### GOLD PANNING IS LATEST

Everybody is panning gold. That is a generality that is only partially true but it is as true as most generalities. People in the north are becoming "gold-conscious." Gold pans are much in demand by people who are going to the creeks to try their luck and the provincial government is backing the movement by having district engineers give illustrative demonstrations of the use of the pan and the rocker.

Formerly we spoke of the miners going to the hills. Now they go to the valleys to try their luck in the sands instead of among the rocks. Students are preparing to spend their holidays panning for gold instead of peddling books during the summer. Even sober and sedate business and professional men, and there are some, are planning to carry gold pans instead of frying pans when they go out to whip the streams.

It is to be hoped that Prince Rupert will be included in the demonstration points under provincial government auspices. Many Prince Rupert people, not being fathers of families, would like to learn how to make and operate a rocker.

### MINING ENGINEERS

It seems as if it would be false economy of the provincial government to do away with the present system of appointing resident engineers in the various mining districts. Much good has come from the system in the past and today it is justified by having them take charge of the rocker demonstrations. The engineers are needed now more than ever.

A number of cases have come to light where direct results were obtained following the advice of the engineer. A man was in the office a few months ago who showed photographs of his property which was very promising. He told how he had acted on the advice of the engineer and found the richest lead on the property.

### PANS NOW AVAILABLE

There was considerable inquiry a few weeks ago in Prince Rupert for gold pans but at that time local merchants did not have many in stock and could not get them as there had been a run on them in the south. Now, however, the market is supplied and the prospective gold panner can get all the pans he wants within reason.

Those who plan trying their luck during the holidays should get their pans early and it might be well to discuss methods and locations with the local resident engineer as this may help them to avoid disappointment. It is not every person who knows gold when he sees it.

### SPORT CHAT

A "freak" tournament was held recently by the Ladies' Golf Club at Anyox. Wrong clubs were used for certain shots, making for difficulty and a good deal of diversion. Two ladies tied for first place—Mrs. Roy and Mrs. Cormier—and, rather than undergo the ordeal again, they drew for honors, Mrs. Roy winning out. Great interest is being taken in weekly golf competitions for both ladies and men which are being held at the smelter town.

Goat races have made their debut on Indian tracks. An advertisement in a Bombay paper reads: "Puna Park—All India goat race championship—The leading jockeys of western India will positively compete." Greyhound racing is unknown in India; promoters of goat racing hope that it will attain a popularity here similar to that of dog racing in other countries.

### Interesting Description of Groundhop Coal Field—Report of Gold-Copper—Fraser Again On Esperanza

The Groundhop coal field, while somewhat irregular in outline, conforms fairly well to the following boundaries: the southern boundary runs approximately along latitude 56 degrees, 48 minutes, for a distance of about twenty-five miles, extending approximately from longitude 128 degrees, .02 minutes, to longitude 128 degrees, 41 minutes.

This information is contained in an article by G. S. Malloch which goes on to reveal that the general extension of the coal-bearing strata is to the north northwest in accordance with the prevailing trend of the mountain ranges. During the past year a traverse was run to the northeast corner of the field and it was found that the distance had been exaggerated in previous reports. The extreme length of the field amounts to only 52 miles instead of 70. The northern boundary appears to be approximately an east and west line and, from information obtained from prospectors, the western boundary probably follows the valleys of the Naas and the main fork of the Klappan River. The shape of the field, therefore, approximates a parallelogram and its area is about 900 square miles. It is to be noted, however, that over large areas all the coal seams have been removed by erosion and that in other areas only a very small fraction of the total number of seams has been preserved. The nearest corners of the parallelogram lie 80 miles northeast of Stewart and 100 miles a little west and north of Hazelton. Groundhog field was first discovered by prospectors who went to the Klondyke in 1898 by way of Hazelton, the Skeena, the Klappan and Telegraph Creek. The first recorded discovery, however, was made in 1903 by James McEvoy who found coal float where the main trail crosses Discovery Creek and finally located a six-foot seam two miles higher up the creek. His time was limited but

done by prospectors and on the properties of the Western Development Co. and the British Columbia Anthracite Syndicate large parties were at work opening up all the seams which they were able to find. During the winter of 1911-12 a party under direction of F. B. Chettleburgh was continually at work digging out seams and erecting cabins. The total number of claims on record in the field in 1912 amounted to over 460.

The 1931 statement of the George Gold-Copper Mining Co. Ltd. states that no work was done during 1931. The balance sheet shows that the Consolidated Mining & Smelting Co. advanced \$762 in 1931 bringing the total advance to \$32,757.05. The mining property is shown at cost of \$784,904 with total development of \$66,677. Total assets are placed at \$1,582,782.

Norman Fraser and O. Lofthus of Prince Rupert arrived at Alice Arm last week to resume development work on the mining property there of the Esperanza Mines Ltd. Mr. Fraser was formerly in charge of operations at the Esperanza and Mr. Lofthus is an old employee of the company.

## KETCHIKAN MAY COME

Negotiations Have Been Opened For Series of Baseball Games This Season

The executive of the Prince Rupert Baseball Association, at a meeting last night, decided that it was impossible to accept a proposal from Ketchikan that a ball team from the Alaska city come here for a series of games during the week between May 21 and 28. An alternative proposal, however, is being made to Ketchikan that a series take place here in connection with the Dominion Day celebration on July 1, the locals to go to Ketchikan for a series in connection with the Independence Day celebration there on July 4. Ketchikan requires a guarantee of \$300 to come here and is offering a similar guarantee for a return series by Prince Rupert there.

The Intermediate League situation was considered and it was decided that games in this league should be played on Sunday afternoons until the close of the school term after which there will be games on Wednesdays and Sundays.

Ald. G. W. Rudderham, president of the association, presided over the meeting.

## The Road To Progress

Prince Rupert will make progress if the people build up the hinterland. This week they have the opportunity to help themselves by helping the Bulkley Valley farmers. Bulkley Valley Baby Beef is going on the market tonight or tomorrow. It is the choicest shipment ever made to the city and no one can make a mistake in purchasing it.

The carload arrived at the week-end and is now ready for distribution. All the butchers in the city are carrying some of it.

Progress comes through co-operation. Today we have an opportunity to show that we are ready to co-operate with the farmers of the interior by specifying their beef when telephoning our orders. It is a simple matter but it means a great deal to the farmers.

There is no reason why British Columbia people should be fed on Alberta products when they have good things of their own produced right within their own boundaries. We have the friendliest feelings toward our sister province, but if we cannot use our own product we cannot expect others to use it. If it is good enough for export it should be good enough to use at home. By buying at home we encourage our own people, making them so prosperous that they are able to buy from us. The dollar spent on Bulkley Beef is likely to return but the dollar expended on Alberta beef is likely to remain on the other side of the Rocky Mountains. The motto then should be:

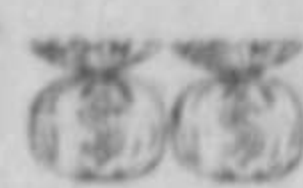

BUY BULKLEY BEEF AND THUS BUILD UP BULKLEY VALLEY FARMS

## Guide to Correspondents

The Daily News welcomes correspondence on live topics of the day or any other subject of public interest, but letters must be brief and to the point. The long-winded correspondent has no place in modern journalism.  
Every letter must be signed by the writer, not necessarily for publication but as a matter of good faith and courtesy. All unsigned documents go to the waste paper basket. Letters of a caustic character must have the signature appended for publication.  
Letter should be written on one side of the paper only. Correspondents must avoid personalities and the language should be such as would be allowed in the ordinary rules of debate.

## DRESS UP TILLIE THE TOILER

**FOLD BACK ON DOTTED LINE**  
**Keep Tillie On Her Toes**  
Tillie will stand up if you paste her on cardboard before cutting out the figure. To keep it from curling, paste another piece of paper on the back of the cardboard. When it has dried, cut out close to black lines and bend back the base. Then you can dress her in her new clothes.

**TILLIE THE TOILER** stepped out of the comic page a few days ago long enough to get herself a complete new outfit of clothes. Two dresses, a coat, three hats, a nifty little jacket and a pair of lounging pajamas were the things she brought home from the stores—and in the next few days she'll show you all of them in this cutout series, so you can try them on her.  
Of course, if you want to see them just as they look on her, you'll have to color them with crayons or water colors. The figure of Tillie should also be colored. See if you can remember the fashionable new shades used in the dresses you've seen in the stores this Spring, and color Tillie's dresses to look like them.  
Watch for her new evening dress and pajamas tomorrow.
