New Capital of Australia is Mooted on Claim of Present One's Inconvenience

CANBERRA, March 14.—A move is on foot to abandon Canberra as the capital of Australia. It is asserted that the present capital, lying in the interior between Melbourne and Sydney, is too far off the beaten track and the country's business could be carried on more efficiently elsewhere.

A change in the capital would, no doubt, revive the old time jealousy between Sydney and Melbourne. The latter city was the former capital for thirty-six years following confederation.

HOME WAS DESTROYED

Mr. and Mrs. De Kergommeaux Suffers in Early Morning Blaze

TERRACE, March 14.—Fire yesterday morning swept away the neat little house recently erected by Robert De Kergommeaux at Terrace. Mr. De Kergommeaux had trimmed his gasoline lamp on the container standing near the kitchen table. After lighting the fire yesterday morning he accidentally upset the container and a quantity of gasoline was scattered around and was set on fire by a falling spark from the stove. The kitchen was at once a mass of flames which spread like wildfire.

Mrs. De Kergommeaux and the four children were quickly got out the little boy only with much difficulty but it was impossible to save any of the contents of the house. The fire siren was at once sounded and plenty of willing hands were on the scene in a very few minutes. It was too late, however, to take any steps to save the house and the efforts of the workers were bent upon saving the barn near by. This was effective. The barn was rapidly cleared of its contents which included a truck and a mare besides a quantity of hay. The family were removed to shelter in the home of Mr. De Kergommeaux's father. This is the second fire sustained by the family in a few months and much sympathy is shown by the residents.

DEMPSEY RETIRING

Is Quite Definite He Will Not Return to the Ring

LOS ANGELES, March 14.—Me-tro-Goldwyn-Mayer is advertising with Jack Dempsey with a view to securing the services of the former world's heavyweight boxing champion for a series of short boxing pictures. William T. Hiden, great tennis player, and Bobby Jones, the world's golf idol, are already engaged in such work.

Co-incident with the announcement that his services were being sought for the movies, Dempsey declared definitely that he had no intention of boxing in the ring again: "I am convinced that I could not successfully fight again," declared Dempsey. He declared, however, that it was his intention to stay with the ring as an adjudicator.

The Manassa Mauler, who has sat on the fence prettily for the past three years whenever asked if he intended returning to the ring, declared that he had now definitely renounced any idea of doing so. He pointed out that he would be 36 years of age in June, or three or four years above fighting prime. He could not, by returning to the ring, justify ambitions that would be held by his friends. His conclusion to retire was quoted "definite and final."

The Heart is the Human Engine

The motor car which stalls by the roadside or the aeroplane which drops into the sea is no more helpless than the human body when the heart plays out.

The heart is the human engine. If supplied with suitable nourishment and not overstrained by unwise eating and living, the heart is a prodigious worker and meets all ordinary emergencies.

When the nerves weaken the action of the heart weakens. Restore the feeble nerves by the use of Dr. Chase's Nerve Food and immediately you strengthen the action of the heart.

This is the most certain way to overcome heart weakness, and the time to begin treatment is to-day—now. You can no better afford to delay than can the pilot in the aeroplane. When you receive the danger signal from the heart it is time to apply the restorative—Dr. Chase's Nerve Food.

W. A. McMaster of Evelyn Tells in Letter of Inconvenient State of Affairs

W. A. McMaster of Evelyn, writing to the Daily News, tells of having been able to go to Doughty post-office for his mail for the first time last week since September 30. Mr. McMaster states that the government allowed the road to Doughty station to be closed last fall and he has not been able to get his mail since. Naturally enough, this state of affairs is not very pleasing to those affected.

**CANADIAN PACIFIC
TODAY**

The Canadian Pacific Railway runs from the Atlantic to the Pacific Ocean. Its liners sail from Vancouver and Victoria to Japan and China, and from Montreal, Quebec and Saint John to Great Britain and the Continent. It operates winter cruises to the Mediterranean, the West Indies and Round the World, and a winter service to Bermuda. Its chateaux and hotels represent the latest word in comfort and luxury. Its telegraph service employs 225,000 miles of wire. Its express travellers' cheques are current all over the world. Canadian Pacific offices and agents are to be found everywhere.

The changing West

FIFTY years ago the buffalo roamed the prairies: the Railway pushed through unnumbered obstacles. "Craigellachie," was the code word, meaning, "Stand fast!" The last spike was driven. The line was completed. The pioneer settler, ever an optimist, subdued the Prairie with the ancient hand tools of immemorial ancestors. Then came the gradual adoption of improved implements, powered by long teams of sinewy horses. Then modern power, and the whole character of the West changed. Wheat farming became a mechanized industry, with all the forces of science at its command. Out of the throes of this economic revolution is being born again a New West, with its prodigious resources of oil, minerals, irrigation

and water powers, undreamed of when the Canadian Pacific first laid its rails across the continent. Today, as then, the Railway endeavours to keep ahead in providing for the needs of the constantly changing and growing West, and is inspired by the same faith in the future.

From the moment the prospective colonist becomes interested in Canada until the time of his final establishment on the land, he has, in the Canadian Pacific, the unique advantage of the service of one distinctive organization. Whether on sea or land, or no matter in what part of Canada he may be, he may always easily get in touch with the railway's colonization service, which helps him toward success and independence in the land of his adoption. Assistance is given to farmers to induce greater production, to find new markets and to experiment in new crops and methods.

Country Readers of "The Daily News"

To the readers of the Daily News who live out of town, we suggest that the classified columns of the paper provide an excellent medium for the disposal of articles they may have for sale or exchange.

Last season a lady at Smithers did a large business in selling fresh eggs direct from the farm by advertising in this paper.

Chickens, implements, household goods, boats, fishing gear, guns, cordwood, furs and dozens of other articles may be disposed of. The charge is two cents a word but six times goes for the price of four.

Many people get good results. Why not you?

ACID after meals

GET RID of your dread of pain after eating. Eat without fear of "indigestion," sour stomach, disagreeable gas or headaches.

When your food ferments, "dis-agrees," lies like a lump in your stomach, it's a sign of too much acid. You need not resort to crude methods—take instead an anti-acid that will correct the condition. Phillips' Milk of Magnesia.

A spoonful of this pleasant-tasting, soothing fluid neutralizes many times its volume in acid. It restores the proper alkaline balance to an acid-soaked stomach and

bowels—assists these organs to function as they should.

Phillips' Milk of Magnesia is what you need when a bad breath, coated tongue, headaches, nausea or biliousness indicates an over-acid condition. Take a spoonful today and for several days and see how it sweetens the system. You won't be nearly so liable to colds or sickness. All drugstores in the Dominion sell it in 50c bottles.

Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the name Phillips on the bottle.

Made in Canada.

United Pacific Fisheries Gets Under Way—Seals are On Move North Again—Week's Halibut Landings

Another important development in the fishery affairs of the port during the past week was the getting down to actual operations of the United Pacific Fisheries with which company the boat owners and fishermen arranged at the end of last week to market their fish co-operatively with down payments of 10c. and 7c. for both Canadian and

American fish, the balance of proceeds, if any, to be split up after the marketing of the fish. Since it started taking fish on Monday of this week, the new company has been handling and shipping the fish through the plant of the Royal Fish Co. pending getting its own plant in the old Shruball Fisheries premises in readiness. Work on the latter quarters is being rushed and it is expected within the near future to be able to move in. Then the United Pacific Fisheries will be actually and permanently in business here.

Developments in connection with the new arrangement continue to be watched with the keenest of interest not only by those directly concerned with fisheries affairs but by the public at large. There has been a lot of discussion one way and the other and, naturally, a healthy crop of rumors has sprouted up. These have had to do with the matter from various standpoints. Most of the reports are, however, without foundation and pending official announcements, might well be left unheeded.

The new company here, as might be expected, is encountering vicissitudes such as always go with the fish business, but is meeting them, apparently, in a capable manner. That the concern will eventually pull through is the confident view of all concerned with the new move. There have been reports that the concern was to launch at once into the handling of various kinds of fish here on a large scale. Asked as to this, officials of the company pointed out that it was their intention to do nothing else for some time at least than to go ahead slowly and cautiously.

Local fish buyers, who at first had little if anything to say about the new undertaking, are now beginning to take a warm interest in it. One of the buyers this week denied a suggestion made in this paper that the buyers were looking in the movement with scornful glance. Their attitude is far from that, at least this one buyer suggested.

With practically all the Prince Rupert fleet having left for the banks around the end of last week following the reaching of the agreement with the United Pacific Fisheries, it is expected that quite a number of the boats may be back within the next few days with their catches.

The United Pacific Fisheries Co. is, so far, active only here and at Seattle although the visit of the manager, Frank J. Kwapi, to Ket-

Columbia waters this summer by the Dominion Department of Fisheries so that continued efficiency of patrol on all parts of the coast may be ensured. Each of the boats will be fifty-two feet long and equipped with Gardiner diesel engines, 72 h.p., will have a speed of ten knots. They will also each be equipped with an oil auxiliary engine. The contract for building the boats has been placed with the Walkem Shipyards, Vancouver, and delivery is to be made during the spring. One of the boats will go on duty in the Queen Charlotte area replacing the Onerka, which was burned some months ago, and another will take the place of the Merrysea, which was sunk in November through a collision with a commercial steamer. The other will replace boats which have been in the service for some time and are no longer wholly satisfactory for work of the kind.

Mariners are advised that the following aids to navigation have been established: a white occulting light and daymark on Gull Rocks near Eyde Passage also a black and a red spar buoy marking the westerly edge of the shoal off the fishermen's floats, Prince Rupert harbor.

The fishing boat A. J., formerly the White Lily, Captain Johnson, hit a rock in the fog off Klewngget last week end. Everything was lost, including 3500 halibut. The crew escaped safely and rowed to Port Essington.

During the past week 12,000 lbs. of Canadian halibut and 114,950 lbs of American halibut was landed here, all being sold to the new United Pacific Fisheries.

FOR ANY CHILD

CHILDREN are happy and carefree by nature, so when they cry for no apparent reason any careful mother worries. No one can always guess just what is wrong but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation and not the slightest harm in its frequent use. As often as

baby has a fretful spell, is feverish and cross and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes it's constipation. Just keep Castoria handy and give freely for any of the above conditions; relief will follow promptly.

All through babyhood, Castoria is a mother's standby, and wise mothers do not change to stronger medicines as the child grows older. Just increase the dose of Castoria and keep the youngster's stomach sweet and the bowels in good order.

To be sure of getting genuine Fletcher's Castoria you should look for this signature: *Wm. C. Fletcher*
