief visit here.

C. R. Gilbert will leave Terrace for McBride on tomorrow afternoon's train, going to the Eastern B. C. town on insurance adjusting business.

It was twenty-four years ago this month since Ald. J. H. Pillsbury first landed in Prince Rupert—a member of the first party of townsite engineers which established its camp here.

Archie Shiel, president of the Pacific-American Fisheries Co., who has been paying a brief inspection visit to Port Edward cannery, will sail by the Catala this afternoon on his return to Bellingham.

Mrs. G. J. Dwyer and family of eight children arrived in the city on the Catala this morning from Stewart to take up residence in Prince Rupert, joining Mr. Dwyer who is employed by the Power Corporation of Canada.

Father E. M. Leray, O.M.I. of Stewart arrived in the city on the Catala this morning from the north and will proceed tomorrow by train to Terrace where he will conduct monthly services in the Roman Catholic Church.

C. J. Fletcher, executive secretary of the British Columbia Medical Association, after having made the round trip to Anyox and Stewart following a brief visit here, is a passenger aboard the Catala today returning to Vancouver.

Mrs. Axel Norberg, and family, who have been here attending the funeral of Mr. Norberg, who died last week in the Prince Rupert General Hospital after a lengthy illness, left last night on their return to their home at Oona River, Porcher Island.

Miss Mary Walters, R.N., will sail on the Prince George Thursday night for Vancouver to attend her graduation exercises as a nurse from the Vancouver Hospital where she completed her training course a few months ago. Her sister, Miss Julia Walters, will make the trip south with her.

Mr. and Mrs. H. L. Bailey, formerly of this city, who arrived a few days ago from Vancouver, will sail on the Princess Louise tomorrow morning for Whitehorse where they will take up residence. Mr. Bailey, formerly engaged in the taxi business here, will go into a similar business at Whitehorse.

W. W. Wright representing the Gypsum Lime and Alabastine (Canada) Ltd. is spending a few days in the city in connection with the sale of their products, Gyproc, gypsum lath, dry insulux and other fire proof materials, the agents for which in the city are Albert & McCaffery. He goes to Stewart and Anyox tomorrow.

## Tea Biscuits unusually good when made with Magic Baking Powder

3 out of every 4 Canadian housewives\* who bake at home, use Magic Baking Powder because they find that Magic gives consistently better baking results.  
Next time you bake biscuits, try Magic and see for yourself how it will help you with your baking.

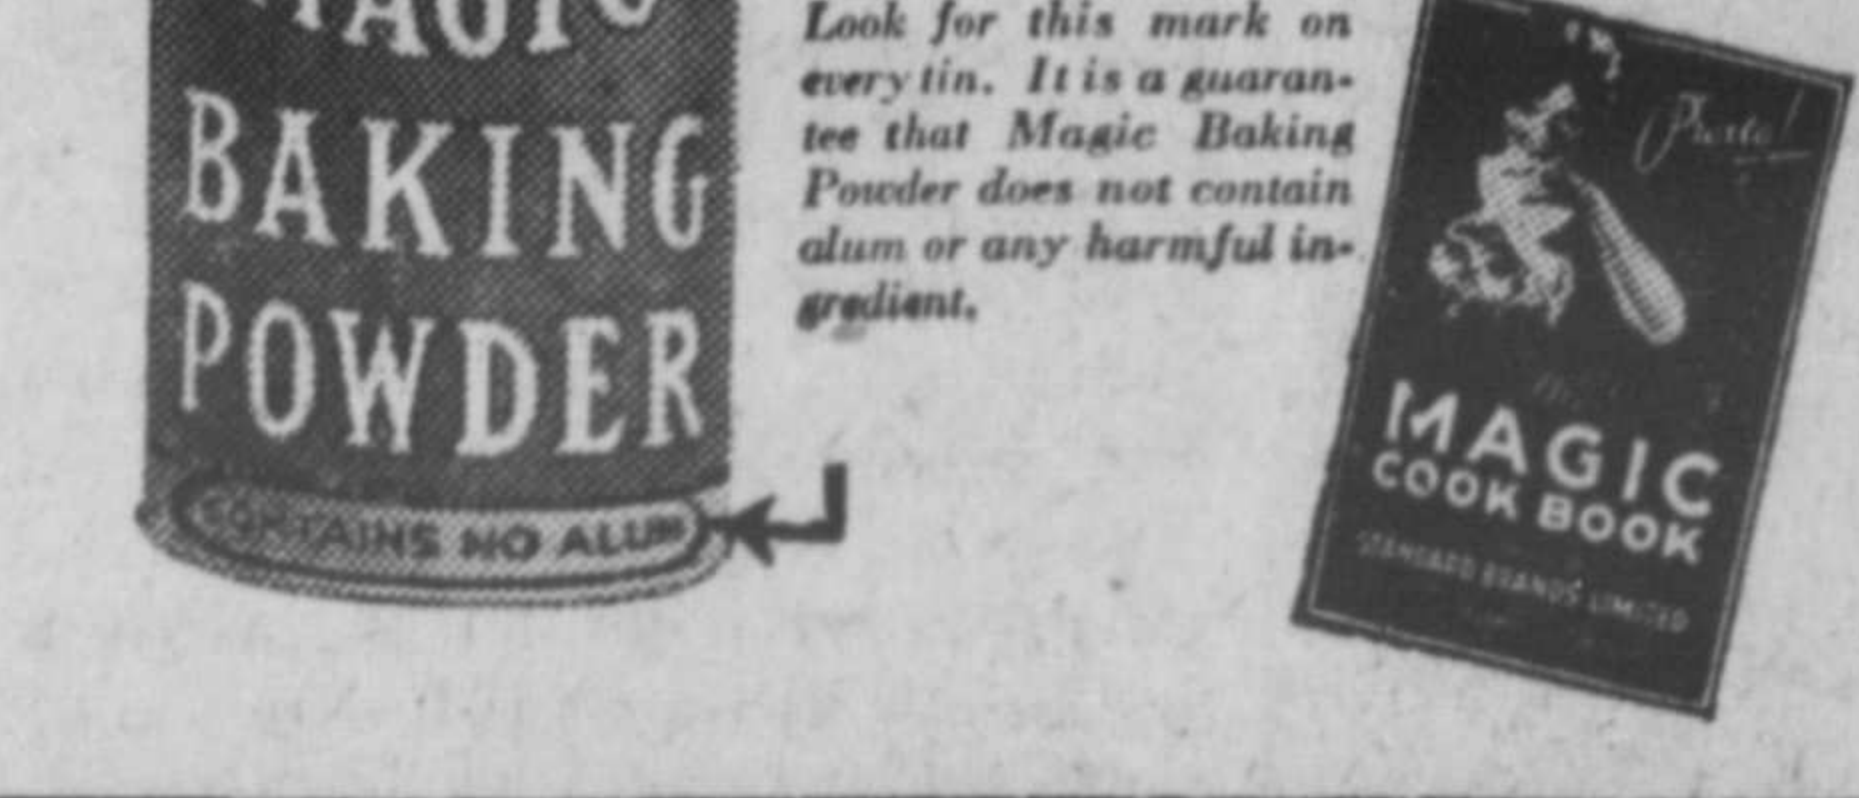

#### Try this Recipe for Biscuits

2 cups flour 2 tablespoons shortening  
4 teaspoons Magic Baking Powder 1 cup cold sweet milk, more or less  
1 teaspoon salt  
Method—sift together flour, magic baking powder and salt, then cut in shortening. Gradually add cold milk sufficient to make as soft a dough as can be handled, using a knife to mix with.

Flour centre of board generously, drop dough on it, pat or roll out very lightly to 1" thickness. Cut out, bake 15 to 20 minutes in a hot oven.  
All ingredients should be cold. Handle as little and as lightly as possible and avoid working in more flour after milk has been added.  
\*This fact was revealed in a recent Dominion-wide investigation.

STANDARD BRANDS LIMITED  
GILLETT PRODUCTS  
Toronto Montreal Winnipeg  
and offices in all the principal cities of Canada

If you bake at home send for the New Magic Cook Book. It will suggest many attractive dishes and save time for you.

Look for this mark on every tin. It is a guarantee that Magic Baking Powder does not contain alum or any harmful ingredients.

### SHRINE CLUB DINNER DANCE

Nobles Entertained Wives and Lady Friends at Enjoyable Function Last Night  
Members of the Prince Rupert Shrine Club entertained their wives and lady friends at an enjoyable dinner dance last evening in the Commodore Cafe. John Dybavn, president of the club, was in the chair for the dinner and A. E. Bazett-Jones was chairman of the committee in charge of the dance. Splendid music was furnished by the Premier Orchestra, the party breaking up about midnight.

M. M. McLachlan, local manager of the Brackman-Ker Milling Co., returned to the city on the Catala this morning from a brief business trip to Stewart.

The last issue of the B. C. Gazette contains announcement of the incorporation under the Societies' Act of the Remo Farmers' Institute which has, among other objects, "the improvement of conditions of rural life so that settlement may be permanent and prosperous."

Tom Kennedy, Vancouver stock salesman, who has been spending the past winter at Alice Arm where he did considerable big game hunting, arrived in the city on the Catala this morning from the north, bringing with him two fine black bear skins among his trophies of the season. He expects to spend some time in town.

The by-products of a shark are leather, glue, pigments, polishing materials, animal fodder and fertilizers.

## Hygienic Service and Assured Comfort

### The healthful method of dealing with an intimate feminine problem

Women should know the hygienic service provided by Kotex, the New and Improved Sanitary Napkin. It amply protects against ill-effects that may so easily follow trying days. Doctors and nurses urge its use.  
Kotex is comfortable too. Fits like a garment. Easy to adjust. Deodorizes absolutely. Brings security and an amazing peace of mind.  
No embarrassment when buying. Just say Kotex at any drug, dry goods or departmental store. Regular size 60c for box of a dozen. Super-size 75c. Directions in every package.

# KOTEX

Sanitary Napkins

- #### 6 Features of the New and Improved Kotex
1. Kotex is soft—Not a deceptive softness, that soon packs into chafing hardness. But a delicate, lasting softness.
  2. Safe, secure... keeps your mind at ease.
  3. Kotex filler—is far lighter and cooler than cotton, yet absorbs 5 times as much.
  4. In hospitals... Kotex is the identical material used in 50% of Canada's leading hospitals.
  5. Deodorizes, safely, thoroughly, by a patented process.
  6. It is easily disposed of. No unpleasant laundry.

## FAST BOUTS AT SMOKER

Eagles' Lodge Held Successful Entertainment Last Night With Good Sized Crowd

A successful smoker was held by the Eagles' Lodge last night in the lodge hall, a large number of fans being in attendance. The feature of the evening's program was a fine card of boxing bouts supplied by the Empress Social Club. The outstanding bout of the evening was a three-round exhibition no-decision go between Frankie Neil and Benny Wendle which proved a very fast engagement out of which the crowd got a great kick. Another good bout was a three-round affair between Americano Dominato and Frank Barrett, 120-pounders. Others were:

Jack Annosley vs. Severino Dominato, 99 pounds.

Kibby Lamb vs. Donald Kennedy, 105 pounds.

Johnny Pierce vs. Chuck Hickey, 140 pounds.

Doug Frizzell refereed the main event and Frankie Neal, the preliminaries.

Items on the musical program were as follows:

- Accordion solo, M. Colusi.
- Comic songs, J. N. Kelly.
- Comic songs, Algy Hunter.
- Vocal solo, Tom Barton.
- Impersonations, Harry Astori.
- Stunts and songs, Dick Ford.
- Barrel boxing, the Eagles.
- Vocal solo, Wright Davies.
- Piano selections, T. Barton.
- Piano selections, W. Fisher.
- Thomas Clough, head of the lodge, was in the chair.

During the evening, refreshments and dsmokes were served in abundance.

## Many Entries In For Track Meet

Very Successful Event on May 24 Is Anticipated With Newly Formed Local Association in Charge

Entries for the track events to be held on May 24 under the auspices of the new Prince Rupert Track and Field Association will close this evening. Already there has been a heavy list of entries, it is reported by Douglas Frizzell, secretary of the association. The team entries are Native Sons of Canada, Elks and Canadian National Recreation Association while there are also many individual entries.

The first track meet on Victoria Day promises to be a very successful event. It will be held at 1 p.m. just before the first Ketchikan-Prince Rupert baseball game.

These three English girls, in "free and easy attire," preferred to spend their Easter holidays on a cross-country hike.

## DETROIT BEAT BROWNS TWICE

This Double-Header Was Only Big League Baseball Activity Yesterday

DETROIT, May 20.—In the only Major League baseball games played yesterday, the Detroit Tigers won both ends of a double-header from the St. Louis Browns by scores of 5 to 4 and 4 to 2.

## KILMARNOCK WINS FIRST TOUR GAME

MONTREAL, May 20.—Playing in a deluge of rain, the Kilmarnock soccer team of the First Division, Scottish League, which arrived here on Sunday to commence a Canadian tour, defeated Carsteel, local club, by a score of three to nil last evening.

## Sport Chat

The Centrals, Andy Donald's baseball entry, will make their first appearance of the season on the local field tonight when they are billed to try conclusions with the Native Sons of Canada, who were beaten last week by the Elks in the first game of the season. The line-ups of the Centrals presents a few new players on the local diamond, also some who have not been seen for a few years. With Chenoski as regular hurler and Somerville, formerly of Anyox, behind the bat, it looks like the Centrals have at least one of the strongest batteries of the season. All in all, the line-up looks like one which may be expected to make a very good showing this year. Just the same, the Native Sons are out for revenge following their defeat at the hands of the Antlered Herd last week and they too should be able to do things if they can once get going. Following are tonight's line-ups:

Centrals—Somerville, c.; Chenoski, p.; Farquhar, 1b.; G. Mitchell, 2b.; J. Barrie, ss.; Joe Gavin, 3b.; J. McNulty, rf.; D. Morrison, cf.; C. Hill, lf.; A. Easson.

Native Sons of Canada—J. Nelson, c.; H. Astori, p.; W. Mitchell, ss.; Smith, 2b.; B. Wendle, 3b.; V. Menzies, 1b.; G. Howe, rf.; W. Lambie, cf.; D. Frizzell, lf.; R. Stalker, spare.

The 1930 baseball season was ushered in at Smithers recently, with a game between high school teams representing Hazelton and Smithers, the locals winning out on the long end of an 18 to 5 score. Smithers batted in four runs in the first stanza and was never threatened thereafter. A return game will be played shortly at Hazelton.

At a recent meeting of the Native Sons of Canada in Smithers, cups recently won in school sports there were presented to the various holders as follows:

Girls' Basketball—Patty Hetherington, Myrtle McIntyre, Winnifred Haan, Kathleen Giraud, June Carpenter, Erma Thorne and Marjorie Furness.

100-yard dash—William Collison, High jump—Mike O'Neill, Olive Eviitt, Kathleen Giraud and David Mattson.

School hockey—Herbert Leach, Harland Lewis, Ward Carey, Wilfrid Watson, Pat Carr, Johnny Dunlop and Charles Bowland.

## REGIMENT IS WINNER

Defeated Athletic Club By Two to Nil Score in Gilhuly Cup Football Game

Although the Prince Rupert Athletic Club had bad luck in missing some scoring chances, the Regiment was value for a win in the Gilhuly Cup football series last night but, possibly, not by such a decisive margin as two to nil.

In the first half, Regiment monopolized the attack but scored only once, this being when Frank Russell counted on a nice straight play. The Athletic Club had the best of things on the field in the second half, with the hill in their favor, but failed in the important business of shooting, missing a number of chances by narrow margins. Johnny Murray got through to head in the ball from a free kick well taken by Edgecumbe to give the Regiment its second goal.

Laidler, in goal, played a fine game and good defence work was done on the full back line by J. Ross. Doig was the choice of the halves and Russell, Smurthwaite and Johnny Murray were the pick of the forwards.

Spiro Gurvich kept a good goal for the Athletic Club and Hill at half back, was a tower of strength. Albert Dickens had bad luck in hitting the cross-bar twice on long shots. McKay was the next best forward for his side.

The Athletic Club missed Chenoski on the forward line and the absence of Watson and Wilson was also noticed by the Regiment.

Playing conditions were none too good on the muddy field and the evening's showers prevented, more than a few of the more enthusiastic and hardy of the fans from attending.

William Barton refereed and Alex Clapperton and Andy Murray were linesmen. The teams were:

Prince Rupert Athletic Club—S. Gurvich; Stiles and W. Murray; G. Hill, G. Mitchell and T. Tasker; A. Dickens, A. Newman, H. Dickens, J. McKay and D. Frizzell.

Regiment—Laidler; Ross, and Heilbronner; P. Edgecumbe, Macdonald and Doig; Walker, Russell, Smurthwaite, J. Murray and C. J. Norrington.

### Gilhuly Cup Standing

	W.	D.	L.	F.	A.	P.
Regiment	2	1	0	3	0	5
P. R. A. C.	1	0	2	2	3	2

## Former Ski Champ Was Hanged Today

"Bing" Anderson Pays Supreme Penalty at Cyney, N.S., For Murder of Hotel Clerk

SYDNEY, N.S., May 20.—Ingvald "Bing" Anderson, former champion ski jumper of New England, was hanged early this morning for the murder of a Sydney hotel clerk with robbery as his motive.

## Twenty Years Ago

In Prince Rupert

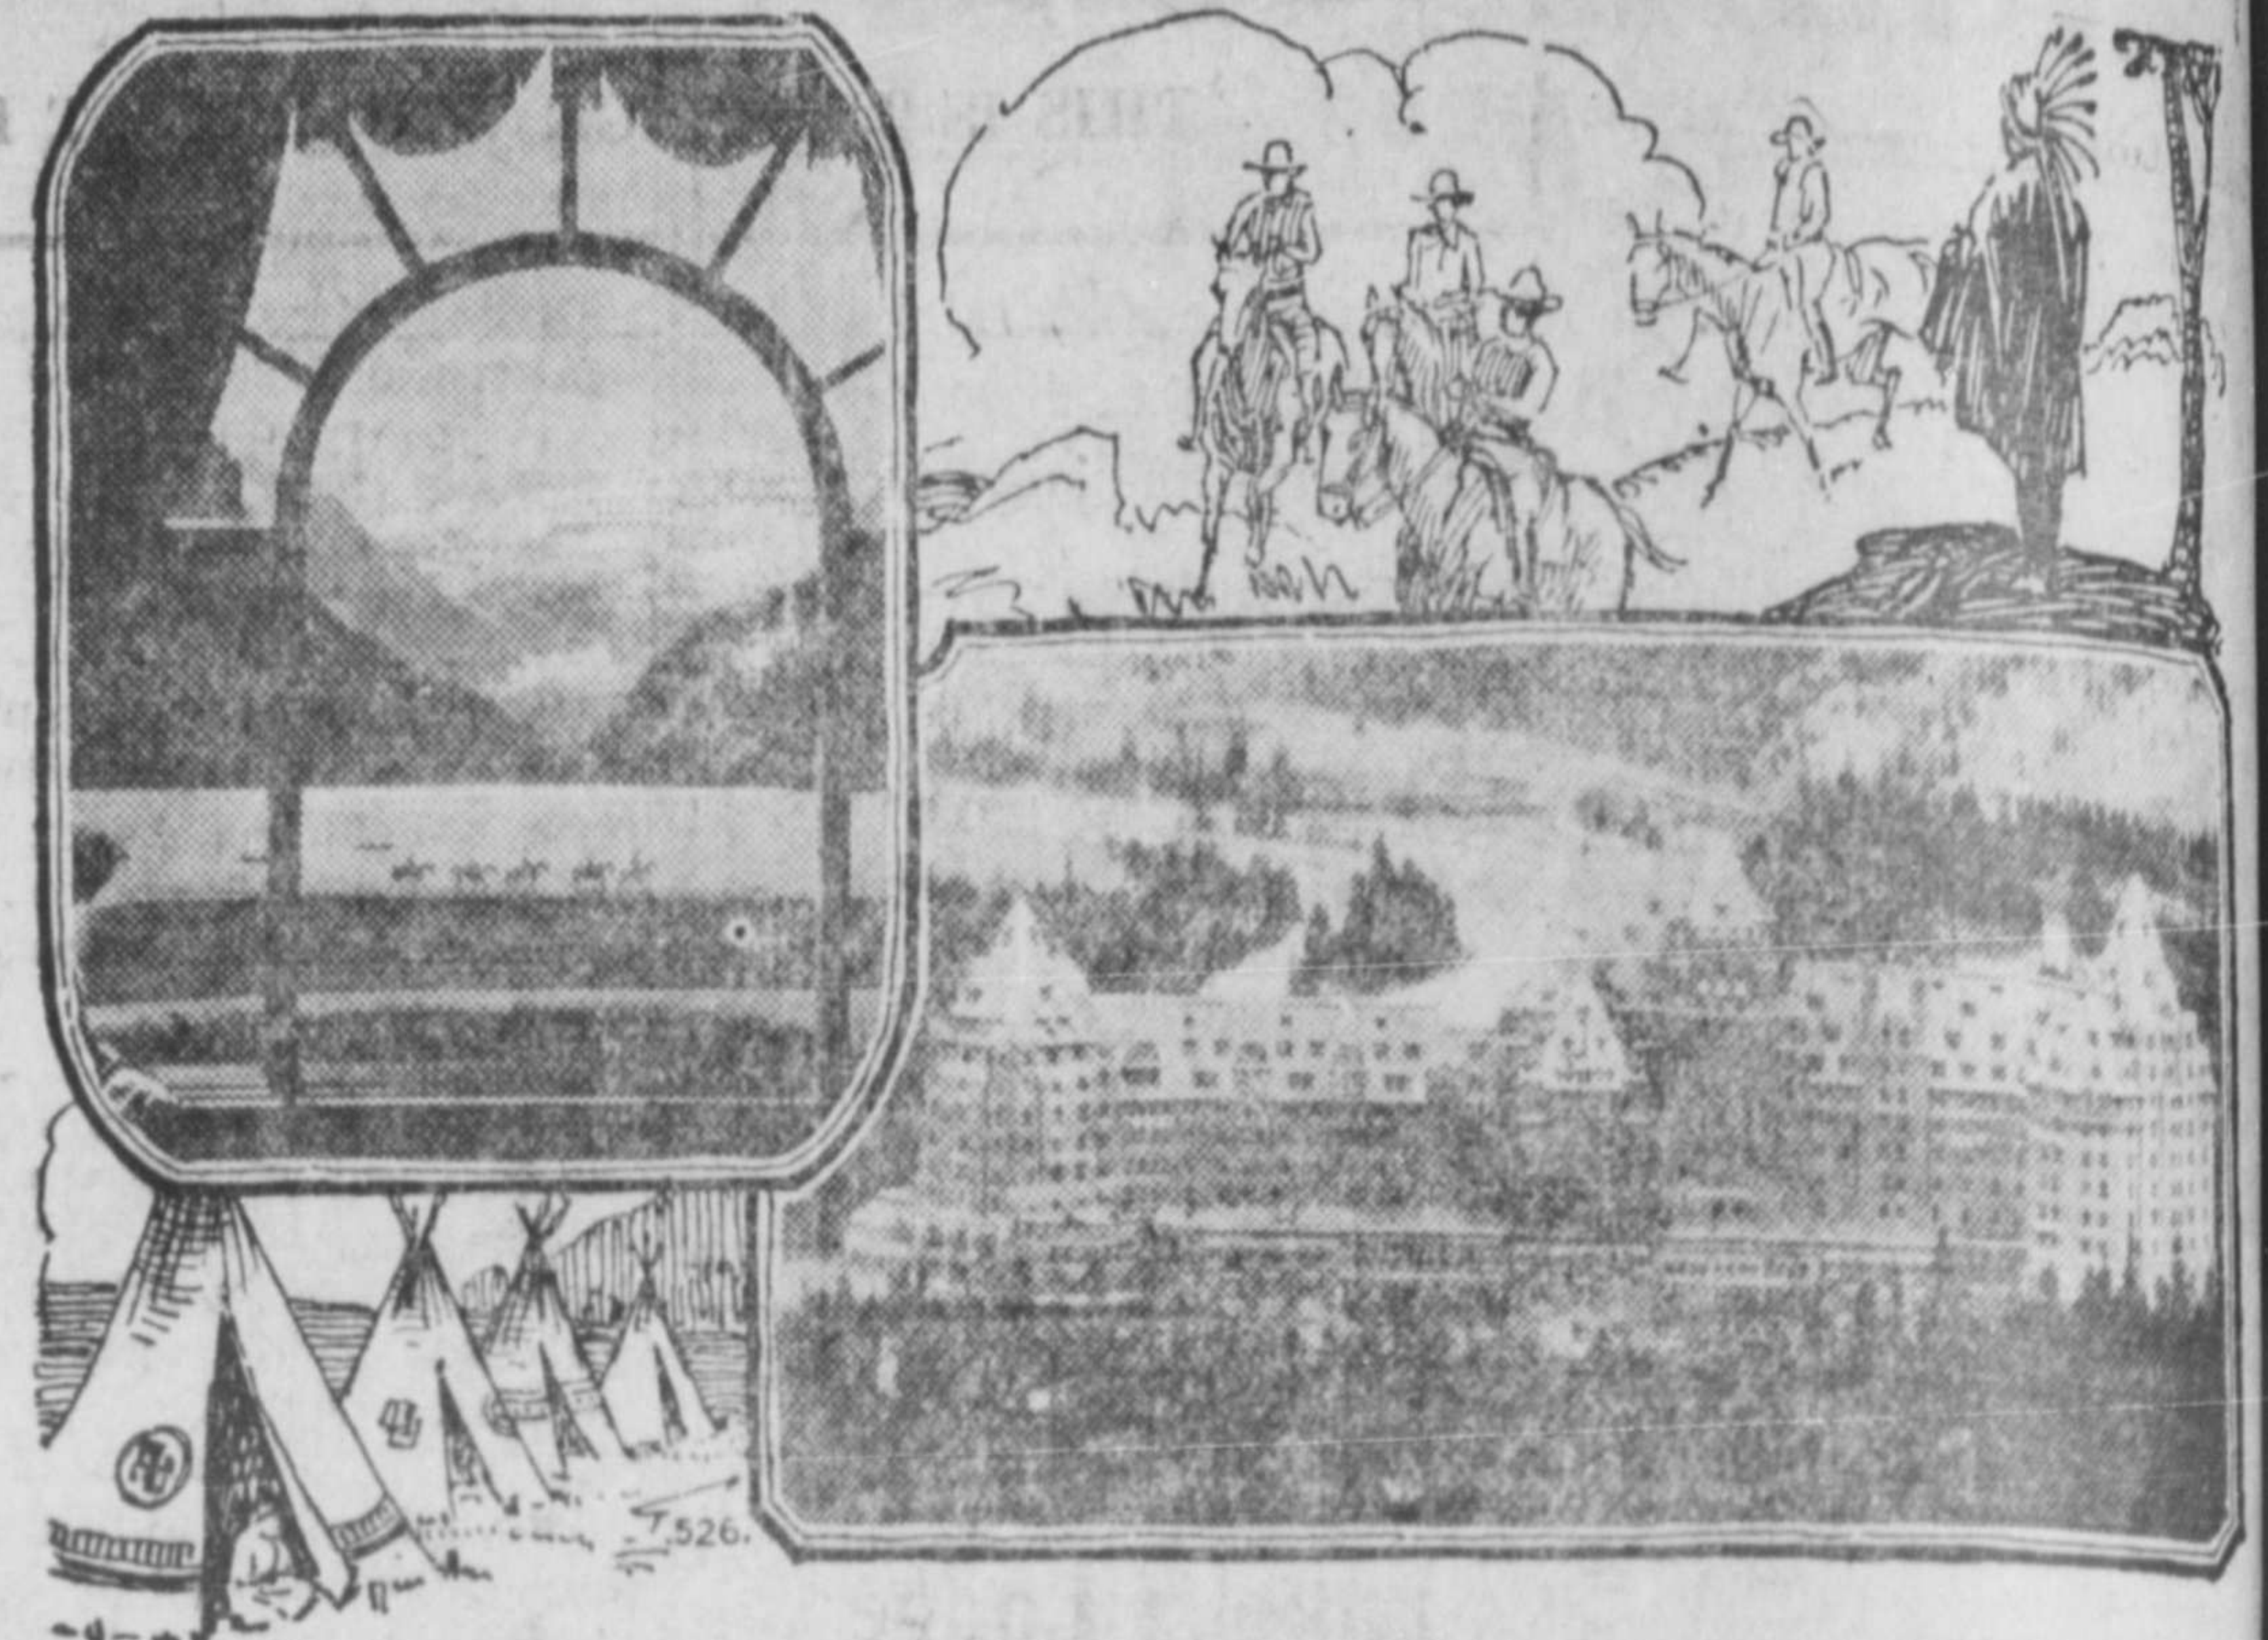

May 20, 1910

The final count of the first civic election in Prince Rupert yesterday was as follows: for mayor, Stork, 557; Manson, 453; for aldermen, Mobley, 663; McIntyre, 578; Pattullo, 549; Lynch, 510; Barrow, 508; Smith, 504; Hilditch, 482; Naden, 449; (elected); Stephens, 442; Morrow, 418; Clarke, 400; Morrissey, 358; Quinian, 313; Arnott, 279; Douglas, 200; for school trustees, Bennett, 688; Stewart, 627; Currie, 555; (elected) Clayton, 500. After the election there was a great jubilation in the Empress Theatre.

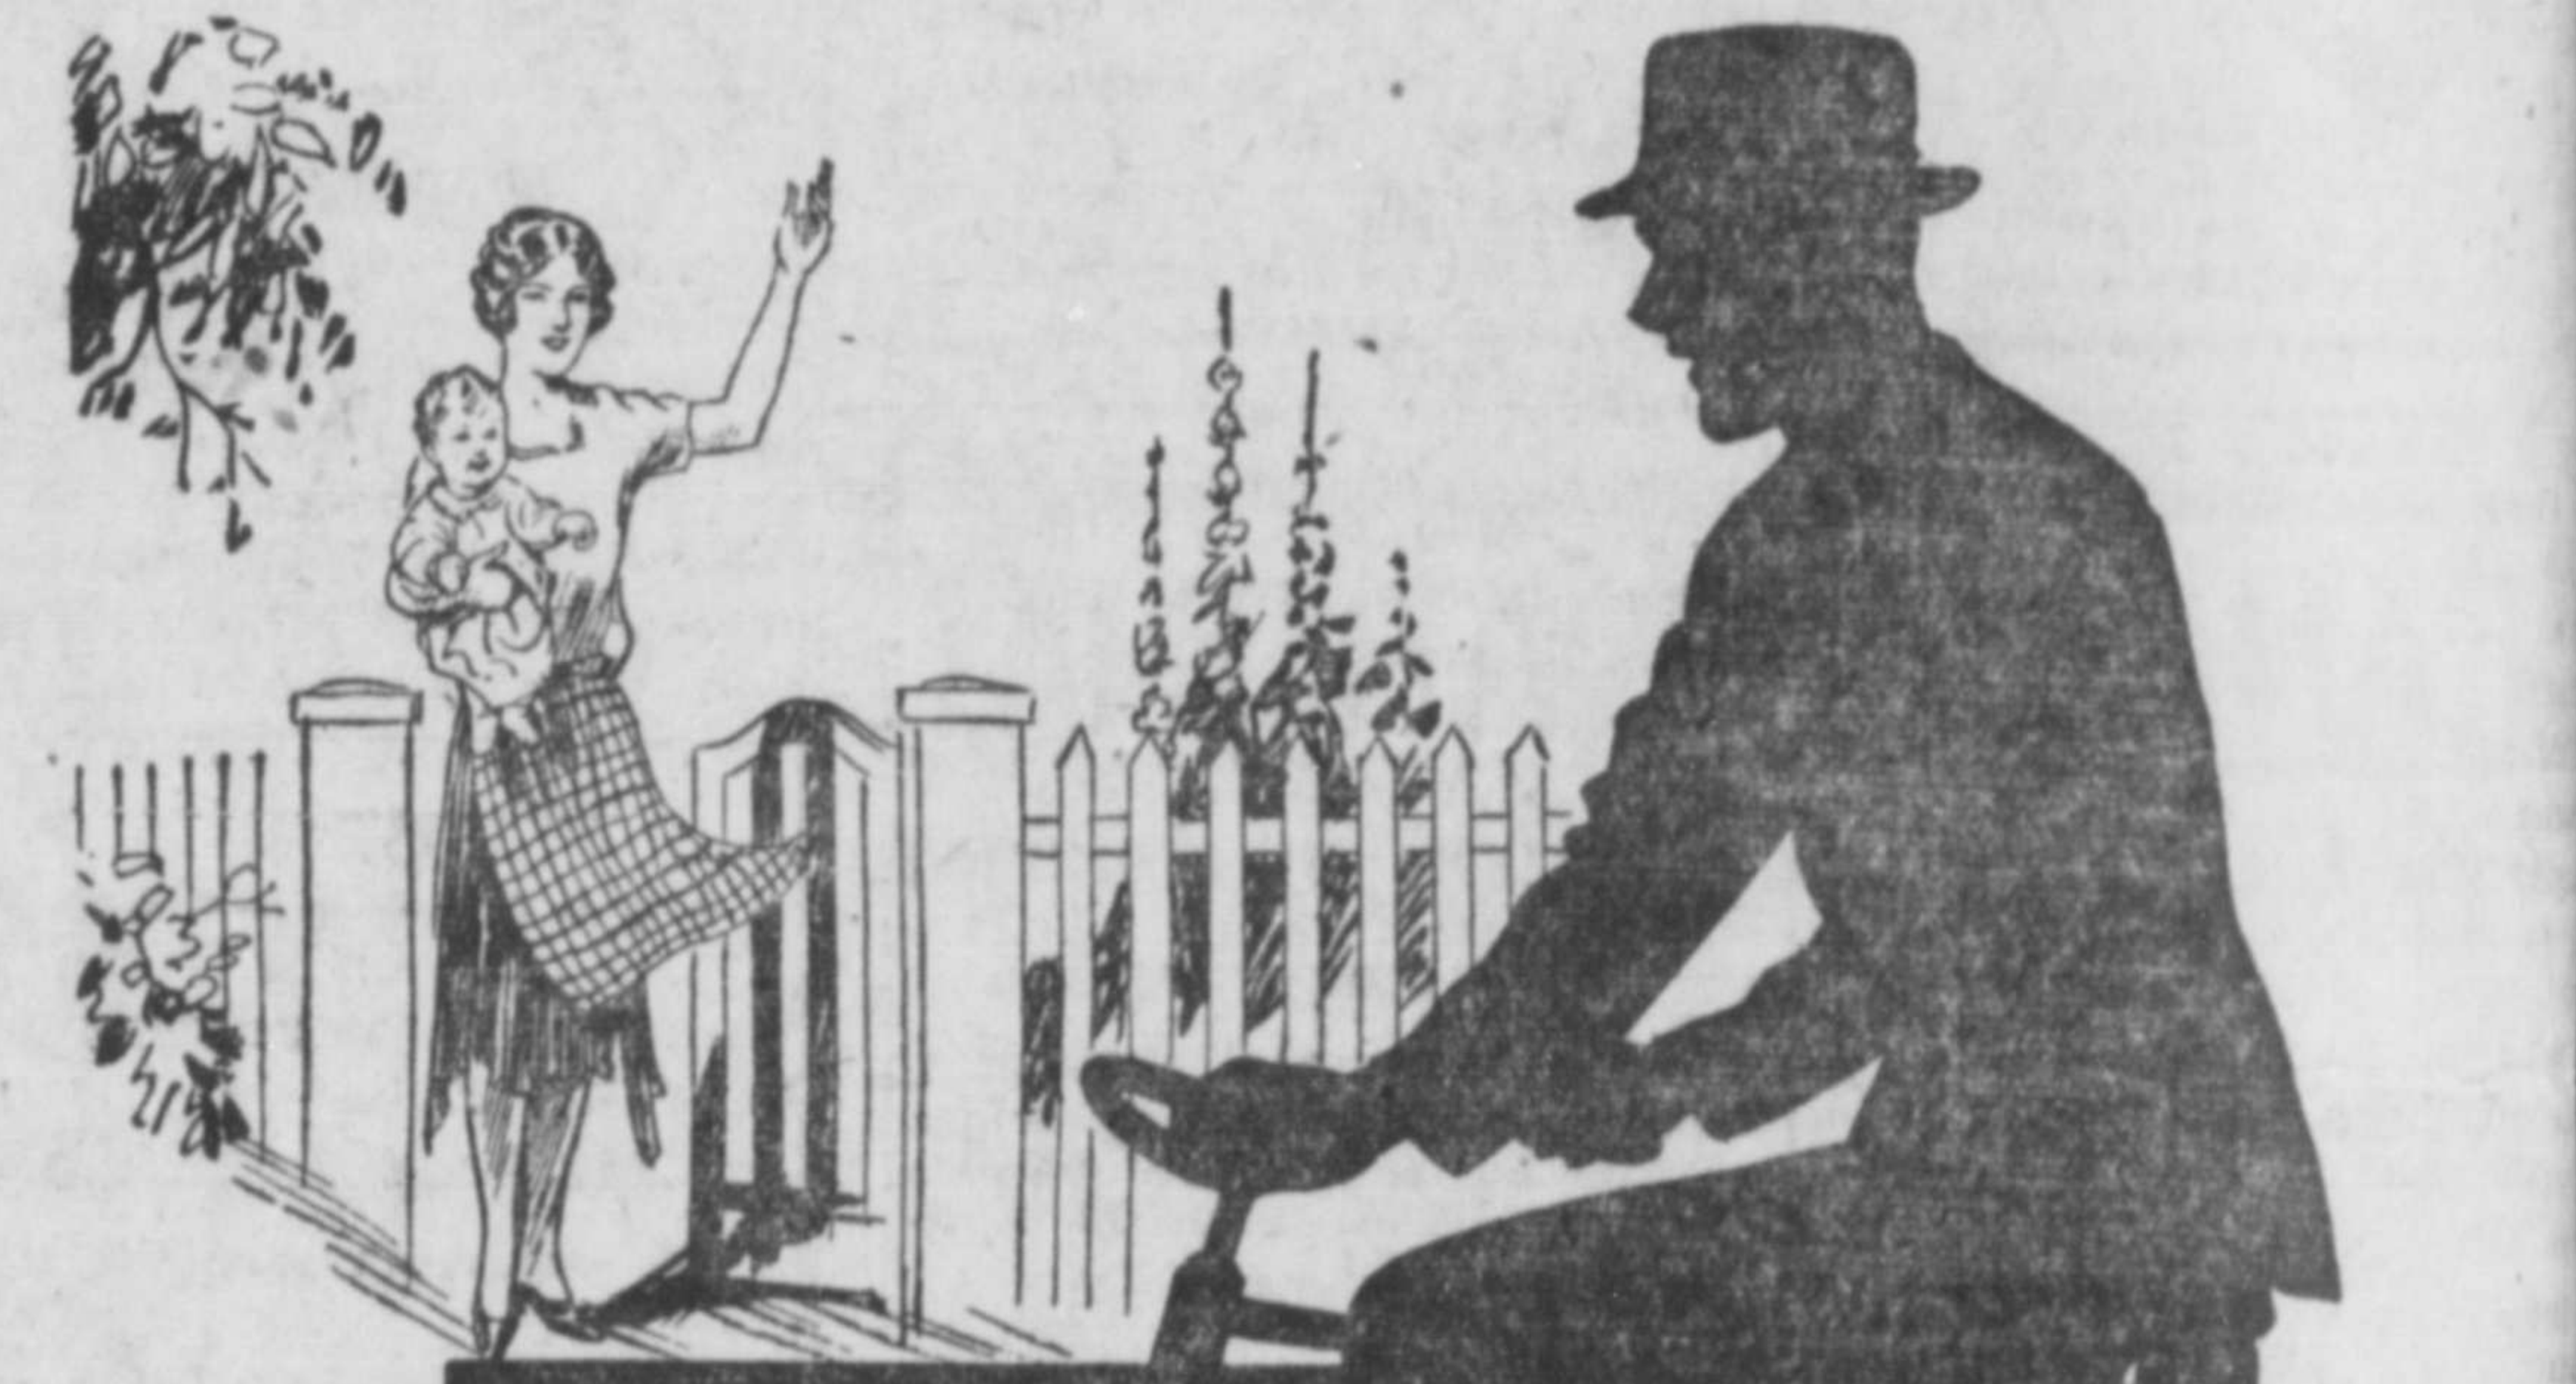

A great memorial for King Edward VII was held in Prince Rupert today in common with the rest of the Empire. The gathering took place in the Empress Theatre and all the clergy of Prince Rupert participated—Rev. F. H. DuVernet and Rev. T. C. DesBarres of the Anglican Church; Rev. A. M. Ross of the Presbyterian Church; Rev. C. F. Connor of the Methodist Church and Rev. Father E. M. Binoz of the Roman Catholic Church.

The Gillillan Lumber Co. of this city has practically decided to build a large sawmill at Stewart, it is announced by T. B. Swain, secretary of the company.

## The Rockies Are Calling You

The combination of the extremes of natural and sophisticated at Banff Springs Hotel and Chateau Lake Louise, which open May 15 and June 1, respectively, until September 30, is perhaps the secret of their charm. Located in the heart of the finest scenery of the continent—mountain, lake and forest—each offers to the visitor everything that the most ritzy hotel in the most cosmopolitan cities of the world can furnish. You may cut dancing to look through huge windows at slices of billion-dollar scenery or you may attire yourself to please yourself and go out for days on horseback into territory virtually untouched by the white man and all within a few miles of either hotel. You may live plainly but well on food packed into the wilds by horse or you may dine on exotic dainties drawn from the ends of the earth. You may be strictly formal or you may wander around in plus fours—everything goes, whether you are admiring the moonlight on snow-crowned peaks or listening at your ease to a cosmopolitan dance orchestra playing the latest blue. Anyone visiting either of these hotels has laid in a memory that will last a lifetime. Lay out shows, left, view from Chateau Lake Louise; lower right, the Banff Springs Hotel.

## Home Earlier, Fresher!

A BRISK bicycle ride after a day inside the four walls of an office or factory blows away the "cobwebs" and freshens one up amazingly. You arrive home earlier, too, and with a keener appetite.

It is easy to own a C.C.M. Bicycle this year. Prices are the lowest in thirty years. The quality has never been higher.

The big increase in C.C.M.'s output the past few years enables these new low prices to be made. Everyone knows that a bigger output means lower manufacturing costs.

The more you know about bicycles, the more you'll appreciate the fine quality of C.C.M. Bicycles, and especially these six points of superiority:

1. C.C.M. 20-year Nickel Plating.
2. C.C.M. Triplex Crank Hanger.
3. C.C.M. Improved Hercules Coaster Brake.
4. Three Coats of C.C.M. Enamel baked on over a Coat of Rust-Proof.
5. Gibson Pedals (on most models).
6. Dunlop Tires.

CANADIAN SPORTS WEEK MAY 17-24

Your nearest C.C.M. dealer will give you the new 1930 catalogue or write Canada Cycle & Motor Co., Limited, Weston (Ontario), Montreal, Winnipeg or Vancouver.

## NORTHERN B. C. NEWS

### STEWART

Business blocks and private dwellings in Stewart have been receiving treatment from the paint brush during the past several weeks. Fifth Street, in particular, is undergoing an extensive brightening up program and will present a clean and favorable aspect to the many visitors who will tread its streets this summer.

Cars have been getting up the Salmon River road as far as Fish Creek and, in a few days, it is expected they will be able to get through to Nine Mile. The upper end of the road is still in bad shape.

The Stewart Board of Trade has recommended the names of Howard Campbell, W. R. Tooth and John Campbell as temporary village commissioners for Stewart pending the holding of the first civic election here next January.

The three-times a week mail service for Stewart has been started this week. The steamer Prince Rupert as well as the Prince George and Catala now bring mail here.

Melvin Lee left last week for Vancouver where he will take tests preparatory to joining the Royal Flying Corps.

Jim Easton left last week to join the staff of the Big Missouri mine.

Bert Shearme was in town last week from the Georgia River mine for a brief visit.

Mrs. Allan Carolan returned to town last week from a brief trip to Vancouver.

Leslie Chapman of the engineering staff of the Premier mine left last week for a month's holiday trip to Vancouver.

### PRINCE GEORGE

The Board of Works has presented an \$8,000 sidewalk program for the year to the city council. In all, \$12,000 has been appropriated for sidewalk work in the city this year.

Miss Phyllis Ireland has been named May Queen here and will be crowned on June 7 under the auspices of the Women's Hospital Auxiliary. Helen Styles, Alice Johnson and Florence Belina will be maids of honor.

The city council has ordered a strict clean-up in Prince George and has instructed the health officer to take action if long standing

nuisances are not abated at once. At the council meeting last Monday night Ald. Fraser declared that he believed Prince George to be "the dirtiest town in the Province of British Columbia."

The contract for the construction of the 12-mile cut-off which will take the C. N. R. line up McLennan Creek to Swift Creek to connect with the main line in that vicinity has been awarded to the Thompson Construction Co. of Winnipeg. Work will commence as soon as the railway estimates are passed at Ottawa.

### BURNS LAKE

A motion was passed by the Burns Lake and District Board of Trade at a meeting last week asking the provincial government to reopen commercial fishing in lakes over four miles long. Surprise was expressed by members of the Board at the action of the government in closing so many large lakes in this district to commercial fishing after the Board had endorsed this business venture.

Burns Lake defeated Rose Lake by a score of 2 to 1 last week in about the best football game that has ever been seen here.

The village commissioners have decided to insist that the traffic bylaw be observed in Burns Lake and signs will be erected at various points warning auto drivers not to exceed fifteen miles an hour within the town limits. Turning except at specified intersections is also prohibited.

A start was made last week in getting the local tennis courts in shape and the sport will soon be on in full swing here.

K. Engstad has taken a position in Phil Brunell's store here.

A. R. Brown and Kenneth Warner have completed the building of a new house for Mr. and Mrs. A. E. Kiscock and the latter have now moved in.

Neil Van de Veen and R. G. Stearns of Tintagel were visitors in town last week.

S. S. Phillips, district agriculturalist, Smithers, was a visitor last week in the Lakes district on official duties.

While the days are hot, there have been night frosts here constantly during the past few weeks and the garden stuff is slow in starting to grow.

### SMITHERS

Olof Hanson is here on his way back to Prince Rupert after a business trip to Ottawa, Montreal and Washington, D.C. On his way west he was called to Kamloops to attend the funeral of his brother, Bert Hanson, who was killed in an accident. Mr. Hanson will leave in a day or so for Prince Rupert.

The action of Joseph S. Kelly of Smithers vs. J. F. Duthie of Seattle, which was to have been heard at the Supreme Court Assizes in Prince George, has been settled out of court by the payment to the plaintiff of \$600. The original claim was for \$5,000 as recompense for machinery which plaintiff claimed was used wrongfully by the defendant.

A large tractor and several men are now engaged in removing stumps from the new aviation field here so as to make it suitable for airplane landings.

The town scavenging contract has been quite a problem for the village council. George Godwin has submitted a tender to do the work at a slightly lower figure than is at present charged.

Quite a camp for unemployed who drift into Smithers has been established just west of town.

At a meeting this week of the Smithers Assembly of the Native Sons of Canada, prizes were presented by President A. C. Fowler to the winners in a recent public school essay contest. The winners were: Kathleen Powell, Alice Dimock, Alfred Bamford, Molly Priest, Lorna Apps, Fred Small, Jerry Warner, Margaret Windt, Hildur Payerlid.

## Home Canning Made Easy By New Free Book

Summer Foods in Winter Help Preserve Health and Provide Ready-Cooked Meals

Just prior to the war some remarkable discoveries were made in regard to the canning of food products, discoveries that have greatly enlarged the scope of food preservation and made it possible to put up for future use almost every kind of fruit, vegetable and meat.

These developments are described in a new booklet entitled "Home Canning," just issued by the Bank of Montreal, dealing with their food problems in the modern scientific way. With this booklet as her guide, the farm housewife is able to provide just such a wide range of healthful foods in winter as in summer. Furthermore, when busy days arrive, or when unexpected company drops in, she is no longer flustered by the problem of meals—she has good, appetizing foods right at hand in plenty, only waiting to be warmed up and served.

Here are some of the things that one can now easily preserve in all their original freshness, and with the health-giving vitamins retained: Tomatoes, string beans, peas, corn, greens, asparagus, carrots, beets, rhubarb, berries, cherries, plums, peaches, pears, chicken, beef, pork, soup and fish.

Of course, to preserve these foods properly, you have got to know how. The booklet describes how. It deals with cold packs and hot packs, glass jars and tin can containers, and with best methods of processing, whether in the ordinary boiler or in that wonderful little invention, the steam-pressure cooker, which latter, by the way, can be used to great advantage in ordinary cooking.

Lots of people wonder why they need headache cures and tonics during the winter and in spring—the lack of those healthful qualities which fresh fruit and vegetables contain. This booklet shows how to get summer food all the year round, to the great advantage of the health and the pocket book. Food that would otherwise be wasted can be saved and enjoyed at any time; chickens, pigs

## Evidences of Progress

There are a number of very material evidences of the progress of Prince Rupert just now. Among them may be noted:

The construction of the first unit of a large hydro-electric power plant for the use of the city and neighborhood.

Plans all laid for building of new Canadian National Railway Hotel to commence this year.

Tenders being called for new Liquor Store for Provincial Government on Third Ave.

Work proceeding on construction of highway by Provincial Government.

Securing of contract by local shipyard for building large railway car barge for use in the south, the work to be done this year.

Extensive new fishermen's floats being built by Federal Government.

New Post Office expected to be built by the Federal Government.

Work on new addition to Fisheries Experimental Station nearing completion.

Number of buildings being planned for private interests.

Increased tourist service being given and better stop-offs arranged by railway company.

New steamship to make home port at Prince Rupert just commenced new service.

General spirit of co-operation and optimism on the part of the people of the city, officials of the railway company, power corporation and country generally in regard to future prospects for city and district.
