City Thrown Into Panic When Powder Barges Explode

SHANGHAI, Jan. 25.—For the ostensible purpose of protecting Japanese citizens from anti-Nipponese activities here, the Japanese government up to yesterday afternoon had landed a total of 1400 marines here while nine warships of that nation were standing on guard in the harbor.

Over Saturday night 500 more marines had been landed and more warships arrived.

Strict martial law prevailed in Shanghai last night. It was thought the Japanese might occupy the city today.

The city was thrown into a panic when two barges laden with ammunition and in tow of a tug blew up. It was thought that the Japanese warships had started to bombard the city. Thirty-six Chinese were killed in the blast.

SERVICE IS COMMENCED

Trans-Canada Telephone Hook-Up This Morning—Mayors Leeming and Orme Speak

At about 9 o'clock Pacific Standard Time this morning a trans-Canada telephone line, with which Prince Rupert is connected by radiophone, was officially opened by Lord Bessborough, Governor General of Canada. Communications were successfully established between all cities from the Pacific to the Atlantic coasts.

In connection with the official opening, the Governor General talked with the capitals of all the provinces, the Lieutenant-Governor of each province replying.

The voice of His Excellency was carried for a distance of 4,000 miles from coast to coast in the course of the official opening of the new service. It is an all-Canadian system.

This morning Mayor David Leeming and Ald. Brown of Victoria were talking by means of radiophone with Mayor C. H. Orme of this city. In Victoria, Mayor Leeming said, the weather was just like spring with the warm sun shining beautifully. Mayor Leeming sent best wishes to Prince Rupert and expressed regret at having been unable to take part in the recent official opening of radiophone service between Prince Rupert and Vancouver and Victoria.

CITY HAS BIG GALE

Electric Light and Telephone Wires Suffered—Hotel Garage is Wecked By Wind

Telephone and electric light wires and windows were the principal sufferers in one of the season's heaviest southeast gales, accompanied by torrential rain, which swept over the city for several hours Saturday night and Sunday morning. Line crews of the Northern B. C. Power Co. and the city telephone department were busy since the big wind repairing numerous breaks in the lines.

The gale twisted the Prince Rupert Hotel garage at the corner of Sixth Street and Wayne Place rather badly. A plate glass window was blown in in Fraser & Payne's store at the corner of Third Avenue and Sixth Street. For a few hours yesterday, the telephone line between the city and Digby Island was out of order.

It was impossible to learn at the Digby Island meteorological station the exact velocity of the gale. The station is awaiting the arrival of a new wind gauge.

Damage is reported to have been done to boats at the dry dock and fishermen's floats.

PASSES IN VANCOUVER

G. A. Cruickshank, Father of Wm. Cruickshank, is Dead at Age of Seventy-Nine

William Cruickshank, city ticket agent for the Canadian National Railway here, received the sad news at the week-end of the death late Saturday morning at his home in Vancouver of his father, George Alexander Cruickshank, in his seventy-ninth year. The late Mr. Cruickshank, who had been a resident of Vancouver since 1891 and a member of the postal service there for a quarter of a century, had been quite ill for about six months and the end was not altogether unexpected. The funeral will take place in Vancouver tomorrow under United Church auspices.

Born near Fraserburgh, Scotland, in 1853, the late Mr. Cruickshank spent some time at various points on the prairies before coming to Vancouver to live. About five years ago he retired from the postal service. Until about a year ago he had enjoyed the best of health.

Predeceased by his wife, who died three years ago, the late Mr. Cruickshank is survived by three sons—William of this city, John A. of Vancouver and George W. of San Francisco—and one daughter—Miss Clem Cruickshank of Vancouver, who formerly taught school in the central interior. There are also two brothers, one in San Francisco and the other in Moose Jaw.

Out of sympathy for the local son, the dinner of the Prince Rupert Gyro Club, at which William Cruickshank was to have been installed as president, has been postponed from tomorrow night and will probably be held on Tuesday evening of next week. Sympathy of many friends here will also be extended to the popular local railway official in his bereavement.

**EXPORTABLE HEMLOCK**

Last fall E. C. Stevens of Skidegate took the manager of the Nakata Exporting Company of Seattle out to look over a few stands of the old crown-granted timber. What this firm wanted was hemlock logs that were exportable. Taken from leased land the clause against exporting became operative.

The ships controlled by this firm are of ten thousand tons each and they wanted to ship full cargoes.

Mr. Stevens and Mr. Nakata could not find the timber they required so no business was done.

As there is little demand in British Columbia for island hemlock, although it makes excellent flooring, many people think the export of these logs should be allowed. Provision might be made that only Canadians be allowed to work in the woods.

As a general policy we do not favor the export of raw material from the country but as a means of restoring the financial condition of the country it would seem to be a very good emergency measure.

**MR. BRUHN IS RIGHT**

We are glad to be able to back up Hon. R. W. Bruhn, minister of public works, in his plea to Ottawa to provide work for the men now boarding in the road camps and also for others who are out of work. The provincial minister has the right idea and has been urging it on Ottawa. He says there are seven thousand men in the British Columbia camps and they are restless under the enforced idleness. He had visited a number of the camps and found that the men would much rather be working.

The whole employment and relief system has been hopelessly muddled but there is still time to straighten it out if quick action is taken.

**TELL THE CUSTOMER**

People are sending out of town for their goods. Why? Because they are not kept properly informed of the prices at which they can buy at home. If they knew, they would buy here.

It is impossible for the merchant to meet his prospective customers personally every day. He can't keep them posted on the trends of business unless he adopts some other method than personal contact. By advertising, however, he can do it easily. When he has anything particularly attractive to offer he can tell them about it. To do this daily is the desirable method. Each day brings its own problems and its own changes. The customer likes to know about these and appreciates the confidences of the merchants.

Daily advertising, kept alive with news of the store, is the best possible means of keeping business good when things are quiet.

**Unshaken Faith in Future of Canada Expressed at Royal Bank Annual Meeting**

"I have witnessed many depressions during the last fifty years and I see nothing in this one which weakens my faith in this country."—Sir Herbert Holt, President.

"While I do not wish to voice my prediction as to the date of business recovery, it will be very disappointing if an improvement does not take place in 1932."—M. W. Wilson, Vice-President and General Manager.

At the annual meeting of The Royal Bank of Canada held at the Head Office in Montreal, both the President, Sir Herbert Holt, and the Vice-President and General Manager, Mr. M. W. Wilson, were emphatic in their expressions of unqualified confidence in Canada. Sir Herbert Holt's mature and world-wide business experience is reflected in his statement "I have witnessed many depressions during the course of the last fifty years and I see nothing in this one which weakens my faith in the country." The tone of both addresses was one of quiet optimism, exemplified by Mr. Wilson's remark, "While I do not wish to voice any prediction as to the date of business recovery, it will be very disappointing if an improvement does not take place during 1932. The leaders of politics and finance in the principal countries are capable of bringing this about and the indictment against any who block the way will be severe indeed." The President pointed out that with quoted values of most securities well under their intrinsic worth, improvement could be expected as and when measures were taken which would result in a real return of confidence in the United States. Earlier in his remarks he had referred to the splendid record of the Canadian banking system during a time when disorganization in finance was accentuating the depression in many other countries. He expressed the opinion that the relatively satisfactory position of Canada could be attributed in no small degree to the stability of our banking organization and the way in which industry had been supported.

Before moving adoption of the report Sir Herbert referred with profound regret to the death of Mr. Neil, after a lifetime spent in the service of the bank. "In his passing the bank has lost a wise councillor, his associates a loyal friend, and Canada an eminent banker and distinguished citizen."

After dealing briefly with the situation in agriculture and the principal manufacturing industries, Sir Herbert referred to the plans which are under way for a consolidation of the principal newspaper companies in Eastern Canada, and expressed the opinion that the development though difficult of accomplishment was a constructive one and highly desirable if Canada was to continue to maintain the supremacy to which she is entitled by reason of her natural advantages.

**Railways**  
 The appointment of a railway commission was mentioned with approval and the belief expressed that such a commission should be capable of bringing in recommendations which would in large measure solve the present very serious situation caused by uneconomic competition and duplication of services. The President stated "Savings to the country of from \$60,000,000 to \$75,000,000 a year are possible and this without impairment of service to the public."

**Imperial Conference**  
 Pointing out that as long as other nations raise intolerable tariff barriers against British Empire goods it is necessary that the different parts of the Empire should protect themselves by concerted action, he expressed hope in the results of the Imperial Conference to be held in Ottawa, provided careful analysis and close study produced a scientific tariff structure which would stimulate reciprocal Empire trade without handicapping home industry.

**Public Finance**  
 The success of the National Service Loan was referred to as a notable achievement. He stressed the fact that both internal and external revenue had been reduced by the decline in the activity of trade and that excessive expenditures by governments and municipalities had placed a heavy burden of interest payments on the people. "There never was a time in our history when it was so necessary to avoid extravagance of every kind, and governments, Federal, Provincial and Municipal, should follow the splendid example set by the British National Government in reducing the cost of administration and balancing their budget."

Closing his remarks Sir Herbert said in part "It has been said that it is darkest just before the dawn, and in previous depressions conditions have seemed most discouraging at a time when improvement had already set in. The violence of the depression must of itself tend to produce a strong reaction. It may well be that the gold countries are now on the verge of a rise in the price level. With a sound and strongly integrated banking system, no important investments in depreciated securities of foreign governments, an industrious and virtile people who have maintained their morale unimpaired, and with a system of government permitting prompt and decisive action, Canada is in a relatively satisfactory position and we are justified in

looking to the future with confidence."

**General Manager's Address**  
 Mr. M. W. Wilson, Vice-President and General Manager, stated that maintenance of the Bank's assets at a figure as high as \$325,000,000 reflected not only the conservation of existing business but also the acquisition of new and desirable connections. He referred to the substantial over-subscription of the Dominion of Canada National Service Loan as an achievement of which our government and Canadians generally may well be proud.

**Strong Liquid Position Maintained**  
 The liquid position of the bank was maintained at substantially the same ratio as a year ago, quickly realizable assets being more than 48% of liabilities to the public. In referring to the enviable record of the Canadian banking system during the period of world depression, Mr. Wilson said: "Once again the ability of the Canadian banking system to take care of the needs of the country has been clearly demonstrated. The type of organization under which they operate enables our banks to take a broad view of the transactions that come before them and I think it will be admitted that the disposition has been to deal with problems in a sympathetic and constructive manner."

**Business in Other Countries**  
 "Entirely satisfactory," were the words used in describing the bank's experience during the last year in the foreign countries where it operates.

Mr. Wilson pointed out that the Bank's foreign branches have never been allowed to expose themselves to risk of loss through exchange fluctuations and as a result their experience during the last year had been entirely satisfactory.

**Commodity Levels**  
 The General Manager expressed the opinion that the restoration of commodity price levels to the basis of 1924-1928 was essential to a really satisfactory recovery in world business. He made favourable reference to the anti-deflation measures now being considered by the United States Congress and felt that they justified the hope that corrective forces would soon be at work in that country.

**Business Psychology**  
 "As the depression continues the factor of business psychology is one of constantly increasing importance," Mr. Wilson declared. "Distrust and lack of confidence are largely responsible for the extremes to which world business has gone. He indicated that we in Canada had been particularly fortunate in this respect and said, "Confidence in our country and in our ability to solve the problems that present themselves is above the average and in my opinion is amply justified by our past record and future prospects." Lack of international confidence was the main obstacle in the way to world-wide business recovery. Mr. Wilson went on to express the opinion that confidence could be restored by co-operation between the leaders of politics and finance in the principal countries. Signs are not lacking that progress may be made along these lines and this formed the basis for his statement, "While I do not wish to venture any prediction as to the date of business recovery, it will be very disappointing if an improvement does not take place during 1932."

Mr. Wilson pointed out in vigorous terms that we must not get into the frame of mind in which we think of losses as pertaining to all business activities. The majority are holding their own, he declared, and while reduced earnings for the time being may be inevitable, we should be gratified that in this period of transition a great majority of our Canadian concerns are more than covering operating expenses and our agricultural population is staying on the land and maintaining the acreage under cultivation. Closing on a note of optimism, Mr. Wilson said, "There are signs of stabilization in a number of directions, our present assets are being kept intact and, with reasonable economy and hard work, we shall find that Canada will be one of the first countries to feel the good results of business recovery."

#### RESPECTABLE DOLE

Editor,  
Daily News:  
I would like to draw your readers' attention to the huge sums that are often appropriated by bankers without an equivalent expenditure of their energy during the process of appropriation.

While a big noise is often made as to the cost of relief, feeding of free-borders and frequently with implications that it would be better for recipients and their morals if they would be provided with opportunity to work it out, no one has ever suggested similar treatment to the recipients of colossal doles which could be exemplified by following:

"The Senate Finance Committee revealed that Wall Street had made \$400,000,000 and \$600,000,000 by floating foreign bonds." The major groups getting these pickings were: J. P. Morgan National City Bank and Kuhn, Loeb & Co. The largest spread (i.e. the difference between what borrower got and the investor paid) was 14.71% received by the National City Bank when it loaned \$1,745,000 to Haiti and received as its profits \$256,395.

Well here is a chance for some public-spirited citizen to tell the bankers where they get off. However, some sympathizer may rejoice that poor bankers are entitled to these profits for the reason of tremendous risks they are subjected to when in such business. And how about us fishermen? Are not we staking our possessions when trying to catch fish? and how about risking our lives when fishing in stormy weather? These are bigger risks than poor bankers are facing. Consider, on the other hand, risks involved in logging industry. Last year there were 340 men killed and 15,000 injured and their remuneration like that of a fisherman was food, clothing and some shelter, no dividends, no profits. However, bankers are no more to

blame than any free-boarder, or unemployed worker anywhere. The bankers have to do just what they are doing, or out they go and some one else would become the banker. No single individual nor a group, are, or could be held responsible for this scandalous and temporary business dislocation that we are enjoying just now. This was naturally evolved from the previous business cycle of prosperity (?). When every banker was lending freely every manufacturer was busy causing production of commodities and most of the workers were working and graciously paying for their board and lodgings. The whole of them, while under competitive nature of capitalism, were racing and trying to get on top first with the inevitable results from this scramble that too much of this, too much of that and too much of everything else including labor-power was produced. The important complication of this whole business was that, while production of commodities was ahead of demand, the corresponding purchasing powers of society to match same were not produced, causing curtailment in productive process which resulted in unemployment reducing the purchasing power correspondingly. This condition, i.e. the normal demand coupled with overabundance of commodities, from the capitalist point of view appears as underconsumption and it may be honestly stated that the problem of production was magnificently solved under capitalist era paving a way for solution of distribution under socialism.

However, as a larger portion of nationally produced wealth goes in a form of unearned profits, dividends—the respectable dole—in the hands of fewer men as the time goes on the proportionally decreasing purchasing power of the multitude shall become a constant cause for even longer and more frequent depressions while capitalism lasts.  
Yours for the better times,  
M. ANDERSON.

HAMILTON, Bermuda, Jan. 25.—Proposals to invite delegations from the Canadian and Imperial parliaments to visit Bermuda during the Easter recess are now being formulated here and as soon as Parliament convenes definite action will be taken and the invitations go forward.

At a recent meeting of the Bermuda Branch of the Empire Parliamentary Association, attended by His Excellency the Governor and his A. D. C. Lord Carew, who is a member of the House of Lords His Excellency, commenting upon the projected visit of Canadian and British Parliamentarians, said nothing would give him greater pleasure than to welcome such delegations to Bermuda. Hon. A. W. Bluck, Speaker of the House of Assembly, and Sir Sidney Rowan-Hamilton, President of the Legislative Council, gave expression to similar sentiments, the former adding that such a visit would be productive of great benefits, fostering the Empire Spirit and promoting understanding between the peoples of the Empire.

The idea of this visit, now taking definite shape, originated in the spring of 1930 when the then Canadian Prime Minister, Rt. Hon. W. L. McKenzie King, visited Bermuda during the Easter recess.

Annual Overhaul Work Proceeding At Local Dry Dock on Steamer Prince George

Included in the annual overhaul job on the steamer Prince George at the local dry dock is the installation of a new tailshaft, the old one having been recently condemned. The old shaft has already been drawn and preparations are being made to fit the new one which has already arrived.

The Prince George, which is being given general hull overhaul will remain on the pontoons until the middle of next month.

## Extension of Moratorium Is Being Opposed

WASHINGTON, D.C., Jan. 25.—Extension of the war debt moratorium for European countries was strenuously opposed by Senator W. E. Borah of Idaho in speaking on Saturday in the Senate.

T. J. Shenton, inspector of mines, sailed last night on the Coos Bay for a trip to Anyox on official duties.

## MARKET IS IMPROVED

SIDNEY, N.S.W., Jan. 25.—Australian wheat farmers are greatly heartened by the better tone in the world wheat market. Growers who abandoned wheat for other crops as a result of the depressing prospects last season are now regretting their action.

Six months ago the distress of wheat growers was one of the paramount political considerations in Australia. Now it seems that the wheat industry is destined to go a long way towards the recovery of the Commonwealth, economically.

Wheat markets overseas have firmed during the past few weeks and, although the tonic effect of the last British elections given as one basic factor, the position of the Soviet, in opinion of Sidney merchants, also has borne largely on the present position. Russia, it is said, is experiencing difficulty in filling, in full, contracts entered into some time ago for wheat to be supplied to Britain and elsewhere; and apparently the Soviet agents have heavily oversold everywhere. Buyers may have to look elsewhere for stocks and at the same time there will be an increased reluctance to deal with Soviet agents. The result might be of substantial benefit to Australia.

Traders in Sydney are cautious in framing their forecast of the market. They recognize that when prices go high the tendency, especially in some of the Southern European countries, will be to reduce the flour-bread bill very materially. Partial failure of the crop in Germany would have a helpful effect.

Stocks in the United Kingdom are reported to be fairly substantial for this time of the year and there are said to be considerable quantities on hand in America. Notwithstanding all these potential factors, however, there are distinct indications of markedly better times ahead for Australian farmers.

## The RECORD SPEAKS for ITSELF

In opening the Canadian National Exhibition at Toronto on Friday, August 28, Earl Jellicoe said: "Over a period of 52 years, the population of Canada has increased by 6,000,000; the revenue of the Government from \$22,000,000 to \$460,000,000 and the value of her trade from \$169,000,000 to \$2,400,000,000. In the same time, her manufactures have increased ten-fold and her crop acreage three-fold. This remarkable record encourages a feeling of optimism for the future."

Earl Jellicoe also made the following reference: "Canada's record growth constitutes an achievement of world importance and stands as a challenge to future progress. This phenomenal growth is the direct result of that splendid courage and determination which the people of Canada showed so strikingly from 1914-1918".

The record for public favour which is held by Turret Cigarettes is the natural outcome of quality consistently maintained throughout the years. After all, nothing can replace good, honest tobacco; grown and ripened right out in the field under nature's own sunlight—nothing artificial about that—and the high quality is "inbred".

MASSETT, Jan. 25—A delightful evening was spent in the Massett Community Hall on January 15. A whist drive was first enjoyed by all after which a short play was presented entitled, "The Gay Caballero", this was rendered by Mrs. Pelton, Miss Carpenter and Miss Bradley with Mr. Bradley taking the part of the Gay Caballero. Then came a dialogue "In a Dime Museum" with Mrs. Pelton acting the part of the exasperated mother. Mr. Harrison as the inquisitive boy was a scream. Prizes were given out and refreshments served. Dancing then started and continued until the wee small hours.

**Truth is Subject of Lesson Sermon In Science Church**

The subject of the lesson-sermon in all Christian Science churches and societies on Sunday was "Truth."

Among the Bible texts included in the lesson-sermon was the following from III John 1:11: "Beloved, follow not that which is evil, but that which is good. He that doeth good is of God; but he that doeth evil hath not seen God."

The lesson-sermon also included the reading of citations from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, one passage being as follows: "In science, truth is divine, and the infinite God can have no unlikeness. Did God, Truth, create error? No! 'Doth a fountain send forth at the same time sweet water and bitter?' God being everywhere and all-inclusive how can He be absent or suggest the absence of omnipresence and omnipotence? How can there be more than all?"

In the Vancouver Province Sunday magazine section recently appears an article entitled "On Canada's Northwest Coast," in which this district is extensively mentioned. The author is C. Marius Barbeau and the article has largely to do with Indian life.

**It's got to be good to be ADVERTISED**

**READ THE GROCERY ADS TODAY**

All the king's horses . . . and all the king's men can't make a success out of a bad product. No amount of advertising will create a market for it. The more it's advertised, the more its defects become known.

**A Good Product Well Advertised**

grows as swiftly and naturally as a healthy plant. People try it and like it. They tell others. They like it. Soon that product is found everywhere . . . and its name, spread abroad by advertising, is on every tongue.

When you see something widely and consistently advertised, you can be pretty sure it's well worth having. If it weren't . . . if it didn't represent an honest and worthy value . . . the maker couldn't afford to advertise it.

**Look Over the Advertisements in this Paper**

Some of these names you know. Others, perhaps, are newcomers, all are entitled to your trust . . . all are here because they have potential friends bringing some new comfort or convenience. But something real to contribute to your advantage . . . your service . . . your happiness.
