PRICE FIVE CENTS

MYSTERY ORE DISCOVERY IS MADE

QUARTER OF BILLION CROP THIS YEAR IS ALL EXPECTED

Detroit Geophysicist Says Great Bear Lake Ore Runs \$1200 Ton

Eclipses Even Recent Sensational Find of Pitchblende and Radium There—Copper Is Also Contained In Large Quantity

EDMONTON, July 10.—A mystery ore body, even eclipsing the radium pitchblende find at Great Bear Lake, has been discovered on an island in Echo Bay on the same lake, according to T. G. Donovan, Detroit geophysicist, who declines to divulge the nature of the discovery other than to state that assay samples show values of up to \$1200 per ton.

Trades Council Defers Election Of New Officers

The Prince Rupert Trades & Labor Council, at a meeting last night, deferred until next month its election of new officers.

Celebration Was Successful

Dominion Day Proceedings Were Satisfactory Financially and From All Other Standpoints

The joint committee in charge of the Dominion Day celebration last week for the Sons of Canada, Football and Baseball Association, and Boys' Band announce that the day was very satisfactory financially and from all other standpoints.

The committee was appreciative of assistance given in the staging of the celebration not only by members of the organizations but also by many other citizens.

The Weather

Dead Tree Point—Cloudy, calm, barometer, 30.10; temperature, 54; smooth sea.

Triple Island—Part cloudy, fresh westerly wind, moderate sea.

Langara—Overcast, moderate westerly wind, rough sea.

Local Scientist Discusses Soil and Plant Growth and Tells of Needs in This City

(By Dr. R. H. Bedford, Prince Rupert Fisheries Experimental Station)

For a better appreciation of the part that soil plays in affecting plant growth, it might be as well to see first just how a plant grows from seed to maturity. Plants are generally classified into two main groups: 1, green; 2, not green, e.g., mushrooms.

The fact that the green color forms such a conspicuous characteristic of many plants suggests that some important property must be connected with it and such is the fact. The plant depends upon this green coloring matter for building up the greater part of its food substances, such as sugar, starch, fats, etc.

Big Boom Of Island Logs Disposed Of

SKIDEGATE, July 10.—Messrs. Munro and Hastie, who are operating a logging camp at Copper Bay, Moresby Island, brought in a 200,000 foot boom of spruce logs which they have disposed of to the A. P. Allison Co. at Queen Charlotte City.

FLYERS WILL TRY JAPAN HOP AGAIN

NOME, Alaska, July 10.—Reginald Robbins and Harold Jones, who failed yesterday in their attempt to make a non-stop refuelling flight from Seattle to Tokyo, will make another attempt in the same plane Fort Worth with a larger engine, they announced here.

FISH PRICES IN BRITAIN

Scottish Paper Tells of Bad Condition Especially at Ports of Hull, Grimsby and Aberdeen

Used For Meal

Trawlers Run at Loss—Unemployment Increasing at All Fishing Ports in Country

"Fishing News" of Aberdeen, Scotland, in a recent number says: Hull, with its great catching power, provides the most eloquent example of the unfortunate situation, and has been compelled to send enormous quantities of fish to the fish meal factories. Her own big factory, although working to full capacity, has been unable to overtake the enormously increased supplies, and the aid of outside companies has had to be called in to effect a disposal. Exporters and merchants are also affected. The former find the internal conditions of foreign countries playing havoc with the currency, rendering business impossible. At Hull, Aberdeen and Grimsby reductions of staffs have been made imperative. One of the outstanding features of the situation, of course, is that while the price of fish has dropped so considerably, there is no corresponding reduction in overhead charges.

A survey of the position was made by Tom Hudson, president of the Hull Fishing Vessel Owners' Association, the other day.

Asked if it was true that the Hull trawler owners had decided to cut down crews by one man per boat on Icelandic and White Sea voyages in the hope that trawlers would bring less fish to port, Mr. Hudson said it was true that such reductions were being made. It was not done with the express hope of reducing catches, however, the basic reason being that at the present time there was a glut of a perishable article. The public would only consume so much, and the trawler owners were having to send a tremendous lot to fish meal works because there was no sale for it on the market.

"Such disposal," he continued, "has caused a very great loss to the owners, and the obvious solution would be to lay up a proportion of the Hull trawlers, but the owners are very loth to take such a step as it would entail great hardship to the people engaged in the industry from an unemployment point of view."

"At this time of the year various boats are generally held up a little while for renewals and repairs, but after their ordinary survey is completed they are putting out to sea again as usual. So far as the disposal of our marketable fish is concerned, much is going to the fish meal works, and a problem in the (Continued on page five.)

FISH BOAT IS BURNED

Well Known American Halibut Vessel Total Loss in Sumner Strait

KETCHIKAN, July 10.—The halibut schooner Northern burned nearly to the water's edge, following an explosion in Sumner Strait Wednesday, forcing the crew of eight and Capt. Claus Ramburg to take to the dories. They were brought here by another schooner. The captain is being treated for injuries.

There was 20,000 pounds of halibut on board the Northern when she burned.

The Northern and her crew were well known in Prince Rupert. The vessel landed a catch of 25,000 pounds here about the middle of May.

Succeeded In Examinations

The following girls in Northern and Central British Columbia were successful in provincial civil service examinations which were held recently:

Prince Rupert, senior—Laura A. Stephens; junior—Amelia T. Pillsbury, Helen M. Walker, Rose E. Wesch, Ida Mabel Boddie, Elsie A. Finley, Margaret M. Smith, Winnifred E. Tucker, Brenda P. Allen, Mary Y. McCrea, Lillian Ytreberg, Joan Cross, Clara M. Lundquist, Mabel M. Ivarson, V. McCutcheon, Kathleen R. Duncan.

Smithers, junior—Tamar L. McIntyre, Bertha L. Chapman. Prince George, junior—Gwenlliam M. Williams, Eva R. Gaul, Martha M. Huble, Olive Nourse, Aima J. Grundall.

Pouce Coupe, junior—Eva M. Morrell, Annie G. Daizell.

FISHING VERY GOOD ON SKEENA RIVER

Visitors here from the Skeena River state that fishing is very good just now. Boats are getting mostly from sixty to one hundred fish a day but the high boat came in with 250. The present spell of good weather makes the fishing good.

ENJOYED GREATLY

Rare Musical Treat Afforded by Royal Russian Chorus

Large Audience

Return Engagement is Arranged For Next Week

Thrilling their large audience with the sheerly delightful artistry and beauty of their talents, members of the Royal Russian Chorus rendered last night in the Moose Hall one of the most outstanding musical entertainments that Prince Rupert has ever had the good fortune to enjoy. The pleasure that the audience took out of last night's program, one of wonderful versatility, cannot be overrated.

It is fortunate that the Royal Russian Chorus is returning to Prince Rupert on Friday of next week for a return matinee and evening engagement. So great and so appreciative were the plaudits earned in last night's program that there should be no question of sold-out houses on both of the forthcoming occasions.

In having brought to the city such another fine entertainment of this kind, the Gyro Club is deserving of much credit and appreciation from the citizens of Prince Rupert as a whole. It is this kind of thing, coming indeed rarely enough, that tends to brighten life up in these outlying communities. People, whose fortune it is to attend, are transported from the everyday things of life to a rare esthetic plane which all can comprehend. Nor is the repertoire of the Royal Russian Chorus entirely one of brilliant artistry and beauty but is also versatile enough to appeal to all tastes—even the most common. Last night's program has been cleverly arranged in this regard.

Technically, the group of twelve vocalists is superb. Modulation is coupled with remarkable control. Great power is tempered with harmony nigh perfect. In the rollicking and the blase or the gentle and the delicate rendition is alike.

Vancouver Wheat

VANCOUVER, July 10.—Wheat was quoted on the local exchange today at 55 1/2c.

Percentage For 1931 Harvest Is Put Down At 56 in Statistics

Is Based on Long Time Average Yield and Compares With Ninety-Two Per Cent at Same Time Last Year

OTTAWA, July 10.—Andrew Cairns, statistician for the Wheat Pool, gave from 225,000,000 to 250,000,000 bushels as an "optimistic estimate" of the wheat crop of all Canada this year before the agricultural committee of the House of Commons yesterday.

The condition of the spring wheat crop for all Canada on June 30 is given as fifty-six percent on a long time average yield per acre in a Bureau of Statistics report compared with ninety-two percent, at the corresponding period last year.

DIPLOMAS GIVEN OUT

Academy Students Succeed in Their Studies

The following students of St. Joseph's Academy commercial class have been successful in the final examinations and have obtained diplomas.

Full Commercial Course—Yolanda McRae, 90%; Amelia Pillsbury and Audrey Wrathall (equal) 89%; Grace LeDuke, 88%; Dorothy Brown, 86%; Mabel Ivarson, 85%; Olive Munro, 82%; Isabelle Fidler, 81%.

Stenographic Course—Vivian Hickey, 78%; Violet McCutcheon, 77%; May McDonald, 76%.

Five students of this year's class also passed the Civil Service examination, Amelia Pillsbury, Brenda Allen, Yolanda McRae, Mabel Ivarson, Violet McCutcheon.

Tourist Booklet Issued By Gov't; Very Attractive

An attractive little booklet "Alluring British Columbia," has just been issued by the Bureau of Provincial Information and Publicity. The tasteful illustrations of the brochure are an interesting feature. Scenes as well as articles deal with Northern and Central British Columbia as well as with other parts of the province. The booklet has been prepared, apparently, with the object of attracting tourists to the province.

Jones Budget Assailed By Grit Leader at Terrace Last Night; Large Crowd Hears Pattullo

TERRACE, July 10.—"Never has there been a more misleading document submitted to the provincial legislature than Mr. Jones' first budget. In spite of protests of Spartan economy, the estimated expenditure for the current year is the largest in the history of British Columbia, although essential public services have been curtailed," said T. D. Pattullo, Liberal leader, before a large audience in the Odd-fellows' Hall here last night.

R. W. Riley, president and Dr. H. C. Wrinch, Member for Skeena riding, also spoke, criticizing increases in taxation and drawing attention to three million dollars reduction in taxation during the last four years of Liberal administration.

Today, Mr. Pattullo and party are visiting the outlying parts of the district, and go to Hazelton by train this afternoon.

FINE YACHT PAYS VISIT

One Hundred-Foot Harmony of Seattle Has Russian Singers On Board

The palatial 100-foot Seattle yacht Harmony, owned and skippered by Capt. Hubert Gough, arrived in port at 7 o'clock last evening from the south bringing the Royal Russian Chorus party, to which it is under charter for their tour of Alaska and British Columbia. The vessel, which tied up at the floats of the Pacific Salvage Co., left at 2 o'clock this morning for Ketchikan. It will go as far north as Skagway, visiting various Alaska points en route and will be back here on July 17 with the party. In addition to the artists themselves, there are on board Laurence A. Lambert, manager of the troupe, and his wife and family.

A handsome yacht without and luxuriously fitted within, the Harmony is equipped with twin 100 h.p. Hall-Scott engines which give her cruising speed of 12 knots per hour. The party on board the Harmony totalled 20 persons. There is also a crew of seven. Coming up the coast from Seattle, stops were made at Powell River, and Swanson Bay, where Wednesday night was spent.

The evils of enforced leisure are almost as bad as the evils of enforced labor.—L. P. Jacks of Manchester College, England.

BAD EPIDEMIC OF INFANTILE PARALYSIS IN AUSTRALIA

VICTORIA, Aust., July 10.—The worst epidemic of infantile paralysis Victoria has experienced is now sweeping the state. An average of 10 cases a week have been admitted to the Children's Hospital, until now half the beds in the institution are occupied by infantile paralysis cases.

THE DOLE AGAIN

Yesterday announcement was made from Victoria that the government was again returning to the dole system of relief, something that it was hoped was a thing of the past. If this is simply a temporary expedient, no one will grumble, but if it is intended to make it a permanent policy, we believe it is not in the best interests of the people receiving it or of the province generally.

When Premier Tolmie announced that he was about to institute a system of absorbing the unemployed on needed public works, we commended the plan. We have commended other utterances of Premier Tolmie in regard to this matter, but now the government seems to be changing its original plan.

We hope this is only a temporary expedient and that in the very near future we shall hear from Premier Bennett and Premier Tolmie that they have agreed upon a big scheme of highway construction and railway construction that will benefit the whole country and bring about a more prosperous condition.

NOTHING IS STABLE

When times were good we were assured that the good times would last for ever and that we could never return to the former condition of business depression, low prices, low wages and unemployment. Then came the slump and today we find people trying to say that we are living in a new world and that from this time on there will be low prices, low wages, and all the accompaniments.

Both groups are wrong. This is an age of change. Nothing is stable. None of us know what the condition will be like ten years hence or even five years. Changes come quickly, and often they arrive before we have time to adjust ourselves to the new way.

And there is a change needed in our system. In this country we find there is a glut of wheat and beef and eggs and other commodities and yet there are people going hungry. That is undoubtedly wrong. While many people think they know how to right that wrong, it is probable that they do not. No system yet devised seems to meet the situation. Those who point to Russia ignore the fact that the streets are filled with beggars, that the standard of living in that country is far below our standard and that many of the inhabitants habitually do not have more luxuries than our unemployed army.

Probably we have much to learn from Russia and much from other countries. In all probability the new system, whatever it is, will be evolved rather than adopted. Exactly how it will come about nobody today knows.

Full of Good Points

The name "Black & White" on a bottle of whisky is as absolute a guarantee as the hall-mark on silver. It assures that subtle difference in flavour and quality which distinguishes this whisky from all others. It guarantees that only the finest materials have been used and that always everywhere the quality is the same.

Local Scientist Discusses Soil

(continued from page 1)

ded, the plant grows normally, showing that the minerals it requires come from the soil. Plants require all their food in solution.

It has been shown that the five following factors profoundly affect the growth of plants:

- 1—Water supply.
- 2—Air supply.
- 3—Temperature.
- 4—Supply of plant nutrients.
- 5—Various injurious substances, secreted by plant roots and bacteria.

The question that naturally presents itself is what is the composition of soil, its nature, and its function in the growth of plants.

The composition of soil may be divided broadly into two parts, the mineral or inorganic part and the vegetable or organic part. For example, quartz sand is wholly mineral while peat is practically all organic or vegetable material. Between these two limits there are all kinds of soils containing different proportions of inorganic or organic material. The soils of southern parts of the prairies contain in their virgin state about 7.2% organic material, the Peace River belt about 27%, and peat, 93%.

The soil in the first instance was derived from rocks, by the action of frost, air and water. The changes of temperature caused the large rock masses to crack and these were gradually broken into smaller particles by the alternate freezing and thawing of water in the rock fissures. Then again, by means of the acid formed by the carbon dioxide gas in the atmosphere and water, some of the rock went into solution. In most cases the fragments were sooner or later carried away by water and deposited at the bottom of a river or sea. There they mingled with residues of living organisms which have subsequently played an important part in the history of the soil as its chief source of calcium carbonate and calcium phosphate. In course of time, the material accumulated to considerable depths; then, as a result of some earth change, the water retreated leaving the deposited material as dry land or rock.

Mineral Food

The first vegetation must obviously have obtained its mineral food from the dissolved material of the soil particles but, when it died and decayed, all the substances taken up from the rock particles were returned. But the plant returned more than it took from the soil, for, during its life, it had been making (synthesizing) sugar, starch, etc., which, when it died, fell back on the soil. This organic or vegetable material introduces a fundamental change in the soil because on it other living things may grow.

The soil then may be visualized as a framework or skeleton of rock particles within the spaces of which are the residues of plants which have grown since the soil occupied its present position.

A plant requires just as many substances for its growth as any animal. For example it must have in some form or other such nutrients as copper, potassium, phosphorus, carbon, hydrogen, oxygen, sulphur, iron, magnesium, chlorine, sodium, etc.

The rock particles and dead vegetable material are both essential for

plant growth. That is one reason why rock in the form of lime is added to such soils as peat. And then there is one constituent which the plant must have and can only be obtained from dead vegetable matter (unless it is added as a fertilizer. This is nitrogen. The release of nitrogen from dead organic material for plant growth introduces one of the most fascinating problems in the domain of natural science.

Not Inanimate Mixture

Soil is not just an inanimate mixture of rock particles and dead vegetation but a subterranean world teeming with the activity of enormous numbers of very small plant-like creatures. These plants are so small that they can only be seen with the aid of the microscope and because of this they are called micro-organisms (bacteria, molds, protozoa).

Without these organisms, there would not be any vegetable or animal life. For in breaking down the dead vegetation they provide the living plant with certain nutritional substances that it cannot obtain in any other way, except by the addition of certain nitrogenous fertilizer. One generation of plants die that the succeeding ones may live. Soil bacteria are the connecting link between the dead and the living. They—the bacteria—disintegrate the dead vegetation so that the nitrogen it contains is made available to the plant. This process is not an haphazard one but is rather the result of fine team work between different groups of bacteria in the soil. One group tears down the vegeta-

tion to a particular stage and then others take up the work until there finally evolves a nitrogenous compound called nitrate; it may be nitrate of soda or calcium. In this state nitrogen appears most beneficial to plants.

Fertile Soil

The question is commonly asked as to what constitutes a fertile soil. The answer is that there is not one set of conditions that will give the best growth for every kind of plant. Every plant seems to require a particular set of soil conditions. One substance may be very beneficial for the growth of a particular plant and injurious to another. As a general rule in any fertile soil there will be found a plentiful supply of calcium, potassium phosphorus and nitrogen. The rapid growth of a plant depends a great deal upon just how these substances are held in the soil, which in a general way depends upon the soil's acidity. Calcium is beneficial in neutralizing acidity—the majority of plants do not like acid. Peat plants do, and peat is quite acid. It also stimulates the growth of the root system of most plants, and is beneficial in a number of other ways.

If potassium is lacking, the color of the leaves become abnormal, first dull green and then they tend to die early at the tips. The stem becomes weaker so that the plant does not stand up well.

Root Growth

Phosphorus promotes the root's growth particularly in the early stages of growth. This is very noticeable on sticky soils as clays and

peat mucks. It also hastens maturity of the plant and consequently, flowering plants will bloom somewhat earlier.

A moderate supply of nitrogen leads to more rapid growth, very useful in cold weather. Abundance of nitrogen on the other hand leads to the development of dark green leaves which are often crinkled and usually soft, sappy and liable to insect and fungoid pests, as well as retarding ripening.

For immediate effects nitrogen in the form of sodium or potassium nitrate is the best.

Temperature plays an important part in conditioning the soil for plant growth. Soil temperature follows the temperature of the atmosphere. It profoundly affects the rate of growth of plants. Its effect is equally important upon the bacteria in the soil which are so busily preparing food for the plant. Generally speaking a soil temperature of about 70 degrees Fahrenheit is the best. In Prince Rupert it doesn't get that high and consequently the bacteria do not work as rapidly as they would otherwise and the rate of plant growth is reduced.

Moisture is essential for a number of reasons. The bacteria that prepare the plant's food require their own food in solutions just as plants do—neither of them can ingest solid particles of food. Too much water interferes with the respiration of bacteria and plants and so reduces their normal life processes.

Sphagnum Peat

Peat soil such as exists in this

district is called Sphagnum peat. This is because the dominant plant is a moss called Sphagnum. It is very acid, and lacks especially phosphorus, potassium, calcium and nitrogen. The calcium can be supplied in the form of calcium carbonate (shell or marl) or lime, phosphorus as bone meal or phosphates of calcium such as apatite, tri-di or mono-calcium phosphate, potassium as wood ashes or more directly as muriate of potash. Nitrogen may be added as an organic fertilizer such as fish fertilizer, or if immediate results are sought nitrate of soda (chili salt petre) is best. If ammonium sulphate is used a plentiful supply of lime along with it is generally preferable. Stable manure is also very good if it has been properly preserved. It must be remembered that such substances as wood, ashes, coal ashes, and bone meal in addition to supplying certain substances that the plant must have also help in other ways. If a peat is mucky they will tend to open it up and permit a better circulation of water and air which bacteria and plants always need. Sand too will have a similar effect when used in this circumstance. Peat soil should always be well drained.

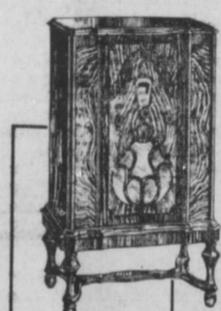

There is only one way of knowing what the effect will be of a particular soil upon a particular plant and that is by experimentation. Small pot experiments in which definite quantities of certain fertilizers are added to the soil in which the plant is to be grown will generally answer the question. No chemical analysis can do this.

Super-Heterodyne
VICTOR RADIO

...beauty of cabinet... quality, performance and value

\$122.50
Complete with Tubes

VICTOR RADIO, R-8 (Baby Super-Heterodyne) Lowboy Console \$119.50 Complete with tubes

ONE demonstration will reveal to you the infinitely superior value offered in the Victor Highboy. Distinctive wood-matching in a cabinet of rare grace and appealing proportions... traditional Victor quality throughout... plus all the advantages of advanced eight-tube Super-Heterodyne performance. And the price...

Only \$122.50, complete with tubes! Barely half what an ordinary Super-Heterodyne would have commanded but a few months ago. Here is VALUE... radio value such as has never before been possible. Only through Canadian production and Victor's immense scientific resources is it possible today.

And remember! Victor Radio R-9 is an advanced Super-Heterodyne. Added to the superlative selectivity and sensitivity of the most

modern Super-Heterodyne are the tonal perfection and noiseless operation of the new super-control tubes. Other features which make the Highboy outstanding in performance and value are increased-range tone control... "trigger touch" station selector... improved electro-dynamic speaker... and acoustically correct cabinet design. See your Victor dealer today. He will gladly demonstrate the Highboy and the other new Victor models... the Lowboy, \$119.50, complete with tubes... and the "Superette," the smallest big radio ever built, only \$89.50, complete with tubes.

LETTER BOX

OPPOSED TO POLICY

Editor, Daily News:

At a regular meeting of the Fish
Packers' Unit, O.B.U., it was moved
that the Unit go on record as be-
ing opposed to Premier Bennett's

policy whereby the cost of living of
the worker has been increased by
taxation and import duties—while

wages are falling and work scarce
—also his apparent favoritism of
the capitalist class through reduc-
tion of income taxes, which only
benefits the millionaire class, who
thereby save large sums of money
which might well be used for gov-
ernment relief of unemployed and
needy workers.

A. G. McDONALD, Secy.

OLD EMPRESS BEATS S. O. C.

Hotelmen Rally to Make Biggest Score of Season in Last Night's Encounter

Come From Behind

Commons Wins First League Game He Pitches—Stalker Makes Shoestring Catch

In a game which was featured by 10 errors by the Sons of Canada, Old Empress won last night's league fixture by a score of 14-6 and still have a chance to tie the Sons for the first of the season in the quest for the Orme Cup, emblematic of city baseball championship. The Hotelmen have one more game to play with the Elks, which will probably take place on Sunday, and if they can take the Lodgemen into camp, which they are very liable to do, they will be tied with the Sons.

Ray Commons, who has been out of the city for most of the first half, returned yesterday and was on the slab for the winning team. He was rather wild in the first inning, hitting one man and walking two. With the bases full, Johnnie Comadina came through with a triple, and scored himself which brought the Sons score up to five. They got one more on two hits in the second and that was all. They only got one more hit off his offerings in the remaining five innings and were never dangerous.

Stalker made the feature catch of the game when he robbed Vic Menzle of a hit by coming in and taking one off his shoestrings for the third out. He picked one of Wendle's long hits off near the fence too, which would have been good for a homer had he not been back there.

Styles, who had pitched the evening before against the Elks, started again for the Sons, but after a flock of errors in the fourth he began to weaken and was touched for six hits, including triples by Wendle and Hibbard, which netted eight runs. Lambie went into the box and Smith was thrown out at first by Johnson. Twelve men faced the pitcher in the stanza.

Old Empress put the game away in the next inning when the added four more. Three errors, a walk and Wendle's second triple of the game accounted for the runs. Two more errors and two singles accounted for two more runs in the sixth, and that ended the scoring for the night.

Wendle and Hibbard led the attack for the Hotelmen, each making three hits, the former getting two triples and the latter one. Eldridge and Nelson each made two hits but the former struck out on his three other times up.

Comadina, Moran; stolen bases, Menzle, Commons, Hibbard, Stalker; hits off Styles, (8) in 3-2-3 in., Lambie, (3) in 3-1-3 in.; losing pitcher, Styles; base on balls of Styles, (1), Lambie (2), Commons, (3); struck out by Styles (2), Lambie (4), Commons (8); left on bas, S.O.C. (5), O. E. (8); hit by pitcher, Frizzell; time of game, 1:30; umpires, Brookes & Laporte.

ARABELA CIGARS

5¢ each

by far the greatest value

A LOT of cigars must improve their quality if they are to compete for smokers' favour with Arabela... buy one to try, you'll buy the pocket pack of five next time... the aroma and freshness are sealed in.

ENJOYED GREATLY

(Continued from page one)

pathetic. It was numbers of the former kind, of course, that brought large ovations of which there were many last night. On the other hand, there were some of the lady soloists, delightful in personality, who won great favor from the audience. One of these was Mademoiselle Mara Slaviansky, soprano soloist and accompanist. Other members of the group also scored individually.

The Royal Russian Singers present more than mere vocal features. There were some dancing numbers on last night's program in which great skill and grace was exhibited, particularly one of the lady members who is featured in this way. She was one of those who won an ovation from the audience. Other members of the

party show skill as instrumentalists in certain sequences.

In Russian Tongue

The Royal Russian Chorus sang most of its numbers in the Russian tongue although there were occasional items in English, Polish and Hungarian.

Among the items on last night's program that proved especially delightful to the audience were "The Song of the Volga Boatmen," "Awaiting My Sweetheart," "A Merry Song About a Little Chicken," "Good Evening" (sacred), "Hungarian Song and Dance," "Along a Petrograd Street," (with orchestral accompaniment) and "Mishchenka Under the Cherry Tree." Russian dances with song provided a rousing finale.

No account of the performance of the Royal Russian Chorus could be complete without reference to Princess Agrenea Slaviansky, the gracious conductress. Her personality is highly delightful and her direction elegant.

There was a brief interruption in last night's program while Laurence A. Lambert, Hollywood impresario, who is personally managing the tour of the Royal Russian Chorus, spoke briefly, thanking the audience and making brief announcements.

William Mitchell was in charge of the entertainment for the City Club. Other members of the club assisted in various ways. The complete program was as follows:

Part One

1. What the Flowers of the Steppes Told Me. (Soft and Low, the Desert Winds Blow, and it Sounds Like the Music of Long Ago).
2. (a) At the Gates of Kaluga. (b) In the Green Meadows. (They played and they sang, and danced for joy, the young girls singing to their favorite lay).

3. Volga Boatman Song.
4. Awaiting My Sweetheart.
5. Oh! My Dear Slavonic Home (Men's Chorus).
6. Golden Silence.
7. A Merry Song About a Little Chicken.

Part Two

1. Trepak. Symphony Composition. Music by A. Rubenstein.
2. Two Polish Songs—Chopin, Moniuszko.
3. Kobza. (Imitation of a Ukrainian instrument).
4. Love's Old Sweet Song.
5. O' Man River.
6. Hungarian Song and Dance.

Part Three

1. Along the Petrograd Street (Ancient Russian song with balalaika orchestra).
2. Ukrainian Dance.
3. Mishchenka Under the Cherry Tree.
4. and 5. Russian Dances and Finale.

ANOTHER FORD OWNER

tells of Unusual Reliability, Economy and Good Performance

SOME TIME AGO we published an account of a Ford car that had been driven 24,000 miles in a year.

The article created much comment and brought many letters telling of the unusual reliability, economy and long life of the Ford. Here is an interesting letter from a Ford owner in Hamilton, Ontario.

"I noticed in one of your recent advertisements that a Ford owner had driven his automobile 24,000 miles in a year and didn't have the head off until he had gone 20,000 miles. I would say this is fair, but just wait—

"In the first twelve months I had my

Ford I drove it 29,000 miles. The head wasn't taken off the engine until 25,000 miles, and the battery has never been out of the car.

"I started with four tires and a spare and I didn't have to buy a new tire until I had gone 31,000 miles. The second, I bought at 32,000 miles. The other three tires have gone 35,110 miles and still look good for another 5000 miles.

"My Ford has certainly given me good service and I'm mighty proud of it."

Letters like this are indicative of the worth of the Ford and the quality built into every part.

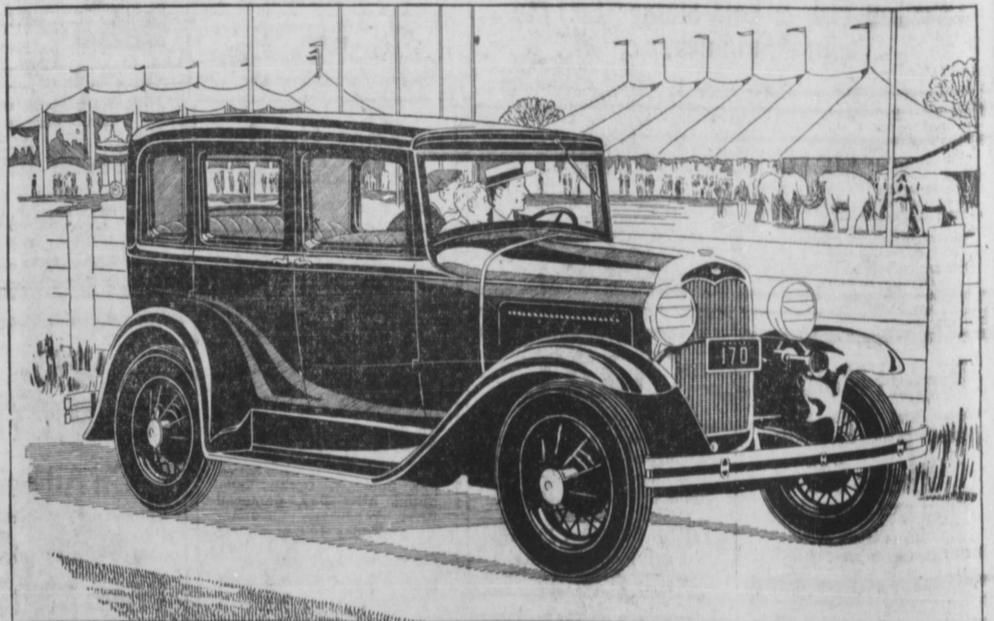

In every detail of construction it is made to endure—to serve you faithfully and well for many thousands of miles. The price of the Ford is low because of volume production and the unusual Ford manufacturing facilities. These facilities save many dollars for every purchaser.

HIGH QUALITY—LOW PRICES

FOURTEEN BODY TYPES

\$515 to \$765

FISH PRICES IN BRITAIN

(Continued from Page One)

trade at the moment is how to dispose of the surplus.

"There will, I am sure, be no dumping if we can possibly avoid it. The local Fish Meal Company, I hear, are sending a train load of inferior quality to Shields so that fish with which they cannot deal can be reduced to fish meal, and in every way, up to the present time, we are handling the situation all right.

"We have had these times before and we will have them again. No one can control fish supplies. They come in gluts when often least expected, and the same applies to scarcity of supplies.

"It is a position we have had to face many times before. This is one of those periodical gluts that we get, and owing to our enormous catching power in Hull it is more manifest here than in any other place. We are actually selling more fish than we have ever done before by a tremendous amount, for our landings last year were 54,000 tons in excess of the previous year, and that increase is being sustained during 1931.

"Trawlers undoubtedly are being run at a loss, and while we realize the seriousness of the position we are not getting into a panic about it. The whole position is one of uncertainty, but we are not going to stop, sit down and cry about it."

Questioned as to whether the landing of a greater variety of fish at Hull would solve the situation, Mr. Hudson pointed out that the Hull trawler owners were handling a class of fish they had always handled. He added that despite the difficulties experienced in disposing of catches not a boat had, as yet, missed the tide.

Speaking of the salted fish trade, J. W. Johnson, of the firm of Messrs. Johnson and Knudtzon, said the production was exceeding consumption.

"We are," he said, "having to do a larger volume of business in order to cut down expenses, for prices of selling have dropped 30% or 40% in the last six months. We are up against bad internal conditions in the countries with which we deal. We do business with Spain, Brazil, Portugal, Italy and the West Indies and Cuba, but the revolution in Spain and the fluctuations of currency in other countries have made our problem a very difficult one."

At Grimsby
Unemployment is increasing daily in Grimsby as a consequence of the slump in the fishing industry. The tying-up of trawlers has resulted in hundreds of fishermen being thrown out of work, and now the female labor at the port is being seriously affected.

Braiders employed by the Coal, Salt and Tanning Company Ltd. and Consolidated Fisheries Ltd., have been put on short time. The week before last nearly 150 girls were stood off by the Coal, Salt and Tanning Co., and although 57 returned to work last week, it was expected that a further batch will be stood off this week. "Women employed at the Consolidated Fisheries braiding works in Granville Street and Sixthills Street are also being placed on half-time.

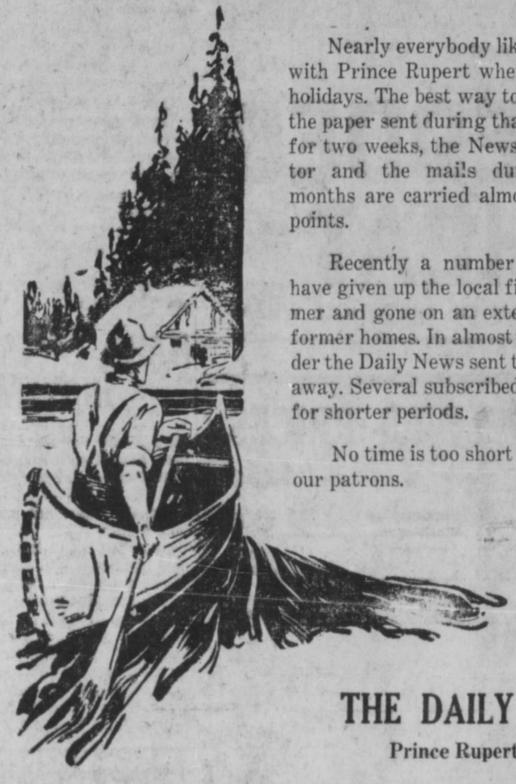

Men employed in the fishing industry and its subsidiary trades continue to register at the Employment Exchange, the total number of unemployed receiving benefit on May 18 being 5078, including 4032 men, 125 boys, 683 women and 238 girls.

During the past fortnight unemployment among fishermen has increased at an alarming rate. On May 18 there were 132 trawler engineers on the register and 230 fishermen. Last week these figures had increased to 175 trawler engineers and 320 fishermen.

Aberdeen
It is several months now since one big Aberdeen exporting firm found it necessary to curtail its staff considerably. It was then hoped that the phase was only temporary, but succeeding months have shown an intensification of the depression instead of the amelioration hoped for. The period may be described as the most prolonged as well as the most severe that has been experienced for many years. Although inshore North Sea boats are still actively engaged, the longer voyagers are making nothing of their trips, and the sequel is bound to be the "tying-up" of a considerable section of the fleet.

Off for Vacation

Take The DAILY NEWS with you When Going on Summer Holidays

Nearly everybody likes to keep in touch with Prince Rupert when away for their holidays. The best way to do this is to order the paper sent during that time. If it is only for two weeks, the News is a welcome visitor and the mails during the summer months are carried almost daily to most points.

Recently a number of Scandinavians have given up the local fishing for the summer and gone on an extended visit to their former homes. In almost every case they order the Daily News sent them while they are away. Several subscribed for a year, others for shorter periods.

No time is too short for us to look after our patrons.

Vanderhoof Men Hailed Into Court Following Fires

WANDERHOOF, July 10:—For breaches of the provincial forest act, three men were fined by Stipendiary Magistrate J. D. Charleson.

J. M. Johnston was convicted of contravening conditions of a burning permit and was assessed \$50 and costs. Paul Boor and Felix Paul were each fined \$25 and costs, Boor for failing to do his utmost to prevent the spread of fire burning on his property, and Paul for failing to obtain a permit before setting a fire.

"TILLIE THE TOILER"

Too Realistic —By Westover.

LET ME MAC YOU CAN SEE RIGHT OUT AGAIN I'LL GO TO TALK TO YOU EVEN I HAD NOTHING TO DO

BUT TILLIE JUST WANTED TO KNOW HOW YOU LIKED THAT PHOTO-GRAPH OF ME IN MY RACING CAR

YEAH YOU AND WHO ELSE PLEASE GO NOW I DON'T WANT TO ARGUE

YOU DON'T HAVE TO PUSH ME I'LL GO

AND TAKE YOUR OLD PHOTOGRAPH TOO

HEY TILLIE IT'S A MISTAKE THE GIRL IN THE PHOTOGRAPH WAS REAL - '28 JULY

I DON'T BELIEVE IN SIGNS

Canadian Shredded Wheat is 100% Canadian grain. Eat TWO Shredded Wheat Biscuits a day and help Canada's Prosperity.

"We have it for at least one meal every day"

"Of course Shredded Wheat is our breakfast every day in the year and we sometimes have it for lunch with luscious ripe berries and cream. Shredded Wheat with milk gives the children Vitamin B and the mineral salts which their growing bodies need. Having Shredded Wheat once a day they are sure of getting the needed nutritive elements—also all the bran in the whole wheat which, you know, induces regular habit."

Baptist Sunday School Picnic Highly Enjoyed

The annual Baptist Church Sunday-School picnic was held yesterday when a good sized crowd made the trip to Digby Island. The weather man was kind and a delightful frolic was indulged in. Boats were loaned for the occasion by J. D. Thurber, Clifford Gilker, W. Wrathall, J. Armstrong and Mr. Glass. The winners in the races were as follows:

Children, 3 to 6 years—Audrey Green, Peter Pederson and Marvin Calvin.

Boys, 6 to 8—Dick Cameron, Elmer Eburne.

Girls, 6 to 8—Jean Krause, Betty Blake, Austrie Peterson.

Boys, 8 to 10—Dave Houston, Dick Cameron, Melburn Eburne.

Girls, 8 to 10—Velma Thurber Ella Krause, Joyce Edwards.

Boys, 10 to 12—Bob Houston Russel Cameron.

Girls, 10 to 12—Velma Thurber Dorothy Grimble, Joy Green, and Ella Krause.

Boys, 12 to 14—Bob Houston Russel Cameron, Dick Cameron.

Girls, 12 to 14—Velma Thurber Dorothy Grimble, Eva Morris, Eileen Hamblin and Vivian Wrathall.

Girls, over 14—Edith Johnstone, Cath. Mussallum, Vivian Wrathall.

Boys, 3-leg race—Cameron Bros. and Houston Bros.

Girls, 3-leg race—Velma and Dorothy, Eva and Vivian.

Boys, sack race, under 14—Velma Thurber, Dorothy Blake.

Girls, over 14—Eva Morris, Edith Johnstone.

Married Ladies' race—Mrs. Eburne, Mrs. Houston and Mrs. Linzey.

Thin Ladies' race—Mrs. Boulter and Mrs. Calvin.

HARD TIMES INEVITABLE

When Money Scarce Among Workers, Alice Arm Herald Observes In Commenting on Situation

Says the Alice Arm and Anyox Herald: "There are hundreds of thousands of people in Canada living a hand-to-mouth existence. Increased taxes mean that they are forced to buy less. This naturally decreases the demand for goods and more men are thrown out of work because of overproduction. History has invariably shown that the least taxed country is the most prosperous. If money is scarce among the workers, hard times are inevitable."

Man in the Moon

In spite of the low price of fish, the failure of the wheat crop, the invisible profits of the merchants and the sad wail of the professional mourners, the July sun is just as warm as usual.

Here's to the pessimist. Who sees the whole world blue The sun will never shine again If his sad wail comes true.

The difficulty with some of the American law cases is that when they are decided the present generation will be dead and the children won't know how they started.

A boxer has discovered a new punch. It's called the curfew wallop, because when it hits you your lights go out.

Man in restaurant—Give me four sandwiches to take out.

Proprietor—Joe, dress up four grunts to go waiting.

Vegetarian—Yes. Ever since I have given up meat I have had a desire to attain greater height—to climb.

Friend—And look for nuts, I suppose.

GETTING HIMSELF BEAUTIFUL BLACK EYES

A beauty expert says that a woman in order to have beautiful hair, should have her husband pull her tresses every day.—Prince Albert Herald.

Mrs. Stevens Of Skidegate Is Hostess

SKIDEGATE, July 10—A very enjoyable bridge party was held recently at the home of Mrs. E. C. Stevens, Skidegate. There were four tables. The out-of-town guests were Mr. and Mrs. G. H. Jolliffe, Mrs. A. Du Val, Mrs. R. MacKenzie, Mrs. A. Christensen and G. D. Beattie, all of Queen Charlotte City, and Mr. and Mrs. O. G. McIntyre, of Anyox, S. DuBois and D. DuBois of Philadelphia. The first prize for bridge was won by Mr. Beebe of Skidegate, and Mr. Andy Christensen. The consolation prizes were won by G. Jolliffe and Mrs. R. MacKenzie. A very delicious luncheon was served at 12:30 after which round table games were enjoyed. At 2:30 the party ended.

C.N.R. steamer Prince George, Capt. Neil McLean, arrived in port at 10:45 this morning from Vancouver, Powell River and Ocea Falls and sailed at 3 o'clock this afternoon for Anyox and Stewart, whence she will return here south-bound tomorrow evening.

Bring your best Prince Rupert

The Fair Board is anxious to encourage residents in the districts around Prince Rupert to bring their best to the

FALL FAIR

Which will be held the

FIRST WEEK IN SEPTEMBER

Local residents believe that they can grow flowers better than any place within two hundred miles. Can they? The Fair Board would like to have the districts pit their horticultural skill against the Prince Rupert Flower Society and see if they cannot wrest away some of the prizes, especially that for the best floral display.

A cordial invitation is extended to all to compete. Further information can be obtained from

Secretary W. D. Vance

or from

The Daily News, Prince Rupert, B.C.
