DAILY EDITION.

TUESDAY, JUNE 6

THE GRAND TRUNK ASSESSMENT

Owing to the near approach of the time when the citizens will be called upon to vote on the above question to bind the city to an agreement covering a long period of years, and owing also to the evident reluctance shown in certain quarters to discuss the question with the citizens, the Daily News will print a series of editorial articles dealing with the various aspects of the question.

In so doing, there is no desire to sway the minds of the electors either for or against the proposed settlement. The aim will be to state the case fairly, without prejudice, without exaggeration, and without rhetorical appeal, letting the issues be clearly seen, and allowing the facts to make their own appeal to the individual mind. Our chief concern is not which way the electors will vote, but that the electors may know what it is they are voting for or against.

Article No. 6.-How the Proposed Agreement Affects the Waterfront and Trade Development of the City.

In the last article it was shown that the proposed agreement This is a matter for the Medical to grant a fixed assessment to the Grand Trunk Pacific, whereby Health Officer who is to look it will pay \$15,000 a year for ten years, means a reduction in the city's into it, or nose around about it. power to borrow capital for civic enterprises by over \$1,250,000 at the lowest computation, and that this in turn will preclude the city from carrying out several needed civic enterprises.

But this, the first by-product of the agreement, would not prove so severe a handicap to the city's development as some of the less piling for city purposes has apobvious effects, notably the effect on the water-frontage.

Arising out of the fact emphasized in previous articles that Prince Rupert was chosen by the railway company, for the railway company, the water-frontage was safely disposed of to the railway company before the townsite was put on the market. The consequence is that Prince Rupert is an island within an island. With commercially impassible mountains behind us, and the whole of the water-frontage divided between the railway company and the Provincial Government, Prince Rupert so far as commerce is concerned, is as effectually barricaded from free commerce with the world as if walls a hundred feet high were built round it. No vessel can bring commodities or raw materials to the city, without paying tribute to the Grand Trunk Pacific. Upon all we eat and wear, on the building materials of which our homes are constructed, even to the paper and ink with which the newspaper now in your hands is produced, tribute in the form of wharfage dues are levied by the railway company.

True there was a Government wharf started by the Provincial Government over two years ago, but the "progress" made on it, and the repeated official promises which are never fulfilled, have raised a suspicion in the minds of many that the work on the Provincial Government wharf is being intentionally delayed for a purpose.

The amount of tribute levied on a sheet of paper and a bottle of ink is infinitesimal. It does not affect the selling price of the Daily News. But the amount of tribute which would be levied for wharfage charges if a smelter, or a sugar refinery, or a flour or saw mill were to locate on First avenue, would make it impossible for the venture to pay. It is imperative that all the heavy industries and large manufacturing plants which propose locating in the city, should be situated on the water-front. Then not only would an economy be effected in the cost of bringing in raw material, and of exporting the finished products, but the whole of the Dominion would by means of the completed railway line be brought to the back door of the factory. That is the economic value of the water-frontage—the value which it possesses over ordinary town-lot sites for easy and cheap transportation of raw and finished materials. The water-frontage is the only place in the city where heavy manufactures can profitably be located. It is that which gives it extraordinary value.

Because the city is interested in seeing permanent manufacturing industries locate here, giving employment to thousands, and because the water-frontage is the only place upon which industries can profitably locate, it follows that the city is deeply interested in the development of the waterfront.

The esteem in which the waterfrontage is held by the railway company is seen by the fact that it is not for sale at any price. It is not even to be had on lease, save for short terms. Leases for a period of more than twenty years will not be considered. Yet it is on this leased the lease than twenty years will not be considered. Yet it is on this of more than twenty years will not be considered. Yet it is on this pricelessly valuable property which the railway company is asking for a reduction of assessment, not for one year only, or until such time as the line is linked up, but for ten years.

If the ten year agreement should be agreed to, how would that affect the waterfront development?

One of the consequences of taxing idle lands equally with those which are being used for development, is to make it hard for the speculator who keeps his lands idle, to reap huge profits at the expense of the men who improve their properties.

That is the principle of the single tax theory, the theory upon which , taxation in Prince Rupert was based last year, and the principle on which the city council proposes to tax all of us this year-with the exception of the Grand Trunk Pacific.

Why a principle, supposed to be productive of good among a lot of small owners who own from one to ten lots apiece in the town, should be waived on behalf of the greatest owner of all,—the owner of all of the available water-frontage, has not yet been shown. If the city has an interest in making it difficult for individual owners, whose properties can be duplicated, from holding back development until the rest of the citizens have increased the value of idle property, how much more necessary it is to see that the monopolistic owner of the water-frontage—the only place where industries can be profitably located—is not allowed to evade his equitable share of taxation, during the period he is holding his lands from development.

This is a matter upon which the city's interest is so important as to deserve the whole of an ensuing art cle.

THE COSY CORNER =

DEVOTED PRINCIPALLY TO THE INTERESTS OF WOMEN

This is a little section of the paper, which from day to day will be devoted to subjects of special interest to women. Any and all of the ladies of Prince Rupert are invited to contribute to its columns, and to take part in its discussions. Suggestions and criticisms are invited by the editor. The hope is expressed that "The Cosy Corner" will fill a social need.

gowns made for spring weddings hours. Harbor, Graham Island, thence 80 chains south, use lace profusely. One that thence 80 chains west, thence 80 chains north, thence 80 chains east to point of commencement and containing 640 acres more orless.

Dated March 17, 1911 GEORGE FRIZZELL had a skirt foundation of old POLISHING gold stain over which was a skirt of ecru Russian lace. One of the best services the modern newspaper gives the public is in the classified advertisement columns. There buyer and seller, employer and worker, landlord and tenant, and a host of others meet on common ground. To put this modern convenience in reach of everyone the News will reduce its rate to a nominal price of a cent a word per insertion. Minimum charge of 25 cents.

Here is our Classified Advertising Column for today. Watch it grow.
